 † Absent on leave first semester.

THE PRESIDENT'S ANNUAL REPORT

To the Trustees of Alfred University:

The President has the honor to submit his report for the year ending June, 1942, being his ninth annual summary, although his first included the months of the presidency of the late Dr. Paul E. Titsworth. The present report is for the one hundred and sixth year of the University and its eighty-fifth under the present charter.

Necrology

President Emeritus Boothe Colwell Davis

1863 - 1942

President Emeritus Boothe Colwell Davis passed away at his home in Holly Hill, Florida, January 16, 1942. The funeral and burial took place in Alfred, January 20. As an educator, clergyman, patriotic citizen, and consistent Christian gentleman he was outstanding. In all these relationships he made a remarkable contribution to his time and country.

He was born July 12, 1863, in Jane Lew, West Virginia, received his education at Alfred Academy and Alfred University, earning the A.B. degree in 1890. He received the B.D degree from Yale University Divinity School in 1893, and was the recipient of the following honorary degrees: Doctor of Divinity, 1901, from Alfred University, and Doctor of Laws, 1926, from Temple University.

Doctor Davis was ordained a minister of the Seventh Day Baptist church in 1892 and served as pastor of the First Alfred Church from 1893 to 1895 when he was elected President of Alfred University remaining in that position to 1933. He was also President of the New York State College of Ceramics at Alfred University established in 1900, and President of the Board of Visitors of the New York State School of Agriculture established in 1908, a trustee of Alfred University from 1895 to 1933, and honorary trustee from the time of his retirement until his death.

Boothe Colwell Davis was the builder of the new Alfred. In the changes that took place during his administration of thirty-eight years, half of the corporate life of the institution, he was the inspirer, the guiding genius, the undaunted leader. In the years of his presidency some 5,500 young men and women had entered Alfred. From the time he took office to the date of his retirement, 1895-1933, a comparison of certain facts and figures shows in a more material sense his contribution. The campus was enlarged from 16 acres to 100 acres; endow-

merit funds increased from \$250,000 to \$980,000; faculty enlarged from 17 to 60; student body increased from 65 to 559 (exclusive of the School of Agriculture); necessary increase in annual expense from \$24,000 to \$460,000; number of college buildings increased from 7 to 21. During the same period the New York State College of Ceramics and the New York State School of Agriculture were added, and the College of Liberal Arts was accredited by the Association of American Universities and the Middle States Association; 1930 marked the completion of the subscription of a million-dollar fund for Alfred University under his guidance.

Appropriate resolutions of appreciation of his life and service passed by the Executive Committee of the Board of Trustees of Alfred University read in part as follows: "He accepted its presidency when the outlook for the school was decidedly gloomy. For thirty-eight fruitful years he brilliantly led in raising the University from that early, dubious condition to its present situation as a well-established institution of higher learning. By these successes he won the unending admiration, esteem, love, and gratitude of all its friends. Laying carefully his far-visions plans, he got the assistance of influential men and women of means, gained the confidence and goodwill of the State authorities, and secured the two State schools, expanded the plant, enlarged the faculty, modernized and diversified the curriculum, attracted students, and raised academic standards thus gaining full recognition by all the accrediting authorities having jurisdiction.

"During his retirement he was ever ready when asked by his successors for information or advice to place at their disposal his rich resources of wisdom and knowledge. His death marks the end of an epoch in Alfred's story."

Chauncey Loomis Allen

1870 - 1941

Chauncey Loomis Allen, a member of the Board of Trustees since 1909 passed away at his home in Alfred, September 7, 1941. Born in Syracuse, New York, January 16, 1870, he obtained his education in the public schools of Syracuse and Cicero, and at Alfred University and Syracuse University. His Alfred years were 1886 to 1889. He became a recognized and nationally known leader in the field of electric railway engineering, management and financing. While his chief activities in this profession centered around Syracuse, Utica, and Oneida, New York, he was engaged at various times in similar work in Ohio, Maryland and Connecticut. He was a past president of the American Electric Railway Association, and the New York State Railway Associ-

ation. He was a member of the American Society of Civil Engineers. Mr. Allen was active in various civic and fraternal organizations, and because of his keen interest in historical reading and study became somewhat of an authority on certain phases of the American Civil War, 1861-65. Since 1932 when he retired from business. Loomis, as he was familiarly called, has lived in Alfred serving the University as trustee. Finance Committee chairman, plant manager and student aid committee head. In all of these services he has devoted himself loyally to the interests of his Alma Mater. Alfred conferred on him the honorary degree of Master of Science in 1905, and both Alfred and Syracuse honored him with the degree of Doctor of Science in 1916.

*Curtis Fitz Randolph **

1873 - 1940

Curtis Fitz Randolph. Treasurer of Alfred University from 1911 through 1939, and trustee for nearly twenty-six years, was born January 10, 1873 at Greenbrier, West Virginia. He received his education in the public schools of West Virginia; Hopkinton, Rhode Island; the Eastman Business College, Poughkeepsie, New York, and Alfred University. He began his career as an accountant in 1896 in Westerly, Rhode Island, coming to Alfred in 1911 as Treasurer of the University and of the New York State College of Ceramics and the New York State School of Agriculture. During most of the time he was also business manager of the University, and was known in these capacities by scores of students as well as by his associates and faculty. In 1935 the *Kanakaclea*, the student yearbook, was dedicated to him with these words of appreciation: "To Curtis F. Randolph, one whose stalwart presence is indispensable to the foundations of Alfred University, in whom we find a sage and silent guide—a friend." In 1936 he was given the Alumni Citation, an award presented on occasion by the Alumni Association of Alfred University to one of its members who has definitely contributed in some noteworthy way to the University. At the 1939 Commencement the earned degree of Master of Business Administration was conferred on him by Alfred University. He had been a member for a term of three years of the Board of Trustees of the Village of Alfred, was for three years a member of the Seventh Day Baptist Commission of the General Conference, was a member of the First Alfred Church and Treasurer for seven years, a Past Noble Grand of Alfred Lodge 362, I. O. O. F., was a director of the University Bank and had been Vice President since 1929. Mr. Randolph was made Treasurer Emeritus of the University upon his retirement December 31, 1939.

* PUBLISHED IN (HIS YEARBOOK INSTEAD OF 1940-41.

COLLEGE OF LIBERAL ARTS

The College of Liberal Arts has enjoyed, academically speaking, a nearly normal year. A certain amount of unrest on the part of both students and faculty members, due to the war situation, prevented quite as good academic results as usual. There has been made a careful study, **by** the faculty Committee on Curriculum, of entrance requirements and possible curricular changes. The broadening of the high school program and the tendency on the part of such schools to pay less attention to college entrance requirements have made this study desirable. Changes in entrance requirements have been adopted by the faculty with a view to meeting more adequately this situation. There have been other fruitful discussions in the faculty meetings dealing with the problem of maintaining enrollment and the problem of campus democracy.

The five-year program of teacher training has been under consideration during the year. Apparently the State is making some changes in its original regulations about the fifth year. It is considered that Alfred University will be able to meet any requirements the State authorities are likely to set up. A Faculty Workshop is to be organized again this year in Albany, like the one in Syracuse last year under the auspices of the Committee on Teacher Education of the Association of Colleges and Universities of New York State. One member of our faculty will be present at this Workshop, which continues through the month of June.

The Dean has spent much time advising students about the draft, and corresponding for them with draft boards. Thirty-one cases were dealt with, **tAventy**-three of which were deferred. The Department of Business and Secretarial Studies is fully justifying itself. It has a large group of majors and finds good outlets for its graduates. An unusual number of this year's seniors in both colleges is going into graduate study.

SCHOOL OF THEOLOGY

This School has enjoyed its usual successful year. Its entire set-up, organization, courses, personnel, and relations with the denomination are to be studied **by** a denominational committee. This committee will report the results to the General Conference **in** August. The Conference of Seventh Day Baptist Ministers, held annually very successfully the last few years at the School of Theology **in** June, will be repeated this year. The students of the school have had this year good opportunities to attend conferences, as at Princeton and Rochester. They have had opportunities to preach, one, in fact, having had a regular appointment. A Teacher Training Conference was held

with Bible School workers from this area in attendance. The special lecturer for this year was Rev. Lester G. Osborn of Shiloh, New Jersey.

College of Ceramics

The College of Ceramics fared well at the hands of the Legislature this winter on its budget requests. A bill has become law providing a salary scale for the members of the faculty of the College. This law does for the College of Ceramics what a similar law passed last winter did for the Agricultural and Technical Institute. The scale of salaries assures both schools the retention of adequately trained faculty men and women for their work.

All students who wished deferment on the draft were deferred. The Dean acted effectively as adviser for them. The Ceramic Industries Association of the State published a bulletin describing the research facilities available at the College. The Ceramic Experiment Station, a department of the College, published an extensive bulletin (No. 2) on borax in salt glazing—a very important scientific contribution. At the recent meeting of the American Ceramic Society the Dean was elected Vice President of the Society; Professor H. G. Schurecht of the Experiment Station was elected Secretary by the Division of the Institute of Ceramic Engineers; and Assistant Professor John F. McMahon was appointed chairman of the Division of Materials and Equipment. Alfred men figured very prominently at the convention.

Agricultural and Technical Institute

This School has had another boom year with its regular work and extra defense courses. Men and women to the number of 698 have taken this defense work this year mostly off campus. During the past two years nearly 2,000 individuals have taken work regular or special offered by the Institute. The Civilian Pilot Training program is to be extended with the likelihood that the Army may send in some men to take it. This work is done jointly by the Institute and the College of Liberal Arts as are certain other offerings for the training of radio technicians.

The NYA Resident Centers here were closed in February, although a few of the girls remained to finish the year. All their work was in the Institute. Marked improvements in various buildings have been effected through the WPA. It is now planned to build a large shop building of concrete and glass north of the present main building. This is a revival of the project broached last year when the Trustees voted to give the land. It will be 200 feet by 40 feet, and will ultimately become part of the permanent building to be provided later. New equipment worth \$100,000 has been received.

The school terms or semesters have been drastically telescoped which brought the Institute's Commencement early in April. Dr. Arthur W. Schmidt, Associate Commissioner for Finance, gave the address, and 123 seniors graduated. Five additional instructors will be employed next year.

Summer Schools

1941

The enrollment last summer was a little below the previous year. Graduates working toward master's degrees and those specializing in pottery and crafts were the largest interest groups enrolled.

Enrollment

College of Liberal Arts	254
College of Ceramics	313
School of Theology	7
Summer Schools:	
Intersession	11
Surveying	74
Regular session	162
	247
Less duplicates	9
Department of Music (net)	11
Jamestown Extension	94
Regular Extension	58
Agricultural and Technical Institute:	
Regular students	316
Defense courses	698
1014	
Grand Total	1989
Less duplicates	110
Net Total of Different Individuals	1879
Less Non-residents	850
Net Total of Resident Students	1029

The total number of different students in attendance on the campus during the regular school year was 1029. The total of students studying under the auspices of Alfred University in its broadest interpretation, including summer schools, the Jamestown Extension, etc., but omitting all duplicates, was 1879.

University Faculty Changes

1941-42

Liberal Arts

Professor Eva L. Ford was on leave of absence during the year. Dr. Katherine A. Clarke was appointed Assistant Professor of Romance Languages as substitute for Professor Ford.

Dr. Ellsworth Barnard was appointed Associate Professor of English and Chairman of the English Department, as successor to Professor Beulah N. Ellis, retired.

Dr. Roland L. Warren was appointed Associate Professor of Sociology and Philosophy, and Chairman of the Department of Sociology, Philosophy and Psychology, as successor to Dr. Artie E. McGuire.

Mrs. Consuelo de Zavala Guy was appointed Instructor in Romance Languages, as substitute for Miss Marie Cheval, still unable to leave France.

Dr. Marjorie Hunsinger was appointed Instructor in Business and Secretarial Studies in January on resignation of Miss Augusta O'Neal who succeeded Miss Agnes M. Pearson, resigned.

