HALF OF ALFRED STUDENT BODY

Poll of Student Opinion On War vs. Peace

As a result of the War-Peace question, an interesting assembly on Thursday, many interesting items have been brought to light. First and foremost, fifty per cent of the Alfred student body present would order no circumstances fight if drafted; and the remaining thirty percent would volunteer for active service disregarding the program, Thursday, including the on war, one which was defensive, or one in which the United States had either or at first set out by arbitrary measures.

An interesting thing which came to light was the fact that a good many students took the opportunity to offer their personal opinions as to why they would or would not support the war. One of these was:

"I would do all in my power to prevent war, commodities, etc., but if war were declared against my country, or if it were declared against it in any way, I would go into the service."

From "First in War," by Lawyer Granady.

An old army colonel is acting as a speaker, "Chicago has been termed a "New York of the West." To Be Celebrated Thursday morning, February 9th, on the campus of the University of Buffalo. CONCERNING CIVIC NEWS
Alfred Won!

Your team was when all seemed lost. The Fiat Lux joins in extending sincere congratulations to the team and the coach that scored this impressive comeback.

The following report has been made to say: "While there is life, there is hope." Transposed to Alfred's case this old saying should read: "While there is life, there is hope." This decision has arisen. This must be due to the fact that the Buffaloes have been the undiluted winners for the past two seasons and the whole team showed their spirit by overcoming the odds of past defeats. Buffalo's impressive record, and a last minute lead. The students have a reason to be proud of their team and their coach that scored this impressive comeback.

The essence of success is always a sort of preachment to the win. Result—'the breaks and spectacle. Always, here in Alfred, we have there is life, there is hope”. Tu in Kentucky, where they have pretty women, fast horses, and blue grass, there grows a tobacco called White Burley. It doesn't grow anywhere else in the world.

There is a type of this White Burley that is best suited for pipe smoking. It is neither too thick nor too thin. It is not light and chatty; at the same time, it is not rank or strong. "U. S. Type 31" is the government classification for White Burley.

Since no other pipe tobacco has yet been found which seems to equal White Burley, this is what we use in making Granger Rough Cut.

Next, we use the Wellman Method, a famous 1870 method of making pipe tobacco, to give Granger its fine flavor and fragrance. Then, too, Granger is "Rough Cut"—just like they used to "whittle" their tobacco off a plug with a jack-knife. It smokes cool, lasts longer and never gums a pipe.

And finally, we want to sell Granger for 10 cents. Good tobacco—right process—cut right. So we put Granger in a sensible soft foil pouch instead of an expensive package, knowing that a man can't smoke the package.

Granger has not been on sale very long, but it has grown to be a popular smoke. Folks seem to like it.
