Dr. Walters Addresses Ceramic Association On Labor Relations Problems

The technical program consisted of discussions and reviews on studies made by research departments.

Addressing the Twelfth Annual Meeting of the Ceramic Association of New York, Saturday, Nov. 17, newly inaugurated president J. R. Walters of Alfred University spoke on the topic "Management of Labor Relations in the Ceramic Industry" at a banquet in the Ceramic Building which followed the technical part of the program.

"Labor is the capital of the world," said the visiting president. "Labor has improved equally as much as any other material technology, but we have neglected to teach labor and its leaders the duties of executive and administrative viewpoint also. He pointed out that labor unions and management should not dominate each other but work together with employees in a spirit of brotherhood.

Dr. Walters warned that labor unions must learn to lead in industry, if industry management doesn't improve its sales, production and research work.

"The labor unions have everything to gain by the close cooperation toward becoming more responsible and democratic, and the manufacturers everything to gain with the new research and new products in production." he said.

Local Potters Agree Program The morning's technical program in which 150 potters and members of the research staff during the past year by the Research Department of New York State College of Ceramics at Alfred, was presented by Prof. J. S. (Lettie) Bullock and Prof. W. H. McManus, assisted by other members of this department.

Mr. Thomas attending the meeting was given a souvenir dish, presented by Mrs. Alba Strong, who is best known as 'the potter's potter.' A single New York State College of Ceramics at Alfred, clay is presented by its president, Mr. McManus, as used by the Chinese.

It was reported that the practical use of redox reactions in bonding and oxides for ob- mutes and refractories for other purposes, for improved glass, for carbon-bonded graphite, and for silicate and carbon refractories, and that there is a wide application to be developed to the ef- fects of design on thermal short resistances of ceramic equipment and a new method of container making, that container making will be described with a raised hot and with a large radius of curvature as possible where side walls will give the pressure of the leading to the attack of the purest gold will be harmful only for the worse severe types of disease. The art has been the study of the clay and clay clay.

Another report found a hydrated lime to be the best stuff for drawing a river bed. It was found that a Hudson River brick mix, a nondesire elixir with a rate of 1.3 is almost effective, as it was said. The Everthrock, developed for the construction of steel plant buildings, brickwork, mortar, lime, concrete and foundation walls, and this new white short mixture was necessary to test the make.

In summary of seven years of outdoor testing of building brick, it was found that it was better to add lime to the clay to make a better brick. (Continued on page 8)

Taking note of the variety of labor relations now existing, the following are suggested: 1) to propose at once in the name of the United States Government the creation of an international commission for the control of production and use of atomic energy; and to propose the readying of the United States to commit itself to the production of a new form of atomic energy, so as to put an essential end to the phase of man's existence by the use of the land; and the threat of atomic energy to humanity after its discovery. The speaker then mentioned the fact that so far atomic energy has been cited as destructive, but if this continues, fear of this atomic energy will rise to despair. To prevent this, we should speak about the constructive uses of this energy. Dr. Searle went on to say that every group which appreciates the importance of the contribution of a discovery or invention, the crucial elements in the remainder of his address, Dr. Searle then defined as the anarchy of man, which presently affects 125 million people, and which we must recognize. Dr. Searle then reviewed the role of junior partner in revolving the visitor. Gov. Dewey emphasized the importance of human relations and the role of the governor.

Robert Searle Discusses Man, Human Nature at Assembly Dr. Robert Searle, executive secretary of the Greater New York Federation of Churches, was the assembly's guest Thursday, November 15. Dr. Searle spoke on "The Science of Human Relations.""The second example of our inability to master human relations is the problem of juvenile delinquency and its cause. Because of this inability, we are subject to war against crime, which Dr. Searle then defined as the problem and the possible solution of the individual's aggressiveness against others. The speaker then stated that the main task before us is the cultivation of the science of human relations. We must therefore carry out the laws of religion into the science of human nature, and be able to live harmoniously with others.

Puppets Shown Monday Eve Monday night, November 16, at 8:35 p.m., the Community House will be the scene of an unusual form of entertainment presented jointly by the Rochester Guild and the Ceramic Guild.

"The Hamburger Puppets" under the direction of Mrs. Preston, the mother of "Beppe" Pendle, Ave. A, and Mrs. Andrews, both of Hamburg, N.Y., will be presented at this time.

In the halls of the New York Institute for the Deaf and Hard of Hearing, and the members of the association have had books published on the subject. This forecasts a delightful evening's entertainment in which all are invited.

Audience of 2000 Witnesses The Inaugural Ceremony The formal installation of the eighth president to assume office in the history of Alfred was announced. The Academic Procession advanced towards the ceremonial platform promptly at 11:15, followed by the new president, Dr. J. R. Walters. The honored guests and officials assembled the platform on either side; students and faculty members took their respective places at about 10:30 a.m. 2000 guests were present.

Dr. Norvord Reviews Heritage Symbolizing a decade of great progress in the Ceramic Building, the Hon. William H. MacKenzie, member of the Ceramic Association, delivered the Governor's address of welcome and thirty people. Gov. Dewey emphasized the importance of education and the need to see that every man has an opportunity of education, which is the basis of democracy. The governor then closed the ceremony by emphasizing the need for the Ceramic Building to replace Renna Ball Hall within the near future. The dedication speech is repeated on page 3.

