Fraternity positions marked change

The frailties of the student's social world come into focus in this second part of a series, as the influence of drinking is discussed.

Dr. Bronk: law is instrument controlling expansion

"Law must be the instrument through which man controls his expanding power," said Dr. Detlev W. Bronk, president of Rockefeller University, after confering on him the honors degree of doctor of civil law at the Charter Day Convocation last Thursday.

"In an age when the world awakes either to redemption or annihilation through the agency of technical advance, great importance is attached to men who understand science. Detlev Wolf Bronk is in this, but he is also a member of a still smaller group of whom the world does not yet need a scientist who understands man."

"Scientific knowledge is the tool for the operation of our social system," Dr. Bronk said. "Scientific research is a means for solving problems created by the use of science and technology."

"Scientific influence, the altering influence of science requires a widespread understanding of the nature and scientific ends, a general understanding of the nature and scientific ends, a general understanding of the science that has built our country and that all fraternity members must live in their house if rooms are available and University rule permits. (This includes sophomore men.)"

The fraternity membership on social patrol are prohibited from holding house offices; that alcoholic beverages may be consumed at official functions which are approved by the Board; that excessive consumption of alcohol to fraternity members is prohibited; that after-custodial systems do not exercise their minds to reach understanding of the nature of science and scientific ends, a general understanding of the science which has built our country and that all fraternity members must live in their house if rooms are available and University rule permits. (This includes sophomore men.)

Rushing rules: Second semester rushing should prove beneficial to the freshman men. Presumably it gives the new student more time to adjust to an unfamiliar academic environment before being required to make a full-time social commitment. The effect of second semester rushing on the fraternities is yet to be determined.

Effective April 15, 1965, current regulations concentrating the social activity of fraternity parties were established. The changes were submitted to the University Faculty Council. According to these rules, one chaperone is now required for a fraternity party, providing he consents to chaperone alone.

The changes was instituted to remedy the stress which had previously placed upon certain departments of fraternity parties, the change of course and the change of central party being the most beneficial. (Continued on Page 4)

Automobile accident kills sophomore Don Fenichel

Don Fenichel, an Alfred student, was killed in an automobile accident while he was traveling home for the weekend. The car, driven by his fraternity brother, entered an intersection at College of Liberal Arts, was driving alone on his way home when his car struck another vehicle on the road and drove off the road. The chaperones of the event, held at a house in New Rochelle, occurred at no fault on the campus.

As a representative of the University, the FIAT LUX extends its sincere condolences to Mrs. Stanley Fenichel on the recent death of her son, Don.

Construction of a road for fraternity row was begun this September. The ground has been leveled and the grading of the road was begun. In the near future, both the University and Board of Trustees will be accepting and the project will be completed.

Automobile accident kills sophomore Don Fenichel

By Sally Falmor and Stephen Chappell

Fraternity activities are in the midst of a series of alterations which reflect the recent changes in the role of fraternities on the Alfred campus.

In the spring of 1964, a Fraternity Code was drawn up by a special committee of the Board of Trustees and submitted to the Fraternity Board. The Fraternity Board made the following changes in the recommendations of the Trustees and, in December of 1964, published its own Fraternity Code which was accepted by the fraternities and is now being enforced.

Members of the Fraternity Board at that time were: Paul F. Pevet, junior, student chairman of the Board; Richard Steinman, president of the Inter-fraternity council; Fred Lemisch, assistant University treasurer; Dr. James Lynn, associate professor of ceramic engineering; and Dr. Thomas Gray, assistant professor of ceramic engineering.

Fraternity code: The fraternity semester was not affected by the fraternities, includes the following provisions:

(Continued on Page 2)

Trustees to consider liquor policy change

At its annual meeting to be held Oct. 29, the Board of Trustees will consider a proposal which would allow alcoholic beverages to be served in University buildings.

Specifically, the proposal recommends that the University committee on wine and trustees consider changing University policy regarding the consumption of alcohol in University buildings and allow alcohol to be served on campus.

Dr. Bronk spoke on "Law and the Social Role of Science" at ceremonies marking the University's 100th year.

Dr. Bronk

Also at the ceremony, President M. Ellis Drake congratulated Dr. Detlev W. Bronk, president of Rockefeller University, after conferring on him the honors degree of doctor of civil law at the Charter Day Convocation last Thursday.

