Resumé Expert use disputed by AU students

Before Resumé Expert was used, the CDC was jeopardizing students’ opportunities, said Carvana. She said when companies called looking for students with certain qualifications, it took too long for the CDC staff to search through resumes manually. Carvana said the delay caused students to miss out on opportunities.

Carvana said the program was made compulsory to encourage students to start planning for their careers. This year, many more underclassmen have registered with the CDC than in the past, she said.

Students at the meeting said they objected to the program because it limited their individuality. They said they worried what employers would think of a resume that looked just like everyone else’s.

They also expressed concerns that the program is outdated, eliminates style and creativity and is not user-friendly.

Other students complained that their resumes were already done and to have to redo them in a different program was an unnecessary waste of time.
Carver Development Center Director John Carvana held a meeting last week to respond to student concerns about the use of Resume Expert software.

Almost 100 students signed a petition against usage of the software because the style of resumes was too restrictive, and information already available to students could not be imported. Carvana responded well to the criticism, saying, "If we’re not doing something right, tell us.

Some students listed their complaints about Resume Expert.

Carvana attempted to remedy the situation by saying the software was no longer mandatory.

He explained that employers wanting resumes quickly would only receive those created on Resume Expert, and only those employers allowing more time to gather resumes or visiting campus would be given resumes not created by Resume Expert.

In addition, once the CD has the capability to post resumes on the Internet, the CD will only post those resumes in Resume Expert. (As an alternative or supplement to CD benefits, students may want to check out http://www.monster.com, one of a number of Internet sites devoted to job searches and resume postings. Here, people can create resumes within the Monster site or upload their own.)

Resume Expert is an unpublicized program compared to the ones most students would write their resumes on. It involves fields and allows little originality in terms of set-up and design of a resume.

For students who would like their resumes to stand out, especially art or design students, Resume Expert definitely limits that ability. How many employers would like to see a resume that looks like everyone else’s?

Those attending the meeting also pointed out other problems. For those students who already created resumes, they’ll probably have to start over. Resume Expert is a DOS-based program, and does not have the capability of importing text from another word-processing program. For some people, that’s a lot of work to throw away.

A final problem with Resume Expert is the large number of viruses found on the disks and transferred to Olin computers. To fix this problem, Computing Services now needs to install an additional virus scanner for DOS. This seems rather counterproductive. Maybe the CD should look for a more flexible, more reliable program.

One solution suggested using Resume Expert as an a la carte. If the CDC needs to find students which meet certain qualifications, the program could be used to determine which students meet the requirements, and then the CDC could pull those students’ resumes from a file drawer. That way, students could be identified with a database but represented with a resume that is more happy with everyone.

Carvana dismissed the idea, saying he didn’t want to go to two systems and that e-mailing resumes is easier than mailing them.

But this isn’t two systems—it’s one with two options. And while e-mailing certainly is easier, how much more difficult could operating a fax machine be? This solution seems to meet the students’ need for flexibility while still offering the convenience of Resume Expert.

Currently, only about the same number of students have submitted their resumes to the CD, via Resume Expert. And this type of response is exactly what the CDC should aim for.

But they’ve given this responsibility by forcing students into a corner by mandating use of Resume Expert. Now, they’ve allowed students to take a step out of the corner, but still remain in a small room.

Carvana said, “This is the first time we’ve really had this problem with bad breath.” It seemed to be open to students’ concerns, which is commendable. But far from ideal.

The CD should be bending over backwards to help students find jobs. And so far, they have. This year there have been more announcements of job fairs and attempts to get students’ resumes to employers, and that says a lot for the efforts of Carvana and the CDC.

But far from keeping insisting students primarily use Resume Expert limit them and limits us.

Clinton victory: Sign of the times

In a time when it is easy to point fingers at political candidates for being too negative and at the media for sensationalizing stories, a presidential election was held and voters ignored negativity both in the press and on the platforms in making their choice.

Last week, President William Jefferson Clinton was reelected to a second term in the White House. This was no surprise. Clinton maintained a sizable lead in the polls over Republican Robert Dole and Reform candi- date H. Ross Perot throughout the campaign.

And Clinton won this election, which had low voter turnout and interest levels. According to major TV network exit polls, mos- ters, in fact, said they learned little about the candidates or their plat- forms from the campaigns.

