

Margaret Speaks, Radio Singer, Tomorrow; Rockwell Kent, Artist, Tonight After All

Rockwell Kent, artist-lecturer-explorer, will speak at Alumni Hall, tonight, before an Alfred University Forum audience. Margaret Speaks, Metropolitan Opera soprano, will entertain Wednesday evening as the third feature on the Forum Schedule.

Mr. Kent originally was scheduled to appear Tuesday, January 12, but a mixup in dates forced a week's postponement of the lecture, hence the two features in two nights this week.

Not alone on the name of her composer-uncle, Oley Speaks, did Margaret Speaks rise to fame. Her soprano voice is regarded as one of the most pleasing in radio.

And it was through radio that Miss Speaks became famous. Her concert tours for the most part came after she had won recognition over the networks.

She is currently co-starred with Richard Crooks, Metropolitan Opera Company tenor, on the "Voice of Firestone".

Radio-concert stars lead busy lives and Margaret Speaks counted on a vacation last summer while crossing the ocean for a European tour.

But French Line officials prevailed on her to sing for the Seamen's Fund aboard the "Normandie" and a radio-telephone call asked when she could sing in Texas.

Her London concert—with 11 encores—was followed by a trans-Atlantic broadcast through the British Broadcasting Company.

After that week, concerts in Amsterdam, Zurich, Paris, and Vienna were practically routine. Her radio sponsors caught up with her in Switzerland, however, and again brought her voice across the ocean to American listeners.

Margaret Speaks is good-looking (see cut), married, likes ping-pong, swimming, and trees. She is less im-

MARGARET SPEAKS

portant but better known to the radio public than her uncle, who wrote "Sylvia" and "On The Road To Mandalay".

Last Rites Held For Mrs. Camp

Alfred today mourned the passing of Mrs. Jennie Camp, matron of Bartlett Dormitory for four years, who died Thursday, January 14, in St. Joseph's Hospital, Elmira, following an operation which she underwent two months ago.

Mrs. Camp had been forced to give up her duties as guide and counselor to Alfred's freshman men last fall, because of illness. Mrs. C. A. Burdett has been acting in her stead.

Funeral services in Hornell Saturday afternoon were attended by many Alfred friends.

Mrs. Camp, widow of Charles F. Camp, was a member of Hornell Park Methodist Church, the Mitchell Bible Class, past matron and past grand officer of the Order of Eastern Star, and had also held offices in Emmaus Shrine.

She is survived by two sons, Robert E. Camp, Elmira, and Leighton Camp, New York City.

Univ. Of Penn. Profs Pick All-Star Faculty

Philadelphia, Pa. — (ACP) — When sports writers had finished their all-star picking, the University of Pennsylvania faculty took advantage of the lull and did a little choosing on its own account—but not in the sports field.

Given the opportunity of voting for a mythical all-star faculty of ten members from all the history of the world and from any field of knowledge and work, faculty men and women of the University of Pennsylvania selected Dr. Albert Einstein, Socrates, Plato, Aristotle, Da Vinci, Shakespeare, Galileo, Newton, Darwin and Pasteur. Dr. Einstein is the only living man included.

Metropolitan Alumni Meet, Discuss Banquet

The Alfred Club of New York held its third quarterly luncheon and meeting at the Hotel Woodward in New York City on January 9. More than 150 alumni attended, many of whom had not seen each other since leaving college.

After the luncheon, the group gathered in its room and discussed the coming Alumni banquet with some of the officers of the Alumni Association who were present.

The Alfred Club of New York, a recently formed and vigorous organization of the younger alumni of the Metropolitan area, urges all students of the class of 1937 who live in the vicinity of New York to join the club.

Senate Accepts Judge's Resignation; Will Soon Announce Rules Change

Accepting the resignation of Edward E. Kunzman from the position of judge of Campus Court was the initial step taken by the Student Senate in its proposed revision of freshman rules and organizations. This action was taken in the Senate's emergency meeting last Monday night. Present at the meeting were Edward Kunzman and Stanley Orr, editor of the Fiat.

No definite action has been taken by the Senate on the status of the Court or the Department of Campus Duties. A plan, now in the formative state, which will clarify the confusion which has existed recently will be submitted to the Administration soon and made public.

Alumni Equipment Available To Campus Organizations Soon

A new addressograph, costing about \$700, will soon be the possession of the Alumni Association and is expected to aid in the Association's express object of bringing about a more complete acquaintance with the University on the part of Alumni, Secretary John Reed Spicer said today.

Prof. Spicer, who is combining his Alumni responsibilities with the task of attracting and corresponding with prospective Alfred students in his capacity of Counselor to Prospective Students, announces that the machine will be used by the Alumni Association and for other campus organizations wishing to contact Alumni.

By the use of metal tabs placed along the top of a small metal plate embossed with the person's name and address, it is possible to indicate his membership in organizations and his different activities on the campus, and automatically to print lists or to address letters according to these connections.

Fraternities May Use Machines
There are 24 different classifications that may be used. By this means fraternities and sororities will be offered an efficient addressing service.

"By keeping alumni well informed and by stimulating their interest and cooperation, more students will be induced to attend Alfred," Prof. Spicer comments in announcing his policy for the Association.

At present their are sixteen main groups of alumni. Important ones are New York City, Olean, Elmira, Albany, Buffalo, N. Y.; Washington, D. C.; Chicago, Ill.; and Daytona Beach, Fla. Annual meetings and banquets comprise the center of their activities. Homecoming Day in Alfred during October is a special feature.

Prof. Spicer has taken over the task of contacting prospective students, carried on for several years by Dr. J. Wesley Miller, who now is organizer and counselor of the new Institutional Finance Company.

Booklet Out Soon
Plans are being formulated for publishing a 16-page booklet containing pictures of the campus and information concerning activities at Alfred. The pictures will be done on rough paper in the new supersat process. The necessary information will be given to interest prospective
(Continued on page four)

Sub-Zero Air Produces Strange Results, Chemistry Head Proves

Frozen eggs, fish, and grapes, held the attention of the student body in assembly Thursday, when Dr. Paul Saunders gave his "Liquid Air Demonstration". This exhibition which has been put on before many clubs and schools, has been presented here once in 1926 and again in 1934.

