#### DEPARTMENT OF BUSINESS.

# COURSES OF STUDY.

## DEPARTMENT OF THEOLOGY.

The Department of Theology is open to students from every denomination of Christians. It is designed, primarily, to prepare persons for the Christian ministry. Any others who desire the advantages of theological study are received to its classes on such terms as the Faculty may prescribe. Applicants for admission are expected to furnish satisfactory evidence of Christian character, and of such scholarship as will enable them successfully to pursue the studies of the course. The terms and vacations are the same as in the other Departments of the University.

No charge for tuition or room-rent, for those rooming in the College buildings, is made for students who are studying in this department with the design of entering the ministry. There is already a well selected Theological Library, to which valuable additions will be made as fast as possible. There are constant opportunities for students to engage in labor, with small congregations and Sabbath Schools, and thus not only to do good service for others, but become the recipients of aid. There are also measures instituted for the purpose of aiding such as may need pecuniary assistance. No possible means or labor will be spared, on the part of the Faculty, to meet all the appointments in this Department.

## COURSE OF STUDY.

The regular course of Theological study in this Department occupies three full years. The general order of study in the different branches of Theology is as follows:

### JUNIOR YEAR.

**BIBLICAL.**—Hebrew Grammar and Exercises; Portions of the Pentateuch and Psalms in Hebrew; Lectures on Introduction to the New Testament; Exegesis of the Four Gospels in the Greek Harmony.

**THEOLOGICAL.**—Theology, as based on the Nature and Laws of Mind; the evidences of Christianity, Inspiration and Canon of the Scriptures; the Introduction to Theology, God's nature, attributes, and works; Natural and Comparative Theology and Religions.

**HISTORICAL.**—Lectures on the History of the World before Christ; Life of Christ.

**HOMILETICAL.**—Lectures on Pastoral Theology.

### MIDDLE YEAR.

## ACADEMIC DEPARTMENT.

### PREPARATORY.

The preparatory studies include Spelling, Reading, Freehand Drawing, Geography, Arithmetic, and Grammar. These are required to the extent demanded by the Regents of the University of New York, for granting their Preliminary Academic Certificates. Classes in the above named studies are taught each term in the year. The Regent's Certificate will be accepted in these studies, in lieu of examinations, for the higher departments.

TEXT BOOKS.—Geography, Swinton; Arithmetic, Milne; Grammar, Reed and Kollogg.

### ACADEMIC.

## DEPARTMENT OF PHILOSOPHY AND THE LIBERAL ARTS.

### CLASSICAL COURSE.

#### FRESHMAN YEAR.

##### *First Term.*

LATIN:—Livy

GREEK:—Plato's Apology, Tyler.

MATHEMATICS:—Algebra, complete, Milne.

##### *Second Term.*

LATIN:—De Senectute et Amicitia, Cicero, Allen and Greenough.

GREEK:—De Corona, Demosthenes, Tyler.

MATHEMATICS:—Solid Geometry, Wentworth.

##### *Third Term.*

LATIN:—Germania et Agricola, Tacitus.

GREEK:—Antigone, Sophocles.

MATHEMATICS:—Trigonometry, Wentworth.

#### SOPHOMORE YEAR.

##### *First Term.*

MATHEMATICS:—Conic Sections, Wentworth.

GREEK:—Birds, Aristophanes.

NATURAL SCIENCE:—Physiology, Cutter.

POLITICAL SCIENCE:—Science of Government, Young and Lectures.

##### *Second Term.*

LATIN:—Odes, Horace, Chase and Stuart.

MATHEMATICS:—Astronomy, Sharpless and Phillips.

NATURAL SCIENCE:—Physical Geography, Guyot.

PHYSICAL SCIENCE:—Physics, Norton.

*Third Term.*

- PHYSICAL SCIENCE:—Chemical Physics, Norton.  
 NATURAL HISTORY:—Botany, Gray and Kellerman.  
 GREEK:—Prometheus, Aeschylus.  
 GERMAN:—Conversational Method, Studien Und Plaudereien, Stern.  
 ITALIAN:—Conversational Grammar, Coure.  
 Italian Conversation and Composition.

## JUNIOR YEAR.

*First Term.*

- GERMAN:—Grammar, Sawyer.  
 Prose Reader, Bjornson. *Boisen*  
 German Conversation and Composition.  
 FRENCH:—Conversational Methods, Saureur.  
 Petites Causeries  
 ITALIAN:—Grammar, Coure.  
 Writing and Conversation.  
 NATURAL SCIENCE:—Chemistry, Cooley.  
 POLITICAL SCIENCE:—Political Economy, Gregory.