A few conclusions could be drawn from this. The first would state that none of the candidates were at all popular, thus causing the low interest levels. Another possibility would be to say that voters were turned off by the neg- ative and image-driven campaigns run by the candidates.

In other words, mudslinging detracts from the main issues and therefore detracts from the exis- tence of helpful and informative campaigns in contemporary poli- tics.

Hey folks, mudslinging has been around in American politics since the 1800s, and many meaningful and high-interest elections have been held since then.

There is a definite reason why there was so much focus on image, especially from the CDC, in terms of ethical attacks on Clinton. It was because there were no "real" issues to attack Clinton on. This is because, as several exit polls have shown, people are happy—or at least content—with the status quo.

Traditionally, low turnout has been equated to high contentment rates among voters, and this elec- tion was no different. The average American voting and the average family income is consider- ably higher than it was four years ago.

There haven’t been any major wars or catastrophes, foreign or domestic, that have had a consider- able impact on American citizens.

In other words, things just aren’t that bad.

Whether this has anything to do with what Bill Clinton has done in office is a different argument, but the point is that for some reason, economic, foreign and social situ- ations are decent right now.

Clinton said he’d stick to a pos- itive, issue-oriented campaign, and he did. He praised Dole’s service to Congress, but criticized his pro- posed tax and program cuts, say- ing they were either too dangerous or too costly, both economically and socially.

Dole started his campaign on the positive side by dodging the campaign of Clinton questions. But later in the campaign, Dole, lag- ging in the polls, finally went on the offensive by bashing Clinton’s image. But nobody cared about his image, because Clinton, at least for the time being, is running over a healthy economy and job market, had already won the issue.

Television advertisements and news coverage may have given substantial coverage to superficial issues such as "image" can include political (cau- pal agendas). But the voters did not make their choice based not on image, and maybe not even on issues.

They based their choice on which candidate they thought would continue to make their day- to-day lives more livable, and that is still is probably more impor- tant than any single issue.

---

My column on this week, “The power of a good impression,” stated that people today put more emphasis on appearance. And by "appearance," I meant how people present themselves, how they act and what they do, not just their appearance in physical form.

Aimee, the president of a company that helps people put their best foot forward, said that a good impression is crucial in the workplace.

"People spend half of their waking hours at work," she said. "If they make a good impression, it will open the door to future opportunities. If they don’t, it will close it forever."

That’s why we have to put as much focus on appearance as we do in other areas of our lives. And that means that if we want to get ahead, we need to make sure we present ourselves in the best possible light.

---

But what about the rest of the world? How do we make a good impression abroad? And what about the role of image in politics, specifically in the United States? These are questions that need to be addressed if we want to succeed in the global marketplace.

For instance, the United States has a reputation as a country that is powerful and confident, but also judgmental and arrogant. This image has been reinforced by our political leaders, who often use negative tactics to gain power, and by our media, which often focuses on superficial issues.

But what about the rest of the world? How do we make a good impression abroad? And what about the role of image in politics, specifically in the United States? These are questions that need to be addressed if we want to succeed in the global marketplace.

Correction: The Greek Leadership Conference held during WORM week was sponsored by the Office of Student Life and not the Office of Student Senate.
Dear Editor,

On behalf of the Student Activities Board and the entire Alfred community, I would like to thank the Brothers of Kappa Sig for opening up their house to our third annual Haunted Hall. Without their support, our program would never have been as successful. They went above and beyond the call of duty, lending their house, cleaning, decorating, and participating in the Haunted Hall, and we all appreciated their efforts. They were great to work with, and we look forward to working with them again in the future. Everyone had a great time; thanks to them.

Sincerely,
Jennifer Baran
SAB President

Dear Editor,

On behalf of Adopt-A-Youth Organization, I would like to thank the Brothers of Kappa Sigma for hosting our annual Halloween party for the kids of the Hornell area.

Every year, our Student Volunteers of Alfred University come together to plan something new and exciting for the undervprivileged kids of the Hornell area. It is not always easy to keep everyone interested and alert, but with the help and imagination of the Brothers of Kappa Sigma, they were able to make this Halloween party a success.

Every Brother, with your great ideas for the Haunted House we were able to keep the kids entertained for several hours, and everyone was happy! Great job, guys—that definitely deserves a round of applause.

I hope that in the future, by working together, we can make even more great things come true for many little kids!

