

FOUR FOREIGN PLAYS TO GRACE FOOTLIGHTS AT "WEE PLAY HOUSE"

"Hidden Treasure," "Der Prozess," "La Surprise d'Isidore," and "Meen-Toe," Coming Thursday Night

PROF. JOHN B. STEARNS AUTHOR OF "MEEN-TOE"

The presentation of four short plays next Thursday evening at the Wee Playhouse by the "foreign" clubs will be a unique event. Two of the plays are to be given in the foreign languages. For the benefit of those who do not readily understand German or French, thorough synopsis will be printed on the programs. Besides, plays with simple plots have been chosen, so that no one need feel out of place in the "foreign atmosphere." The performance Thursday evening will be the first of its kind in Alfred and the four clubs concerned are initiating it in the hope that it may become an annual event.

The program consists of three rousing comedies and one tragedy. If all the humor in modern literature borrowed from the Latin writers Plautus and Terence were eliminated, this would be a melancholy world, indeed. One of the best of the comedies of Plautus is "Hidden Treasure. Prof. Stearns has rendered this five-act play into an English version of less than thirty minutes in length, but containing all the essential humorous elements of the original.

The German play, "Der Prozess" (The Lawsuit), is a popular one-act comedy by Benedix. It depicts the reconciliation of two bitter enemies by the simple means of locking them in the same prison cell. It is as true as life and full of mirth.

"La Surprise d'Isidore" is French from start to finish. The scene is laid in a doctor's office next door to an insane asylum. Isidore wants to surprise his friend, the doctor, by dropping in on him unexpectedly. But he is mistaken for a crazy man, and the surprise is not all on one side.

The fourth play, "Meen-Toe," by Prof. Stearns, is based on an old Chinese legend. It is tense, terse, and tragic. Both plot and setting of this little drama are unique and pleasing.

"ANDY" DROMAZOS MAKES APPALLING DISCOVERY

A RESTAURANT CEMETERY
Did anyone ever hear of a cemetery in a restaurant? The obvious answer is negative, but Andrew Dromazos, proprietor of the Students Candy Kitchen and Lunch Room has made an affirmative statement with regard to his place of business.

"I was surprised," said Mr. Dromazos, "to find such a condition existing in my emporium, but statistics show that the same situation is prevalent throughout the whole of this magnificent country."

When an astonished look had passed over the countenance of the Fiat reporter, and eyes had blinked in dumb

VARSITY FACES GENEVA ON CINDERS FRIDAY AFTER NOON

Purple Track Men Ready for Initial Test in Track and Field Events

SEVERAL RECORDS EXPECTED TO BE BROKEN IF FAIR WEATHER PREVAILS

On Friday afternoon at 1:30, the Alfred and Geneva College track teams will start the first contest of its kind ever held here. This dual meet is expected to show some superior athletic ability. Every man of the two teams will do his utmost to gain the victory for his college. A close, exciting struggle is sure to result.

The weather is, as always, the uncertain factor in the success of the meet. Everything possible will be done this week to put the cinders in fine condition and to equip properly Alfred's runners. The most essential preparation must be done, however, by the men themselves.

"No track athlete can do his best in this meet," states Coach Wesbecher, "unless he voluntarily submits to strict training rules, including regular practice, plenty of rest and a carefully planned diet."

The program of events for Friday afternoon includes: 100 yard dash, mile run, 220 yard dash, 220 yard low hurdles, discus throw, shot put, 440 yard dash, half mile run, high jump, pole vault, broad jump and relay race. A two mile run will perhaps be added to this list.

Alfred's track men have not been definitely chosen for the team. Time trials will be run several afternoons during this week. The coach is at the field every afternoon, and track men should practice at that time.

While several sprinters, runners and jumpers stand out prominently among the candidates, there is no use of prophesying the result of any events. Every man representing "the purple and gold" can be counted on to do his best.

UNIV. OF ILLINOIS DIRECTOR ADDRESSES CERAMIC MEN

Dr. E. W. Washburn, director of the Ceramic Department of the University of Illinois, gave a technical address last Tuesday afternoon to an interested audience of engineers that filled the Babcock Hall lecture room. The detailed treatment of the subject "Determination of Porosity" was especially helpful to the large number of Ceramic students present. In seeking to discover a practical standard method of testing porosity, Dr. Washburn has done much research and has gained valuable data.

