

GLASSARTENGINE exhibit showcases experimental works

12/03/14

The Alfred University School of Art and Design invites the public to a free exhibition of experiments from the GLASSARTENGINE Research Teams course Saturday, Dec. 6 in the Inamori Kyocera Fine Ceramics Museum Discovery Room (B-244, second floor of Binns-Merrill Hall) from 4-5 p.m.

ART 300 class, GLASSARTENGINE is an interdisciplinary course between glass engineering and glass art students. The course is taught by various faculty members combining both technologies and philosophies to foster collaborations yielding unknown results.

There will be free sushi and trucker hats.
