## Motion For "No-Credit" Grading System Defeated

The Liberal Arts Faculty has rejected a proposal to replace the "F" grade with a no-credit, "NC."

The grading change was proposed and passed by a slight majority at the April 9 meeting of thirteen members of the Liberal Arts Curriculum Committee.

The Liberal Arts faculty, meeting September 19, "overwhelmingly" defeated the motion, according to faculty sources present at the meeting. The grading system now in effect is:

1. All students in good academic standing may be graded Pass-Fail in one course a semester provided it is not a requirement for a major program.

2. Track II students will be graded by the same system that applies to students in Tract I, by Letter grades, A\* B\* C\* D\* F.

Dr. Roger H. Moritz, Associate Professor of Mathematics and present chairman of the Curriculum Committee indicated that few members of the Curriculum Committee firmly believed in the "NC" grade, and those votes in favor of the motion were partially due to uncertainty among the voters.

Moritz added that prior to the proposal to replace "F" with "NC", a proposal to also eliminate the "D" grade and include it in an "NC" grade, was defeated within the Curriculum Committee on the basis that "it would lower standards."

Yet, Dr. Robert A. Heine-

man, Gannett Associate Professor of Political Science and former chairman of the Curriculum Committee argued that, in effect, elimination of the "D" grade would raise standards. He stated that a "D" is more useless and dangerous than no "D" because many times a teacher will let a student slip by with a "D" rather than fail him. Therefore, the advantage to eliminating the D grade would be that the student would not receive credit for a course unless it was mastered."

Dr. John C. Gilmour, Associate Professor of Philosophy and a member of the Curriculum Committee, noted a feeling among several members of the committee that the "F" grade had a stigma attached to it with punitive implications.

Dr. John C. Gilmour, Associate Professor of Philosophy and a member of the Curriculum Committee, noted a feeling among several members of the committee that the "F" grade had a stigma attached to it with punitive implications. It has been suggested that a student should receive credit for what is achieved and what is not achieved should not be so important, he added.

According to Dr. Richard M. Rulon, Professor of Chemistry, "the question is best resolved with the consideration that the student may be participating in a college program for the 'sake of education' or is in college to

receive a degree. If the student is interested in receiving a degree it will not be to his advantage to have a tentative employer see a list of "NC's." Considering the feeling of several Curriculum Committee members that as student is penalized by an "F" on his record, Rulon commented, "you are penalized if you don't make judicious, suitable progress towards a degree," because a graduate school or employer will see a lot of unfinished courses.

Another problem in using the "NC" grade would be difficult to determine in placing students on condition and deans list.

A well-informed faculty member sensed an inconsistency in the fact that the "NC" grade was unanimously rejected while the motion for a Pass-Fail course per semester was accepted. The source noted that the science department in particular was in favor of the Pass-Fail motion and had shown the greatest disapproval of the "NC" grade. The source stated, "it may well be that the hard sciences are hurting for students and think more will be encouraged to take science courses Pass-Fail."

It was Rulon, a science professor's feeling that "Pass-Fail encourages students to

explore areas where they lack confidence to reach a high level of achievements but have an interest. This should be encouraged because a student may find something valuable to him."

When the motion to replace the present letter grade "F" with "NC" was brought to the Liberal Arts Faculty meeting, one of the Curriculum Committee members present, spoke in its favor. Several of the former committee members were no longer at Alfred and, according to a Curriculum Committee source, none of the members present felt they had a sound case for it.

## Gardner Seeks Participants For Study Tour

Alfred, N.Y., Oct. 10—Dr. George H. Gardner, professor of sociology at Alfred University, announced today he was planning to conduct a three-week January study tour of Egypt, Jordan, Lebanon and Jerusalem in Israel. He said he was seeking 20 participants from among area residents and Alfred University students to join him in the venture.

The tour, the third that Gardner will have led in as many years, is scheduled to include meetings with students, teacher and government leaders in addition to visits to museums and antiquity sites.

Gardner said a tour price of under \$1,000 would include round-trip air transportation,

hotels, meals and land travel arrangements. "The group will work hard, enduring some hardships," said Gardner. "There is much of importance to see, and little time to see it in—there is no money to waste on luxuries."

The group will leave New York City Jan. 1 for 10 days in Egypt, three days in Jordan, four days in Jerusalem and another three days in Lebanon, returning to New York Jan. 22. There will be brief stopovers in Brussels, Belgium on the outward bound and return legs of the journey.