Mr. John Reed Spicer, Assistant Professor of English, absent on leave the first semester, returned to the campus in February.

Mr. David W. Weaver, Assistant Professor of Chemistry, absent on leave 1940-41, returned to his position last fall.

Mrs. Hannah Shaw Burdick, who had served for two years as part-time Instructor in English very successfully, ended her services.

Dr. Everett E. Lund was promoted to the rank of Associate Professor of Biology.

Coach Alex J. Yunevich was promoted to the rank of Assistant; Professor of Physical Education and Athletics,

Miss Lavinia E. Creighton was promoted to the rank of Assistant; Professor of Physical Education for Women.

Mr. Daniel Minnick, Instructor* in Physical Education and Athletics, was made Director of Intramural Sports.

Mr. Olin L. Johnson, Special Assistant in Music and Mr. Irvin F. Weiss, Graduate Assistant in Chemistry, resigned during the year. Mr. L. Eugene Reynolds succeeded Mr. Weiss.

Ceramics

Dr. Tobias H. Dunkelberger was appointed Assistant Professor of Chemistry in place of Dr. Harold C. Harrison, resigned.

Dr. Willard J. Sutton was appointed Assistant Professor of Ceramic Engineering in place of Mr. Robert L. Stone, resigned.

Mr. Wayne E. Brownell, Junior Research Assistant, resigned during the year; his place has not yet been filled.

Mr. Van Derek Frechette was appointed Graduate Instructor in the Department of General Ceramic Engineering.

Mr. T. S. Haile was appointed Graduate Instructor in the Department of Industrial Ceramic Design.

Mr. John G. Mohr, who last year was Glass Blower and Stockroom Manager, was appointed Graduate Instructor in the Department of Glass Technology.

SUMMER SCHOOL

Dr. M. Ellis Drake was appointed Director of the Summer School, successor to Dr. Waldo A. Titsworth, who remains as Registrar.

JAMESTOWN EXTENSION

Dr. Oran M. Knudsen was appointed Director of the Extension as successor to Dr. John H. Melzer. On Dr. Knudsen's resignation in April, Mr. Clinton S. Wainscott was selected to do his class work and Miss Ruth Hunt was appointed Acting Director.

Mr. A. James Coe was appointed Assistant Professor of History and Political Science as successor to Dr. Roy F. Howes, resigned.

Dr. Hilda M. Fife was appointed Assistant Professor of English as successor to Miss Edna M. Perry, resigned.

OTHER CHANGES IN PERSONNEL

Mrs. Ellen H. Sutton, M. D., was appointed Assistant Physician in the Clawson Infirmary.

Mrs. Alice C. McDermott was appointed Acting Superintendent of the Clawson Infirmary as successor to Lydia Conover, resigned; and Arlene I. King, and Josephine E. Tucker were appointed Resident Nurses.

Mr. Burton B. Crandall was appointed Acting Plant Manager.

Mr. George A. Bunnell was appointed Manager of Dormitories and Dining Halls, and Secretary of the Student Aid Committee.

Mr. Ward C. Tooke, Chief Engineer, was appointed Assistant Plant Manager.

Mr. Harry C. Greene, for thirty-one years Superintendent of Buildings and Grounds, retired December 31.

Mrs. Edith S. Beyea completed the year as Assistant Curator of the Steinheim following the serious illness of Mrs. Flora S. Groves.

Miss Katharine Titsworth discontinued her part-time assistant work in the Registrar's office and took similar work with Dr. M. Ellis Drake, Dean of Men and Director of the Summer School.

Student Aid

Financial aid of different sorts has been paid to students in the following amounts:

	Students	Amounts
Scholarships	79	\$ 9,647.61
Loans (cash, etc.)	7	620.50
Cash and Credit Grants	87	14,094.38
Work (maintenance)	62	7,767.00
Departmental Assistants	18	837.09
NYA	86	6,045.10

Total \$39,011.68

The original allotment to Alfred University by the NYA authorities was \$5,805.00. Increases amounting to \$2,020.55 and a reduction of \$1,655.00 made available a total of \$6,170.55 for the year. The average number working at any one time was 56; the average earnings per student \$107.96. Twenty-four departments and offices of the University were helped.

Gifts

Gifts from over four hundred loyal alumni, trustees, faculty, and friends total approximately \$24,000 for the first eleven months of this year. The greater portion is for specific purposes. Included is a gift of \$1,000, an addition to the Dr. John Champlin Scholarship; a \$1,000 addition to the Tullar Scholarships; a sum of money given by the employees of the Bradley companies for the purchase of books for the University Library in memory of the late Justin B. Bradley; \$1,500 from trustee, Susan Howell Ames for the maintenance of Social Hall and for other purposes; and nearly \$8,000 from trustee, John P. Herrick, to be added to the scholarships previously established by him. The sum of \$500 has been paid in by Professor Norman Whitney and his sister, Miss Mildred Whitney, to complete the Margaret Baker Fuller Scholarship. This is completed at an opportune time as Mrs. Fuller was a very close friend of Dr. and Mrs. Davis. Our sincere thanks go to all our alumni and friends for these and other gifts. We bespeak a continuance of their generosity in these difficult times. Good use can be made of more. Indeed, it is quite imperative that more be forthcoming.

Campus Life

The disciplinary problems on the campus have been at a minimum during the year. The plays put on by the Department of Dramatics, the winter Forum of lectures and entertainments, the weekly As-

sembly programs have all been of a high order. The annual Human Relations Conference was omitted this year, partly on account of the financial stress. Social life has been somewhat curtailed and the savings effected put into war bonds for scholarship aid to Alfred men who return to college after their service in the armed forces. French Week, a language festival, Moving-Up Day, a high school senior day, and the St. Pat's Festival were celebrated in an interesting and effective way.

More women have been enrolled this year than last, filling The Brick to capacity. Greene Hall, the cooperative house, has been a success during this, its second year, and the Woman's Student Government has been active.

ALFRED'S WAR EFFORT

As in past wars Alfred University has joined patriotically in the Nation's war effort. It includes an accelerated second semester this year, a radically revised calendar for 1942-43, which calls for three equal terms of at least fifteen weeks each and a separate, lengthened summer session both this year and next. While the regular offerings in Liberal Arts and Ceramics continue, the physical education requirements have been increased, alternative electives with more definite war objectives permitted in Liberal Arts, home nursing and first-aid courses have been encouraged, the Red Cross giving urged successfully, blood bank donations made extensively on two occasions, and books and magazines for the armed forces contributed. Alfred University designated as one of 140 National Key Centers for promoting civilian morale, has been very active in this endeavor under the leadership of a faculty member. The Civilian Pilot Training Course has been successfully offered. The Technical Institute has gone "all out" in defense offerings.

Students have been kept advised as to opportunities in the armed services. The Navy has planned openings for college men in the Marines as deck officers, engineers, and other specialties, and as naval aviation officers. The Army has more recently made similar bids for college men. In all these cases the student is placed in services with chance to finish two college years at least and in many cases complete the four-year course. Frequent visits of recruiting officers for the different armed services have been made to the campus. In some cases they have given physical and medical examinations and a number of students took advantage of the opportunities offered for enlistment. These war-aimed activities have been unified in a University Committee on National Defense of which the President is chairman. Weekly meetings have been held and all phases of the effort supervised. A representative of the local Civilian Defense or-

ganization sits with this Committee. A trial black-out was successfully practiced one night recently. In all this war work, however, we do not lose sight of our duty to educate for the post-victory future.

Various Items

Library. In addition to its normal functions the Library has collected appropriate information for the Key Center for promoting civilian morale.

Sports. In varsity football Alfred won four games, lost two and tied one. In basketball we won seven and lost ten. Trustee John J. Merrill has interested himself greatly as usual in our sports. He purchased land to widen the approach to Merrill Field and is working on plans for other improvements. The women are enjoying their gymnasium in South Hall.

Religious Life. The religious program under the Chaplain's leadership has had a successful year. The combining of the Christian Associations into the Alfred Christian Fellowship has worked well. The Brent Fellowship (Episcopalian) has been unusually active. It mourns the sudden death of Dr. John G. Spencer of Christ Episcopal Church in Hornell, who fostered the work here. The new Rabbi in Hornell is also taking an interest in his young people up here. The Chaplain has been active as a speaker at other colleges and in various conferences and conventions.

Infirmary. All the older complaints against the Infirmary seem to have vanished. It has had a splendid year.

Publicity. The Publicity Department has 800 clippings from six daily papers as well as many from other papers to show for its work. A colored movie has been prepared and new picture post cards printed and placed on sale.

Teacher Placemeyit. Seniors desiring to teach are finding good openings and higher salaries.

Jamestown Extension. A campaign in the city for funds to guarantee the Extension's existence for three years has met with good success. The \$14,000 desired are in fair way to be obtained. Sixteen young people from the Extension are this year students on the campus. Twelve of them will graduate on June 1. They are of unusually high calibre.

Class of 1946. The office of the Counselor to Prospective Students is making a strenuous effort to secure a class of desirable size and quality for next fall. Liberal Arts prospects seem normal just now, but Ceramic applications are below normal. The Counselor has visited eighty high schools this spring.

South Hall Heating Plant. Efforts will be made to keep this plant

operating without much unusual expense, in spite of its precarious condition.

Alfred Coffee Shop. The operation of this necessary facility has fallen temporarily on the University which as it happens owns the building. We should continue to operate it.

Finance

A rough picture of our financial situation as it will be at the end of the fiscal year is as follows: The President and the Treasurer fulfilled their promise to the trustees to save \$15,000 this year as against the expenditures of the previous year. Indeed, they did better, they saved \$18,000. Unfortunately, this was more than neutralized by the defense and war efforts which drastically reduced our revenue. Thus the deficit for the year is or will be some \$28,000. This is after disregarding the \$6,000 spent in advance for next year's coal and other supplies. Our gross, accumulated deficit in the operating budget seems to be about \$35,000. The President and the Treasurer have estimated roughly that a saving of about \$20,000 can be made for next year as against this year.

Conclusion

It has been an anxious and trying year and doubtless more are coming. But we must keep up our courage.

With deep appreciation again of the cordial cooperation of trustees, faculty members, office workers, students, alumni and friends, this report for Alfred's one hundred and sixth year as an educational institution and its eighty-fifth under the present charter is placed before you.

J. NELSON NORWOOD,

Alfred, New York
June 1, 1942

President

REPORTS OF OTHER ADMINISTRATIVE OFFICERS OF THE UNIVERSITY

*On Topics not Covered or Only Partially Covered in the
President's Report*

REPORT OF THE DEAN, COLLEGE OF LIBERAL ARTS

(Excerpts)

My time in administrative work as dean has been largely taken up by usual routine duties, many of which have been described in some detail in previous reports. These duties have included the supervision of the counseling system of freshmen and sophomores in

both colleges, the publication of the new catalogue, and the selection of the major fields of study of juniors and seniors.

In order to do what we could to prepare our students for the immediate war effort, certain so-called defense courses, twelve in number, were announced in January. Students could take these in the second semester for credit either as electives or in some cases as substitutes for requirements in a field of specialization. These courses included world politics, business English, typewriting and stenography, public speaking, drafting, wood and metal shop, ground courses in aviation, and radio.

It was my privilege to represent you, Mr. President, and Alfred University at the annual meeting of the Association of American Colleges and a specially called National Conference on Higher Education and the War, held in Baltimore, January 2, 3 and 4. At these meetings the entire discussion was devoted to ways and means by which the higher education institutions of the nation could make the largest and most effective contribution to the war effort.

In conformity with the announced plans of many other institutions in telescoping courses and utilizing summer terms so that students may finish their courses as early as possible, the College of Liberal Arts is offering an option to students to finish the four-year course in three years.

Fifty-seven members of the senior class this year expect to receive their degrees on June 1. These are completing majors in nine different departments, as follows: Biology 4, Business and Secretarial Studies 10, Chemistry 4, Economics 6, English 8, History and Political Science 8, Mathematics 8, Romance Languages 4, and Sociology and Philosophy 5. These figures indicate a fairly even distribution among the departments but the steady growth of the Department of Business and Secretarial Studies with 10 majors, the largest of all, is worthy of note.