Sincerely,
Paulina Freyborg
President of IVCS

AU’s Native American organization refutes columnist’s arguments

Dear Editor,

We were distressed by the tone and information presented in the letter to the editor written by Brewer. His presentation of a viewpoint he describes as “constructive criticism” and “academic integrity” is nothing more than an exercise in the supremacy of a white, male, American, and one that is unapologetically racist.

In his letter, Brewer argues that Native Americans should not be taught about the Columbus tradition, that the implication of such a tradition is detrimental to the Native American experience, and that Native American students are not interested in learning about such an event. He suggests that Native American students prefer drinking games over activities that highlight reconciliation and understanding.

We would respectfully argue that Brewer’s arguments are not rooted in truth but rather in his own personal biases and prejudices. No student, regardless of their background, should be considered for events that they do not find to be meaningful.

Our organization believes in the importance of reconciliation and understanding, and we believe that Native American students are interested in learning about Columbus and his impact on the Americas.

We are proud of the work that we do, and we are committed to ensuring that our students have the opportunity to learn about the richness of Native American culture and history. We urge Brewer and others to consider the perspectives of Native American students and to work towards creating a more inclusive and respectful environment for all students.

Naranjo, M.D., Member of the Academies of Medicine and Science

LETTER TO THE EDITOR

Dear Editor,

In response to Brewer’s letter, we would like to share our view on the Columbus tradition. We believe that it is important to teach and acknowledge the history of Columbus and the New World.

Colombian Encounter.

We would like to ask what is being done to address these issues?

LETTER TO THE EDITOR

Dear Editor,

On behalf of the Student Senate, I would like to express our gratitude for your support, our sisters, our brothers, our relations.

Thank You,
Donehogawa

NATIVE AMERICAN STUDENT ORGANIZATION

LETTER TO THE EDITOR

Dear Editor,

Frosh year program aims to retain, help, develop

By Michelle Pancoe

Senior update

Alfred University went on tour for an interview with the President of Campus Activities, Steve Harpert, director of student activities, at a recent meeting of Student Senate.

The University won awards for last semester's activities calendar. This semester's activities calendar, last year's Homesteading poster and the Cultural Celebration were included.

Also, Zach Hampton, Student Senate president, said he would like to see more ice skating rinks on campus. He said there is a possibility in the area of the bandstand that would be flooded to form an outdoor ice rink.

The executive board of Student Senate presented awards for the best programs in September and October. FNL was recognized for its 25th show in the Hornell area. APA and Poder Latino were recognized for Cultural Cade in October.

Hampton said that if the future of organizations, co-sponsor events, Senate will pay for the publicity.

Senate Allocations requests were granted to the Organization for Green Living for a rainforest awareness poster. The National Automobile Dealers Assn. was given money to buy CPR videos and training equipment and to buy football team jackets.

The committee reported that the dining halls are trying to get food for their multicultural committee said that they will try to make the Festival of Nations an annual event. Also, the spirit committee said they plan to publicize sporting events on campus and would like to sponsor a spirit event.

This is the beginning of a successful year.

Mike Christakos, Student Senate vice president, said that the Keesleit committee was working on the interior of the building, including deciding on furniture.

Tricia Debertolis, assistant director of Powell Campus Center, and Dan Nagashis, assistant director of student activities, were also congrats on their marriage.

Frosh year program aims to retain, help, develop

Alfred University is encouraging freshmen to play drinking games in the residence halls.

The drinking games are part of the Freshman Experience program, which is aimed at providing the transition to college life. F.Y.E. is a required core program and community-builder program.

Students are divided into teams within the residence halls. The resident assistants in each hall are in charge of presenting a program to each group on a weekly basis.

The core programs address issues such as drug and alcohol use, sexual assault, study skills and improving community relationships. The programs are designed to provide students in the residence halls to socialize and interact with each other through activities like hitting trips, movies and informal drinking games.

Sarah Clark, a resident assistant in Cannon Hall, said student reactions to the program have been mixed. Clark said the most successful activities have been those involving the whole hall instead of the individual team members and the programs students felt were necessary, such as learning the VAX system.

Freshmen Matt Fleming and Greg Smith agreed that the concepts were good, but the programs turn out to be meaningless.

"The execution just isn't there," Fleming said.