*Second Term.*

- MATHEMATICS:—Astronomy, Mathematical, Norton.  
 GERMAN:—Grammar, complete, Sawyer.  
 Reader, Bjornson. *Boisen*  
 Conversation and Composition.  
 FRENCH:—Grammar, Duffet.  
 Conversation and translations.  
 ITALIAN:—Racconti, Baccini.  
 Conversation in Italian.  
 HISTORY:—History of England, Anderson.

*Third Term.*

- NATURAL HISTORY:—Zoology, comparative, Orton and Lectures.  
 NATURAL SCIENCE:—Chemistry, Analytical, Appleton, Frasenius.  
 FRENCH:—Grammar, Duffet.  
 French Conversation and Composition  
 ITALIAN:—Imici Prigioni, Silvio Pellico.  
 Italian Conversation  
 MATHEMATICS:—Surveying, Wentworth.

## LATIN.

 THIRD TERM.—Livy, Books I, XXI, XXII; Roman History.

## SOPHOMORE.

- SECOND TERM.—(Elective) Juvenal; Letters of Cicero and Pliny; Early Latin, Latin Inscriptions,

## METHODS.

The Roman method of pronunciation is followed.  
 During the first two terms special attention is paid to the vocabularies, and a thorough acquaintance with the more common forms of declension and conjugation is insisted on. The next three terms are devoted to a systematic study of Latin Etymology and Syntax, and the reading of Cæsar's

Commentaries. There is a continuous drill on the agreement of words, the cases of nouns and pronouns, the principal parts of verbs and the uses of the Subjunctive mood. Irregular nouns and verbs so far as they occur in the text read are expected to be mastered and a beginning is made in a scientific study of the formation and derivation of words. The first twenty lessons in Jones' Latin Prose Composition are studied, and students are drilled in writing other Latin sentences based on models taken from Caesar. In reading Cicero, the special uses of the Subjunctive are carefully noted, and the study of synonyms opposites and derivation of words, is made a specialty.

While reading Virgil's *Aeneid* a beginning is made in the study of Prosody, Classical Geography and Antiquities and Classical Mythology. The study of these subjects is continued throughout the course. In the last year of the Preparatory course, Sallust's *Catiline* and Virgil's *Eclouges* are read. In connection with these, much time is spent in sight reading, and a careful review of the whole Latin Grammar.

In the teaching of Latin the student is constantly directed to observe and imitate, is required to command a large vocabulary and is exercised from the very first in writing Latin and reading easy passages from different authors at sight. These exercises in connection with careful grammatical drill will it is believed best prepare him for the study of Latin Literature in the original.

In College, the study of Latin is required during the Freshman year only. It is expected that before admission to college the student has acquired the ability to read ordinary Latin, with ease, without the aid of the Lexicon. During the Freshman year unusual grammatical forms and rare idioms only are noticed, while the aim is to read as much of each author as possible.

Roman History and Literature are systematically studied throughout the year, both by text-books and lectures. In Literature, striking passages of authors in the different periods are read in the original.

#### TEXT-BOOKS USED.

Latin Lessons.—Jones.  
 Latin Grammar.—Allen and Greenough.  
 Caesar.—Allen and Greenough.  
 Cicero.—Allen and Greenough.

 Early Latin.—Allen.  
 Latin Lexicon.—White.  
 Roman History.—Leighton.  
 Roman Literature.—Crowell and Richardson.  
 Mythology.—Murray.  
 Classical Atlas.—Ginn and Heath.

## PHYSICAL SCIENCE.

PROF. H. C. COON.

### PHYSICS AND CHEMICAL PHYSICS.

The instruction in these is by Text-book, Lectures, and Experiments, giving a thorough knowledge of the elements of these subjects. In the Winter Term, Physics proper is taken up, including the mechanics of solids, liquids, and gases, and sound.

The Spring Term is devoted to Chemical Physics, including Light, Heat, Electricity, and Meteorology. These subjects are illustrated by suitable apparatus, which students use under the direction of the Professor.

Additions are being made to the apparatus as fast as funds accrue from the Babcock Endowment for that purpose. Text-books, Norton's References, Daniel's Sonot Deschanel, Cook's Chemical Physics.

### CHEMISTRY AND LABORATORY WORK.

The Fall Term in this Department is devoted to the study of the elements which are taught by Text-book and Lectures. Students are required to spend at least one hour a day in the laboratory, performing the experiments necessary to familiarize them with the apparatus, and with the elements and their reactions.

Text-books; Cooley's New Chemistry, and Appleton's Young Chemist. References, Clark Richter, Roscoe, and Schorlemmer. Students are charged two dollars extra for chemicals, and pay for their own breakage.