During the year considerable study of changes in our admission and curriculum requirements has been made by members of the faculty, individually and collectively. Two very interesting faculty meetings were held to discuss the questions of how to make our courses more vital and attractive and of how to interest a larger number of young people in entering Alfred University. One study has taken definite form. The Committee on Curriculum recently recommended to the Faculty a revision of our admission requirements and it was adopted by the Faculty as presented. These new admission requirements go into effect immediately. Under their terms high-school graduates will be admitted with four years of English and twelve other unspecified units. Admission will be based more on general scholarship and rank in the secondary school than on a particular pattern of studies which the applicant may offer for entrance.

With these somewhat liberalized requirements it is expected that the College will attract students having perhaps more divergent preparation than usual, but possessing clear ability to do successful college work.

The Committee on Publications, of which I am chairman, had a conference recently with representatives of the *Fiat Lux* staff, and voted its approval of certain desirable changes in the constitution of that organization. The changes provide for an editor-in-chief, who is responsible for all departments of the paper, and two departmental assistants to be called managing editor and business manager. Thus the entire direction of the paper is in the hands of a compact managing group and should produce an even better publication. It is a matter of satisfaction that *Fiat Lux* has during the year maintained its usual standard of excellence.

The enrollment this year in the Alfred University Extension at Jamestown was disappointing. The total number registered during the year is 94 as compared with 108 last year. Of this number 28 are freshmen, 12 sophomores, and 54 special or part-time students. The loss of income because of the smaller registration than was expected put the enterprise in the red to the amount of about \$1300. Approximately \$1000 was available for this year's expense from the solicitation of funds in Jamestown in May, 1941, conducted by the Citizens' Committee. However, this was not enough to balance this year's accounts. The future of the Extension has therefore looked pretty dark. It seemed as if the enterprise was not sufficiently understood and appreciated by the people of Jamestown to warrant its continuance. Furthermore, the State Education Department has been about ready to withdraw its approval of the project. But the Citizens' Committee has persisted in seeking support for the Extension program at least for another year and the State Education Department has approved of the effort.

Now the prospects for next year are much more favorable. A larger number of young people have indicated their interest in becoming students. A financial campaign put on in April to raise funds for the support of the Extension over a three-year period has resulted in definite pledges of nearly \$8,000 with other good promises that will make fairly sure a fund of \$12,000. This is definitely encouraging. Plans are going forward for the maintenance of the Extension next year along about the same lines as were followed during this year.

REPORT OF THE DEAN OF THE NEW YORK STATE
COLLEGE OF CERAMICS

(Excerpts)

During the past year the Ceramic College has made substantial progress in some respects, but in other respects it has suffered a loss in efficiency. I believe the net result is a small improvement in the general proficiency of the College. Certainly we have prevented deteriorating influences from having a serious effect on the College. In accomplishing this result most of the members of the faculty and employees of the institution have participated. Especially noteworthy have been the services of the Professor of Ceramic Engineering and the Professor of Research. The Ceramic College has also been benefited in one way and another by the interest and action of the following persons who are not employed by the College: G. S. Diamond, William H. McKenzie, Abbot Low Moffat, J. K. Meneely, G. A. Bole, S. F. Walton, H. F. Kichline, Benjamin Crump, R. L. Stone, J. J. Porter, R. A. Weaver, James McLeod, R. O. Sosman, L. J. Trostel, Ralph Denton, J. H. Miller, G. J. Easter, L. A. Wilson, G. V. D. Hutton, H. R. Straight, Robert Sherwood, Walter Merck, Frederick Muller, Ross Purdy, Clarence Austin, Joseph Kruson, J. D. Sullivan and J. T. Robson. The members of the Board of Managers also have individually made contributions to the welfare of the College that are of great importance.

ENROLLMENT OF STUDENTS

The enrollment of 313 is all that we can take care of and we undertake to keep the enrollment at that figure. However, the war has already begun to have its effect. During the year 32 students dropped out of the College. Many of them went into war work of one kind and another. Next year we expect many more to do the same thing. The effect of the war, therefore, has been to reduce the number of students now on the campus about 10%, and I believe it is destined to reduce the enrollment next year by a much larger figure. We may be able to admit the same number of freshmen, but we cannot control the number that return to the sophomore, junior and senior classes. Neither may we have as many applicants as formerly for the freshmen classes. That would result in lowering our standards.

MISCELLANEOUS CERAMIC COLLEGE PROJECTS

The numerous Ceramic College projects which were initiated several years ago for the purpose of building up morale and lifting the work of the College above the ordinary level of effectiveness have, with few exceptions, gone forward in a normally effective manner and in some cases improvement has been attained. The work dealing with

the personality traits of students has fall-en completely by the wayside. The Ceramic Christmas Festival of the Art Department was revived after a lapse of one year and was one of the most successful we have ever had. The Ceramic Guild in one afternoon sold over \$500 worth of ware the members had made. This money was used in part to finance lectures by distinguished artists. Benefit to students also accrued from their experience in making the ware. The Beaux-Arts Ball that was held' in connection with the festival was not up to the previous standards of interest and attendance. We may have to abandon the ball or substitute something else for it.

Due to obstruction and interference the St. Patrick celebration was inferior to previous ones. In fact, we have never been able to carry this celebration out as intended or reach the objective desired. Even at that, it has proved to be one of the pillars of strength in the operation of the Ceramic College.

The senior plant inspection trip continues to be highly popular amongst the students and beneficial to them. This year the trip is to be made to the Pittsburgh and eastern Ohio district instead of to New Jersey where it was made last year.

The Ceramic Association of New York has again functioned efficiently, and the cooperative relations between it and the Ceramic College have been all that could be expected. Mr. Meneely'S' financial committee and Mr. Diamond's publication committee have made highly important contributions to both the College and the association. The paid-up membership of the Association is slightly higher than it has ever been before. The Association has continued to encourage research at the College by promoting the establishment of industrial fellowships, by giving a prize for the best thesis, and by a cash appropriation for the Experiment Station.

The Alfred Student Branch of the American Ceramic Society has had its most active and successful' year. The average attendance has been over 100. Each month a distinguished guest speaker has addressed the Society. The speakers this year were of very high caliber. The students manage the affairs of the society, including the St. Pat's program. They take a great deal of interest in it and get a lot out of it. This year, at the last meeting, officers for the coming year were elected!. About 130 attended and the competition for the offices was keen, showing that it is a really live-wire organization. This organization is the most important one on the campus for the Ceramic College students.

The students got out three issues of the *Alfred Engineer* this year. This is a Ceramic College newspaper which is very effective in promoting the interest of the College. The students manage it com-

pletely, including the financing of it which is done by securing advertisements from the ceramic industries.

Deferment of Students from Military Service

Most of our students are subject to Selective Service. We have taken the stand that it is in the interest of national defense to keep engineering students in college so that they may complete their preparation for engineering work. The government and industries need many more engineers than are available. This is recognized by the government as shown by its practice of sending to high schools and secondary schools literature which encourages graduates of these schools to go to college and take up engineering work. We are backing this campaign by sending letters to high school principals urging them to act on the government's suggestions. We are also taking up with local boards the matter of deferring each individual student. To date we have received deferment from military service for every student that wanted it. We intend to continue this policy.

Employment of Graduates

We are swamped with requests for ceramic graduates. Most members of the graduating class have several offers. They are starting at salaries of \$150 and \$165 per month and can choose what they want. There is also a demand for experienced men up to \$350 per month. Government departments such as the Signal Corps are asking for ceramic engineers at salaries of from \$2000 to \$3800 per year. All of our under-classmen are having no difficulty finding summer work at salaries up to \$150 a month. The demand for ceramic men far exceeds the supply.

Participation in the Work of The American Ceramic Society

Whereas six or seven years ago the Ceramic College took practically no part in the work of the American Ceramic Society, the last convention of the Society was provided with twenty-six items by Ceramic College men. Sixteen were provided by the college staff, chiefly from the Experiment Station, and ten by alumni of the College. Most of these items were research papers. However, participation in the work of the Society has extended beyond the presenting of research papers. At the last convention the writer was elected by the membership as its Vice-President. Professor H. G. Schurecht was appointed Secretary by the Division of the Institute of Ceramic Engineers, and Professor J. F. McMahon was appointed chairman of the Division of Materials and Equipment. An especially interesting feature of the Convention's program was a speaking contest where selected student

representatives' from each ceramic school competed for prizes. Our representative, Mr. John S. Angevine, won first prize.

Industrial Fellowships

We continue to stress the importance of research work both on the part of students and faculty. It is nearly as important as the teaching duties of the institution. The research facilities afforded by our permanent organization have been supplemented by fellowships sponsored by the Electro Refractories and Alloys Corporation, the Edward Orton, Jr. Foundation and the North American Cement Corporation. These fellowships are to be continued during the coming year. Especially gratifying results have been obtained by the North American Cement Corporation Fellowship. Three men will be employed this coming year on it. The fellowship work has been supplemented by the private work of some members of the staff. Their work, which has produced several patents, has enhanced the prestige and reputation of the institution a great deal.

Finances

Substantial progress has been made in increasing our budget. For the year 1942-43 we will have \$9000 available for new equipment. This will make an important dent in the long list of new equipment that we need. An increase of \$300 was allowed for Printing and Advertising. This will enable us to get out one bulletin. We need to get out several. An increase of \$150 for Travel was also allowed. This will reduce the amount of money that members of the staff will have to pay out of their own pocket for necessary travel. \$450 was also allowed for increasing the salaries of the seventeen members of the staff. These increases, however, were neutralized in part by a reduction of \$300 in the fund allowed for General Expense and \$970 for Equipment Replacements.

The net effect of these budgetary readjustments will be to raise the appropriation per student slightly above the present \$428 per year per student. This compares with approximately \$1200 per student per year in certain other comparable institutions.

By directing our attention now to the budgetary situation for 1943-44, we find cause for enthusiasm insofar as the item of personal service is concerned. The salary scale at the New York State College of Ceramics has always been pitifully low compared with that of other state institutions of similar character. The result has been the inability to hold high-grade men of the kind required for the work that we give. For five years we have been hammering away at the project of getting enacted a salary classification bill which would materially lift the scale of salaries, particularly in the lower brackets. Sometime

ago the bill was passed by both houses of the legislature and we received word this week that the governor had signed it. It is now the law of the State. While this bill will not lift salaries to anywhere the level of salaries of other comparable institutions in the State, it does represent a very important advance and will relieve a great deal of the strain and difficulties under which the Ceramic College has been operating. I consider it one of the three or four outstanding landmarks in the history of the College.

From my knowledge of ceramic schools in general, I am convinced that the New York State College of Ceramics is not the best ceramic school in the country. On the other hand I am quite sure there is none better, but it ought to be unquestionably the best. It has the resources and facilities to be the best. I urge that the Board of Managers give special attention to ways and means of increasing its proficiency. The educational policy and the objectives of the College constantly challenge our attention. We receive much praise but few criticisms and suggestions. If more criticisms and suggestions would come directly to us it undoubtedly would result in improvements.

REPORT OF THE DEAN OF MEN

{Excerpts}

The current academic year has brought to the office of the Dean of Men additional activities and responsibilities growing out of the defense program and the war emergency. In particular this office has been a clearing-house of information on war-service opportunities and a large number of men of military age have come for information and advice on individual problems. It has, of course, not been possible to answer all questions or to hand out ready-made solutions to problems but in most cases assistance has been given. I have also served as a liaison officer in relationships between the University and the military authorities who have visited the campus on numerous occasions during the year for the purpose of enlisting men in the various branches of the armed services.

The war has had a noticeable and depressing effect upon the morale of some of our students. This is evidenced by indifference regarding class attendance and a general lack of attention to studies. I am inclined to believe, however, that the large majority have their feet pretty well on the ground and fully realize their individual responsibility in the present crisis.

