From you and from classrooms like yours must go out that leadership of social good-will and that law of inter-
national service, in which alone is the basis of Europe's redemption, and through which alone can come endur-
ance for the future. It must be a call for leadership in schools and churches and parishes of the world. The delayed war notions will call, as never before, for policies and programs that make every truth in our country and for integrity in our poli-
ties. From you and from classrooms like

"The College Mind

Preparedness? Yes. If North America is to play her true part, her promised part, in the gigantic re-

flects of ideas, which will disturb and menace the world long after the pres-

ent war of brute force has spent its-

itself. It is high time all the institutions learning in these two American no-
tions made ready for that inevitable struggle.

But the preparedness for which I plead on this occasion and in this place is the preparedness of the American Mind, the preparedness of the Ameri-

conscience, the preparedness of the American Will.

Better, infinitely better, to go un-

pared into the war at the battle fields of Europe, as Britain crossed the Channel unprepared in 1914, and

lined up her little standing army of 150,000 trained and disciplined veter-

ans on the fields of France, against Germany's great prodigy of forty years— better, gloriously and tr-

iumphantly better to have done that in 1914, and to have saved Paris, even at its unspeakable cost, from the heel of the slaughtering Hun, then for wit,

ners, with its universities of cul-

tures and its schools of religion, to live in the world conflict of Ideas in 1917 and in the stormy days yet to come, with an unchildlike national

Mind, a seared national Conscien-

ce, an irresponsible national will.

The national Mind! The national Conscience! The national Will! These are the Verdem battalions of America's life. Together with the innocents of Truth and Honour and Freedom, and, no matter what hap-

ens to your brothers and your hands,

your action has will have lost its
cost, from the heel of the slaught-

oment about new duties cre-

DO YOU NEED A NEW SUIT OR OVERCOAT?

OF COURSE YOU DO— Good clothes are a necessity—they are a sign of success.

If you don't believe that good dress is important, stop and ask any young man who believes in boosting Alfred. We Believe in Reciprocity.

We have been printing our suits and overcoats in various colors and styles at the factory price. It is a precautionary measure; for by and by the power of modern thought will almost inevitably bring us to the age of the new civilization. The danger is that we shall not make the adjustment. The change, and along with it a loss of faith in something will come when we may lose belief in something in the essence of the divine activity. We can believe in the personality of God just as easily as we can believe in our own personality. When we know that no matter what may be going on in the backbrain of the nation, we are not free to do as we please because we are not free to do as we please and so are to be interested in the church.