Gardner is a contributing editor of a recently published text in his field, **The Middle East: Its Governments and Politics**, published by the Duxbury Press. He is also

co-author with Sami A. Hanna of the book **Arab Socialism**, published in 1969 by the University of Utah Press.

For 12 years before joining the Alfred University faculty in 1962 Gardner taught at the American University in Cairo, Egypt.

Additional information on the January study tour may be obtained directly from Gardner at South Hall on the Alfred University campus or by telephoning (607) 871-2215. The tour is officially part of Alfred University's one-month winter trimester, which encourages study and research projects normally unavailable during the academic year.

## Assembly Reviews Organizational By-Laws

The Thursday, Oct. 10th, meeting of the Student Assembly was mild in its content. There was an announcement that the Library Committee is possibly thinking of reconstructing their book-ordering process. Last year's expenses amounted to \$28.25 while \$138.77 worth of books are on order now and the balance is \$932.98.

It was mentioned that the University Council is looking into the possibility of changing the time slots for classes. This will be discussed at a later date.

The following names will be recommended by the Assembly to President Rose for the five sub-committees of the Board of Trustees: Student Affairs, Bob Frank; Financial Committee, Robert Sterling; Curriculum Committee, David Chesnoff; Development Committee, David Gruder; and the Investment Committee is still open for a nominee.

In addition, a committee is now being formed to explore the prospect of altering the term of Assembly officers.

The main event of the night was a proposal to have a separate person appointed to be Parliamentary rather

than the Secretary who is now filling that capacity. The proposal was put to vote, but was defeated. Also, a copy of the Student Assembly constitution is available in Herrick Library for those who are

interested in the Assembly procedure.

All Student Assembly-funded organizations are reminded that the following by-laws are in effect:

1. All groups, in existence

throughout the school year, receiving funding from the SA, shall publish in the **Fiat Lux**, in the third issue of each month, a financial report; and a schedule of events must be submitted to the **Fiat Lux**, **Walf**, and **This Week at Alfred** for publication, or the financial committee of the SA will be in power to declare the group ineligible for funding in the following semester, and withdrawal of supporting funds from the group during that present semester, may occur with a vote of the Student Assembly.

2. All groups receiving funds from the SA, shall not have conflicting meetings or events with the regularly scheduled Student Assembly meetings.

3. All groups receiving funds from the SA shall make public by advertisement, and include on all published literature the endorsement of the SA (ie. funded by the Student Assembly).

4. To obtain better accessibility of events for the student population of Alfred, Student Assembly requires that all groups SA funded, have their meetings open and in university facilities.

STUDENT ASSEMBLY OFFICERS DELIBERATE.

## Art Tour: A Possibility

Research into the possibility of setting up a New York State performing arts touring circuit will continue as interviewers fan out into 20 communities during the next few months.

The research is being carried out by Arts Development Associates, a consulting firm for Nazareth College in Rochester, with funding from the New York State Council on the Arts.

Earlier this year, Arts Development Associates explored the feasibility of establishing such a circuit in 20 other communities throughout New York State. The firm's findings laid the groundwork for a pilot tour by professional theatre companies—one adult, one children's—in eight communities during Spring 1975.

Since the initial soundings showed those communities wanted more theatre, the pilot tour will offer theatrical presentations. The continuing research, however, will explore the potential for all the performing arts, including musical and dance presentations.

In its current phase, as earlier, Arts Development Associates will interview scores of local performing arts groups, artists, educators, business and civic leaders, librarians, and many other individuals and organizations between now and December 12th.

Concentrated efforts will be made to reach those groups and individuals who might provide such information as: —the cultural complexion of each community, in particular the performing arts needs not now being met by local arts groups;

—the identity of individuals and organizations which might sponsor touring attractions;

—the potential market for such attractions in the community and surrounding areas;

—the identity of individuals and organizations which might sponsor touring attractions;

—the potential market for such attractions in the community and surrounding areas

—the availability of all kinds of spaces, including churches, libraries, community center, schools, etc., which are not usually considered for performances.

Hornell is among the 20 towns to be investigated, with a researcher destined to venture to the southern tier town Nov. 21-22.