For several years I have been very much interested in the possibility of giving to students a larger share of responsibility in University affairs. We have accomplished a great deal at Alfred in this respect but there is still an opportunity for more to be done. Per-

sonally I believe that we should undertake soon a careful study of the problems of democracy on the campus and faculty-student relationships and formulate policies which will make for a greater degree of student participation.

I am hopeful that it will soon be possible to employ a campus night watchman. Such an officer could render valuable service in guarding against possible disastrous fires and at the same time could exercise a restraining influence over students who are inclined to create disturbances on the campus during the night and who have little respect for personal or property rights. He would not need to be an officer of the law and if chosen with proper attention to personality factors would have, I believe, the respect of the most of the students. The Dean of Men, contrary to what some people apparently believe, cannot be a watchman or a police officer. This need is urgent and I hope that an early provision can be made to meet it.

For the sake of brevity I have purposely omitted from this report any mention of many of the activities and accomplishments of the year. A mere catalog of these would serve no useful purpose.

REPORT OF THE DEAN OF WOMEN

(In Full)

In spite of the uncertainties and anxieties which are facing us in the present world situation, the college year for the women at Alfred has been a successful one. There were more women enrolled at the beginning of the year than in the immediate past and there have been very few withdrawals during the year. The Brick for the first time since it was rebuilt was filled to capacity with 107 girls. Only five of these have left during the year, one to accept a position, three for health or family reasons, and one because of financial necessity. Of the sixty-four girls living in sororities, only three have left school, two because of low scholarship and one because of unsatisfactory conduct. The number at Greene Hall has remained stationary. Ten girls have been in residence there.

The Cooperative House in its second year has been entirely successful and self-supporting with the exception of coal furnished by the University. Applications for next year already are more than enough to take the place of the seniors who are leaving. We are even wishing for more space so that a larger number might be accommodated.

Because of more adequate housing now, only twenty-five girls live outside of University houses, and seventeen of these are living with the family or relatives and three are working for their board.

During the spring the N.Y.A. Residence Center was abandoned by the State and fourteen girls were placed for the remainder of the semester in homes of townspeople. They were then under the direct supervision of the Dean of Women and the Women's Student Government. These girls finished their course in April.

In this connection I wish especially to express my appreciation for the splendid work of the Women's Student Government. Their cooperation and efficiency make them a constructive influence among the women. They inaugurated this year a coffee hour for all women on campus which proved an excellent means of bringing the different groups together.

The University has given scholarship help to eighteen seniors, twelve juniors, thirteen sophomores, twenty-three freshmen, and one special student, and further assistance has been given to nineteen girls by way of room grants at The Brick. It is planned next year to appoint a student counselor for each floor of The Brick and to compensate them by means of room grants.

I would like to mention the splendid way in which Miss Creighton has carried on the greatly enlarged Physical Education program for women which has been a part of our defense work. Her efficiency and her ability to win fine cooperation from the students have made it a successful project.

The Registrar's Office has felt the effect of the war emergency in a number of ways. It has been found necessary to eliminate one office assistant who worked half-time in this office, as well as other temporary assistants, used during peak-load periods. The increased demand for transcripts for the armed forces has added an especially heavy burden during 1942. A third effect has been the time required to fill out various and sundry Government forms, demanded by students who wish to enlist or to enter the deferred service of the Army or Navy.

For the first time since the adoption of the book-size diploma, a new diploma plate has been engraved, which is simplified in form and wording and therefore has a more pleasing appearance.

No special research work has been done this year but there is an increasing demand for statistical data and lists, the compilation of which requires more and more of the time of the office personnel.

REPORT OF THE DIRECTOR OF THE GRADUATE DIVISION

College of Liberal Arts

(Excerpts)

Courses Offered First Semester: Education 141 (13 students), Joseph Seidlin; Sociology 123 (9 students), Roland L. Warren; History 137 (4 students), W. C. Russell; English 152 (4 students), Leila E. Tupper; Thesis (1 student), Joseph Seidlin; Thesis (1 student), Wendell M. Burditt; Thesis (1 student), Lelia E. Tupper; Beginning Spanish (19 students), Elbert W. Ringo (Extension).

Courses Offered Second Semester: Education 211 (5 students), Joseph Seidlin; Education 124 (7 students), Roland L. Warren; English 103 (2 students), Lelia E. Tupper; Conversational Spanish (12 students), Elbert W. Ringo (Extension).

Degrees Conferred June 1941: Master of Education, 4; Master of Science, 1 Candidates for Degrees, June 1942: Master of Education, 4; Master of Arts, 2.

REPORT OF THE LIBRARIAN

(Excerpts)

Books in Literature (13,000) were read more than any other class of books in the library. We are confident that much of the use in this field was by non-student readers. For one thing, the drama collection is widely used; for another many papers are written on literary subjects by persons not taking formal education courses. The History class (4,986) is next in order. The figures show that magazines (1109 bound magazines, 3097 current magazines) rank third in use. Next in order of use is the Economics, Sociology and Education group (3,125), followed by books in the field of Art (2,749), books on Useful Arts (2,185), Religion (1,637), Science (1,354), Philosophy (837), and Philology (588).

The library conducted a very successful Victory Book Campaign this spring. Committees composed of townspeople, faculty, and students were influential in making it so. Altogether about 1,200 books were collected.

This year the Alfredana and Seventh Day Baptist denominational collections have been moved to a seminar room on the second floor of the library which hereafter will be designed as the "Alfred" room. Much will still have to be done in order to make the room as attractive as we hope to have it. In order to provide more space for the new

REPORT OF THE LIBRARIAN

books, the out-of-date books in Religion from the main floor and basement have been prepared for storing in South Hall.

Since Alfred University was appointed! a Key Center, the library has become a war information center in which are currently available the latest facts, reports, directories, regulations, and instructions for public use. The urgencies of wartime will frequently require immediate information and quick decisions. The library, therefore, must step up the tempo of its service. It must foresee and prepare to meet such demands. The library must supply technical information to industrial defense workers and students. It must disseminate authentic information and sound teachings in the fields of economics, government, history and international relations; it must make available valid interpretations of current facts and events. The library must help to relieve the strain of war; it must help and support post-war planning.

Statistics:

Books in library	61,874
Fiction books loaned, May 1, 1941—May 1, 1942	11,084
Non-fiction books loaned, May 1, 1941—May 1, 1942	15,256
Reference reserve books	14,713
Books loaned May 1, 1941--May 1, 1942	41,058

Loomis Allen Estate, Fred Place Estate, Sigma Chi Nu Sorority, Carnegie Corporation, Albert Becker, Leo Shaw, Ceramic College, Sanford Cole, Bernard Baruch, Justin Bradley Memorial Fund, R. H. Pfeiffer. Mrs. Beulah Ellis, Betty Jacox, Mathematics Club, Miss Lydia Conover, L. Ray Polan, Dr. O. P. Fairfield.

REPORT OF THE DIRECTOR OF RELIGIOUS ACTIVITIES

(Excerpts)

The University Chapel

The installation of an altar has greatly enhanced the dignity and worshipfulness of our Chapel in Kenyon Hall this year. The altar is so arranged that with a few adjustments each Sunday it is much more adequate for the Roman Catholic Mass than the previous arrangement. Among the special speakers at the daily chapel services this year, in addition to the faculty, have been: Dr. L. K. Anderson, Secretary of the Board of Foreign Missions of the Presbyterian Church in the U. S. A.; Miss Catherine Smith, Secretary of the Student Volunteer Movement; Dr. C. P. Harry, Secretary of Student Work, United Lutheran Church; Dr. T. V. McNulty, (Episcopal) Boys Academy, Soochow, China. Among the special services we have observed are Armistice Day, the Universal Day of Prayer for Students.

and a service in many languages at the time of the Language Festival on the Campus. Every Friday throughout the year the Commission on Personal Religious Living of the Christian Fellowship arranged the service to be led by students.

The University Church

The University Church has had two guest preachers during the year: Dr. J. Nelson Norwood, President of the University, and Dr. Georgia Harkness of Garrett Biblical Institute at Northwestern University, outstanding author and theologian of the Methodist Church. Special services have included the observance of Holy Communion on the first Sunday of each month when the University was in session, the Candlelight Carol Service by the Choir, the Homecoming Service and the Baccalaureate Service of the Institute. From September until June the Church provides a service of worship each Sunday, not omitting vacation periods. The Lenten Season was especially rich for us this year. We began on Ash Wednesday with a moving picture, "The Journey To Jerusalem," sponsored by the local ministers. On the Sundays throughout Lent the sermons were built around the various phrases of the Lord's Prayer. On the eve of the Easter recess, during Holy Week, the Choir sang a special Choral Service of Worship which was well received by the campus. Beginning the first of October the University Church has undertaken to provide for the care and education of a war refugee child through the Foster Parents' Plan for War Children. The children of our Church School and the members of our Women's Guild have united with the Church in the generous support of this project.

The Alfred Christian Fellowship

The Alfred Christian Fellowship, which resulted from the merger of the Y.W.C.A. and the A.U.C.A., has enjoyed a very successful year, so much so that the students this spring voted to continue the merger indefinitely. The cabinet of eight students met each week to plan the meetings which were held every Sunday evening. They were advised from time to time by the Faculty Advisory Board, of which Dr. E. E. Lund was chairman. The program was developed around three Commissions which provided special emphases and a continuing interest group for our members. They were: Commission on Personal Religious Living, Commission on Campus Relations, and Commission on Christian Citizenship, at Home and Abroad. There was a membership of sixty-five on the new basis which includes commitment to our purpose, a financial contribution, and participation in the program. A much larger number of students was reached since all our meetings and activities are open to the campus.

DIRECTOR OF RELIGIOUS ACTIVITIES REPORT

A review of the Sunday evening programs would reveal an interesting variety of type and subject, including worship services, student panels, and faculty and guest speakers. Other significant items were: acting as host to the Allegany County Youth Rally which we invited to the campus; an all-day conference with Miss Kathryn Duffield of the Student Christian Movement of New York State; the raising of \$225 for the World Student Service Fund; and the development of a series of informal fireside groups at faculty homes on Sunday evenings. We hope to continue and enlarge the number of firesides next year. In intercollegiate activities, the A. C. F. maintained relationship with the state and national movement and established membership in the World Student Christian Federation.

General Activities

A review of the campus would note the strong programs of the Seventh Day Baptist Church and of the Newman Club. The Brent Fellowship has resumed its activities for Episcopal students. The Jewish students have enjoyed some meetings with Rabbi Karl Werner, of Hornell.

The Chaplain's office is the scene of many committee meetings and personal conferences. Our home is also used to a considerable degree by the students now that they are becoming better acquainted with us. During the past year we have served over two hundred and thirty meals (not counting light refreshments) and entertained nine over-night guests in connection with our work. Student visitors have been too numerous to record. The Chaplain was the principal speaker at the State Christian Youth Conference in Syracuse and was elected a Counsellor to the Executive Committee of that group. The Cornell Conference on Religion also invited him to return to their campus to assist in this year's conference. Other engagements included speaking at Hendricks Chapel at Syracuse University, and on various occasions in such nearby cities as Batavia, Waverly, Hornell, Wellsville, and Whitesville.

REPORT OF THE DEAN, SCHOOL OF THEOLOGY

(Excerpts)

Faculty

Five men have been on the staff of instructors during the year. Dr. Edgar D. Van Horn and Dr. Walter L. Greene, both employed on a part-time basis, continue to serve in their respective fields of theology, and church history and religious education. Dr. George B. Shaw has given a course in English Bible, and Dr. Ben R. Crandall

ALFRED YEAR BOOK, 1941-42

gave this year his course in rural sociology. This course alternates with one given by Rev. Elmo F. Randolph, who next year will repeat his course in scouting and church camps. The last three men named give their services without compensation, and they deserve the sincere and hearty thanks of all who are interested in the education of our ministers at Alfred. The dean has taught more hours than any other professor and naturally covers a wider range of subjects.

