

Hot-Spring Ark.

White Hall, Ill., Dec 7, 1905.

Dear Professor Burris.

Your letter came a day or so ago. I talked with the representative here and he is inclined to favor your ideas about the branching out from the "Rockwood" style. He thinks Miss Kenler would be satisfied. However Mr. Bradford is to be down here soon and he wants to talk the matter over then. I will then write you again.

Could you spare me, say 5[#] of ground calcined clay? I want to make some early tests in mats and our mills are slow to come, so slow that I can't wait very well. If 5[#] could be mailed to me I will be glad to pay whatever the bill may be.

Yours very truly

Paul E. Cox.

Box 545.