One term is devoted to Qualitative, and one to Quantitative Analysis, with work in the laboratory at least two hours a day, during each term. These are intended to introduce the student to the more practical workings of this science, preparatory to Medicine, Mechanical arts, and Agriculture. For these, ten dollars extra are charged for each term.

### PHYSIOLOGY.

One term is devoted to the elements of Anatomy, Physiology, and Hygiene, including the subject of Stimulants and Narcotics, as required by our State of all teachers of its common schools. These subjects are illustrated by a manakin, skeletons, charts, histological slides, and prepared specimens.

The advanced Physiology is designed for those who desire a more extended knowledge of the subject, and, especially, for students preparing for Physicians. They are expected to dissect and study the structure of animals especially the cat, and become familiar with the preparation of tissues for the microscope, and to learn how to use this instrument in their investigations.

### TEXT-BOOKS.

Physics.—Norton.  
 Chemistry.—Cooley's New Chemistry, and Appleton's Young Chemist.  
 Chemical Analysis.—Appleton's and Fraweain's Qualitative and Quantitative.  
 Political Economy.—Gregory.  
 Descriptive Astronomy.—Sharpless and Phillips, or Young's.  
 Physiology.—Cutters Analytical Anatomy, Physiology, and Hygiene, or Tracy's.  
 Advanced Physiology.—Martin's Human Body.

## NATURAL HISTORY.

PROF. E. P. LARKIN.

M. SHEPPARD, M. D., Lecturer on Ornithology.

There will be a three year's course in Zoology, Botany, Geology and comparative Anatomy and Physiology, and Biology will be taught, as a speciality, whenever called for.

There will be a shorter course of one year, in each of the above named studies.

The beginners' class in Botany will be organized for each Winter term, when especial attention will be given to the germinating of seeds, and observing How Plants Grow.

Students in Biology will have the use of first class microscopes, and the course will consist principally in the study of Animal and Vegetable Histology.

Instruction in this department will be given by lectures, in addition to the following text-books:

**ZOOLOGY.**—Comparative Zoology, by James Orton, Ed. 1883, and Lectures. For reference, Zoology, Packard.

**BOTANY.**—Elements of Botany, Kollerman, Gray's Manual of Botany, (Last Ed). For reference; Botany, Bessy, Gray's Botanical Text-book; North American Lichens; Tuckerman, Part I., Macclerkie's Botany.

**GEOLOGY.**—New Text-book of Geology; Dana, Edition of 1883, revised and enlarged, and Lectures. Reference, Dana's Manual of Geology.

**BIOLOGY.**—Practical Biology; Prof. Huxley and H. N. Martin, London, McMillan & Co., 1882, and Lectures, The Crayfish, Huxley. Reference. The Microscope and its Revelations, Carpenter, Botanical Microchemistry, Poulsen.

**ANATOMY AND PHYSIOLOGY.**—Anatomy of Invertebrate Animals; Huxley; Human Body, Martin, etc., and Lectures.

**ORCHESTRAL AND OTHER INSTRUMENTS.**—Instruction will be given upon Orchestral and Band instruments, both in individual lessons and in classes, as there shall be demand for it. No pains will be spared to make the instruction in this department of the Conservatory complete and thorough.

**VOCAL MUSIC.**—Throughout the entire course much time and attention will be given to the study of vocal music. There will be classes for rudimentary study and practice; frequent exercises in congregational singing by the entire school; and special classes for Chorus practice, in which will be studied the best chorus compositions of the old masters, as well as those of more modern writers. When practicable, orchestral practice will be joined with chorus study.

## GRADUATION.

### BACCALAUREATE DEGREES.

The following degrees are instituted:

Bachelor of Divinity, upon graduates of the Department of Theology, provided they are College graduates; Bachelor of Arts, upon graduates of the Classical Course; Bachelor of Philosophy, Philosophical Course; Bachelor of Education, Normal Course; Bachelor of Industrial Mechanics, Department of Industrial Mechanics; In the three following Departments, if students, in addition to the special studies, shall have pursued studies equivalent to the Normal Course, the following Degrees will be conferred: Bachelor of Fine Arts, in the Department of the Fine Arts; Bachelor of Music, in the Conservatory of Music; Bachelor of Accounts, in the Business Department.

### ADVANCED DEGREES.

The Masters' Degree, in course, will be conferred, on application, upon such as shall become entitled to the Degree.

### DIPLOMAS.

The completion of the special courses, without the additional studies required for a degree, will entitle the student to a Diploma, certifying such completion.