Dr. Saunders explained that until the critical temperature of permanent gases had been understood such gases could not be liquified. By the use of a bent tube some Englishman succeeded in 1897 in liquifying chlorine. In 1877 the French finally liquified oxygen. Cooling, drying, and compressing, the air is the method employed in liquification. The use of the vacuum flask keeps the oxygen from evaporating.

To Offer New Courses In Grammar

The first concrete sign of revision of the liberal arts college curriculum appeared today with the announcement of a new two-hour course in English Analysis, which will be offered by Prof. W. M. Burditt for the second semester of the current school year.

A sort of laboratory English," was Prof. Burditt's description of the new course, which is the first of the new subjects to be offered in revision of the English curriculum.

With English 1 as a prerequisite, English Analysis will include these points:

1. A detailed study of English syntax.
 2. The study of vocabulary and the specific uses of words.
 3. A discussion of colloquial uses.
- Prof. Burditt may incorporate the use of a radio in the study of colloquial uses. Students will tune in on "local" radio stations and pick up sectional differences in speech.

Copies of actual student themes will be used to aid students in analyzing their own ideas and constructions.

Primarily a course for the interest of English majors, the course is suggested as an aid to other liberal arts students in the sciences, business, social sciences, and language courses.

The first meeting of the class will be 11:30 a. m. on the first Tuesday of the second semester. Prospective registrants for the course are requested to meet with Prof. Burditt sometime before the opening of the class.

Research Station Studies Problems

The research Department of the New York State College of Ceramics, established here last fall by special state grant after years of effort by Dean Major E. Holmes, now is progressing in research projects of various stages.

The two-fold purpose of the station, to aid in the development of the Ceramic College and to render research science to the ceramic industries, as well as to carry on teaching work.

Each month the experiment station sends reports throughout the state industry covering research completed during the month. The work is in line with what the industries of the state consider of most interest and importance to them.

Prof. H. G. Schurecht is head of the Research Department.

At a Board of Directors meeting of the New York State Ceramic Association in New York State in December, Dean Holmes was named secretary-treasurer of the association.

Three 'Tapped' By Spiked Shoe

Spiked Shoe, national honorary track fraternity, tapped three men at Thursday morning assembly.

They were: Robert Hughes, cross-country captain in 1936, who will succeed himself next fall in that position, and two-miler; Walter Scott, middle distance and crosscountry man; and Eugene Keefe, crosscountry letterman and two-miler.

Classes Important Too, Seidlin Tells YWCA; Raps 'Bull-Sessions'

"Students should set for themselves a higher standard than merely fitting into society," said Dr. Joseph Seidlin at Sunday night's YWCA discussion, on "Keeping a sense of values".

"They should have ideals and raise the level of the community to them," he continued.

The value of the "bull-session" is in his opinion over-emphasized. Dr. Seidlin believes that most of them reach a dead-level without intelligent leadership, he said.

Upsetting to some students was his statement that growth comes from classroom discussion and not mainly from extra-curricular activities. Character building is important but when a student graduates he needs technical knowledge.

The discussion also brought out that most people are pushed, they do not go, and that students should be world and not campus citizens.

The meeting next week will be in charge of the Freshman cabinet and will be used to outline and discuss next semester's program.

Keramos Adds New Members, Told Of Binns

"The Life of Doctor Charles Fergus Binns" was the topic of an essay presented to the members of Keramos last Thursday evening by Prof. John McMahon, assistant director of the ceramics research station. The meeting was the second of a series designed along the forum plan to treat some aspect of ceramics at each session.

The paper, which was prepared by Prof. McMahon with the help of Miss Elsie Binns, covered the five phases of the life of the famous educator who for more than thirty years served as director of the New York State School of Ceramics. A copy of the lecture is being prepared and bound and will be placed in the permanent library of the Ceramic College. Following the reading of the paper the faculty members who were present and who had known Doctor Binns told of some of the incidents in his life which had endeared him to all who knew him.

In connection with its new program policy, the local chapter of Keramos, the national ceramic engineering fraternity, will invite several interested non-members to its forum meetings. Guests at this meeting were Prof. Charles Harder of the art staff and Sylvia Gailar, Frances Ruggles and Stanley Orr, senior ceramic engineers.

Preceding the discussion of the meeting, Prof. H. G. Schurecht, Rodney Jones, Jud Gustin, Desmond Teague, Walter Scott and Harvey Conner were formally initiated into the fraternity.

Boraas Is Speaker At Canaseraga

Prof. H. O. Boraas addressed the faculty and students of Canaseraga High School on the problem of: "Will You Do It?"

He explained that the question is one which most people ask themselves when first they get the idea that something might be done.

His talk was in effect a discussion of motivation, and he urged his audience to do many things and to develop enthusiasm for doing more things.

Long Homeless, Fiat Lux Now Has Office

Years of effort, the blood sweat of earnest journalists, and the frayed nerves of employees of the "Alfred Sun" reached their culmination this week with the formal opening of the office of the Fiat Lux in English Room 2 of the Green Block.

Equipment in the new office includes one desk, one Underwood typewriter, two dictionaries, sheets of copy paper and of page dummies, a ruler, two pencils, a file of this year's Fiat Lux copies, and a chair.

Through the initiative of Stanley C. Orr, editor, the office was obtained. Efforts are being pushed forward by members of the staff to acquire glue, scissors, a telephone and an ashtray.