The speaker was introduced by D. Robison '21, chairman of the local branch of the American Ceramic Society. After the meeting Dr. Washburn met several of the more interested students.

The following morning he journeyed to Rochester to attend the meeting of the American Chemical Association.

"BILL" LEACH ADDRESSES STUDENT BODY AT ASSEMBLY

Former Varsity Athlete, Now Buffalo Pastor, Speaks On "Democracy Of Red Blood"

ONE OF ALFRED'S REPRESENTATIVE ALUMNI

"There is nothing in this world quite like the democracy of red blood," declared Rev. William Leach, in his inspiring address at Assembly last Wednesday morning. "Every man has an equal opportunity in a democracy of this nature, and every man can fit himself for it."

Rev. Leach went on to say that of the many democracies of the world, there was one that really counted, and that was the birthright of every thinking man, the democracy of real faith in himself through the medium of red bloodedness, and obedience of the golden rule.

The fact was emphasized that a man with determination can make something of himself, a man who has self respect, loyalty, and honor, no matter what has been or is, his station in life. From the presidential chair to the most lowly laborer, every man exists in a particular sphere, the adaptation of his intellect and of his innate spirit.

The spirit of red blood is seen throughout America. It is not the spirit of the conqueror, but the spirit of the sportsman. It permeates the democratic atmosphere of this great nation, and it makes for a greater democracy, and a more powerful, higher minded nation.

Rev. Leach's address was keenly interesting, and it portrayed the spirit of the man who delivered it. The former Alfred student and athlete, now engaged in active Christian work, is a splendid example of the democracy of red blood.

INTERSCHOLASTIC MEET WILL BE LARGEST IN ALFRED'S HISTORY

339 Men Representing 29 Schools will Compete on May 18th -- May be More Entries Close May 10

The 13th annual Interscholastic Track Meet of the University promises to be the largest in the history of these events. Already Assistant Manager Holley has received 339 entries representing 29 high schools in Western New York and Pennsylvania. The number of entries this year doubles that of those received in any previous year. Entries for the meet close May 10th. A detailed account as to schools entered, etc., will appear in the Fiat Lux next week.

DELTA SIGMA PHI BANQUET AT WELLSVILLE COUNTRY CLUB

Alpha Zeta Chapter Stages Final Fraternity Ball of Year--Many Guests Present

DELEGATES FROM OTHER FRATERNITIES ROYALLY ENTERTAINED

The second annual banquet and dance of Alpha Zeta chapter was held on Saturday evening, April 30th, at the Wellsville Country Club. The members and guests spent the evening in a most enjoyable manner. The home atmosphere of the club house, the artistic decorations, the well-served banquet, and the fine music all combined to make the occasion one of the most successful social events in the history of the chapter.

At 6:45 P. M. the banquet was served to the assembled guests. The seven small tables were tastefully decorated in the fraternity's colors, green and white. In the center of each table was a green candle surrounded by green ferns and carnations. At each place was a white carnation, the fraternity's flower, and a novelty dance program. The banquet as served by C. C. Smith, would have needed no such charming decorations as were present, to have been successful.

The strains of Houghton's orchestra proved to hurry the banqueters

through the last two courses and prevented any tendency to linger at the tables. The guests adjourned to the dance hall, where dancing commenced at 8:30. Owing to the disagreeable weather, the porch was left enclosed and the small heaters added to the large log fireplace in the reception room gave one a comfortable feeling of home. Decorations of any kind in this atmosphere would have been superfluous. Dancing continued until twelve o'clock.

The faculty members present were: President and Mrs. Davis, Prof. and Mrs. Bole, and Prof. and Mrs. Potter. The guests of the evening were Coach Wesbecher, Mr. Plank representing the Klan Alpine fraternity, Mr. Stamm representing the Eta Phi fraternity, and Mr. Anderson representing the Theta Gamma fraternity.

