Professor Chas. F. Binns

Alfred, N. Y.

Dear Friend,

I am on the trail of a job of mold making. I tried here in town with the U. S. Encaustic Tile Co. and failed because of the hard time to get on tho I received a promise for future consideration.

Of course I can get something to do someplace and will survive. But I think that the next job that I take should have some permanence, that is be with a good company, and of a nature that would insure something like a place to tie to. I'm tired of moving.

Yours very truly,

Paul E. Cox

East Liverpool is dead just now I am told.
