

## **AU Graduates Find Their Place**

11/13/98

Alfred, NY -- For the fifth year in a row, almost every student who graduated from Alfred University is either employed or enrolled in graduate or professional school. The placement rate for the class of '97 stacks up well with figures from 1993-96, according to a survey by AU's Career Development Center. Last academic year, the Center surveyed the class of 1997 by mail and phone. Out of 540 graduates, a total of 352, or 65 percent, replied to the survey. In summary, the results were: 71 percent of the class of '97 were employed. 23 percent were enrolled in graduate or professional school. 5 percent were available and looking for work. 1 percent were not seeking employment. The percentage enrolled in graduate or professional school has gone up every year since 1994.