Our special lecturer this year was Rev. Lester G. Osborn of Shiloh, N. J. April 13-15, Mr. Osborn gave three evening lectures on evangelism to students, faculty members and friends. During the day he met with the students for discussion and consultation. This service in the interest of the central theme of the Christian ministry was greatly appreciated by the students as well as by the administration.

In June of last year the fourth annual conference of Seventh Day Baptist ministers was held in Alfred under the auspices of the School of Theology. The wives were invited to this conference, and there was a good attendance of both men and women from the eastern part of the United States. The conference will be held again this year on June 8-10. Thanks to the University authorities the Bartlett dormitory will be used to accommodate our guests as in former years. The School of Theology appreciates this service.

Physical Equipment

The Gothic continues to serve adequately all our school needs, class rooms, office, library-reception room, and chapel. However, the increasing number of married students who matriculate makes it necessary for some to find living quarters outside. In order to even up, in part, living expenses of students, certain funds are allocated to these outside residents. For several years each resident in the Gothic has been charged a modest maintenance fee, which of course is not required of outside students.

Finances

Our income from endowments and from denominational budget is still inadequate for our needs. Therefore, it becomes necessary each year for the dean to seek financial help from friends of the School. Soliciting letters were sent out recently to all who have helped in the recent past. The response thus far has been very encouraging. Since the School has agreed to share in the expense of re-roofing the building more money will be needed than would be the case otherwise. This added financial burden seems legitimate since the School uses the entire building for its own purposes.

At its session in August of last year the Seventh Day Baptist

REPORT OF THE SCHOOL OF THEOLOGY

General Conference reduced by one-third the amount which it had placed in its tentative budget for the School of Theology. The Board of Christian Education, through which the denominational gifts come to the School, made some adjustments within its own total budget by which the School enjoyed its usual amount as anticipated. Except for this fact the situation would have been exceedingly difficult if not critical.

I would recommend that the School of Theology ask the Board of Christian Education to include the usual amount for the School in its askings from Conference this year (\$2,000). That amount equals a little less than one-half our required budget, and without it I do not see how we are to continue to function as a graduate school, with authority to offer courses leading to the bachelor of divinity degree, the status which we at present enjoy.

The School is just now in receipt of a gift of \$500, which represents a portion of the proceeds from the sale of the Scio Seventh Day Baptist Church building. Former members of that church who made the transfer suggest that it be accepted as an endowment, but with the understanding that it be held on call in an emergency. We are grateful to the donors for thinking of the School of Theology when considering what disposition to make of these funds. We hope it may prompt others to go and do likewise.

Pending Appraisal

The Commission of the General Conference has appointed a committee to make a study of the whole question of the education of Seventh Day Baptist ministers. This ought to prove to be a healthful thing for all interests concerned.

REPORT OF THE DIRECTOR OF THE BUREAU OF APPOINTMENTS

College of Liberal Arts

(Excerpts)

In the Class of 1942 there are thirty seniors who will have completed the State Requirements for a Provisional Certificate. The disposition of the class, as of May 14, is as follows:

8 have signed contracts, 5 contracts are pending, 1 has received a graduate assistantship at Syracuse University, 1 intends to enter the ministry, 1 is getting married, 2 are, at present, physically unable to accept employment, 6 are likely to find themselves in some branch of the military service soon after graduation.

As heretofore, we do not have complete information with reference to the promotions or advancements of our alumni. We have sent out approximately three times as many folios this year, as last. Approximately forty alumni have been placed in better teaching positions or in administrative positions. In these days, naturally there is no limited employment period. For the duration, the Placement Bureau will have to work on a twelve-month basis. Chances are that the months of June, July and August will be as "active" as April and May. Generally, there has been an unheralded rise in salaries. Thus far, no one has been placed at less than \$1200 (last year, some were placed at \$1050 and \$1075), and one senior has just signed a contract for \$1400. The same situation prevails in the area of experienced teachers. Recently one of our alumni got a new position with a \$400 raise in salary.

REPORT OF THE COUNSELOR TO PROSPECTIVE STUDENTS

(Excerpts)

The Office of the Counselor to Prospective Students has carried forward its routine duties this year as in previous years, and has initiated new projects as occasion demanded and workable ideas developed.

The Assistant Counselor, Miss Ruth D. Whitford, was in charge of activities during the first semester while Mr. John Reed Spicer, the Counselor, was away completing his year and a half of graduate study. During the second semester the Counselor has been traveling a great deal interviewing high school students and teachers as well as attending alumni dinners in various sections of the country, so that, although Miss Whitford has been in charge of the office and most routine matters, some of the responsibility of the various projects has been returned to Mr. Spicer. Mrs. Charles Bond and Mrs. William H. Dennis have rendered invaluable assistance, displaying initiative, good judgment, and tireless cooperation in all their duties, both old and new. When these two people leave within the next few weeks, the Counselor's office will be greatly handicapped, for it will be difficult to replace either of them even by training newcomers.

Applications for Class of 1940. The situation with regard to enrollment for September, 1942, is indicated by the table following which compared figures for this year with figures for the past two years of approximately the same date.

Prospective Student Organizations. The two prospective student organizations with which the University has cooperated during the past year and a half have been in most cases helpful and of consider-

REPORT OF THE COUNSELOR TO PROSPECTIVE STUDENTS 39

able value. The report for September, 1941 is as follows: School and College Advisory Center (joined about Dec. 1, 1940) has submitted approximately 1500 names, six of these have been enrolled in Liberal Arts, two in Ceramics; American Schools and Colleges Association (joined about March 1, 1941) submitted about 400 names, one of these has' been enrolled in Liberal Arts.

Comparative Table of Applications Received	1042	1941	1940
Liberal Arts	39	07	88
Ceramic Engineering	20	69	70
Industrial Ceramic Art	10	24	25
Partial Credentials On Hand	1942	1941	1940
Liberal Arts	10	21'	lit
Ceramics	19	21)	41
Grand Total	38	51	00

Guest Days. The Language Department sponsored and carried out with the cooperation of this office an afternoon and evening program for the benefit of high school language students who were guests' of the University. The program was well organized and was enthusiastically received by 40 some guests. The Language Department is to be commended for its initiative and enterprise in carrying out such a fine program.

A Guest Day for general college information to high school students looking forward to college entrance was held on May 16.

High School Visiting. The Counselor with others of the administrative and teaching staff have felt the need for closer personal contact with high school guidance officers, principals, and prospective students in high schools in this area and elsewhere in New York State and nearby states. Accordingly, when such need became very evident this spring, the Counselor carried out a number of intensive visiting trips calling on high school guidance officers, particularly in order to make their acquaintance and lay foundations for further contact with them in future years. In almost every case after chatting with the faculty member, Mr. Spicer was introduced to students who were usually desirable college material. What the results of these trips will be is not measurable now—but the future benefits of pleasant contact with these schools, although not measurable, is worth considerable expense and effort.

Improvements. The vastly improved appearance of the offices of the Counselor are a great satisfaction to the occupants and certainly must make a much better impression on the many visitors, both alumni and strangers who call here during the course of the year.

REPORT OF THE DIRECTOR OF THE SUMMER SCHOOL
(Excerpts)

The intercession* and school of surveying started on the day following Commencement, (June 10) and continued for approximately three weeks until June 27. The attendance was as follows. This table includes the regular summer school.

	Men	Women	Total
6th Intercession	11	0	11
8th Summer School of Surveying		1	74
28th Regular Summer School	85	77	162
Total	169	78	247
Less Duplicates	9	0	0
Grand Total	160	78	238

Although there was a loss of 14% in the attendance of the regular summer school, the distribution of work was such that there was no financial loss. The number of students attending the pottery and crafts courses was as large as usual, the loss being entirely in Liberal Arts students, particularly in the languages and social studies. There also was a slight decrease in the number of graduate students in education.

Mr. J. LeRoy Thompson, Superintendent of the Washington Irving Schools, Tarrytown, New York; Superintendent Evan E. Jones of the Port Chester, New York, schools; Dr. Ellis Freeman, Professor of Psychology, University of Tampa, Tampa, Florida; Dr. Esther M. Dole, Professor of History, Washington College, Chestertown, Maryland; Principal Gustav Patz of Irvington, New Jersey; and Professor Norman J. Whitney, Syracuse University, were among the visiting instructors.

Of the total of 238 students, 110 were from our regular student body, attending this year (1941-42).

Mr. Walter Bates, President of the Canadian Singers Guild, returned to Alfred for the second summer, giving courses in conducting and choral singing. We were somewhat disappointed in the venture as a whole as the enrollment for the Master Class was very small. However, Mr. Bates developed a chorus of approximately sixty voices, which gave a splendid concert at the conclusion of the summer school.

REPORT OF THE DIRECTOR OF PHYSICAL EDUCATION
AND ATHLETICS FOR MEN

(Excerpts)

Physical Education

First Semester:

Students in classes, 123; in intercollegiate athletics receiving credit, 50, and 6 not receiving credit; excused by University Physician

6; number not reporting, 21. Total number of cards received, 206.

Activities. Physical Education classes: **Softball**, touch football, soccer, tennis, basketball, gymnastics, volleyball, indoor track, wrestling, boxing, ice skating, skiing, archery, badminton, riding. *Varsity sports:* cross country, football, basketball, wrestling, fencing.

SECOND SEMESTER:

A new program in Physical Education was inaugurated to include all the men enrolled in the University.

Students in classes, 302; in restricted activities, 20; enrolled in classes but not reporting, 19. Total class cards received, 302.

Activities. Stress was put on strengthening and conditioning exercises: heavy calisthenics, running, apparatus', wrestling, boxing. Restrictive exercises: volleyball, basketball, games, contests and relays, softball, tennis, track. Varsity sports: Basketball, wrestling, track, fencing.

INTRAMURAL AND INTERCLASS ATHLETICS

Activities. Touch Football, basket ball, fencing, softball, tennis, pushball, golf, track, badminton, and archery. Approximate number competing, 360.

SUMMARY OF INTERCOLLEGIATE ATHLETICS

Total number of participants in intercollegiate sports, 359; approximate number without duplication, 210; total number of dual contests, 61; won, 30; lost, 30; tied, 1; percentage, .560; total number of championship contests, 8.

CHAMPION CONTESTS:

I.G.4-A. Cross Country meet, New York City, Alfred placed seventeenth, twenty-one colleges and universities represented. Freshman I. C.4-A. Cross Country meet, New York City, freshmen placed eleventh, eighteen colleges and universities represented. I.C.4-A Indoor Track Championship, New York City, four men competed, none in finals, eighteen colleges and universities represented.

Penn Relay Carnival, Philadelphia, six men participated. M.A.S. C.A.A. Mile Relay Championship, Alfred placed fifth. University of Pennsylvania Classification Race, Alfred fourth, seventh place in the discus, eighth place in shot put. M.A.S.C.A.A. Track Championships. Haverford, Pennsylvania, Alfred placed fourth, sixteen colleges and universities represented. I.C.4 A Outdoor Track Championships, New York City, two men competed. Interstate Wrestling Championships. Cleveland, Ohio, Alfred placed fourth, twelve colleges and universities represented). N.C.A.A. Wrestling Championships at Michigan State College, two men competed, both in semi-finals. Including all dual and

championship contests, Alfred has competed against 94 different colleges, 2 normal schools, 1 collegiate center, 1 business school, 2 preparatory schools, 1 technical school. The Department of Athletics conducted the Steuben-Allegany Sectional Basketball Tournament and Allegany County Track Championships.

General

Speaking engagements. The staff of the Department of Physical Education and Athletics has attended and delivered addresses at six high school athletic banquets.

Improvements. A large press box was constructed at Merrill Field for use at football games. It will accommodate twenty members of the press, with telephone and telegraph service, and six men in the public address booth.