The one big disappointment of the evening for all was the absence of Oliver Ferry, the president of the chapter.

UNIVERSITY RACQUET STARS IN FOR BUSY WEEK

The university tennis tournament, scheduled to begin yesterday morning, has provoked much interest about the campus, and a large number of entries have been received. All students are requested to watch Bassett's window for a placard on which he schedule will be posted. Matches should be played off at once.

The Varsity schedule is nearing completion. Manager Whitford has closed negotiations with Colgate for a match there upon May 21st while Hamilton may be played on the same trip.

During the present week all courts are reserved for tournament competitors, but may be used by other members of the tennis association at a time when no tournament set is being played.

Prospects for a big tennis season were never better, and despite the inclement weather of the past few days, the courts are in excellent condition.

HORNELL SECRETARY AND WORLD WAR VETERAN TO ADDRESS Y. M. C. A.

The Y. M. C. A. meeting planned for Sunday evening, May 8th, will probably be the largest and most interesting of this term. Mr. Joseph C. Smith, Secretary of the Hornell Y. M. C. A., is expected to give a review of his experiences as a British lieutenant and an American Y. M. C. A. worker. All college men are urged to attend this meeting, to be held at 7:15 Sunday evening, at the Gothic.

INTER-FRATERNITY LEAGUE RACE TIGHTENING

Delta Sigs Lead by Margin of One Game

Standing of the Clubs:

Interfraternity League			
	W	L	PC.
Delta Sig	3	0	1.000
Eta Phi	2	1	.666
Burdick Hall	1	2	.333
Klan Alpine	0	3	.000

Each team has three more games to play. There will be no games this week on account of the preparation for the dual meet with Geneva next Friday afternoon.

ETA PHI WINS EXCITING VICTORY OVER BURDICK HALL

At the athletic field last Tuesday afternoon, the Eta Phi ball-tossers staged a win over the Burdick Hall nine by the score of 5-3. The game was hard fought throughout, and there were several disputed decisions, but withal it was one of the best "interfraternity" games of the season.

Lyman began on the mound for the Eta Phi, but was replaced in the fourth by Witter. Ahern went the route for Burdick Hall.

The teams ran along evenly for five innings, but in the 6th, the Eta Phi managed to sew up the game by driving two runs across the plate.

Features of the game were the hitting of Coffin and Ahern, and a one hand stab of Newton's drive by Clarke in right field.

The summary:

	R	H	E
Eta Phi	1	1	0
Burdick Hall	1	1	0

Umpires: Bliss and Banks.
Continued on page two

**KLAN DEFEAT IN LOOSE GAME
DELTA SIGS WIN EASY
VICTORY**

The Delta Sigs won an easy victory over the Klan Alpine nine last Monday afternoon by the score of 10-1.

With the exception of the first inning the Delta Sigs scored in every frame, many errors contributing toward the high final score.

Griffith pitched good ball for the Klan, but his efforts went for naught as the support accorded by his teammates was more than ragged.

Stryker held the Klan to two hits, and at no time was forced to exert himself.

Line up and summary:

	R	H	E
Delta Sig	0 6 2 2 x	10	8 2
Klan Alpine	1 0 0 0 0	1	2 9

Batteries: Stryker and Holley; Griffith and Sanford.

Umpires: Lyman and Banks.

PROF. WINGATE ATTENDS CONFERENCE

Prof. Ray W. Wingate left Alfred, Monday night to attend the Eastern Music Supervisors' Conference at Boston, Mass. This conference will continue for four days, May 3, 4, 5 and 6.

MOVIES

The biggest treat in movies, which Alfred can expect to have, is scheduled for Wednesday evening, May 4th, when the Athletic Association will show at Firemens Hall, the official Signal Corps film of the World War.

A HIGH FLYER

A jolly young Chemistry bluff, While making a compound of stuff, Held a match to the vial, And after awhile, They picked up his teeth and a cuff. Ex.

President Stamm of the Eta Phi received a rather warm reception when he returned to the fraternity house early Sunday morning. His "brothers," mistaking him for a sneak thief who has been prowling about of late, had almost lulled him to dreamland in the darkness before he proved his identity. Charles is now convalescing.