In the spring of 1964, a Fraternity Code was drawn up by a special committee of the Board of Trustees and submitted to the Fraternity Board. The Fraternity Board made the following changes in the recommendations of the Trustees and, in December of 1964, published its own Fraternity Code which was accepted by the fraternities and is now being enforced.

(Continued on Page 2)
The University will sponsor a Parent's Weekend this Friday and Saturday to acquaint the parents of the freshmen class with the facilities of Alfred. All scheduled events will be open to both parents and students. Included in this program is an invitation for parents to eat with the students in the University dining halls.

The schedule is as follows:

Friday, October 19
3 to 5 p.m. — Parents registration, Campus Center
5:15 p.m. — Dinner at University dining halls

Saturday, October 20
9 a.m. to 12 p.m. — Parents registration at the Campus Center
10 a.m. to 12 p.m. — Office hour and open house, Diana-Merrell Hall, Room D. Dean Mueller of the Ceramics College and colleagues will be on campus.

Independent meeting
The first meeting this year of the Independent Club will be at 7 p.m., next Monday in Room B of the Campus Center. It will be an organizational meeting. This group is open to all students who wish to support various activities and social events designed for the whole campus.

Freichte lectures in Germany at Max Planck research institute
Dr. Van Derk Frechte, professor of materia science technology in the College of Ceramics is serving the current semester as visiting professor at the Max Planck Institute for Silicate Research in Wurzburg, Germany.

In addition to teaching at the Institute, Dr. Frechte is preparing a volume of his book Microscopy of Ceramics and Ceramics. He is working under the supervision of Dr. A. Dietzel, director of the Max Planck Institute, in conjunction with department head, Dr. H. J. Ges, who was a visiting lecturer at the College of Ceramics last spring.

Dr. Frechte also will visit several research laboratories in Europe during the coming months. He plans to return to Alfred in February.

For further information contact House President of the Parents Association, and a freshman class representative. A discussion of life on the Alfred campus covering student budget, buildings and facilities including the improved outdoor playground will be open to parents' inspection.

12:15 p.m. — "General Meeting". Open to all parents and freshmen, Alumni Hall. Donald W. Corpino, president of Alfred University Parents' Association, William A. Geer, first vice-president of the Parents Association, and Richard K. Murphy, assistant to the president and secretary of the Parents Association.

4 p.m. — A program "Landmark Achievements in the Keyes" Myers Hall. Room 24, Panel — Fred Gertz (founder), registrar. Dr. Willis O. Myer's Hall, dept. of ceramic engineering, Dr. David Leach, prof. of history and political science, Dr. Robert C. Byerly, dean of Graduate School. A discussion concerning aspects of student academic achievement.

5:45 p.m. — "Your Investment in Higher Education at Alfred University" Campus Center, Room C. Panel — David Williams, dir. of development, Edward Lehman, treasurer. A discussion of Alfred University from a business point of view covering the University budget, buildings and personnel.

6 p.m. — "Student Life and the University Community" Myers Hall, Room 24. Panel — Dr. Robert Cometoak (moderator), assoc. professor of psychology, Howard Wiener, president of Student Senate, Richard Keppeler, president of Associated Women Students, Michael Storer, president of Interfraternity Council, Patricia Romano, pres. of Interfraternity Council, and a freshmen class representative. A discussion of life on the Alfred campus covering student budget, buildings and facilities.

5:45 p.m. — Dinner at University dining halls

Dr. Bronk
(Continued from Page 1)
There is a relationship between law and science as there is a relationship between selfishness and selfishness, Dr. Bronk emphasized. "Many of the rights of which we speak are vicariously gained rights. The man who is unwilling to yield some of his property, made available by others, is likely to suffer, and to make others suffer."

Law changes
Law is not static. Dr. Bronk concluded; it is continually changing. Social ideals and legal procedures enable men to be beneficiaries of the great consequence of sciences, and at the same time enable others to live happily and well.

Retiring faculty
Alfred University conferred honorary doctorate of sciences upon four retiring faculty members. Honored during the ceremonies were: John F. McManus, who this month ended 14 years of service as dean of the College of Ceramic; Robert M. Campbell, former chairman of the ceramic engineering department, who, due to hospital confinement, was honored in absentia; Dr. Joseph Seidlin, who since 1920 has served the University; and James Nasution has gotten out of Sukarno's right hand and is standing in back helping him stay on the rope. Sukarno seems to be leaning toward the left, while Nasution is pulling him to the right.