Conclusion. At the close of the school year, and looking back upon the changes occurring in the Department, it might be said that this has been the most active year in the history of the University. Starting the second semester, the physical education program was stepped up to include all men enrolled in the University, taking physical education three times a week. This program can be appropriately called "Physical Training". Strenuous activities were engaged in, chiefly to better the physical condition of the students'. The students entered into the new program with enthusiasm, and with few exceptions, carried through for the entire semester. By testing and measuring as accurately as possible over a six weeks period, an improvement of approximately 10% was shown in the strengthening and conditioning of the students. A survey was made of student opinion regarding the program, and the results showed an overwhelming majority in favor. The intramural activities were increased and enjoyed by more students than ever before.

REPORT OF THE DIRECTOR OF PHYSICAL EDUCATION FOR WOMEN

(Excerpts)

The first semester 147 students (men and women) were enrolled in classes twice a week. Second semester 195 students enrolled in classes three times a week.

Extra-curricular Activities. Archery, 8 tournaments, movies, special coaching by Mr. Hoogerhyde in December; badminton, 3 tournaments, 15 players participated in league games or in outside tournaments; basketball, interclass games, interhouse games; fencing, 2 tournaments.

REPORT OF UNIVERSITY PHYSICIAN

47

fencing movies'; field hockey, games on Saturday mornings on practice football field; skiing, 16 girls received W.A.A. credit; sport days, hockey at Cornell University, 14 players, modern dance at Cornell, 5 students; table tennis 2 tournaments; tennis 2 tournaments;

Facilities. South Hall Gym, indoor archery range added this year; Room 6 arranged for fencing; temporary archery and badminton field; tennis courts'.

REPORT OF THE UNIVERSITY PHYSICIAN

(In Full)

To the President of Alfred University:

The medical services rendered by the University Physician for the college year 1941-42 have been as follows, with fees attached:

Examination of new students and athletes.	\$ 200 00
Office visits at \$1.10, 410.	410.00
Infirmary visits at \$1.00, 761.	761.00
House and Infirmary visits at \$2.00, 114.	228.00
Night calls at \$3.00, 16.	48.00
Minor Surgery.	58.00
Student X-rays.	146 25

\$1851.25

Total guarantee for medical services. 1000.00

Excess cost for the year above guarantee. 851.25

Respectfully submitted,

R. O. HITCHCOCK,

University Physician

May 15, 1942

REPORT OF THE ACTING SUPERINTENDENT OF THE CLAWSON INFIRMARY

(In Full)

To the President of Alfred University:

The fifteenth annual report of the Clawson Infirmary is presented as follows:

Summary

- 774 Students called at the Infirmary
- 5522 Student office calls
- 289 Student bed patients
- 1126 Days beds occupied by students

24 Students transferred to hospital or home for treatment or operation
 65 Student X-rays
 20 Contagious disease
 187 Student physical examinations
 77 Heart, and lung examinations

STUDENTS OF THE COLLEGES

574 Students called at the Infirmary
 187 Student physical examinations
 77 Heart and lung examinations
 4340 Student office calls
 234 Student bed patients
 892 Days beds occupied by students
 15 Students transferred to hospital or home for treatment or operation
 56 Student X-rays
 16 Contagious disease (Scarlet Fever, Mumps, Measles)

STUDENTS OF THE NEW YORK STATE AGRICULTURAL AND TECHNICAL INSTITUTE

152 Students called at the Infirmary
 971 Student office calls
 46 Student bed patients
 201 Days beds occupied by students
 6 Students transferred to hospital or home for treatment or operation
 7 Student X-rays
 Contagious Disease (Diphtheria, Scarlet Fever, Mumps)

STUDENTS OF THE NYA RESIDENT TRAINING CENTERS

48 Students called at the Infirmary
 211 Student office calls
 9 Student bed patients
 33 Days beds occupied by students
 3 Students transferred to hospital or home for treatment
 2 Student X-rays

FACULTY AND TOWNSPEOPLE

28 Office calls
 4 Bed patients
 15 Days beds occupied
 12 X-rays

Respectfully subinilled,

(Mrs.) ALICE C. McDERMOTT, R.N.

Acting Superintendent.

May 10, 1942

REPORT OF THE MANAGER AND TREASURER OF THE
ALFRED COOPERATIVE PICTURES

(Excerpts)

The Call season was rather poor in attendance for reasons unknown, but more recent receipts have been encouraging. The quality of the shows has been the highest we have ever had. A special tenth anniversary show was arranged in February at which time local merchants cooperated excellently so that thirty-three door prizes were presented to patrons. This helped publicize an event that might have passed unnoticed. Tickets with our name printed on them to comply with the new federal law are now used. This came in with taxation on each ticket.

CASH BALANCE MAY 31, 1941	\$	46.09

J. NELSON NORWOOD, Chairman

REPORT OF THE DIRECTOR OF THE NEW YORK STATE
AGRICULTURAL AND TECHNICAL INSTITUTE

(Excerpts)

The problems which have faced the Institute during the past year are those common to all institutions of learning during a period of war. We have endeavored to train our students for the phase of life which lies immediately ahead of them—service in the armed forces or work in some war industry; but in so doing, have tried not to lose sight of the main objectives to which education is pointed in time of peace which, it is hoped, lies in a not too distant future.

Enrollment. We are probably looking forward to a definite decrease in our regular enrollment which, it is hoped, will be offset by increased activities in the shorter training programs for special defense workers. In addition to defense training, special emergency programs for both boys and girls will be offered. These will be of six-months' duration, and call for the same entrance requirements as those of the regular courses. For women these will include work in floriculture, dairy bacteriology, and radio; and for men, radio and electrical power.

During the current year the defense courses have laid special stress on machine shop and radio training. All students who completed these courses have been placed with such concerns as Curtiss-Wright, Pratt and Whitney, Moore Pre-Heater, and similar war industries. It is anticipated that with our increased facilities the number carrying on this type of training will be greatly increased.

Regularly enrolled students this year numbered 309. When the radio students returned on April 27 for their second year of work, they were joined by seven additional radio majors, making a total for the year of 316 regularly enrolled students. Including those who elected to take special defense courses, the school has served during the period July 1, 1941 to May, 1942, a total of 1014 individuals. In the period commencing October 20, 1940 and ending March, 1942, the Institute has given instruction to 2231 students. Eliminating from this number 276 duplications, leaves a total of 1955 different individuals which the school has reached during this period, and who have taken courses ranging in length from thirteen weeks to two years.

Buildings and Grounds. During the past year WPA has completed new poultry houses at the farm; the renovation of the interior of the main building including new toilets and locker rooms; and work on the athletic field with the exception of the tennis courts and fences which are to be finished this summer.

With WPA labor the former brooder house at the edge of the garden center was rebuilt and an enclosed glass front added. This

has added a greatly needed unit to the Floriculture Department, consisting of propagation house, office and classroom; and in addition, has improved the appearance of the garden center.

Plans are under way for the building of a shop which will be included as part of the laboratory and shop unit to be erected on the campus after the present emergency has passed.

No other building changes are anticipated for the coming year.

Civilian Pilot Training. During the past year thirty additional pilots have been trained and plans are now under way for the operation of a year-round program offering both primary and secondary training. It is quite possible that students carrying this work will be sent here by the Army. These candidates will complete their preliminary training in about eight weeks, to be followed by a training period of similar length in which they will finish their secondary training.

Equipment. Between \$60,000 and \$65,000 worth of major shop equipment has already been purchased for the machine shop. In addition, another \$40,000 worth is now being acquired and will be in operation before July first. During the year approximately \$50,000 has been allocated for radio and electrical equipment. This has all been bid and is now being delivered, so that by mid-summer complete deliveries should be made.

NYA Centers. On February 2, 1942 the two NYA Centers were officially closed, after being in operation since April 1938. Started more or less as an experiment, our two centers soon became an integral part of school life. The young women, during their work periods accomplished a tremendous amount of secretarial work for the teaching staff; and the young men gave us exceptional service in the matter of repairs, wiring and electrical installations, and general upkeep of buildings and grounds. The school, in turn, gave them valuable training for the future, and the positions of responsibility now held by many of the former residents are a source of pride. When the Center closed at the end of the first semester, a number of senior girls were left without places to stay until their courses were finished. Residents of Alfred opened their homes so that every girl who wished to graduate was provided with a home for the duration of the term.

Future Progr-ams. In addition to the special emergency courses offered for young men and women, a special radio training program will be conducted during the summer, starting on July sixth. This will be a concentrated, highly technical course of six months' duration.

For the past six months the University under the supervision of the Institute and in cooperation with Cornell University has offered special radio technicians courses as sponsored by the E. S. M. D. T. Seven centers were established in surrounding towns including Bath.

Corning, Wellsville, Alfred, Salamanca, Olean and Jamestown. 264 were enrolled in this group. The first classes will complete their work on May 28, and will be able to start Advanced Electronics immediately. In addition, the first phase of the work will be offered again to another group.

Faculty Changes. Robert J. Brooks, formerly in the Department of Air Conditioning and Refrigeration returns July first after a year's leave spent in industry. B. H. Anderson, a reserve officer in the Artillery, has been called for active duty with an armored unit at Fort Knox, Ky. For the past three years he has done excellent work as instructor in Floriculture. Kenneth B. Floyd has been granted his sabbatical leave to study for his doctorate at Cornell, beginning September first. Substitutes for Mr. Floyd and Mr. Anderson have not yet been selected.

During the year the Legislature has allocated five new positions to the school, three in the field of agriculture and two in the industrial field.

Yearbook. The *Argosy* was published as usual this year, although it is probably the last edition during the war. It was dedicated by the Class of 1942 to their schoolmates in the service. Forty-three of them were already serving in the armed forces, and including older alumni, the Institute has over one hundred of its former students in some branch of the service. Many are in officers training camps, while others have enlisted as air cadets. Two of our recent students were in the Phillipines when hostilities started and have not been heard from.

Commencement. It was decided at the end of the first term to accelerate to some degree the pace of instruction at the Institute. By eliminating all vacations and holding classes six days a week, eight hours daily, the seniors were enabled to graduate on April 13 instead of early June as has been the custom for several years, thus releasing youth several weeks earlier either to enter defense industries or join some branch of the service. There were 110 regular graduates, and thirteen special students, making a total of 123.

While the number of regularly enrolled students will be less than last year, it appears now that the shortage will not be so serious as was anticipated. But in many respects the outline of future activities for the Institute is still seen but dimly. It is probable, if the present conflict is prolonged for several years, that our defense shops will be very largely taken over by women preparing for men's jobs that they may be released for combat. But in any event, it shall be our endeavor to keep our program as flexible as possible to enable us to undertake any new tasks which these uncertain times may bring to us.