Prof. and Mrs. George Bole, Prof. Waldo Titsworth and B. C. Davis, Jr., were in Rochester last week attending a convention of the American Chemical Association. Prof. Bole was one of the principal speakers at the meeting.

The twenty-third regular meeting of the Student Senate was called to order April 27, 1921, by the vice-president. The rules concerning smoking on the campus were explained to Mr. Oppenhyim.

**HARVARD UNIVERSITY
DENTAL SCHOOL**

There is unlimited demand for skilled dentists and specialists in dentistry. This school offers a most thorough and efficient training in this interesting profession. For those who wish to specialize there are courses in Oral Surgery, Orthodontia (straightening the teeth) and other branches. Instruction by leading dentists of Boston and vicinity. Up-to-date equipment with unusual opportunities for practical work. A college certificate indicating one year's work in college English, Biology, Chemistry, as well as high school or college Physics, required for admission. Write for particulars.

What Makes the Firefly Glow?

YOU can hold a firefly in your hand; you can boil water with an electric lamp. Nature long ago evolved the "cold light." The firefly, according to Ives and Coblenz, radiates ninety-six percent light and only four percent heat. Man's best lamp radiates more than ninety percent heat.

An English physicist once said that if we knew the firefly's secret, a boy turning a crank could light up a whole street. Great as is the advance in lighting that has been made through research within the last twenty years, man wastes far too much energy in obtaining light.

This problem of the "cold light" cannot be solved merely by trying to improve existing power-generating machinery and existing lamps. We should still be burning candles if chemists and physicists had confined their researches to the improvement of materials and methods for making candles.

For these reasons, the Research Laboratories of the General Electric Company are not limited in the scope of their investigations. Research consists in framing questions of the right kind and in finding the answers, no matter where they may lead.

What makes the firefly glow? How does a firefly's light differ in color from that of an electric arc, and why? The answers to such questions may or may not be of practical value, but of this we may be sure—it is by dovetailing the results of "theoretical" investigations along many widely separated lines that we arrive at most of our modern "practical" discoveries.

What will be the light of the future? Will it be like that of the firefly or like that of the dial on a luminous watch? Will it be produced in a lamp at present undreamed of, or will it come from something resembling our present incandescent lamp? The answers to these questions will depend much more upon the results of research in pure science than upon strictly commercial research.

We are asked the question from time to time, "Why doesn't Alfred enter athletic relationships with St. Bonaventure? In answer to this question the greater part of the present generation of Alfred students confess that they don't know, and the remainder pause in an attempt to recall some story about a football game that has been handed down to them from a former generation, which was the cause of the two schools severing athletic relationships.

Alfred and St Bonaventure are colleges of about the same size located not more than sixty miles apart. The two institutions are athletically about on a par. Both colleges hold athletic relationships with practically the same schools. Why not enter athletic relationships with each other?

There are, no doubt many who would object to again meeting St. Bonaventure on the athletic field. Those who remember the football game at Wellsville in 1916 probably will still harbor something of a grudge. It should be remembered, though, that both schools have now a new generation of students, and that there is seldom a story with but one side. Why should a football game played five years ago, which so few of us remember, prevent the two colleges, which are in such easy access to each other, and which are so evenly matched, from again meeting on the athletic field?

Games between Alfred and St. Bonaventure would, on account of the close proximity of the colleges, be inexpensive. Such games would necessarily excite great interest and enthusiasm, and draw large crowds. Why then do we not patch up our athletic relationships with St. Bonaventure?

Coach Wesbecher has recently received a letter in which St. Bonaventure manifests a desire to resume athletic relationships in a dual track meet. This letter not only affords Alfred an opportunity to exhibit her spirit of fairmindedness, but it is also a chance to pave the way for a time when we can again meet them in all five sports. Why not grasp it?

Oliver Ferry '22, is at his home in Almond recovering from a nervous breakdown. For several weeks he has continued his college studies and activities while in poor physical shape. Whether he will be able to resume his course this term is questionable. The students of Alfred regret to learn of his condition and hope for his speedy recovery. It is confidently expected that Ferry will return to Alfred in the fall in fine shape to lead the football team through the season.

