

DEPARTMENT OF APPLIED AND FINE ARTS

MECHANICS INSTITUTE

ROCHESTER, N. Y.

OFFICE OF
THE SUPERINTENDENT

Mar. 26, 1909.

Dear Professor,

I am sending you to-day by the National Express Co, prepaid, about three lbs. of a mix of chrome tin to be calcined and ground.

Please calcine in a shallow crucible on top of roppers, exposed to the flame, at about cone 6. It should come from the kiln a very deep red.

Am going to Buffalo tomorrow to visit The Albright gallery—

Sincerely yours—

F. E. Walrath,