DEGREES CONFERRED IN COURSE

June 1, 1942

COLLEGE OF LIBERAL ARTS

Bachelor of Arts

Selden Bentley Bemus	Mary Ellen Mills
Marilynn Eleanor Burch	Franklin Pershing Morley
Robert Hannis Burton	Sarah Jane Morris
Elizabeth McDonald Cosby	Beatrice Lorene Nash
Betty Jane Curry	Sophia Perry
Harold Edleson, <i>in absentia</i>	Paul Bruce Pettit
Herman Eichorn	Catharine Greening Pierce
Mearl Huber Greene	Mildred Ellen Pivetz
Leland Burdette Hoitink, Jr.	Clifford Reader
Robert Glenn Humphrey, <i>in absentia</i>	Darwin Kenneth Ripley
Robert Stephen Hunt	George Stephen Robinson
Paul Kornfeld	Charles Henry Rushmore
Everett Arthur Landin	John Howard Ryan
Stanton Barber Langworthy	Edwin Walter Szybillo
Jean Louise Lewis	Louis Phillip Tomassetti
Alice Genevieve Lundy	Salvatore Nicholas Tota
Henry Bernard Meckowski	Margaret Pitman Wingate
Jean Elizabeth Meritt	Patricia Gilmore Wray

Bachelor of Arts, cum laude

Joan Helen Arnold	Roy Clifford Lindstrom
Genevieve Marguerite Carlson	William Arthur Petri
Beulah Luella Erdel	Audrey June Place

Bachelor of Arts, magna cum laude

Alfred Ells Austin	George William LeSuer
Ira Loyal Hall	Josie Anne Procopio

Bachelor of Arts, summa cum laude

Courtney Bennett Lawson	Rachel Pauline Peterson
-------------------------	-------------------------

Bachelor of Science

Judith Barton Clausen	Dorothy Pertain
Barbara June Hill	Frances Catherine Polan
Harriet Alberta Klees	Dorothy Mae Schilz
Betty Jane Pearce	Alice Elizabeth Schryver

Myra Bentley Whitney

Master of Arts

Alary Kathryn O'Connor	Aimee Annis Gannan
------------------------	--------------------

MASTER OF EDUCATION

Arthur Thomas Hood	Avis Joyce MacMullen
William Joseph Lundrigan	Josie Emegine Willis

NEW YORK STATE COLLEGE OF CERAMICS

Department of Ceramic Engineering

BACHELOR OF SCIENCE

John Stewart Angevine	Royce Denton Luce
Burton Elmer Baker	Esther Wilma Miller
Harold Newton Barr	Paul Elliott Miller
Robert McLane Callahan	David Fredrick Nordquist
William Stewart Cole, Jr.	John Michael Nowak
William Brooks Crandall	Richard Mohr Peck
Joseph Hamilton Dauchy, <i>in absentia</i>	Ralph Ernest Rhodes, Jr.
Elton Samuel Gamble	Robert Barr Todd
Raymond Clarence Hall	Romer Vernon Volk
Robert Webster Jolley	Alan Betz Williams
George William Kellogg	Seward Edward Wooley
Kenneth Robert Kleinman	John Shepard Young, <i>in absentia</i>

BACHELOR OF SCIENCE, CUM LAUDE

David Leon Armant	Malcolm Douglas Beals
	Paul Thomas Whelan

Department of Glass Technology

BACHELOR OF SCIENCE

Joseph George Chait	Arnold George Johnson
Arthur Cohen	Kurt Matthew Mooney
Charles Campbell Forbes	John Gilbert Ray, Jr.
	Donald Booth Underhill

BACHELOR OF SCIENCE, CUM LAUDE

Laur Don Gutelius Wheaton

BACHELOR OF SCIENCE, SUMMA CUM LAUDE

Robert Henry Dows

Department of Industrial Ceramic Design

BACHELOR OF FINE ARTS

Virginia Janet Austin	Louis Coulson Hageman
Harriet Eloise Bassett	Kathryn Mary Hardenbrook
June Louise Chisholm	Ora Louise Kenyon
Arthur Hunt Crapsey, Jr.	Louis Benjamin Raynor
Cleo Anne Crawford	Marjorie Jane Russell
Paith Louise Dorsey	Dickman Walker

Bachelor of Fine Arts, cum laude

Robert Douglas Manning Walter Hugh Robinson

Master of ScienceRodney Andrew Jones, *in absentia* Milton Alfred Tuttle**SCHOOL OF THEOLOGY****Bachelor of Divinity**

Charles Hefner Bond

MEDALS, PRIZES, TROPHIES, AND AWARDS

(Presented during the year)

The Binns Medal—Harold Siegrist Nash

ALFRED YEAR BOOK, 1941-42

DEPARTMENTAL HONORS

Departmental honors have been awarded to the following students upon recommendation of the major professor and by vote of the faculty. The requirements for honors in the College of Liberal Arts are:

- (1) The satisfactory completion of at least two hours of tutorial work.
- (2) The passing of a comprehensive examination in the field of specialization.
- (3) The attainment of a 2.2 cumulative index in the subjects of the major field.

Joan Helen Arnold	in <i>English</i>
Alfred Ells Austin	in <i>Chemistry</i>
Genevieve Marguerite Carlson	in <i>English</i>
Courtney Bennett Lawson	in <i>English</i>
George William LeSuer	in <i>Mathematics</i>
Sophia Perry	in <i>English</i>
William Arthur Petri	in <i>Chemistry</i>
Paul Bruce Pettit	in <i>English</i>
Audrey June Place	in <i>Romance Languages</i>
Josie Anne Procopio	in <i>Romance Languages</i>

Departmental honors have been awarded to the following students upon recommendation of the head of the department and by vote of the faculty. The requirements for honors in the New York State College of Ceramics are:

- (1) Recommendation by the head of the department.
- (2) A cumulative index of 2.2 or better in the entire course.

David Leon Armant	in <i>Ceramic Engineering</i>
Robert Henry Dows	in <i>Glass Technology</i>
Robert Douglas Manning	in <i>Industrial Ceramic Design</i>

Samuel Forman Walton, Sr.

HONORARY DEGREES**DOCTOR OF MUSIC**

Ray Winthrop Wingate

DOCTOR OF DIVINITYJames Currie McLeod*
George Hoyt Allen, Jr.**DOCTOR OF SCIENCE**Robert Augustus Weaver
George Barton Cutten

RAY WINTHROP WINGATE presented by Dr. Kamiel Lefevere.

Mr. President:

From my very first contact with Professor Wingate and his work with the carillon, I had the firm conviction and satisfaction that he had the ability, energy and enthusiasm for the instrument. His keen understanding of what is required of a carillonneur in his duties toward the community and his great energy to accomplish "a great deal in a short time" have been an inspiration to the entire Guild of Carillonneurs of North America. His gay disposition and friendly joviality are clearly reflected in his playing, thus creating the right atmosphere of good, sound carillon music; worries and troubles are forgotten for a while by the people and the mission and purpose of the carillon reaches a high level under such ideal conditions. The few years of hard work and study by Professor Wingate as carillonneur have classified him already among the better carillonneurs in the country and the art has gained considerably under his influence.

The beauty of the old bells, by master bellfounders, and the enthusiastic interpretation by Professor Wingate form a perfect combination for a successful future of the Davis Memorial Carillon among the singing towers in this world.

Ray W. Wingate was born in Lawrence, Massachusetts. He graduated from the Lawrence High School in 1906, and in 1910 graduated from the New England Conservatory of Music in Boston.

From 1910 to 1912 he was a teacher of voice, glee club, and public school music at Emporia State Teachers College, Emporia, Kansas. September, 1912, Mr. Wingate was appointed Director of Music at Alfred University. In this capacity he has been director of the University band and orchestra for thirty years, teacher of voice, organ,

* CONFERRED FOUNDERS' Day. NOV. 0, 1941

harmony, theory, public school music, etc.; organ soloist for more than 600 organ vespers; chapel accompanist; assembly song leader; Student Army Training Corps song leader; composer and arranger and director of the men's and women's glee clubs in over five thousand performances; and since 1937 has been carillonneur of the Davis Memorial Carillon. Mr. Wingate has played 17 of the 54 carillons in the new world. He has played over 700 programs and has arranged almost 800 compositions for the carillon.

For thirty years he has been organist and choir director of the First Alfred Seventh Day Baptist Church. Few important events in connection with Alfred University and the town of Alfred have occurred without help and participation of Mr. Wingate with some form of music over this thirty-year period.

He has been baritone soloist in Boston, Massachusetts; Oratorio Soloist in Emporia, Kansas, and at Wasburn College, Topeka, Kansas; and soloist on numerous special occasions. Mr. Wingate has studied with Dudley Buck of the Eastman Conservatory; with Doctor Hull of Royal College, London, England; and at the Three Choir Festival School, in Herefordshire, England.

He is a member of Music Supervisors National Association, the National Music Teachers Association, and the North American Guild of Carillonneurs. He belongs to Phi Sigma Epsilon, Kappa Psi Upsilon (local fraternity), the Blue Lodge Masons, Chapter and Commandery Knights Templar.

Mr. President, it gives me great personal pleasure to present to you for the honorary degree of Doctor of Music, Ray Wintthrop Wingate,

President Norwood said;

Graduate of the New England Conservatory of Music, long-time director of Alfred's Department of Music, ready responder to endless calls for the exercise of your talent locally and in our wider area, nationally known carillonneur of the Davis Memorial Carillon, colleague and friend for thirty years of the present speaker, Alfred University now takes a faithful servant for three decades and adopts him as a son.

Therefore by authority of the Trustees of Alfred University acting under the Regents of the University of the State of New York, I admit you, Ray Winthrop Wingate, to the degree of Doctor of Music, *honoris causa*, in this University with all the rights, privileges, and obligations thereunto appertaining, and in token thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

JAMES CURRIE McLEOD presented by Dean Alfred E. Whitford.

Mr. President:

The man whom I have the honor to present for an honorary degree is well known in Alfred as a religious leader and a personal friend.

Born in the city of Buffalo, descended from a sturdy line of Scottish ancestry, he early found his interest in securing a thorough education and in training himself for usefulness in the service of his fellowman. Receiving his preparatory training in Lafayette High School in Buffalo and in Mercersburg Academy, he spent four fruitful years of undergraduate study at Middlebury College, and was graduated from that institution in 1926 with the bachelor of science degree. This was followed by three years at the Yale Divinity School where he continued his studies in preparation for the Christian ministry. Yale conferred on him the degree of Bachelor of Divinity in 1929.

During these years of study in both college and divinity school, he not only participated in most college sports, but served as coach as well. Furthermore, while in New Haven, in connection with his training for his chosen life work, he served with outstanding success as minister of three different churches.

Twelve years ago, after the completion of his course in the Divinity School, he came to Alfred as the first full-time Chaplain of the University. For eleven years he served students and community in a dynamic and significant manner. He was a friend and counselor to all students. He advised with many student organizations in their troublesome problems. He served as coach of our cross country teams for ten years, and during this period his varsity teams won six state championship and five championships in the Middle Atlantic Association of Colleges.

But most important of all were his ministrations as leader and speaker in the daily chapel exercises and as pastor of the Union University Church. Here he brought a versatility and an exceptional knowledge of a wide range of human affairs to his job that made his chapel talks and his sermons fresh and stimulating as he set forth with increasing spiritual insight the great ideals of the Christian way of life. He dissolved the doubts of those who feared that voluntary daily chapel exercises could not be successfully carried on, and made daily chapel a positive force in the life of the University to the extent that in his last year the chapel attendance reached the highest average of any year of his service as Chaplain.

Outside of Alfred, his services to young people's organizations and to his Christian denomination have been outstanding. His summers have usually been devoted to teaching young people in summer camps and conferences. He has served as President of the Conference of Church Workers of Universities and Colleges and director of

young people's conferences of both the Presbyterian Board of Christian Education and the Student Christian Movement. One year ago he resigned his position as Chaplain of Alfred University to take up a larger work with university students as the Director of the Westminster Foundation at Ohio State University.

Because of his character as a man and a minister of the Christian Church, because of his significant service to young men and women as a friend, counselor, and Christian leader, and because of his thorough scholarship and sound judgment in interpreting Christian ideals and principles, I take great pleasure in nominating James Currie McLeod for the honorary degree of Doctor of Divinity.

President Norwood said:

Graduate of Middlebury College and Yale University, preacher, lecturer, teacher, inspirer of young people at their varied conferences, wise counselor to youth in all its personal and associated problems from athletics to fraternities, honored leader in Alfred's religious life for over a decade, and now the successful director of an intensive religious program of your own great church for the students of Ohio State University, Alfred University gladly recognizes these achievements and welcomes you to the ranks of her adopted sons.

Therefore by authority of the Trustees of Alfred University. I admit you, James Currie McLeod, to the degree of Doctor of Divinity, *honoris causa*, in this University, with all the rights, privileges and obligations belonging thereto and in evidence thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

GEORGE HOYT ALLEN, JR., presented by Dean Ahva J. C. Bond.

Mr. President:

I am presenting for an honorary degree in Alfred University a gentleman who is altogether worthy of such honor.

He graduated from Hamilton College in 1908 with the degree of Bachelor of Arts. Hamilton also granted him the degree of Master of Arts in 1911. In that same year he was graduated from Auburn Theological Seminary, receiving the diploma of that institution. He took an added year of study at Union Theological Seminary in New York, specializing in Religious Education, and received the degree of Bachelor of Divinity in 1912. Pursuing at the same time studies in Columbia University he received from that institution the degree of Master of Arts in Political Science.