Federal tax credit plan would cut college costs

(CPS) A plan to reduce college expenses through federal tax credit has gained the support of the Citizens National Committee for Higher Education (CNCH).

The committee hopes the plan will be passed by this session of the Irish Congress. A similar proposal, co-sponsored by Senator Abraham Ribicoff and Senator Peter Dominick as a bill, was defeated by a narrow margin in 1964.

Ceramic professor submits resignation

Dr. Farook Yassin Soliman, recently appointed assistant professor of ceramic engineering, has submitted his resignation from that position, effective immediately.

Dr. William Taylor, dean of the College of Ceramic, attributed the resignation to Dr. Soliman's inability to find suitable housing facilities in the community. Apparently dissatisfied with several housing units made available to him, he had been living in a guest house provided by the school.

Dr. Soliman received his doctorate in ceramic engineering last year from Columbia University.

The first film lecture in the series "The World Awared" will be presented Thursday at 3 p.m. Richard Linde, a producer and photographer, will narrate the film "Middle East Tinderbox," as the Campus Center Luncheon.

Linde explains in his film documentory that the Middle East is important both in history as the birthplace of western civilization and three great religions, and today as a cross roads of the world.

Richard Linde

Linde has accumulated his data by traveling through Egypt, the Middle East, Russia, and the Orient and also from serving in the United States Marine Fleet in the Pacific and then in Shang-hai, China, as a chaplain.

Linde received a graduate degree from Harvard Business School as well as degrees from Ashbury College and Drew University. Linde has also received the Distinguished Service Award from the United States Committee for the United Nations. He has written numerous articles as well as the document.

The remainder of "The World Around Us" series includes a lecture on South Viet Nam by Kenneth L. Armstrong and one entitled "Russia and Its People" by Ralph Green. The Student Senate is sponsoring the series this year instead of appropriating money to the Cultural Programs Council, as it had in recent years.

Photographer Linde to narrate 'Middle East Tinderbox' film

Dr. Richard Hofstadter, professor of history at Columbia University, will speak on "The Jeffersonian Tradition in American Politics," this Friday at 8 p.m. in Himmel Hall.

The program will be presented, under the joint auspices of the Cultural Programs Council and the Visiting Scholars Program of the College Center of the Finger Lakes.

Dr. Hofstadter is the author of several books on American politics, education, and social changes. He was awarded the Pulitzer Prize in history in 1966 for his book, The Age of Reform, and the Pulitzer Prize in general non-fiction in 1964 for his book, Anti-Intellectualism in American Life.

His awards also include the Beverage Award of the American Historical Association in 1944 for his book, Social Darwinism in American Thought, and the Emerson Award of Phi Beta Kappa in 1962.

Dr. Hofstadter earned his B.A. at the University of Buffalo, and his M.A. and Ph.D. from Columbia University.

Prior to his appointment at Colum-bia, Dr. Hofstadter taught at Brooklyn College, City College of New York, and the University of Maryland. He was also Pitt Professor of American History and Institutions at Cambridge from 1956 to 1959.

Ceramic convention

Harold E. Simpson, professor of glass science at the College of Ceramics, will preside as session chairman at a national meeting of the American Ceramic Society's Glass Division.

EDITORIAL

Statement of policy

When a new editor-in-chief is elected, it has become almost traditional for that new editor to devote the first editorial to a statement of policy changes, even though it may be a re-announcement of previous policy. For it should not be expected that with the advent of a new editor, comes also the beginning of a series of radical changes, either in the physical design of the paper or in its policy.

A new editor is chosen for the most part on the basis of his knowledge and understanding of journalistic style and the principles which make up editorial policy. Therefore, it is important to point out that there will be no significant change in the major areas which have made up Fiat Lux policy in the past.

This, of course, does not mean that we will blindly accept something we do not like simply because previous editorial boards have done so. We are not tied to tradition. Nor do we accept tradition as a rationale for present actions.

Although there have been few changes in the Fiat in recent years, it is by no means a conservatively toned newspaper. The changes which have been instituted have been made in an effort to keep the Fiat in line with the most modern journalistic style. The change to down-style headlines, the removal of column rules, and most recently the new, bolder flag all demonstrate the desire to publish a newspaper which can claim contemporaneity.

The Fiat is responsible not only to students, faculty, and administration, but also to itself to publish a paper which is in keeping with the highest standards of journalistic ethics. This responsibility includes criticism as a major editorial role. For without criticism, complacency becomes the mode and tradition may never be questioned.

