Film Screening: 'All Fracked Up'

SAFE (Students Acting for Equality) are back with DOCUMENTARY TUESDAYS!

Each Tuesday at 7p.m. in Holmes Auditorium we will be screening documentaries that open our eyes to environmental and human rights issues in the United States and abroad!

The first in the series is "ALL FRACKED UP, a Satirical Documentary" about hydro-fracking in the Marcellus Shale by Jeff and Jodi Andrysick!

(from the directors)

"All FRACKED UP" is a hard-hitting documentary which shows that hydro-fracking is an extreme technology used to obtain extreme energy with potentially extreme dire consequences. Only 6 out of 100 people have gas leases; however, all of us may suffer terrible consequences such as ruined water wells, devastated property values, rural zoning turned into industrial sites, big city pollution, 24/7 loud noise pollution from large trucks, drilling equipment, and compressor stations. Just watch the movie to see what has happened in Pennsylvania.

One highlight of the movie is a revealing interview with Anthony Ingraffea, PhD, a Cornell University professor and researcher who helped develop the technology used to hydrofrack the Marcellus Shale in PA but now opposes the method because of its inherent dangers. Also, interviews with Joseph Heath, Esquire, a long-time environmentally active attorney who just tells it the way it is.

You'll also see the sad horror stories from Dimock, PA as various residents speak about their ruined water wells and property values. And there's much, much more!

Tuesday, Sept. 14 @ 7 p.m. in Holmes Auditorium
We look forward to seeing you there!