He was ordained to the Christian Ministry in the Presbyterian Church, and served as pastor of Brockport, N. Y. During the First

World War he served in the Army Y.M.C.A., spending eight months at Camp Green, North Carolina, and nine months in France. Following this service he was pastor in Fredonia, N. Y., and since 1923 he has been pastor of the First Presbyterian Church at Bath, N. Y.

He is a director of the Westminster Foundation of the New York Synod of the Presbyterian Church, a director of the Auburn Theological Seminary, and a member of the Board of Directors of the King's Daughters State Home at Dansville, New York. He is interested and active in all good enterprises in his own community.

He is listed in *Religious Leaders of America*, and in *Who's Who in New York State*.

I take great pleasure in nominating George Hoyt Allen, Jr., for the degree of Doctor of Divinity in Alfred University.

President Norwood said:

Son of Hamilton College, Auburn and Union Seminaries, and Columbia University, official of important organizations and foundations of your own denomination, unselfish leader in civic and philanthropic activities, beloved pastor, comforter, counselor and friend to the members of your church of which you have held the longest ministry in its century and one third of existence, Alfred University gladly recognizes these services and adopts you as one of her sons.

Therefore by authority of the Trustees of Alfred University acting under the Regents of the University of the State of New York, I admit you, George Hoyt Allen, Jr., to the degree of Doctor of Divinity, *honoris causa*, in this University with all the rights, privileges, and obligation thereunto appertaining, and in token thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

ROBERT AUGUSTUS WEAVER presented by Dean Major E. Holmes.

Mr. President:

The New York State College of Ceramics, engaged as it is in helping to develop the American ceramic industries; observes with much satisfaction the tremendous growth and development of our porcelain enamel industry during the past two decades. America is now independent of foreign nations in this important commodity which finds its way, in one form or another, into virtually every household in the land and is essential to the presently established scale of living in America. Annually the United States produces more than one-half billion dollars worth of products made from porcelain enamel. Of the

ceramic industries', only the clay products industry outranks it in importance. The development of the porcelain enamel industry has created jobs for thousands of workmen, a livelihood for hundreds of families and an outlet for scores of ceramic graduates. America now leads the world in this important phase of modern industry.

At this time it is my privilege to call to your attention the career and achievements of the man who has taken the lead in these important developments.

He was born at Bradford, Pennsylvania, in 1890. In 1912 he graduated from Kenyon college and started his industrial career which is characterized by a meteoric rise to the highest position that the industry has to offer. He started at the bottom of the ladder as assistant advertising manager of the Eclipse Stove Company of Mansfield, Ohio. However, his abilities were soon recognized by his promotion to the positions of advertising manager of the Favorite Stove and Range Company of Piqua, Ohio, and sales manager of the Porcelain Enamel and Manufacturing Company of Baltimore, Maryland. These positions, however, did not afford an adequate outlet for his abilities and vision with the result that he organized his own company. In 1920 he founded and became president of the Ferro Enamel Supply Company of Cleveland, Ohio, organized to design, build and install porcelain enameling furnaces, equipment and complete plants, and to sell the porcelain enamel frit manufactured by the Ferro Enameling Company of Cleveland. In 1929 he consolidated these two companies under the name of the Ferro Enamel Corporation, and has served as its president since its founding. With this company as a nucleus he developed a ceramic service that has become world wide in scope.

In 1933 his company took over the former Allied Engineering Company of Columbus, Ohio, thereby providing facilities for supplying the clay body branch of the ceramic industry with glaze frit, body fluxes, stains and the engineering service required for the construction and equipment of complete ceramic plants. Expansion continued at an increasing tempo until now the company operates plants not only in the United States but also in Canada, England, Holland, France, Brazil, Argentina and Australia.

Industrial courage, technical vision and, above all, unselfish devotion to the porcelain enamel industry in general instead of his own company exclusively, have characterized his methods, policies and objectives. He has developed the industry as a whole and his company has shared the benefits with competitors. In 1932 he sponsored at Cleveland, Ohio, the building of the first porcelain enamel on steel residence. In 1933-34 he co-sponsored with the American Rolling Mill Company a porcelain enamel on steel residence at the Century of Progress Exposition in Chicago. Similarly, in 1936 he promoted the por-

HONORARY DEGREES

celain enamel on Steel Exhibition Hall at the Great Lakes Exposition at Cleveland. These were pioneering ventures blazing the trail for things to come in housing.

In pointing the way to a new type of house he has not neglected the aesthetic aspects of human interests. He is a world-wide collector of enamel art ware. In 1939 he sponsored the manufacture of the world's largest porcelain enamel on steel mural designed by J. Scott Williams, which was displayed on the exterior of the Home Furnishings Building at the New York World's Fair and is now installed in the main concourse of the Union Terminal Building at Cleveland. This mural 72 feet long and 28 feet high is an outstanding work of art.

As a means of educating the industry and public in the great possibilities of porcelain enamel, he publishes a trade paper known as the *Enamelist*, which has a wide and effective circulation. He helped organize the porcelain enamel institute and was its first president. This organization brings together the entire enamel industry in the interest of the entire industry. He organized the Ferro Enameling School in 1927 with provision for instruction of his employees in the essentials of enameling art. Since then it has developed into the Ferro Forum which has met annually for the discussion of enamel problems. Neither has he neglected to support higher university education in enamel technology. His company maintains research fellowships in several ceramic institutions which enables students to earn their way through college, and he is the employer of the largest staff of ceramic graduates of any company of its kind in the country. He is a friend of higher education.

With all of this he has not neglected to be a good citizen. In his home city of Cleveland he is an honored and distinguished leader in civic affairs. He is a trustee of the Cleveland Museum of Art and of the Cleveland School of Ceramic Art and Playhouse. He is past president of the Citizens League of Cleveland and of the Ohio Civil Service Council. He is general chairman of the Cleveland Regional Committee of the British War Relief Society, Inc., and is active in the Civilian Defense work. He is a director of the National City Bank of Cleveland and the Standard Products Company. He is a member of the Cleveland Chamber of Commerce, the Masonic Fraternity and the following clubs: Clifton, Hermit, Mid-day, Union, Cole-don Mountain Trout and Question Club of Detroit.

This distinguished record has been achieved not by driving but by leading; not by coercion but by encouragement. He always has a ready and sympathetic ear for the problems, both personal and professional, of his employees and associates. As a result his professional success has been accompanied by the endearment of those who have been privileged associates with him. He is a distinguished represent-

ative of the modern democratic American philosophy of life.

Recognition has already been extended to him. The American Ceramic Society has elected him a Fellow. His Alma Mater, Kenyon College, has conferred upon him the honorary degree of Doctor of Laws and elected him to its Board of Trustees. Alfred University, interested as it is in ceramics, cannot ignore his distinguished services to ceramic education, the ceramic profession, the ceramic industry and to the cause of good citizenship.

Mr. President, it is a professional privilege and personal pleasure to present for the honorary Degree of Doctor of Science, Robert Augustus Weaver.

President Norwood said:

Native of our neighboring Commonwealth of Pennsylvania, son and trustee of Kenyon College, inventor, publisher, promoter of art. leader in civic affairs and war relief work, friend of employees and fellow manufacturers, practical teacher, traveler, founder and president of the great Ferro-Enamel Corporation with branch plants in South America, Europe and Australia, largest employer of ceramic engineers in the world, Alfred is honored in your presence here today, and proudly places you on the select roll of her adopted sons.

Therefore by authority of the Trustees of Alfred University, I admit you, Robert Augustus Weaver, to the degree of Doctor of Science. *honoris causa*, in this University with all the rights, privileges, and obligations thereunto appertaining, and in token thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

GEORGE BARTON CUTTEN presented by Dean Alfred E. Whitford.

Mr. President:

It is a privilege to present for an honorary degree the one whose stimulating address of the day has stirred the hearts and minds of all who have listened to him.

Born in Nova Scotia, graduate of Acadia College in that province, he came to Yale University to study for the gospel ministry. From Yale he received successively the degrees of bachelor of arts, doctor of philosophy, and bachelor of divinity. In all his student work he earned high honors, including a Phi Beta Kappa key.

When he entered college he was very much devoted to college sports and engaged in them throughout his course. He became an outstanding football player and captain of his team. On the Yale football

team he earned the reputation of being one of the hardest hitting centers in the game. He attributes much of his success in later life to the physical stamina and mental alertness which he received from his athletic activities, and especially from football.

During a period of twelve years, including his residence at Yale, he served as pastor of churches in New Haven and vicinity, Corning, N. Y., and Columbus, Ohio.

It is in the field of education, however, that his greatest contribution has been made. In 1910 he was elected to the presidency of his Alma Mater, Acadia College, and served in this capacity for twelve years. While he held this position, during the first World War, he enlisted in the Canadian Army and served as captain and then major, and later as chief recruiting officer for Military District, No. 6. After the Halifax explosion he was Director of Rehabilitation for the Halifax Relief Commission.

In 1922 he became the president of Colgate University and has continuously for twenty years served that institution in a very distinguished and significant manner. He has been eminently successful in strengthening Colgate's financial resources, in putting the institution on a sound financial basis, and in adding to its physical equipment both in buildings and campus improvements.

It was through his leadership that the well-known "Colgate Plan" of curricula and methods of instruction was initiated and has been carried on with such signal success that many features of it have been adopted by other colleges.

He is well known not only as a college president but also as an author of books, for he has published no less than seven books, largely in the field of psychology.

Mr. President, in recognition of this man of dynamic personality and forceful leadership in human affairs, in recognition of his large contribution to the development of American college education both as an administrator and author, I have the honor of presenting for the degree of doctor of science, George Barton Cutten.

President Norwood said:

Vigorous son of the Great Dominion north of us, graduate of Acadia College and Yale University, devotee of the strenuous life, master of many callings from steam fitter, through pastor and soldier to college president, one-time head of Acadia College, your first Alma Mater, builder of the modern academic and physical educational personality that is Colgate University, research delver as a psychologist into the mental and emotional mysteries that are the human mind, author of the dynamic address to which we have listened this afternoon, Alfred

University is glad to give you another Alma Mater by adopting you as her son.

Therefore by authority of the Trustees of Alfred University, I admit you, George Barton Cutten, to the degree of Doctor of Science, *honoris causa*, in this University with all the rights, privileges, and obligations thereunto appertaining, and in token thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

A RECORD OF GROWTH

AUDIT CERTIFICATION

NARAMORE, NILES & CO.
CERTIFIED PUBLIC ACCOUNTANTS
Lincoln-Alliance Bank Building
Rochester, N. Y.

OSCAR L. NILES, CPA.
ROBERT T. MORROW, CP.A.
FREDERICK W. RAPP, CP.A.

We have examined the accounts of the Treasurer of Alfred University for the fiscal year ended June 30, 19-12. Cash receipts and disbursements, as shown by the records, have been properly accounted for and changes in invested funds have been verified. Investment securities held by the David A. Howe Public Library as collateral to a five year note dated June 1, 1939 for \$60,000.00 were certified to us by James P. Coyle, Secretary. The balance of the securities have been verified by inspection.

Bonds and stocks shown in Exhibit A under "Cash and Investments held by Alfred University", and in Schedule A-2 "Endowment Fund Assets held by Alfred University", are carried either at cost or, in the case of gifts, at the market value at the time of donation.

This examination did not include the accounts of the New York State Schools of Ceramics or Agriculture, as shown in the Report of the Treasurer of Alfred University. Neither did we verify funds held for the benefit of Alfred University by the Seventh Day Baptist Education Society and the Seventh Day Baptist Memorial Fund, all of which are summarized in Schedule A-2 of the Report of the Treasurer.

Subject to the foregoing and the comments in our report, we certify that the Report of the Treasurer of Alfred University for the fiscal year ended June 30, 1942, as reflected in Exhibit A, Schedules A-1 to A-6 inclusive, Exhibit B, Exhibit C and Schedules C-1 to C-3 inclusive, properly set forth the true financial position of the University as at June 30, 1942, and the results of its operations for the year then ended.

Rochester, New York