F.Y.E. program was developed at the University of South Carolina by John Gardner, a student affairs expert. Its aim was to improve both student retention rates and overall GPAs. Since its conception in 1973, the sophomore return rate remains higher for students involved in the program. In 1994 the sophomore return rate for students involved in the program was 78 percent compared to 69 percent for nonparticipants.

Alfred University implemented the program in part due to the rising number of freshman dropouts. In the 1995-1996 school year, AU had a freshman dropout rate of 11 percent. This is better than the national average rate of private universities of 25.9 percent.

But the University would still like to improve, said Ian Neuhard, assistant director of student activities, at a recent meeting of Student Senate.

He said AU's F.Y.E. program is also intended to improve GPAs, assist students in social development and build a greater sense of community within the residence halls. F.Y.E. is a program for full-time students, but also student success, Neuhard said.

Although the program should be seen as mandatory, Neuhard said, punishment for not attending is seen as counterproductive. Instead, students not attending, especially in some judicial violations, will be questioned about their absence.

These are the people the program is targeting, Neuhard said.

We’re not as worried about the student who is integrated. We’re worried about the person who is not succeeding,” he said.

Resident director Jennie Volfotte and Clark agreed that more student feedback is needed.

"The program is still in its very early stages," Volfotte said.

Clark said the concept of F.Y.E. will be used in the future, but possibly in a different format.

Dear Editor,

On behalf of Alfred University, I would like to thank the Brothers of Kappa Sigma for hosting our annual Homecoming poster for the kids of the Hornell area. It is not always easy to keep everyone interested and alert, but with the help and imagination of the Brothers of Kappa Sigma, they were able to make this Halloween party a success.

Every Brother, with your great ideas for the Haunted House we were able to keep the kids entertained for several hours, and everyone was happy! Great job, guys—that definitely deserves a round of applause.

I hope that in the future, by working together, we can make even more great things come true for many little kids!

IU
Behind the scenes of a play production

**PART 2 of 2 BY JASON GRAW**

Stephen Crosby, associate professor of theater and director of "Buried Child," sat with the rest of his class, ready to begin. "I'm here again with a ready smile. Now that the production of the play is over, I want to know more about the rehearsal process. We sat down in his office, and Crosby began.

Now that the actors have a "blurry vision of the moving scenery," they can begin to enter the text themselves and take on the aspects of the characters. Barially, Crosby broke it down like this: First the actors familiarized themselves with the text's patterns of human behavior; then they lay down some technical blocking plans which will help the actors assimilate their role's characteristics. Finally, they delve into the specifics of the character, so the portrayal is not a flat character.

This last facet of rehearsal is the most difficult part. Crosby feels it is the most difficult step by step, exploring the individual moments, or "beats" of the text, which include the dialogue's subtext. Once the actors know what the characters are saying underneath their words, he began to know what makes each character act the way they do. From out of this context, a "magical" expression of human behavior can be achieved.

In the case of "Buried Child," the characters have all been abused and hurt by each other, said Crosby. "It makes for a fascinating, dynamic and tension-filled environment within the context of the play," he said.

While all of this is going on, the technical aspects of production continue. David Downings, scenic designer and technical director, has been working with Crosby and scene design students to create the set for the play. Crosby excitedly showed me the schematic for the stage and explained how all of it would work together to form an expression of the play itself. He mentioned how much would be created through the use of light and sound, for instance, creating a rain effect. It takes much more than just recording the rainfall outside your door; Crosby said, because to the audience, that would just sound like static.

By adding in a single drip noise and the sound of water flowing through a rain gutter, however, the sense of a storm is achieved. "Buried Child" is the hardest task to accomplish. His students have ever had to do, he said.

**PART 1 of 2 BY JASON GRAW**

Natalie Saj6, a poet who will be reading her work tonight, at 7 p.m. in Howell Hall, writes poetry as if she skins fruit, getting under the surface of things. I thought I would give those reading this a sampling of Saj6's work rather than delving into any specific one, as a primer for tonight's reading. "Taste is where we will begin. In Chocolatas," she writes:

Like nuclear clocks and racing cars chocolate requires precision, but like capers or caviar they must be consumed before they bloom or break. And then they dissolve to nothing on the tongue, like names called out in anger, and in love.

She utilizes this unique method of using food as a way of talking about social problems in many of the poems in her collection, Red Under the Skin. "Red," food becomes a work rather than delving into the personal. It is like having sex, tied to love.

