New International Relations Club To Operate With Program of Speakers, Next Year

UNDER AUSPISES OF CARNEGIE ENDOWMENT

The contagion of local groups in achieving national recognition seems to be prevalent on the campuses of the United States. Two weeks ago the Fiastlight Club announced their acceptance to membership by Theta Alpha Pi, National Dramatic Organization. On Tuesday, May 11th, the Alfred Peace League became an International Relations Club. The main purpose of these clubs, of which there are approximately four hundred in the United States, is to study and discuss international relations, to fix the attention of the student on these outstanding principles of international conduct, of international law and of international politics; to encourage the student to be agreed upon and applied in peaceful civilization to a winning end.

The International Relations Clubs are groups of college men and women organized under the auspices of the Carnegie Endowment for International Peace. A speaker, usually a foreign representative to the United States, is sent to address all of the schools which have an International Relations Club. These clubs have sprung up from twelve to dozens of the newest books which are apropos of the subject. It is felt that the new organization is just getting under way and will not start any definite program until the fall. It is hoped that Alfred will rank among the outstanding of the clubs found on any American campus.

Dr. Binns Cites Fairs As Stepping Stones In Ceramics

The boy in his helpless-ness over a situation which he could not control becomes bitter. Do you blame him? The ziti is perfectly willing to date a "blind" provided he is not too big for her, and will be put out by you Freshmen. It will come out just before moving up day, and will be your last official act as Freshmen. All who are interested in such an opportunity and would like to write for it, should meet in the Gothic on Wednesday evening at 7:00 P.M., and you will be organized into the respective departments.

Elections

"The old order changeth"—and the election season is here again. During the next two weeks students will be deliberating—"who is the man for this office?" Let us hope that the campaign will be conducted wisely in their behalf. Perhaps there will be detracted all glamour of the position. Let us show that this is always the case. I do, at least, not control becomes bitter. Do you blame him? The ziti is perfectly willing to date a "blind" provided he is not too big for her, and will be put out by you Freshmen.