Neither the administration nor the students can be allowed the smugness of immunity from criticism. For when it is given constructively and taken objectively, the benefit is obvious. Fortunately, the Fiat is free from any form of censorship over its contents, including the editorial page. This freedom makes us more aware of our responsibility to justify the criticisms we make.

Liquor change urged

This month the Alfred University Board of Trustees will consider a proposal made last fall by the student rights committee that alcoholic beverages be permitted to be served in University buildings. We urge the Board not to dismiss this proposal on the grounds that it is contrary to the traditions of the University.

For as was pointed out in this week's letter to the editor, although it may very well be that the University's traditions, we cannot let that excuse, be used to defeat; this proposal on the grounds that it is contrary to the traditions of the University, under Act of March 8, 1933, we cannot let that excuse be used to defeat this proposal on the grounds that it is contrary to the traditions of the University.

This freedom makes us more aware of our responsibility to monitor the contents, including the editorial page. The Fiat is responsible not only to students, faculty, and administration, but also to itself to publish a paper which is free from censorship over its contents, including the editorial page.

Alteration of admissions' policy needed to lessen overcrowding

Berkeley students contest rules

Berkeley, Calif (CPS)—Students at the Berkeley campus of the University of California are again uneasy, this time over new rules governing student activities.

The new regulations, issued on Sept. 15, are "provisional and will be in effect until a final set is developed with formal student participation," Chancellor Roger Heyns said.

Heyns, the former vice-president for academic affairs at the University of Michigan, took the Berkeley post this summer following an administrative shakeup by President Clark Kerr.

Heyns said the final rules will be drawn up by an Associated Students of the University of California (ASUC) constitutional convention.

A spokesman for the Free Speech Union (FSU), which is not associated with the Berkeley ASUC but acts as a government outside the recognized channels, said a constitutional convention should be preceded by a declaration of independence from the regents.

The FSU spokesman said if the chancellor were really interested in student participation in rule making he would set up a student referendum for student ratification of the rules.

He said the only meeting the FSU has had with Heyns was one at which about 40 other students were present. "The students just don't have any real voice. They're just advisory," he said.

Criticism of the rules centered on provisions concerning student manning tables, the keeping of financial records, and provisions for student hearings.

Both FSU members and an ASUC representative were critical of the sections of the rules dealing with student hearings.

"The hearings' decision should be final and the chancellor should not have the final say," the FSU spokesman said.

The final rules will be followed by a declaration of independence from the regents.

Mr. Intellect has learned of the death of his best friend, fellow agent Guy Borden.

As I usually walked through all the classroom buildings one Wednesday afternoon between 1 and 2 p.m., I noticed that the average number of students per class at that time was 26. This, I thought, couldn't be true, due to the opening statement of the 1965-66 catalogue which clearly states, "It's size (Alfred's) makes possible a close and friendly relationship between faculty and students." This is one of the "distinguishing features of life on the Alfred campus."

But despite the catalogue I still felt uncertain about the matter so I gave a short questionnaire to 304 Alfred students, randomly chosen, asking for an evaluation of their class sizes.

The result show that 37 per cent of those interviewed felt over half of their classes were overcrowded. More specifically by classes: freshmen 47 per cent, sophomores 17 per cent, juniors 27 per cent, seniors 15 per cent.

Although the remaining students (40 per cent of the total) overall evaluation of their classes put them in the acceptable category, 37 per cent felt that one or two classes as overcrowded. Student opinion on which I assume has a significant effect on University policy making makes clear that class sizes are much too overcrowded.

Six faculty members and one administration member were also interviewed. Dr. Finch of the English department and Dr. Con- mark psychology, felt that classes were quite satisfactory; according to the lead, off paper at this meeting of the American Ceramic Society's materials testing committee has been the lack of communication, which leads to misunderstandings between them and the students.

Mr. Intellect provides an individual chanceller. They should be guaranteed," he said.
by Jim Cashman
The Alfred soccer team lost to Hobart by a score of 6 to 3 in the second game of their season.

Playing a short passing game, Hobart raced right over the Saxons who had difficulty adjusting from this long passing technique to that of the Statesmen on their own field.

Hobart won the toss and elected to take the offensive. They scored the first goal at 6:15 in the first quarter. Later in the period, senior center forward, Alvisson, passed the ball to Harbutt for a scoring attempt but the ball was blocked by Hobart’s goalie.