Exam Schedule Issued Today By Registrar

The following schedule for examinations for the first semester of the school year 1936-37 was released today by Registrar Waldo A. Titworth:

Wednesday, Jan. 27

9 A. M., T. Th. 8 o'clock classes—Chemistry 6, English I (Assembly Hall).

2 P. M., M. W. F. 8 o'clock classes Ceramics 103 (Rm 1 AL), Physics 2.

Thursday, Jan. 28

9 A. M.—Education 2, English 2 (Assembly Hall). Industrial Mechanics 1 (Chapel).

2 A. M.—Spanish 1 (Rm 27 Ph); Spanish 2 (Rm 27 Ph); Biology 5, Mathematics 4 (Rm 14 Ph); Industrial Mechanics 3 and 5a.

Friday, Jan. 29

9 A. M.—Mathematics 1, 1a (Rm to be announced); Mathematics 2, Mathematics 3.

2 P. M.—M. W. F. 11:30 o'clock classes.

Monday, Feb. 1

9 A. M.—German 1 (Rm 1 AL); German 7 (Rm 1 AL).

2 P. M.—Chemistry 1a (Rm 1 AL); Chemistry 1 (Rm 1 AL); Chemistry 2 (Rm 14 Ph); Chemistry 2a (Rm 14 Ph).

Tuesday, Feb. 2

9 A. M.—M. W. F. 9 o'clock classes; Ceramics 113.

2 P. M.—M. W. F. 10:30 o'clock classes; Mineralogy (Rm 14 Ph); Industrial Mechanics 6a.

Wednesday, Feb. 3

9 A. M.—Physics 1 (Rm 14 Ph); French 2.

2 P. M.—T. Th. 9 o'clock classes; Petrography 1 (Rm A OC).

Thursday, Feb. 4

9 A. M.—T. Th. 1:45 o'clock classes; Physics 5; Spanish 8.

2 P. M.—T. Th. 10:30 o'clock classes.

Friday, Feb. 5

9 A. M.—M. W. F. 1:45 o'clock classes.

2 P. M.—T. Th. 11:30 o'clock classes; X-rays.

All examinations will be held in the room where the class regularly meet except when a special room is designed.

There are special examination periods for the following courses which meet in sections, or at unusual times: Biology 5; Ceramics 103, 113; Chemistry 1a, 1, 2, 2a, 6; Education 2; English 1, 2; French 2; German 1, 7; Industrial Mechanics 1, 3, 5a, 6a; Mathematics 1, 1a, 2, 3, 4; Mineralogy; Physics 1, 2, 5; Spanish 1, 2, 8; X-rays.

The time for examinations in the following subjects will be arranged by the instructor in charge of the course: Industrial Mechanics 6, 7; Public Speaking and Dramatics 4.

All conflicts should be reported to the registrar before January 22, so that they may be adjusted.

Dr. Morey Discusses Phase Rule Tonight

Dr. George W. Morey, physical chemist of the Geophysical laboratory in Washington, D. C., will speak on "Phase Rule Diagrams—Their Derivation and Interpretation" before a meeting of the American Ceramic Society, Tuesday evening in the new Ceramic building.

The meeting will open at 7 o'clock in order that the lecture may be finished before the start of the Forum lecture at 8:30.

Dr. Morey is a pioneer in the field of establishing glass technology and ceramics on a scientific basis. Since 1912 he has been connected with the Geophysical laboratory.

During the late World War, Dr. Morey distinguished himself for his work with optical glass.

The lecture will be the first of the new year sponsored by the American Ceramic Society.

Thesis Award Offered

The Board of the Ceramic Association of New York at its last meeting in December decided to award a cash prize to the senior student of the New York State College of Ceramics at Alfred University who produces the best research thesis this year. This prize will be awarded at the time of the annual meeting of the Ceramic Association, May 14.

The **FIAT LUX**

Published every Tuesday during the school year by the students of Alfred University with office on the ground floor of the Green Block.

Entered as second-class matter October 29, 1913, at the post-office in Alfred, N. Y., under Act of March 3, 1879. Subscription \$2.50 yearly.

The Bells Of Alfred

The proposed construction of the bell tower to house the carillon which Alfred University has already purchased has moved some few cynics to scoff. These malcontents have not considered the many important factors which are involved in the plan.

It has long been the dream of President-Emeritus Davis and his wife to have a carillon in Alfred. What a pleasure it will be to dedicate the new carillon to them!

It is not generally known what an extraordinary opportunity the University has in procuring these bells. They are all old; the oldest having been cast in 1674 and the youngest in 1786. All antedate the ratification of the Constitution of the United States. They were cast in Holland and Belgium by the three most famous bell casters of all time, Hemony, Dumery and Van den Gheyn. Of these, Hemony is probably the greatest. Experts rate him as a bell-caster as one would rate Stradivarius as a violin-maker. The thirty-five bells are being assembled, grouped and tuned by a reliable Dutch firm whose work will be checked by Jef Denyn, the world's most famous carillonneur.

The total cost of the carillon amounts to about \$9,000, more than half of which has already been subscribed by alumni. The reason for this low cost lies in the supposed imminence of war in Europe. The Netherlands fear the destruction of their bells by invaders for casting into cannon and shot. This happened in the Franco-Prussian War and in World War.

Alfred University has been fortunate in attracting the attention of Dr. H. E. Wesson, leading authority on carillons in America. Dr. Wesson, himself a graduate of the Jef Denyn School of the Carillon, has been kind enough to offer his advice on the construction of the campanile and the hanging of the bells. Moreover, he has consented to act as carillonneur for a short time upon completion of the carillon.

The bells will probably arrive on Alfred's campus by the first of April but it is unlikely that the campanile will be constructed before graduation in June. It is not the sort of building quickly built. It will be 135 feet high and 30 feet square, all built of native limestone which has already been donated. An elevator will run to the top of the tower where the carillonneur will have his keyboard.

Dr. Wesson has assured the committee that Alfred will have one of the finest carillons in the world. It will contain more than four octaves in chromatic progression. The proposed carillon is already attracting the attention of music lovers throughout the country.

The value of such a carillon cannot be measured in dollars and cents. The words of the scoffer will perish before they are uttered when he hears the clear mellow notes float through the valley. There is no other music so pure and so gratifying as that produced by bells in the evening.