I will leave you with how she ends it. But sometimes babies happen to people who aren't adopted...If you are interested, send a note with your name and phone number to:

**Did You Know That:**

**BY KENNETH LEONG**

Since the beginning of the semester, Alfred University's musical groups have been practicing for Festifall '96. Alfred school and local community could not have shown more appreciation on Friday, Nov. 1, than by packing Holmes Auditorium to observe this spectacle.

The theme of the evening was "Connections." Laurren Clarke, director of both the AU Chamber Singers and AU Chorus, provided the audience with a marvelous collection of songs. The Chamber Singers were on stage first. Their rendition of "Caravan" was very moving. Following the intermission, the AU Jazz ensemble and Marc Sackman, director of Alfred's concert band and jazz ensemble, treated the audience to some Latin American tunes. Quite a repertoire of percussion was incorporated during the presentation. Congas, bongos, cumbias and maracas accompanied the typical battery of drums.

A guest appearance was made by Vida Eaklor, professor of history, as she played violin with freshmen drummers Kevin Rowland and Aaron Miller. "Spain," she said, "is the music of the age." Pinyan, and they both agreed.

I also asked them about the director, Crosby. "A better show because of it," Pinyan agreed, saying that sticking to the original time frame would have "cut off discoveries" that could have been made with more time.

All this adds up to a play that promises to be enjoyable.
Built in 1884, Kanakadea Hall is the newest of all the 19th century buildings on campus. Originally built by the Alfred School District to house the Alfred Center School, the building cost under $8,000. The day before the start of the school year in 1907, when the Alfred Center School was still used to educate the village children, neighbors saw smoke billowing out of the grade school building. The blaze took out the tower and parts of the second story. After the fire was extinguished, the Alfred School District was faced with a choice to either rebuild or sell. By this time, the flourishing Alfred University campus had entirely surrounded the small schoolhouse. University President Davis decided to acquire the building to restore it to a usable state. The acquisition was more of a trade than a purchase. The University gave the Alfred School District the south end of the University’s Park Street lot, later used as the location for South Hall, in exchange for the burned-out Center School. The newly acquired building housed the departments of history and political science. For many years the Kanakadea was also the home of the Registrar’s office. By 1932, Kanakadea also housed the office of the dean of the College of Liberal Arts and Sciences.

Once Upon A Time...

Meet the Fiat Lux
Who annoyed you this issue?
Take your best shot!
of Strong and Brody, Strong's title would change to vice president for enrollment and academic services, and Brody's title would become vice president of student affairs. Under the proposal, Strong would still report to Strong. 

"One would like to think we all tighten our belts together," said Lou Grieff, professor of English.

The proposal from Coli's office also calls for changes in the titles of

Bernstein said he didn't feel he had to share what he thinks about the changes. It seems odd to have a vice president reporting to a vice president, he said.

Title changes for Strong and Brody would be accompanied by "modest raises," according to the memo. 

"It would create modest raises for the two new VPs, an administrative assistant for the Provost's office, a raise and secrecy for the dean of information technology, and a modest raise for the new director of the Library," according to the memo. 

Bernstein also said he believes the proposal would improve the overall administration and make it more efficient. 

"Only Strong and Brody were out of town and unable to be reached for comment."

under analysis," Dressman said. He said the enzyme produced by the bacteria with the new plasmid will now be studied to determine the function of the specific region of DNA which was altered.

"It will not do anything to improve academic matters, but it's already in his pocket," said a faculty member who did not wish to be identified.

"It will not do anything to improve academic matters, but the only people on campus who can step it are the faculty, and most of them are too tied up to do it," the faculty member added.

Bernstein said he did not feel academicians would be overlooked under the new proposal. He said academicians have been the primary focus of the Provost, and he will continue to "keep a strong focus on improving academic opportunities and the University's reputation."

The task force had recommended the additional responsibilities be given to the executive vice president, but advised the creation of "the position of academic vice president for primary responsibility for coordination of all academic programs."

"It sounded like a good idea," said Wes Benta, president of the Faculty Senate. 

The changes were discussed at the last Faculty Senate meeting, Greg said. 

"I think it needs further discussion with Faculty Senate," he said. Grieff also said faculty input in the decision-making process of the University may need to be addressed.

