The primary object of this Institution, is the qualification of school teachers. Teachers classes are exercised in teaching under the immediate supervision of their respective teachers, combining all the facilities of a Normal School. It has sent out not less than one hundred and fifty teachers annually for the two past years, a number much larger than any other Institution in the State.

The plan of instruction aims at a complete development of all the moral intellectual and physical powers of the student, in a manner to render them thorough and practical scholars, prepared to meet the great responsibilities of active life.

The trustees would take this opportunity to assure the public that no exertion shall be wanting on their part to make the institution worthy of the very extensive patronage that it has received.