Chicago U. Escort Bureau Exacting

University of Chicago fraternity men are going gigolo to furnish material for the newly established Escort Bureau. To qualify as "dowager-thrillers" bureau men must: Physically presentable; have personality and an easy manner; be a gentleman of the Lord Chesterfield type; possess knowledge in at least one social activity—opera, bridge, conversation or ordering from a menu; be a good dancer and be well known on the campus.

The coeds hire more tall brunettes than any of the other types. Upon being selected to conform with the woman's specifications, the young man meets her at a designated spot and is free to use his own name or a fictitious one. Thereafter he is responsible for the success of the evening.

A letter addressed to "The Bedbug Professor, University of Minnesota" was finally turned over to the department of entomology by the partially puzzled university postmistress.

Saunders Tells How He Freezes Fish

Dr. Paul C. Saunders of Alfred University has frozen a goldfish 522 times—and the fish still seems to enjoy it, he said to-day.

He freezes the fish in the course of a demonstration of liquid air which he has given before more than 150,000 persons throughout the east in the last 10 years.

The professor drops the fish into two or three ounces of liquid air in the bottom of a beaker, whirled the beaker constantly and when the liquid is poured off the goldfish is frozen solid.

Then he drops the frozen fish into a beaker of cold water. In a few seconds, the fish wriggles and is soon swimming around as lively as ever. "Liveller in fact," says Professor Saunders, "because the oxygen in the liquid air is exhilarating."

He has frozen the same fish as often as for times a day but he always carries "a few spares," he said. Specimens ordinarily die of old age, he finds.

RAMBLINGS

Thus begins a cruel tale—Pontius Pilate versus Adam in a recent bout in the library. The librarians were frantic, begging anyone who seemed the least implicated to call off the fight. Aileen Broich having accidentally let in one of the offenders was commanded to separate them. Bob Bleakley with much dubiousness attempted. Finally two heroic gentlemen bore the dangling offenders out, Pontius clamped firmly on the tail of poor Adam.

Kappa Psi claims kinship with Shirley Temple through the dimples of Johnny Barvian.

Successor to "Wimble" is "Adam" who is broadening his education by circulating between the French and Spanish classes...when cold air seeps through windows, students envy Miss Cheval and "Adam" their fur coats.

Do you know the two "Texas Rangers," Dr. Seidlin and Harlan Jacobs, who attended said picture in Hornell during the recital last Wednesday evening by Mrs. Seidlin? Sigma Chi dedicated all the cowboy songs at their dance Friday to these two "cowboys".

Some punning youngster at Sigma Chi dance wanted to know where in carnation the fellows got their carnations and that it simply "flowered" him.

Puddle jumping days of Pi Alpha are over since "Kitty Puss" has taken an extended Christmas vacation.

"Mary" Kyle begs that any races on the sleeping porch to shut that banging window will please take other courses than over her feet.

Adrienne Owre was most disturbed to find that when she started to "crawl in"—no bed. Some "friends" had escorted her bed to the end of the hall and the mattress to Miss Winikus' room. A few minutes later is said that Blanche Field and room mate were in a severe tussel with an invader who dumped drawers left and right. Then the dignified young ladies of third floor began a campaign of general bed dumping and drawer pulling.

It's easy to pass red lights and speed one's motor up a bit if you just tell the judge your name is Bleakley.

Definition of An Upperclassman
 Senior: Me.
 Junior: He and I.
 Sophomore: Anything better than a Frosh.

Frosh: Who cares?

War Course Offered Dartmouth Students

Hanover, N. H.—(ACP)—War has put in its appearance on the extra-curricular study program of Dartmouth College.

Interest in warfare has been so manifest that certain members of the Dartmouth faculty—not the college itself, have organized a course that deals with the various phases of conflict.

Prof. Bruce W. Knight, sponsor of the new course, has announced that the series of eighteen evening meetings is open, without fee, to anyone who wishes to enroll. Many of the sixteen speakers who have agreed to lecture saw service in the World War.

"No college, so far as I know," said Prof. Knight, "offers a general course on war. This apparently strange gap in the curriculum may be due to sharp departmental cleavages of the social sciences. Of course the problem is a broad one. A teacher in a given department knows something of war but mainly the part immediate to his own field.

"This is a study of war, not a chance for confirmed pacifists to blow off steam. We have taken the precautions to keep thrill-hunters out of the course. Nevertheless, we have found enough students willing to do the work without college credit and enough teachers ready to present it in addition to their regular work.

"The whole thing is roughly divided into three parts: first, the nature of war along its various fronts—political, propaganda, military, economic and son on; second, the costs of war—economic, cultural, eugenic; third, the means of preserving peace as related to the leading causes of war."

Tea Soothes Exam Takers At Colby

Students of organic chemistry at Colby College who study under Prof. Lester F. Weeks have found that tea during an exam makes a test sweeter to take.

During one of the past three-hour exams, some of the students complained that they were too tired to think and write, at the close of the test.

"I guess I'll serve tea next time," replied Prof. Weeks.

At the last exam, he and his two assistants passed out steaming cups of tea and dozens of filled cookies.

Collegiate Centers Give College Training To Many Students

What and why is a Collegiate Center?

Jamestown's Collegiate Center of Alfred University herein gives the answer.

The attention of High School graduates is called to the opportunities now offered by the Jamestown College Center for the continuation of their studies during the remainder of the scholastic year. The Center offers in general two years of college work. Credit may be transferred to any college which accepts the work of Alfred University under whose auspices the Center is conducted.

During the first semester of this year courses carrying college credit have been offered in the following subjects: English I, English II, American Literature, Public Speaking, Trigonometry, Medieval History, Modern Europe, American History, American Government, European Governments, Sociology, Economics I, General Psychology, Abnormal Psychology, German I, and French III. Many of them are open to beginners who enter in February.

In addition several new courses are in preparation for the second semester. These include a course in French Civilization, Labor Problems, Vocational Guidance, Genetics, and Eugenics, News Writing, Short Story, and World Politics, Social Theory and American Literature since 1870.