The new proposal would also create the position of dean of information resources, to be filled by Lani Meisner, director of Herrick Memorial Library. The position of director of Herrick Library would be filled by a member of the current staff of the library, according to the memo. 

Bernstein said he didn't believe there would be any substantial cost to the University. The memo fixes the cost of the proposal between $75,000 and $90,000.

"This would include modest raises for the two new VPs, an administrative assistant for the Provost's office, a raise and secrecy for the dean of information technology and a modest raise for the new director of the Library," according to the memo. 

Bernstein also said he believes the proposal would improve the overall administration and make it more efficient. 

Goldstein said  now that a mutant gene has been produced, he expects Dressman to co-author a scientific publication. "Devin is a very bright and highly motivated young man," Goldstein said. He worked very hard and expected Dressman to co-author a scientific publication. "Devin is a very bright and highly motivated young man," Goldstein said. He worked very hard and expected Dressman to co-author a scientific publication.

"This petition was the best of all the information in fields so it is easily recognizable.

"The new proposal would also create the position of dean of information resources, to be filled by a member of the current staff of the library, according to the memo. Bavaredo and Strong would be the new academic vice president with primary responsibility for coordination of all academic programs."

"It will not do anything to improve academic matters, but it's already in his pocket," said a faculty member who did not wish to be identified.

"It will not do anything to improve academic matters, but the only people on campus who can step it are the faculty, and most of them are too tied up to do it," the faculty member added.

**Virus booted off Olin Computers**

**BY STEVE WAGNER**

The Olin computer virus problem should be over, said Brian Pye, instructor for business administration. There was no system loss, but many students reported lost data from personal floppy disks.

The reason for the virus outbreak was indirectly linked to the new Career Development Center's program, Resumé Expert, said Conrad Beckman, director of computing services.

"The virus scan program is up-to-date," said Beckman. "The student's computer program does not run when CDC software is used."

The McAfee Virus Scan for Windows is just that—a virus scan. Upon Windows start-up, the virus scanner checks the machine for viruses. Also, whenever files are copied, moved or renamed, the scan runs.

However, this only occurs if the user is in Windows. The CDC software is a DOS-based program, said Beckman. Students wishing to use Resumé Expert type in a special password.

**University student arrested on drug charges**

**BY JONATHAN BAUM**

AU sophomore Eric Malcolm was arrested Oct. 26 on various drug charges. Malcolm was charged with criminal possession of marijuana in the 2nd degree, criminal possession of a controlled substance in the 7th degree, and unlawful growing of marijuana after various drug paraphernalia was seized from his room at Zeta Beta Tau fraternity on Main St.

Kingsbury, a detective of the Alfred Police Department, said the Southern Tier Regional Drug Task Force investigated the situation and obtained a search warrant for Malcolm's room. The APD only assisted in the execution of the search warrant, said Belmont.

"We assisted in the execution of the search warrant, said Belmont.

---

**Full-time RDs' performance gets thumbs up**

**BY MEGAN ALLEN**

With the transition year nearly half over, having full-time resident directors in residence halls seems to have been successful.

"It has gone really well," said Sue Smith, assistant dean of students and director of Greek affairs, "We have a problem in cases where students have concerns, said Smith. All RDs are working on creating a bulletin board on the VAX with tutors' names."

---

**Centralized tutoring system offers easier access to services**

**BY SARAHN HARRISON**

Tutoring services are now centralized due to student response to last year's program, said Associate Provost Susan Strong. Student reaction to last year's tutoring procedures was positive, said Strong. Group and individual tutoring sessions were available last year within the college, but students were required to travel across campus to receive a tutor.

Students were not comfortable with the idea of requesting tutoring services from their deans, and some students had problems expressing their needs.

Michael Christianski, a sophomore history major and history tutor, attributed the negative student response to the idea that the deans are not very visible to students. He said even tutoring services from their dean, and some students had problems expressing their needs.

Next year, the tutoring system is to be more centralized, said Strong. The problem has been solved, however.

The presentation, "Post-election gender roles in government," was given by the Department of Women's Studies.

Lambda Chi Alpha readies for return to Alfred University

BY JEANNE VIGER

Lambda Chi Alpha will become a part of the Greek community again next semester and plans to strengthen inter-fraternity relations.

