

White-Hall July 10, 1905.

Dear Professor.

I enclose you fragment
of the Penn. Clay burned
at cone 1. I think it good
but - I think a better clay
could be found close to it.

I beg to ~~write~~ draw
my declaration as regards
the washing of saggars
for lead glazes until I
do more work on that.

I will stand by my
system however for cone 6
glazes.

Yours truly
Paul G. Cox.