During the present semester 129 students have enrolled at the Jamestown College Center. Above 90% of the entrants this year ranked in the highest third of their high school graduating class. These students have come from the following communities: Akeley, Penn., 2; Ashville, 4; Bemus Point, 1; Brooklyn, 1; Buffalo, 1; Busti, 2; Celoron, 1; Chautauqua, 2; Cherry Creek, 2; Clymer, 2; Conewango Valley, 1; Falconer, 5; Frewsburg, 3; Gerry, 1; Jamestown, 81; Kennedy, 1; Lakewood, 3; Mayville, 3; North Clymer, 1; Randolph, 6; Russell, Penna., 2; Sinclairville, 1; Stillwater, 2; Troy, 1. Of the total enrolled 72 are men and 57 women. Of these 79 are classified as freshmen and 47 as sophomores; 3 unclassified. 35 of the students are working full time, 38 are working part time. The total number of semester credit hours being earned this semester is 1277 or an average of about 10 credit hours per student.

Student activities have received a great impetus this year owing in part to the increased registration, in part to the unusual character of the student body. There are seven organized student activities this year. These include the following: Basketball under the direction of Professor Paul Halbert; Dramatic Club under the direction of Miss Dorothy Ferguson; The Brandeis Debating Club under the direction of Dr. R. F. Howes; The Broadcaster Staff under the editorship of Miss Claribel Lindquist; The Astronomy Club under the direction of Miss Ruth Hunt; The German Club under the direction of Miss Aileen Kelly; and The French Club also under the direction of Miss Kelly.

The president of the Freshman class is Mr. Elbert V. Nelson; the president of the Sophomore class is Mr. William Durwood Hartley; the president of the Student Council, Mr. Kenneth G. S. Ferguson.

Fourteen students, who attended The Center last year, have transferred to other institutions of higher learning. The following schools and colleges accepted credit earned in the Jamestown College Center: Slippery Rock Normal School; Houghton College; Purdue University; University of Oregon; Cornell University; the University of Chicago; Alfred University, and Ohio State University.

81 students of the present enrollment have expressed a determination to continue their college work beyond what is offered in the Center.

Registration for the second semester will open February 15 at 3:30 P. M., in Room 312 on the 3rd floor of the Senior High School Building and will continue during the week. The second semester opens Monday, February 22 at 3:30 P. M. Enquiries concerning the work of the Center should be addressed to Dr. R. F. Howes, Supervisor Jamestown Collegiate Center, Jamestown, N. Y.

Speakers' Bureau

For future teachers who could use some publicity and some practice in public speaking, the Department of Education is planning a Speakers' Bureau which would get engagements for student speakers before vicinity clubs and societies. Students interested are asked to submit their names to Dr. Eginton or Dr. Boraas.

UNIVERSITY LIBRARY

Many new books have been added to the library recently, Ruth Greene, librarian, reports.

New Fiction, classified according to subjects:

Artists: Heywood, D., Lost Morning.

Character Studies: Mitchell, M., Gone With the Wind; O'Donnell, E. P., Green Margins; Parrish, A., Golden Wedding; Van Etten, W., I Am the Fox.

Family Chronicles: De la Roche, M., Whiteoak Harvest; Douglas, L. C., White Banners; Hutchinson, R. C., Shining Scabbard.

Farm Life: Flint, M., Old Ashburn Place.

Spain: Bates, R., Olive Field.

United States: Edmonds, W. D., Drums Along the Mohawk; Kantor, M., Arouse and Beware.

Jewish Life: Singer, I. J., The Brothers Ashkenazi.

Kidnapping: Bottome, P., Level Crossing.

China: Hobart, A. T., Yang and Yim.

England: Priestley, J. B., They Walk in the City; Rosman, A. G., Mother of the Bride.

Illinois: Peattie, L., American Acres.

Massachusetts: Bassett, S. W., Eternal Deeps; Lincoln, J. C., Great-Aunt Lavinia.

United States: Dos Passos, Big Money.

Love Stories: Hauck, L., Whipperwill House; Loring, E., Give Me One Summer; Peattie, L., American Acres.

Mystery and Detective: Gardner, E. P., Case of the Stuttering Bishop; Queen, E., Halfway House; Walling, R. A. J., Corpse With the Dirty Face; Walling, R. A. J., Corpse With the Floating Foot; Wright, W. H., Kidnap Murder Case.

Psychological Novels: Huxley, A. L., Eyeless in Gaze; Jarrett, C., Strange Houses; Kantor, M., Arouse and Beware; Walpole, H., Prayer For My Son.

Satire: Dos Passos, J., Big Money; McHugh, V., Caleb Catlum's America.

TAG-LETTER

Dear Editor:—

There is an old saying, "Well-known people are always in the limelight and every one knows all about them". Yet that does not hold true for our campus. Within our faculty are quite a few who are known very well in the outside world but of whom the students themselves know little. Surely when such opportunities are within our reach, one should make the most of them.

Doctor Watson is very famous because of his experiments and valuable findings concerning bees. Yet he has never, to my knowledge, appeared before the student body to tell them a little about it. The faculty has had the opportunity to do so and all agree that it is well worthwhile. Doctors Scholes and Saunders are others, too. However, we have now had the occasion to see and hear Doctor Saunders.

Alfred is very fortunate in having the School of Ceramics connected with it, but those of the Liberal Arts School know hardly anything about the things that go on within the walls of Ceramic School. Outsiders know more about the men and professors connected with it than we do. When many of us are questioned about Ceramics during our holidays, we find we know surprisingly little about them.

Then, too, the ovation that greeted Mrs. Seidlin when she walked out on the platform the other evening proves that the talent here in Alfred is highly appreciated. Those of us who are music lovers have very few opportunities to hear such things.

Why can't more of our assembly speakers be gleaned from our own campus so that we might better know those around us? I have only mentioned a few of those who are available.

Yours sincerely,
Lillian Texiere.

Tag: Cameron Paulin.

"We are wasting time if we indulge in prolonged discussions as to the place of analytical geometry in a freshman curriculum while jails and park benches are being filled by those who need an education which has some meaning in everyday life." Temple University's President Chas. E. Beury suggests a waste-basket for the old curriculum.