Owing to the absence of Prof. Wingate this week, the dates for the comic opera Pinafore and the Glee Club will be reversed. The Alfred Concert of the Glee Club will be held on Thursday, May 12, and Pinafore will be presented on Thursday, May 19.

DEMOCRACY: A PROMOTER OF WORLD PEACE

John McMahon '23

Our proposition is peace. Not peace through the medium of war, not peace through the labyrinth of of intricate and endless negotiations, but peace. How far have we progressed with this point in view? Just how many stones have we laid in this direction? We have progressed just as far as we have promoted democracy! We have laid as many stones as we have made democracies! In more pointed words, world wide democracy is the greatest medium through which world peace can be realized.

Democracy takes from the hands of a select few and places into the hands of everyone that which is the foundation of a nation's prosperity and peace, that government of the country. It advances education which is the parent of mutual understanding, harmony, and peace. It appoints men who are ever anxious to promote the welfare of their country, men who appreciate the bounties of peace and the uselessness of war. It advances a code of laws by which the world can be governed peacefully. It instills into its people the love of home, pride of country, and, an appreciation for all that is good and worthy. In a few words democracy promotes peace to the utmost.

Germany is rotten to the core! She has done everything which lowers the standing of any nation! She has made treaties and broken them! She has sunk Red Cross ships! She has taken every advantage of the weak! She has damned the United States! She has ordered her men out, in God's name, to wreck homes, maltreat women, mutilate helpless children, and to kill. And while she looked upon her created "Hell" she laughed. But do not let us drag a people's name into the mire without question. Was it

Germany or was it that infernal system of government? The Kaiser of Germany craved power. He not only talked his people but even himself into believing that he was next to God! With this conception he reached out for Belgium, took a sweeping glance at France, stared blindly at the British Isles, and laughed mockingly at the United States. He gathered all of the sly and evil tricks of his associates. He set spies in all nations to work up discontent, to spread heathenish lies and to smash all government machinery. The honor of Germany never entered his head. The sacrifice of life he was about to make at the altar of power, never jolted him. The peace of the world was lost to his view. What he did think of was entirely of interest to Wilhelm Hohenzollern alone, and so it was by the power of one man, this world was thrown from a seeming peace into a "hellish" uproar.

Autocracies and similar types of government are forms of barbarism,
Continued on page four

PREP SCHOOL MEN ENTERTAINED AT ALFRED

Ten members of the Senior class of Newark, N. Y., high school, including several of their leading athletes, were entertained by the Alfred fraternities from Sunday noon until yesterday afternoon. The visitors were shown about the campus, and given an idea as to the various phases of college life. Four of these men have already registered in the Ceramic School, and others may enter Alfred College.

The boys made an excellent impression here, and good things are expected of the Newark contingent next year. Through the efforts of Prin. William Buck of the Newark schools, this visit was made possible. Buck was a former Alfred football captain, and graduated in the class of '16.

DEMOCRACY: A PROMOTER OF WORLD PEACE

Continued from page three

and never shall there be peace until every such form of government is out of existence. Germany has been taken as an example because her acts and deeds are so clear in our minds. But, if we look back into the very depths of history we could see the same thing happening over and over again, and if we might look into the future, similar sights could be seen until all nations have inaugurated a democratic form of government. Slowly, but surely, the autocrat is losing his power, but not without the sacrifice of life and peace.

What governments came to Germany's aid? What governments sanctioned Germany's deeds? What governments joined in her fight? Austria, Turkey and Bulgaria! There they are; all governments of similar mechanism. Did England? Did France? Did the United States? Certainly not, because their principles are higher, worthier and stronger.

However, in our enthusiasm over democracy, we must not forget that someone who is the real instigator of peace. Our Father placed upon this continent a new nation! That nation was placed for a purpose. That purpose was to teach the world many lessons which it had failed to grasp. The big lesson it was to teach the world was that the way to peace was through Christian government, and that the Christian government was the democracy. Our nation was placed here to be a shining example of His decision. His protection brought us victory over England. His guidance brought Cuba into our hands, and His word decided the last war. He showed to the world again that in His judgment the democracy was for peace.

