Glass Candidate Presentation

Aesa Bjork
Date: Thursday, April 17
Time: 4:30-5:30 P.M.
Location: Room C, Binns-Merrill
Cost to Attend: Free/Open to Public

Join the School of Art and Design for a lecture/presentation presented by Aesa Bjork candidate for the College of Ceramics assistant/associate professor in glass.

I am fascinated by the boundaries between inner and outer layers of human existence and how we experience ourselves in a given situation. I focus on the observer and the observed and the many layers in-between. From the inside out and outside in, like half drawn blinds revealing both the inside and outside at once, thus exposing a double reality, a duality inherent in existence. Glass with its inherent dualistic qualities has therefore been a material of choice for much of my work.

Both in my own work and while teaching I love to challenge both the technical and expressive boundaries of the chosen material, even if it results in so called "failure." One of my favorite quotes coming from Becketts Worstward Ho: "Ever tried. Ever failed. No matter. Try again. Fail again. Fail better."

Aesa Bjork graduated from the Glass Department of Edinburgh College of Art with a 1st class BA (Hons) degree in 1995 and MDes in 1997. In 1994 she was an exchange student at VSUP in Prague and studied with Vladimir Kopecky. This both influenced her work and encouraged her in her pursuit of working with glass as a sculptural material.

She has frequented the Pilchuck Glass School as a student and TA since 1998 where in 1999 she also was an Emerging Artist in Residence. In 2006 she was an Artist-in-Residence at the Corning Museum of Glass.

Her work has been shown internationally, she has received numerous grants among them a 3 years working grant from the Norwegian Ministry of Culture. She has had several public art commissions in Norway where she co-founded the open access gallery and workshop S12 in 2005.

She currently holds a three-year position as a visiting artist and faculty at the School of Art and Design, Sculpture Dimensional Studies, College of Ceramics at Alfred University.