Crooked Politics Not Confined To U. S. Says South American Frosh

Extensive traveling and a cosmopolitan background seem to mark Herman Castro, one of two South Americans now in Alfred. A Ceramics Engineer, he formerly attended a co-educational German school and then spent two years as assistant in an industrial art school. A native of a country in which there are only three ceramic plants, his future looks promising.

The study of glazes and art hold his interest as does amateur photography. "Unusual studies with various shadow effects are much more interesting than the stiff group pictures many people take."

Of the South American countries, Castro says, Chile is the first to have Spanish movies for entertainment, rather than for propaganda exclusively. Music plays an important part in the lives of our South American neighbors. The tango, waltz and rhumba are favorites, but folk dances are still enjoyed. Each dance, says Castro, tells a story, or represents the actions of birds or animals.

Hockey, popular in America, was adapted from a South American game called "Chueka". After this sport in popularity comes soccer, tennis and riding. Girls are interested in much the same type of exercise as men.

But women, remarked Castro, are allowed less freedom than in this country. Brothers or an older member of the family chaperon them at dances. Coeducation is confined mainly to the large cities. Most girls go to private schools, and then exchanging an evening's entertainment with a boy's school.

Crooked politicians, strange to say, form the main dissension in Chilean politics. The Chilean republic is like ours, and Castro declares that the legislature is one to be proud of. "There are no more revolutions in Chile, either," he added.

When asked for a few differences in people in the two countries, he said that Americans are more informal and natural. Also, people here tend to specialize in their education.

"In my country one's education is not complete without a thorough literary knowledge and a broad background in other fields." Fraternities are a new experience for him, as South American schools do not have them.

Castro made a statement that might damage his favorable reputation with the "weaker" element of the campus: "Girls there are proud of their knowledge of clothes. They follow the Parisian fashions, while boys wear practically the same clothes that students do here."

Carillons Defined By Publicity Department

Announcement last week that a carillon of 35 rare bells would be installed on the Alfred University campus this spring awoke student queries as to "what is a carillon" and "how does it work". In a series of articles released by the publicity department of the University, this subject will be discussed. Following is the first:

Some 200 persons have already made contributions toward the purchase of the carillon to be installed on the Alfred University campus is shown by a list kept by Prof. Norman J. Whitney, Professor English at Syracuse University and acting-treasurer of the self-appointed committee which is arranging the purchase.

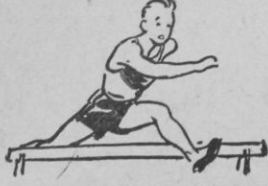

According to William Gorham Rice, head of New York State Civil Service and author of two books: Carillons of Belgium and Holland, and Singing Towers of the Old World and New, "A carillon is a set of bells (a) attuned to the chromatic scale, (b) many in number, sometimes four octaves or more, (c) the lowest often several tons in weight, with each successive bell lighter, so that in the highest octave, the lightest is scarcely 20 pounds in weight, and (d) hung fixed, that is, so as not to swing.

"Owing to its more convenient form," he says, "the word chime is often used when a carillon is meant." He distinguishes the chime (also called a peal or ring) from a carillon by saying that the chime is a set of bells not more than an octave, attuned to the diatonic scale with sometimes a few additional half tones. "Diatonic means proceeding mostly by full tones as opposed to chromatic proceeding by half tones," says Dr. C. W. Pearce in Modern Academic Counterpoint.

The 35 bells which are being purchased for the Alfred campus, when they are assembled in Belgium, will be tuned by Jef Denyn, the World's greatest carillonneur. The pitch of the bells is determined by diameter; (Continued on page four)

SIDE LINES

By Ray Zurer

January seems to be a jinx month for Saxon court teams. January, 1936, saw a strong Alfred team—a team of veterans which had won three of its first four games—make an invasion of the Metropolitan court lair. It was a disastrous trip. The Saxons dropped games to Upsala, Long Island, and John Marshall, all by large scores.

January, 1937 is similar in many respects. A Saxon team, which had annexed two of its first three encounters, made another foreign invasion, this time against the upstate court powers. Again, the Saxons were repulsed by the defenders, Syracuse, St. Lawrence, and Clarkson.

And yet—the 1936 Alfred court edition was not discouraged. They took the defeats in stride, went on to win six of their remaining games, and turn a losing season into one which was fairly successful. Their final batting average was .500, nine won and nine lost.

The 1937 team is a good team. They have still nine games to play, and as six of these are home games the outlook is fairly bright. They may yet eclipse the record of the 1936 team.

So, come out Thursday night and watch the Saxons start the ball rolling as they trim the Cortland Teachers.

Best picture of the week—in last Thursday's Syracuse Post-Standard is a photographic scoop which would do justice to our own Jon Canolesio. The picture shows Sonderman, Syracuse ace center jumping for the ball in competition with Brownell and Buckley. Buckley's back is turned to the camera, and as he leaps into the air, the retarding hand of Bob Stewart, Orange forward, can be plainly seen firmly grasping Buckley's jersey. The official? They probably went out to see a man about a dog.

Donald John, of the Ardsley Vredenburgs is quite a basketball player. He is so good and his fame has spread so far, that even in Syracuse they take his presence in the Alfred line-up for granted. The Syracuse Post-Standard carried his name in the Alfred—probably studying Chem 2 with

VARSITY AND FROSH COURTMEN PLAY AT GYM THURSDAY NIGHT

Varsity Courtmen Meet Cortland Teachers In Feature of Double Court Bill; Frosh Meet Dunkirk Center In Prelim

Basketball will be on the menu for Thursday night at the Gym and two tasty morsels will be served up in the form of a double bill. The main attraction will feature the Varsity against the Cortland Teachers cagers, and in the prelim the Frosh will meet the Dunkirk Collegiate Center five.