The great European War has taught us many things that we did not know, and some things that we had forgotten. We have to admit that the democracies of the world are apt at any time to be attacked, and the strength of our organizations is to be tested. We must be able to stand the attacks of these nations and to hold our place among the nations of the world. Therefore, it should be our duty as American citizens to see that our country is prepared for what ever comes to pass. We were shown again that a question is never settled by the sword. A question always ends in a battle of wits. It is the statesman and not the militarist who settles disputes. Therefore, it should be our aim in life to educate the peoples of all nations in order that they may some day have as good statesmen as we, to teach them the efforts which the democracies of the world put forth for the peace of the world. All these things go in making the world safe for democracy and in establishing peace. To the democracies of the world, at this particular time, comes a great chance and opportunity. Another nation is ready for our creed.

Now let us take Germany from the rut. Let us establish in that country a democracy. As soon as we have done that we have done a lot toward world peace. That form of government, with pride in itself, will bring Germany to the top. It will educate Germany, it will teach the Germans the wealth and resources of their country. There will grow up from the ignorant mass, a people who will make their country proud of them, and who will become leaders in the world's work. There will be enrooted in them the love of their home and the honor of their country and respect for their flag, which will be different from the love, honor and respect that was inspired by the prick of a bayonet or the clout of a boot. The Germans would learn the real meaning of peace as we have learned

it. Thus another nation will be won over to our side and world peace be advanced so much further.

In order to advance democracy as it should be advanced, we must keep our strong faith in our government and our Protector! We must go out and teach His religion and principles! We must keep the progress of our country ever increasing. We must individually, have due respect for our flag and down the red rag which is becoming such a menace to the world. Let us do these things, let us promote democracy, and let us have peace.

Intercollegiate basketball for girls is being given prominence at Transylvania University, Kentucky, a co-educational college of about 400 students. A schedule of six games is played each season with girl's teams from other colleges of the state. Ex.

GLEE CLUB ACTIVITIES

A week ago Monday evening, the Glee Club appeared in Scio, and last Wednesday night, they journeyed to Westfield, Pa. Good results were reported in both villages, but there was a larger crowd present in the New York state town.

Several other short trips remain on the Glee Club calendar before the annual "home-coming" performance at Firemens Hall.

"ANDY" DROMAZOS MAKES APALING DISCOVERY

Continued from page one

amazement, "Andy" hastened to explain.

"You see its this way," he smiled as philosophically as did his ancestors of the far famed peninsula. "Here in America people do a great deal of talking. The jaws of men, women and children, with possible emphasis on the word women, are usually busily employed. When not in the act of speech or in the mastication of food, there must be a substitute for this rapid jaw action.

"Now in evolving a substitute for this natural jaw wagging tendency, some years ago a gentleman named Bill Wrigley presented a scheme. Chewing gum thus came into being, and since that time has gained great popularity. Now, if you'll come here a moment, I'll show you how it has affected my establishment."

Together the two men approached the lunch counter. There is perhaps a foot of extra space where the smooth top of the bar overlaps its underpinings. The visitor peered underneath.

"Now do you see my graveyard?" queried Andy?

The sight was amazing. Small round bits of grayish white stood side by side with larger masses of brownish black. Some times they were amalgamated, and hung like stalactites in a cavern. Numerous as flakes of snow in midwinter, silent and apathetic, the viscid particles of waxy glucose, drained of their flavoring and of their pepsin—if ever that had any of that last named ingredient—presented a solemn spectacle to the eye.

"Death is a great leveller," said "Andy." "Here Beech Nut, Black Jack, Sen Sen, Doublemint, Spear-mint, Juicy Fruit, Fan Tan, Beeman's

and all the others meet on a common plane."

The reporter had a Greek testament in his hand. He opened the Book and passed it to Mr. Dromazos. Lack of proper type prevents a printed repetition of the service.

Should anyone care to visit the cemetery he may have the privilege free between the hours of six-thirty A. M. and twelve midnight on any day of the week.

Mr. Dromazos requests, however, that future corpses be elsewhere interred.
