Managed Student Printing Program

In the spring semester of 2011, ITS computer labs and AU's libraries are going to implement a Managed Printing Program for students. The purpose of this initiative is to reduce unnecessary printing in public computer labs on campus.

Using a print management software program called PaperCut, AU will assign each student a set number of free printed pages per semester. After a student has exceeded the number of free prints, he or she may add money to his or her account and continue printing. Each month, the student will be charged for the extra amount.

For more information, please visit the Managed Student Printing Program Web page.

"ALL FRACKED UP" is a hard-hitting documentary which shows that hydro-fracking is an extreme technology used to obtain extreme energy with potentially extreme dire consequences. Only 6 out of 100 people have gas leases; however, all of us may suffer terrible consequences such as ruined water wells, devastated property values, rural zoning turned into industrial sites, big city pollution, 24/7 loud noise pollution from large trucks, drilling equipment, and compressor stations.