The Varsity will probably play at top speed, for they are anxious to redeem themselves in the eyes of the home crowd for their rather poor showing on their upstate trip, last week. With competition for starting berths on the varsity squad still keen, it is impossible to predict Coach Cox's starting line-up.

The Frosh, who have been improving steadily since their poor exhibition against R. B. I. will attempt to take their fourth straight at the expense of Dunkirk. In last week's competition, the Frosh defeated the Aggies, Hornell High and Cook Academy.

Brick Amazons Win Intramural

Remaining the only undefeated team in the tournament by defeating the Townterriers 17-7, the Amazon sextet clinched the title to the intramural trophy last Monday.

With one more game to play, the Amazons are taking a week's vacation before meeting Sigma Chi January 25. Stepping into her former fast, snap-shooting game Capt. Zubiller led the scoring with 14 points.

Playing a fast, rough and tumble game, the Townterriers tried sturdily to stem the tide of the advancing Amazons. Shepard checked much of the scoring power of the Amazons. Heidel was high scorer for the Townterriers with 4 points.

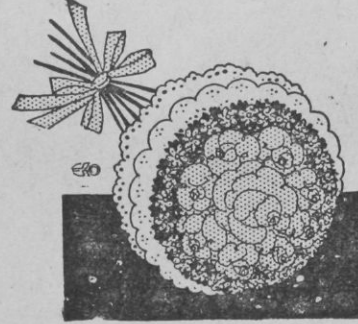

Theia Chi moved forward in a surprising manner to defeat Pi Alpha 11-7. Hallenbeck led the scoring with 9 points, while Kyle was high scorer for Pi Alpha with 5 points.

the aid of the light blonde from Rho Dammitt Rho.

Hash—according to Gerald Ashe of the Syracuse Post-Standard, Nick Oberhanick put in a good night's work against the Orange—he easily held his own with Simonaitis, Orange captain—Brownell did a sweet job of boxing Sonderman, Syracuse ace center—and scored seven points while doing so—it was no disgrace, losing to Syracuse—they have one of the top teams of the East—they defeated Harvard about 50-20—and Harvard trimmed Cornell—so what—Ed Ramsey, owner of that crack intramural team, the Ramsey Boys, is versatile—besides being a football player of no mean ability, and a Calculus student extraordinary—he has added sports reporting to his repertoire—that freshman basketball story is his—wrestling, Willie Green—women's sports, Grace Sherwood.

Frosh Courtmen Win Three In Recent Play

Showing a clean pair of heels to all opposition, the Frosh cagers made a sweep of the week's schedule by taking their arch-rivals, Cook Academy into camp, Saturday night at Montour Falls, to the tune of 32-26. Last Tuesday, they trimmed Minnick's Aggies, 33-23, and on Thursday, taking part in a “round robin” series, defeating both Hornell High and the Aggies.

Greenman, husky frosh forward, led the way against Cook by scoring 9 points. Cook started off with a rush and led 14-10 at half-time. The Frosh came back in the second half with more accurate shooting than in the first half. The game tied up three times before Alfred's better condition allowed them to pull ahead and win by six points.

Danny Minnick brought his Alfred Aggies into the Gym, last Tuesday, for their first contest of the year. They found more than enough height and weight in the Frosh line-up, and in spite of flashing a smooth attack, were forced to accept defeat. Glynn showed some rugged floor work and uncanny shooting for the Frosh. Travis and Cramer stood out for the Aggies.

The Frosh, together with Hornell High and the Aggies, showed University fans something new in the form of a “round robin” series. Each team played a half with each of the other teams, and the team winning both halves was adjudged the winning team. The Frosh started off by defeating the Aggies, 17-6, and then clinched the evening's honors by taking a fast Hornell High team 19-9. The consolation prize was bitterly fought for by the Aggies and Hornell. The Aggies scored four points in an overtime period to leave Hornell with nothing but a cold ride home for their pains.

Army Officer Would Change Grid Scoring

Washington, D. C.—(ACP)—Asserting that the present football scoring system does not always allow the best team to win, Col. E. A. Hickman, F. D., United States Army, on duty as finance officer of the 3d Corps Area, has offered a new scoring method.

He suggested that the value of the touchdown and the field goal be reduced from six points to five and from three points to two respectively. Col. Hickman declared that a team could earn one point for each first down—no matter the excess yardage made, each forward or lateral pass completed and resulting in gain, each forward pass intercepted, each fumble recovered, and each kick that rolled outside within the ten yard line.

RAY BUCKLEY
Sophomore Ray Buckley's smooth passing and dribbling have marked him as varsity calibre.

Alfred Women To Meet Cornell

For the second consecutive year an all-Alfred women's basketball team will meet Cornell on the latter's court.

With no date set as yet for the game, and with the memory of last year's victory still in mind, the local feminine basketball enthusiasts answered Coach Lavinia Creighton's call for candidates with thirty players.

With Zubiller, Kyle, Vincent, Babcock, and Scholes from last season's team to use as a nucleus, the building of a speedy, accurate squad should not prove too difficult a task, for there are many sophomores to replace those players lost through graduation.

Practice periods, according to an announcement by Coach Creighton are to be: Fridays, 3:45 and Saturdays, 10 o'clock. Seniors, juniors, and sophomores are eligible for this team.

Rochester Mechanics Cancel Wrestling Meet Scheduled Tonight

The Alfred-Rochester Mechanics wrestling meet, scheduled for this evening at Rochester, has been cancelled at the request of our opponents. This action will give the Saxon matmen an added three weeks of practice before the first meet of the season, against Toronto University, February 6, at Alfred.

Minor injuries, which have affected the mat candidates and one of Coach Seidlin's assistants, make the future outlook none to bright. Bob Sloane, 155 pound aspirant, has been away from mat practice because of a chest injury. Leo Lerman, 135 pounder, is still out with a bad knee, while Blankenhorn and McAndrews, 155 and 165, respectively, are missing practice sessions due to bad shoulders. Phil Brundage, former 135 pound mat star, who has proven extremely valuable as a coaching assistant, also possesses a shoulder injury. It is indeed an injury riddled Saxon mat squad that is being whipped into shape by Coach Seidlin.

