Washington Semester Program for Spring 2011

Dr. Heineman of the Social Sciences Division is now taking applications for the Washington Semester Program for Spring 2011.

The Washington Semester Program is sponsored by American University and enables students to spend a semester in Washington, D.C., studying public policy in a variety of areas. Students who have participated in the program have used their experience and contacts to obtain excellent positions in Washington and elsewhere.

In addition to taking coursework, students will meet with government officials and political leaders in seminar sessions and will participate in an internship of their choosing.

In addition to its major focus on American national government, the program also has a number of options utilizing non-governmental resources in the Washington area, including working with interest groups and art and cultural institutions. Some of these are: journalism, law enforcement, public law, economics, international business, international organizations, and women and politics.

Course credits and grades are fully transferable to the student's transcript. Students can obtain additional information on the program at www.washingtonsemester.co... Juniors or seniors are eligible to participate and scholarships are available.

Over the past year, Steve Patterson and Kristin Edward Brown attended the program. Those interested should contact Dr. Heineman in room 209 of the Olin Building. Applications should be completed by Friday, Oct. 29, 2010.

Film: 'A Chemical Reaction - The Story of a True Green Revolution'

Documentary Tuesdays with SAFE (Students Acting for Equality)

"A Chemical Reaction: The Story of a True Green Revolution" Directed by Brett Plymale

"A Chemical Reaction," is a 70-minute feature documentary movie that tells the story of one of the most powerful and effective community initiatives in the history of North America.

It started with one lone voice in 1984. Dr. June Irwin, a dermatologist, noticed a connection between her patients' health conditions and their exposure to chemical pesticides and herbicides. With relentless persistence she brought her concerns to town meetings to warn her fellow citizens that the chemicals they were putting on their lawns posed severe health risks and had unknown side effects on the environment.