## TUITION.

The expenses for tuition are as follows:

Preparatory,	\$8 00
Academic,	10 00
Collegiate,	12 00
Chemical Laboratory,	10 00
Oil Painting and Crayoning,	10 00
Instrumental Music,	10 00
Cultivation of the Voice, in Class,	6 00
Cultivation of the Voice, Private Lessons,	10 00
Business Course,	20 00
Drawing,	2 00
Elocution, in Classes,	1 to 2 00
Graduation Fee,	5 00

### EXTRAS.

Surveying, use of Instruments	1 00
Chemistry, Chemicals,	2 00
Music, use of piano one hour a day,	2 00

All Tuition is paid in advance. In case of absence, no deduction will be made on tuition bills as arranged, except in cases of absence on account of sickness, or to teach, and then the charge will be \$1 to \$1 25 per week for the time of actual attendance.

Parents and Guardians are earnestly solicited not to furnish money to be squandered on useless and frivolous things, nor permit their children or wards to contract debts for the same, thus laying the foundation for extravagant and reckless habits.

## BOARDING DEPARTMENT.

SAMUEL WHITFORD, Steward.

Mrs. S. C. WHITFORD, Matron.

The Boarding Hall contains rooms for the accommodation of teachers and students.

	EXPENSES.
Board, per term,	\$39 00
Rooms,	6 00 to 12 00
Fuel,	3 00 to 6 00
Washing, per dozen,	50

Students furnish their own lights.

The expenses, paid, one-half at the commencement, and one-half at the middle of the term.

Applications for boarding in the Hall to be made to the Steward.

Students boarding at the Hall are required to conform to the rules of the same.

## LOCATION.

The University is located at Alfred Centre, Allegany County, New York, two miles from the Alfred station of New York, Lake Erie and Western Railway. The situation is retired and healthy, in a rural region, surrounded by delightful scenery. The village that has grown up in connection with the Institution, is composed chiefly of a population who have received the benefits of its educational influences, and whose interests are intimately connected with it. This gives a special atmosphere of culture and good order. There has been no liquor license granted in the town for over forty years. As a home for students, it is comparatively free from the ordinary allurements to vice and dissipation, and the temptations often attending student life. Those who seek bad company, however, will find it, or make it, anywhere, and the Institution does not offer itself as a moral hospital or reformatory to the idle, the listless, or the vicious, or those who are too wayward for home restraints. Its facilities are for the orderly and the industrious.

## ADMISSION.

The Institution is designed for both sexes, with equal rights and privileges. The candidate for admission registers his or her full name, age, and residence, and, if under twenty-one years of age, the name of parent or guardian. On registration the candidate is a member of the school, entitled to its privileges and subject to its requirements. The student, upon such admission is furnished with a copy of the general requirements, and is, thenceforth, supposed to be acquainted with the general rules of the school. The holder of a Certificate of Registration is thereby entitled to examination and Classification. These occur on the first day of each term.

## THE REGULAR COLLEGE EXERCISES.

The regular exercises which all the students are required to attend, unless specially excused, are: Chapel, recitations in the classes for which they have entered, five days in each week, Church, and Bible study, each week, also, examinations, during, and at the close, of the term.

## LITERARY SOCIETIES.

There are four permanently organized Societies, two for young men,—the Alleghanian and the Orophilian,—and two for young women,—the Alfredian and the Athenæan. They are conducted with ability, having long maintained a high standard of literary excellence. They meet each week

in attractive and well furnished rooms. The members present essays, orations, and discussions, and become familiar with parliamentary rules. These Societies are, thus, important aids to those who are desirous of becoming good writers, and speakers, and participants in the proceedings of public bodies.

## LIBRARY.

The Institution Library consists of a choice selection of Histories, Biographies, Greek and Latin Classics, Mathematical and Scientific works, standard English Literature, and Theology.

## CABINETS.

Cabinets in Lithological Geology, Palæontology, Archæology, Conchology, Entomology, and many branches of Vertebrate life, illustrate these branches of study. Valuable additions are being yearly made to these collections.

## CHEMICAL LABORATORY.

Facilities are offered students for special study in Chemistry. Students pursuing the General Course in Chemistry may, in addition, elect the Experimental Course in analytical work and Laboratory Practice.

## MICROSCOPICAL LABORATORY.

Instruction is given in the use of the Microscope, in the Microscopic structure of rocks, and in Vegetable and Animal Histology. Students in Physiology, Botany, Zoology, and Geology, may elect Microscopical work in connection with these subjects.

## FACILITIES FOR SELF-SUPPORT.

Faithful, diligent, and enterprising persons can usually find employment, with satisfactory compensation, for all the time that they can profitably spare from their studies. Many earn sufficient to meet a great part of their expenses, while a few, by rigid economy and hard work, meet all their expenses. All the traditions, arrangements, and influences of the school and place favor economy in all living expenses. While a student thus working, may be somewhat longer in completing the course of study; yet the education acquired in self-support is of the most available and valuable kind. All things help those who help themselves.