Kunzman Heads St. Pat's Board

Edward Kunzman has been appointed chairman of the Board for St. Patrick's Festival in March. Ray Pape is publicity manager. A full list of committees will be released next week.

Coach Cox's varsity courtmen returned Sunday from a disastrous upstate invasion, during which they dropped engagements to Syracuse, St. Lawrence, and Clarkson.

The Saxons left Alfred, Wednesday morning and met the “S” men of Syracuse that same night. Before 750 Orange fans at the Arebhold Gym, the Alfred basketeers opened their upstate bombardment with a bang as they started the game with a whirlwind attack which netted them six points before the Orange were able to break the scoring ice. The Saxons were able to hold this lead for twelve minutes before the fresh Syracuse reserves wrestled the lead from them and ran the score up to 18-11 in favor of the Orange at the half.

Alfred again opened the second period with a vigorous assault and cut the Syracuse lead to only two points. However, they were unable to keep up the fast pace and wilted badly in the last five minutes, enabling the Orange to run the final score up to 46-23.

The Saxons dropped the second game of the trip to St. Lawrence by a 41-28 score. For the first half the game was closely contested, with the Larries leading 16-15 at half-time. However, the second period saw St. Lawrence running away with the Saxons, and win by a thirteen point margin. Big Ed. Versocki, Larry forward led the scoring with sixteen points. Schachter led the Saxons with eight points, and Oberhanick and Shoemaker followed close behind with seven each.

In the closing game against Clarkson Tech, at Potsdam, Saturday night, the Saxons were again defeated, this time by a score of 31-23. The Engineers led 16-9 at the half and could not be headed by the Alfred cagers.

Ed-Psychs Compare Brief And Precis Values

Educational psychology students have settled for their own group the relative learning qualities of the precis and brief—with the brief triumphant in every skirmish.

Betty Jane Crandall, Samuel Reyscher, and John D. Young conducted the experiment in this fashion:

They clipped a precis from a popular magazine that specializes in warmed-over articles from other magazines. From the precis they made a brief—i.e., a sentence outline.

Their classmates, human guinea-pigs for the day, were divided into two equated groups, so that the average I. Q. in each group was the same.

Naturally an instructor did the dividing. It is regarded as bad psychologically for a student to know his I. Q. or that of another student.

One group was given the precis to study for seven minutes, the other the brief for the same length of time. Then both groups were subjected to the same quiz on the material they had read.

Results:
Per cent correct for the group which had read the precis—82.1.

Per cent correct for the group which had read the brief—68.6.

But before the experimenters were satisfied of the superiority of the brief, they had to double-check. They switched brief groups and outline-groups and let each group study for four minutes.

This time the brief led by a thin hair—88.6 per cent correct to 87.9 per cent.

Then, just as the class was settling down to normal life again, the indefatigable experimenters popped a third quiz, to see how well material was retained over a period of time.

This time it was pretty conclusive. The group which had specialized in the brief knew the answers far better than the group which had the precis.

Why? Now there's a problem for three other students interested in getting a good mark.

Definition of a "snap course": A course in which the professor does not check the roll, make assignments, give failing grades, and which is non-existent.

THROUGH BROAD AND BEAUTIFUL ENTRYWAYS VISITORS WILL PASS TO THE NEW YORK FAIR

NEW YORK, (Special).—Forty thousand persons an hour—visitors from every state and every nation—must be accommodated in comfort at but one of the entryways to the New York World's Fair of 1939, according to arrangements the Fair Corporation is completing to handle a maximum daily attendance of 800,000. The artist's drawing, as reproduced above, calls for a magnificent double-decked entryway with underpasses, overpasses, pedestrian walks, bus terminals, comfort stations and bridge connections assuring comfort while providing an area of architectural splendor.

Shown is a ramp leading from the exposition grounds toward the I.R.T.-B.M.T. subway terminal, at a point where it is necessary to cross over the Long Island railroad tracks and to avoid undue congestion of pedestrian traffic. Shown in the left foreground is a domed restaurant within a fountain basin and a concourse bordered by grown plane-trees, and, nearer, an open-air cafe and an information kiosk. Along the flanking walls the artist has delineated the Fair's world concept which looks to the building of a peaceful, happier World of Tomorrow.

Fraternities May Use Alumni Office Machine

(Continued from page one) students. Fifty copies of the "Kanakadea," college year book, will be placed in high schools to provide more informal facts.

Prof. Spicer is the first alumnus to assume this task in several years. He is appealing to present Alfred students to hand in names of friends in high schools whom they think would be interested in attending Alfred.

Tender steaks, prepared foods and soft breads are causing faulty development of faces, jaws and teeth in the American people, says Dr. William J. Kerr, head of the department of medicine at the University of California.

Results of the tests given to freshmen at the University of Washington show that the men are 10 per cent higher than the women in reading ability and four per cent higher in vocabulary ratings.

Authorities at San Jose College are planning to establish a museum of crime tools for the students of its police school.

Sigma Chi Holds Winter Formal

Sigma Chi Nu entertained at their Winter Formal Friday evening. Some fifty couples danced to the music of Johnny Fitzgerald's Orchestra from Olean.

Dubonnet and silver wall panels with indirect lights decorated the house in the modern manner. Dark red carnations for the escorts and punch for all helped make the party successful. Supper during intermission was enjoyed by the guests.

Aileen Broich and Winifred Eisert were guests from Theta Chi and Pi Alpha. Eleanor Davie was a weekend guest at the house.

The faculty guests were Chaplain and Mrs. James C. McLeod, Dr. and Mrs. Joseph Seidlin, Prof. and Mrs. Kaspar O. Myrvaagnes, Miss Lavinia Creighton, Mrs. Grace Santee, and Miss Lydia Conover.

Lillian Chavis, chairman of the dance, was assisted by Dorothy Wilson and Kathryn Borman.

Elliott Roosevelt, the President's son, has been appointed as a member of the board of directors of Texas A. and M. College.