## Corruption Implicates System

"Richard Nixon did not invent corruption in American politics," began Professor Evan Rogers in his October 8 lecture in the Parent's Lounge of the Campus Center. Entitled **Watergate, Impeachment, Pardon, and Its Aftermath**, the lecture dealt mostly with the political implications Watergate has had on our system.

Professor Rogers suggested that corruption within the system had been going on a long time. The crime that was passed off as a third-rate burglary turned into the biggest American political issue of the last ten years. Prof. Rogers stated that, "Watergate will not be with us too much longer. The

economy is more important... it affects everybody, and it's getting worse."

Watergate has eroded the people's trust in the government. Prof. Rogers pointed out. People have lost faith in thinking that the government will solve our problems. Even the Europeans are concerned about the implications of Watergate and the stability of the American government. "A lot of nations depend on us," remarked Prof. Rogers. He concluded the lecture by saying that the changes in the structure of the government have been far too costly to change the manner in which we elect officials. The best way to fill political offices would be by public monies.

## Information on Media Offered

Seniors, graduate students and faculty who have a special interest in advertising, communications and related fields will have an opportunity to participate in the 18th Annual Advertising Career Conference at Fordham University, November 2. Entitled "Forecast: Fields of the Future," the program is sponsored by the Advertising Women of New York and is designed to give practical, in-depth information about advertising and the communications industry. Executives and experts from the advertising industry will be supporting the conference by offering advice related to journalism, broadcasting, media buying and selling, and public relations.

Some of the highlights of the conference will be workshops on magazine publishing, creativity, account management, and personnel. All sessions

will be conducted at the Lincoln Center Campus in Manhattan of Fordham University.

Further information concerning this advertising forum may be obtained at the Career Planning and Placement Office. Registration deadline for the conference is October 26, and registration forms are also available at the placement office.

# Pregnancy Alternatives Presented

The third sex forum **Contraception and Sterilization** was held in the main dining hall of the Tech. last week and was rather poorly attended. Mrs. Marilyn Lyman of the Sex Education Center of Syracuse spoke on alternatives to pregnancy in addition to showing the film "Hope is not a Method." Ironically, it was noted that although people will tend to partake in a sexual act, they feel too shy to talk about the experience later. This tends to lead to an excuse for not using birth control, because partners are too embarrassed to bring up the subject. The main thrust of the lecture was "either you want a child or you use birth control." This does not apply to the girl, for it is as much the male's responsibility.

The variety of birth control methods, in ascending order of effectiveness, are withdrawal, rhythm, foam and condom, diaphragm, IUD, the Pill and sterilization. At present the most effective methods without permanent results, is the Pill which comes in a wide variety of packages and strengths. What it basically does is affect the hormone level and prevent ovulation. The one major side effect can be blood clotting, yet this is a rare occurrence. It has been shown that ten years on the Pill has the same effect on the body as would one pregnancy. For those women who must avoid the Pill for medical reasons, the next best method is the IUD which developed from the old method of using a peach pit to avoid pregnancy in camels. Obviously it had to be modified for humans, the final result being two different types, Lipp's Loop and the Copper Seven. These two, the latter being the most recent, prevent pregnancy by causing a chemical reaction in the uterus by their presence. The failure rate is 1-2% and the only condition prohibiting the use of an IUD is if the woman has never had a pregnancy. It is also recommended that a foam be used during the fertile period of the cycle to be 100% sure. Next on the list of effectiveness is the diaphragm which must be fitted to the individual and left in place for at least 6 hours after intercourse. It also helps to have a sympathetic partner because the diaphragm must also be inserted before sex and takes some time to insert. This might tend to put a damper on spontaneous intercourse yet can be a very necessary precaution. Foam is one of the least efficient methods and should be combined with a condom in order to attain a fairly high

degree of effectiveness. One of the main problems with foam that it needs to be inserted as close to the time of intercourse as possible, otherwise the warmth of the body will eventually melt it, leaving the woman unprotected. Voluntary sterilization has for many couples (about 20%) been a final step in birth control. There is no age limit and it is legal in all states; however since this process is generally irreversible young couples may have a hard time finding a doctor to perform the operations. This operation becomes more involved with the female than the male, but the results are the same and there is no impairment of bodily functions or enjoyment.

The theme of the lecture and the film was that anytime a penis enters a vagina a pregnancy can occur and that with this fairly wide range of birth controls there is no reasons for an unwanted pregnancy.