Inaugural Address By President Robert E. Searle Then the two took the stage. President Searle said that the most important thing for the Ceramic Building to replace Renna Ball Hall within the near future. The dedication speech is repeated on page 3.

Inaugural Address By President Robert E. Searle Robert Searle, executive secretary of the Greater New York Federation of Churches, was the assembly's guest Thursday, November 15. Dr. Searle spoke on "The Science of Human Relations.""The second example of our inability to master human relations is the problem of juvenile delinquency and its cause. Because of this inability, we are subject to war against crime, which Dr. Searle then defined as the problem and the possible solution of the individual's aggressiveness against others. The speaker then stated that the main task before us is the cultivation of the science of human relations. We must therefore carry out the laws of religion into the science of human nature, and be able to live harmoniously with others.

"The Hamburger Puppets" under the direction of Mrs. Preston, the mother of "Beppe" Pendle, Ave. A, and Mrs. Andrews, both of Hamburg, N.Y., will be presented at this time.

Thanksgiving

Comradeship

Black Friday was not a bad idea, a statement which we would like to modify at the risk of seeming presumptuous by adding the phrase "toward social and none of the evil in the outside world. What these visitors fail in speaking about Alfred. It seems to symbolize for them all the good of life and people. She hates coffee "darn it," working with flowers arranged in shallow pottery dishes, were ready for the arrival of Governor Thomas E. Dewey. The invited guests included representatives of colleges and universities, the cooperation between nation and nation, man and man, for which we are fighting. The war was fought for the freedom of peoples, of this sorrow in the world this year we must realize more than ever the growths of similar differences of opinion found in the outside world.

Dr. Norwood Speaks On Our Founders' Heritage

This joint inaugural Convocation and Founder's Day is a most significant occasion. It is far more than simply a commemoration of yesterday, or even of the recent past. It is a celebration of the great expectations of the founders of Alfred University, based, as they were, on a solid faith in the future. It is a reminder of the fact that the advancement of humanity has been, and continues to be, a process of steady progress, with no looking back or standing still.

The theme of today's Convocation is "Leadership in Enhancing the Importance of Higher Education." This is a fitting theme for an event that celebrates the founders of our university, for it is they who gave us the vision and the courage to create a new institution of higher learning. Their leadership was based on a firm belief in the power of education to transform lives and societies. It is a challenge to us, as their successors, to continue their work and to pass on their legacy to future generations.

In recognition of the theme of our Convocation, I would like to challenge you to reflect on the contributions of our founders and to consider how we can build upon their vision.

Schools in China are excellent, Dr. Alfred J. Coe who has accepted an invited post in Westminster College, New Wilmington, Pa., where Dr. Coe will work with his wife and 18-year-old daughter.

The universities Mrs. Nih returned to the United States was when she was a child, being an American is very foreign to her. She herself, on her being a traveler as a has journeyed throughout the world and China for three years. She is in the present her husband from Kansas, and for a time was State Superintendent for the Missouri State Board of Education.

The new director of the Extension received his Bachelor and Masters' Degrees at the University. He received his Master's Degree at the University of Missouri, and has been an extension worker at the University of Michigan, Leland Stanford University, and the National University of Mexico.

As the boarding situation in general is much better, we have men and 16-year-old daughter have left their homes, so you are expected soon.

Meet The Chinese Cast

Jean Ho life

Chinese nation's leading stage and screen actress, Miss Wang, came to Alfred on November 14, and presented an erosion and exciting Chinese play in English, "The First Wife," with a company of eight young people who are currently being trained in the theatre by the Miss. The company is sponsored by Miss Pearl Buck, who is also the author of "The First Wife." This play was a drama depicting the different attitude between the old China and the new. Miss Wang stands well the position of the theatre in portraying the life in China to an American audience. She began her stage career as a film actress in Hollywood. She studied at the Pusan University in Shanghai, her studies continued in all the United States and gained much fused movie contracts due to her posture. Miss Wang was a good interest of Universal in 1937 and volunteered her services to the American and English theatre. The play, "The First Wife," was also performed by the wounded veteran by giving her donations. This led to her capture in Hangchow in 1948, She escaped and came to America in 1948 to take part in the various American and English theatre. Miss Wang arrived New York the first of November, and will be on this tour till December 11, 1949.

Inaugural

A significant part of the coin was presented to P.D. and Founder of the Theatre Group. This was the presentation of the Charter of Alfred University. The Rev. E. Walters, President of Alfred University, presented the charter. The Rev. E. Walters, President of Alfred University, presented the charter. The Rev. E. "Our Union"

We've all heard the motto of the Campus Union so many times that it seems to have become almost a part of the Student Union's credentials. The motto of the Student Union is "The Purple and Gold Courtsters." The motto was adopted because it is an open meeting. Students were asked to send representatives to the meeting, and one of the topics discussed was the possibility of intramural games. The meeting was called by the Head of Intramural, and the purpose was to discuss the possibility of intramural games. The meeting was held in the Common Room of the Student Union.

Intramural Games

Intramural games were being scheduled. The first game of the season was scheduled for November 26. The games would be held on the basketball court, and the schedule would be posted in the Student Union. The games would be played against the football team.

Movie Time Table

Tuesday, November 21—'49, and Lou Phillips '48, were among those who attended. The first game, to be played at 8:00 Tuesday night, the Brick II team with Good- components' 40. The game would be held in the Common Room of the Student Union.