Against the Saxons gained control of the ball and kept the score with a long field goal from the left wing, Williams.

The first quarter ended with an attempted penalty kick by Alfred which would block at the last second by the Statesmen’s goalie.

Hobart opened the second quarter with one of its familiar scores at Saxon No. 1, John Drum.

The Saxons couldn’t keep the persistent Statesmen on their own side of the field. They were in constant danger of a Hobart score and on one occasion, Hobart was awarded a corner kick when the Saxons deliberately kicked the ball out of bounds. Center forward Ryker finally scored for Hobart at 18:15 in the period. Alfred immediately regulated 60 seconds later with a goal by Peterson.

The second half opened with an uneventful scoring attempt by each team. Then the Statesmen broke loose and scored at 2:26. Twenty-five seconds later Alfred’s Ryker kicked with an assist from Runyon to tie the score. Later, Hobart’s center forward directed the ball right at goalie John Drum, who couldn’t stop this effort and the Statesmen regained the lead.

Play settled to a slower pace for three minutes until Hobart again overwhelmed the Saxons defense to capture two more goals. Alfred received no direct kick but the ball faded to the left because of the high winds.

When Hobart’s right wing, Harbutt, booted a shot on the defenders net, the Statesmen goalie, Carlin, made a spectacular save from a grave position.

Hobart again watched downfield past the Alfred defense and Ryker scored.

To wind up the final minutes of the period Alfred received a corner kick which was deflected by Carlin.

The Saxons took repeated shots at Hobart’s net, never allowing the ball onto their own side of the field. Every time Curtis saw a potential point come toward him, he altered the ball from its intended course. Finally, Saxon’s Ryker kicked the ball but it sailed over the net.

“T’was the effective once more but Hobart defended the goal until he was replaced by the final minutes by Parmenzi.

Gube’s ‘Trojan’ captures unentered Chevy captures Geller

Talbot’s annual four-day reporting events took place on the southern Tier of New York State two weeks ago. The event was the US Grand Prix Formula One race at Watkins Glen.

Meanwhile, at Alfred University, uninterested to junior (front) Fabio, and senior Stock Car driver Ralben S. Davis as was. Fabio, had been a part of the Statesmen’s program last year. Davis was a part of the Statesmen’s group last year.

As a rally, all the cars start out at varying speeds intervals from the starting line. Each car has no finish until they all reach the same specified point of time. Usually there are checkpoints along the way and points are deducted for lateness and/or car damage and a variety of other offenses.

It is not necessary to exceed the speed limit unless you lose time somewhere on the course. The first (and possibly the last) annual Alfred Rally had two specifications for. No one knew the course in advance, and girls were the navigators. The course was planned as a surprise and was canceled at Fabio’s wish. Everybody in between was pure guesswork.

The field included 15 of the finest rally cars ever assembled. There was Danny Loomis’ 1951 four-door Dodge, Frederic Pol

1. Talking to yourself?
Rehearsing a speech.

2. Angela’s idea?
I’m running for President of the Student Council.

3. What’s your platform?
Do I need one?

4. You have to give people a reason for voting for you.
How about “A chicken in every pot?”

5. Already been used.
“Tippicamee and Tyler too?”

6. Look, if you want to show Angala you’re responsible, why not sign up for Living Insurance from Equitable. It’s one of the most responsible things you can do, because Living Insurance will give your wife and kids solid protection.

You shall neither be right nor President.”

Soccer team defeated by Hobart, 6 to 3
Fraternity change

The best development of the stated series of changes is the feeling on the part of the fraternity men that Prez. Drakes is sincere in his efforts to work out their problems.

The three changes which have been discussed seem to have affected fraternities only to the degree that there is a promise of change in store for the future. Fraternity row will no doubt make the fraternities evolve into something which the Alfred campus has not yet experienced. We can only hope that geographical proximity will foster a feeling of cooperation among the various factions, a hope that in the past, not only the school, but the brothers of the individual houses would benefit.

As was previously mentioned, the second semester rushing is probably good for the freshmen and hopefully it will be as beneficial for the fraternity. Although the Fraternity Code may be a significant statement, some of the provisions are useless and others are merely rules that may be evaded.

Chaparone ruling

The Faculty Council ruling on chaparones is one of the most useful pieces of legislation that ever came out of a committee at Alfred. It is hoped that the faculty got together and made a few decisions. Perhaps his feelers were out and his decisions will be used to solve other pressing matters affecting other student organizations.