"The Greek community has changed a great deal since I was a brother three years ago, but I'm sure Lambda will have no problem adapting to the changes," said Dave Williams, a graduate student and Lambda brother. Lambda hopes for support from the Inter-Fraternity Council, he said.

Lambda is aware that fraternities are worried that another fraternity in Alfred will decrease numbers in the houses.

"We'll cater to a different clientele. We'll attract the men who want a different fraternity life than what the other fraternities have to offer," said Dan Porter, managing director of Li'l Alf and liaison between Greek Affairs and Lambda's Alumni Association.

Mitch Feldman, treasurer of Lambda's Alumni Association, said, "Each house has its own personality. The men who join Lambda will have the opportunity to mold the fraternity into what they want it to be without the guidelines of Alfred University policies and Lambda's national fraternity."

Cohesion between the fraternities will make the Greek system stronger and more unified, said Feldman. Therefore, "Equality within the brotherhood as well as in the Greek community will be instilled as a value in the first associate membership class," Feldman said.

Lambda does not plan to come back to Alfred and remove Kappa Sigma from its house. "In fact, Kappa Sigma has just signed a lease for the '97-'98 academic year," said Feldman. This year will provide an opportunity for Kappa Sigma to go ahead with the construction of its new house and for Lambda to get on its feet, he said.

"We look at our return to Alfred as a way for the Greek community to grow," said Feldman. Feldman added that Lambda did not plan to take prospective others from other houses, but tap a new market.

Lambda has its charter in fall 1992 for breaking probation with alcohol and risk management violations, said a Nov. 1996 Plat Lux article.

POLICE BLOTTER

The Alfred Police Department reported the following arrests and incidents from Oct 22 to Nov 4.

Arrests: (Open Container)

- Michael P. Jennings, 20, Fairport (Oct 25)

Men's basketball, ski teams look ahead

By CAROLINE HUMEN AND KERRIN APPLETON
(PART I OF 2)

Men's Basketball

AU's men's basketball team is hoping for a successful season in the new conference. Head Coach Jay Murphy, who is in his second year on the job, is looking forward to the new conference, especially since the PAC allowed his team to travel more often into the Ohio and Pittsburgh areas.

Despite the conference change, competition is expected to remain on the same level. Murphy is looking at Washington and Jefferson as the toughest competition for the upcoming season, since they have appeared consistently at the top of their NCAA division and have a lot of basketball history and tradition.

Another powerhouse to watch for this season will be Waynesburg. Last season they had two first team all-league players who were in double figures.

Consequently, Murphy is looking to his players, especially the senior trio-captains Jason Amore, Chris Johnson and Vinny Morris, to bring up the level of play and dominate the conference.

Murphy is depending on the captains' aggressiveness, defense and relying on them to be the vocal leaders on the court.

Murphy also said sophomore Brian Qualtan has improved his quickness during the off-season and is learning to drive to the basket more often. Junior Dan Young is adding to the team's aggressiveness and improving overall, said Murphy.

Finally, the addition of three new players seems to strengthen the team even more. Devin Dowson has "great physical talent," Brenden O'Bourke "is a point player and great passer" and Ryan Smith, "has great physical skills," claims Murphy. He said one of the most important things is that the team has to "be ready to play each night."

Offensively, the team shoots the ball well and is, on the whole, a quicker team, but they need to remember to reverse the ball and keep the spacing on the floor, said Murphy. Murphy added that one of the major strengths of the team is balance. "All the players are vital to the team. They have team roles, and they have to hang together like a family throughout the year to have a successful season," said Murphy.

The team starts its season Nov. 28 at Ithaca.

Downhill Alpine Skiing

The AU ski team, headed by sophomore Danielle Evrigen, senior Pearl Dzik, junior Jeanette Oتوفر, freshman Michelle Schomesk and freshman Eline Ordorica, is looking at a tough season against the second seeded Nazareth and last 6-0.

"I really want the teams not having Nicolo Lebo in the game due to an injury. She is an excellent player who provides great leadership on the field," Codispoti also credited the loss to inexperience. "We were against a very experienced team who has played together for a while, compared to our team who is still very young and learning."

She said one of the major reasons the team has such a great season was the leadership provided by the captains and upperclassmen.

Unfortunately the Alfred Saxons are losing a couple of great players and leaders from the team this year, but Codispoti said she hopes with the talent they still have that they can be a team for another successful season next year.
