

Hot Springs Ark.

Dec. 7, 1905

Dear Professor Binns

Your letter came a day or so ago. I talked with the representative here and he is inclined to favor your ideas about the branching out from the "Rookwood" style. He thinks Miss Kenter (?) would be satisfactory. However Mr. Bradford is to be down here soon and he wants to talk the matters over then. I will then write you again.

Could you spare me say 5 # of ground calcined clay? I want to make some early tests in matts (or matls?) and our mills are slow to come, so slow that I can't wait very well. If 5 # could be mailed to me I will be glad to pay whatever the bill may be.

Yours very truly

Paul E. Cox