Basketball tryouts

Tryouts for all athletes interested in playing basketball this season will be held in the Men's Gym, Friday, Oct. 18, at 4:10 p.m. Varsity basketball tryouts will be held in the gym on Thursday, Oct. 14 at 7:10 p.m.
Saxons bow in final quarter, 22 to 20

by Chris Rodier

The Saxons lost to St. Lawrence last Saturday 22 to 20, in a game which wasn't decided until the last 20 seconds.

Half way through the first period the Saxons took the ball on their own 25 yard line and rolled down field for the score in 13 plays.

After Bill Knott caught a pass from Johnston for a first down on the Saints four yard line Bob Bocaccio was thrown for a three yard loss. Johnston called on Bob Coloesco to go through the middle for one, making it third down and ask to go for the touchdown.

On the third down Johnston relied on a quarterback option play. Johnston was unable to see Saxons open so he cut downfield. Bob Federsick cut back and tackled the St. Lawrence endman who was in pursuit of Johnston. This gave Johnston the opportunity to pass across for the score. Pete Bower scored the extra point.

Later in the quarter the Saxons scored their first touchdown on a 28 yard pass play. Gerry Metcalf hit Bob Vorisek in the end zone. Jim Michielsen booted over the extra point. Giving the score one at seven to seven.

In the second half the Saxons gained possession of the ball due to a fumble on the St. Lawrence 41. Following a first down on the 36, the Saxons failed to get a first down in three plays. Johnston and the Saxons crossed up the defense by going for the long bomb on a fourth down. The Saxons had the lead 15 to 14.

The Saxons came from behind in the opening minutes of the fourth quarter. Johnston hit Knott for two big gains in the drive for a touchdown. Johnston hit Knott for a point of 25 and 17 yards. The 17 yard would play was the play which put the Saxons ahead.

The Saxons tried for two, but Johnston was bumped before he could get the pass away. This left the score 29 to 15, with 14 minutes left to play.

The Saxons defense held the Saxons from getting within scoring distance, but the Saxons couldn't generate a sustained drive.

The Saxons were forced into a punting situation on their own 13. Frank Wyant dropped back to punt. The Saints' John Moore broke through to block the kick. The ball was picked up on the two and was carried in by Bill Von Wie. This put the Saxons ahead to stay 22 to 20, with three minutes left.

The Saxons tried desperately to get a score. Failing to make a first down on their 49 by just inches, they surrendered the ball to the Saints.

On the next play the Saxons defensive wrecking crew went for the ball, and forced a fumble on the Saxons 43.

On the next two plays the defense wasn't able to gain a yard with two incompleted passes. With 41 seconds left Don Bocaccio hit Bill Knott who was wide open. Knott ran the ball to the Saints 13. The Saxons tried to get the touchdown, but the defense wouldn't yield.

The Saxons tried for the field goal on fourth down with ten seconds left. Wyant was called upon to attempt the kick. The ball was hit, glared down, and Wyant put his foot through the ball. John Moore broke through the line and blocked the kick. St. Lawrence got off one more play, but the final score remained 22 to 20.

Alfred frosh beaten by U of R opponents

by Paul Harvey

The Alfred University football team met the University of Rochester last Saturday and was defeated by a score of 36 to 16.

The fade began the game advantageously, but three plays later the Saxons attempted a bomb, on a fourth down and were forced to put into the University of Rochester territory. Bocaccio, the home team's quarterback varied off tackle plunges with long gains around both ends and brought Rochester its first touchdown on a flip to halfback Collins. The point after touchdown was good for two points.

The Alfred frosh struck immediately in a play that gave halfback Nick Leibovich the kick off. Follow a tightly massed pack of blockers, and then race 55 yards for Alfred's first touchdown. Bill Knott then blocked the extra point.

After an exchange of punts, Bocaccio threw a long pass to one of his ends for U. of R's second touchdown. The point after touchdown was no good. Alfred tied it up in the second quarter as quarterback John Ford threw a long pass to his biggest receiver Fred Gross. The University of Rochester kicks was short and afterward scoring on a 12 yard pass and thus ending all the scoring of the first half.

The second half was mainly an effort by the Alfred frosh to catch up with Bocaccio and Collins, with quarterback John Boyd scoring once more on a quarterback sneak.