If, however, one relied on "hope" at the wrong time and became pregnant, the **Story of Eric** may be helpful. Loretta Smith, Instructor of Nursing at Alfred State College, gave a lecture on natural childbirth, known as the Lamaze method, and showed the film on Eric. It concerned a young couple attending classes to prepare them for the natural delivery of the baby.

The strict Lamaze methods uses no medication, but instead relies upon a conditioned response to pain, which is relaxation. Although this method is relatively new in this country it has successfully been used in Europe for about 40 years. Contrary to the long-held notion of the nervous father pacing the corridors of the hospital, this method depends on the principle that the husband and the wife work together as a team. It is his duty to keep his wife distracted to guide her through the variety of breathing and relaxation exercises, particularly during the labor period. On an average, for the first child, the labor period is 12 hours and will tend to decrease with the second and third child. Studies have shown, however, that women who have been prepared through these classes tend to experience a shorter labor period.

The actual process of giving birth has been compared to an athletic event, requiring top physical shape and the proper state of mind. As much knowledge as possible is given to the mother so she will know what to expect. When the husband works with the wife he is sharing the joys as well as the pains. It was noted in

the film that couples who have used the Lamaze method recommend it strongly.

The proper physical shape is important for a woman to be able to give birth to a child. A few things were mentioned that could have a harmful effect on a child in the womb. X-rays, hard drugs and some medications have been proven to be very destructive to an unborn child, while alcohol and cigarette smoking, in moderation, do not seem to have harmful effects. Studies on the effects of marijuana in pregnant women have not yet revealed any conclusive evidence. Throughout a healthy pregnancy intercourse can continue except possibly during the last month when it can cause a premature labor.

Generally speaking, a pregnant woman is not controlled by the pregnancy and is well able to give birth through the Lamaze methods. To be pregnant and give birth are normal occurrences and therefore should be allowed to reach completion by normal means.

## Afro-American Group Sponsors Programs

Since its creation six years ago, the Afro-American Awareness Society of Alfred University has sponsored a number of relevant programs on campus. The purpose of the organization is to promote Black Awareness and pride, and at present, they have been relatively successful.

The society, along with the Student Activity Board, recently sponsored a concert in Harder Hall featuring **Fresh Flavor**. In Addition, they co-sponsored Nikki Giovanni, the "princess of Black poetry," with the Alfred State College Black Student Union.

The biggest event planned for the future is the Beer Blast on November 2 at Davis Gym. The organization, at present, holds meetings every Sunday at 6:00 p.m. in the Campus Center. Meetings are open to all those who wish to attend. The officials of the group are: Nathaniel Murray-President, James Davis-Vice-President, Janice Gottlieb-Treasurer, Daryl Murray-Secretary.

## CCFL Sponsors Field Studies

College Center of the Finger Lakes (CCFL) by invitation of the Bahamian government will sponsor, for its fourth year, twenty-one undergraduate courses on San Salvador Island. Field studies are available for humanities, social sciences, and natural science majors.

Each of the field studies has been coordinated to build on the experience of others. The most important goal of the project is to focus on man-land-sea-relationships. Projects stress independent study techniques developed to meet personal interests and graduation requirements. All courses are of a months duration by students may enroll for one month, a sequence of months or for the entire semester.

Since Alfred University is a member of CCFL, all undergraduate students are eligible to apply. Project costs have been calculated to include room, board and instructional expenses. Most of the courses are worth four credits and average \$400.00. Students arrange their own travel to Ft. Lauderdale; cost of round-trip flight, Ft. Lauderdale to San Salvador, is approximately \$87.00.

### 1974-1975 Bahamian Studies Schedule: Projects and Project Directors

November 25- December 20, 1974

Bird Survey of San Salvador...J. Robert Miller, Hartwick College  
Fish Study...Earl Eubler, Hartwick College  
Topics in Geography...Norman Lyster, Hartwick College

January 6- January 31, 1975

Intro to Marine Zoology...James Rausch, Alfred University  
Social Reasoning...Charles White, Alfred University  
Island Geology...Daniel Sass, Alfred University  
Visual Journal...Mario Prisco, Alfred University

February 3- February 28, 1975

Psychological Aspects of Planned Change...William Bergquist, A.U.  
Historic Archaeology...Kathy Gerace, Elmira College  
Research in Bahamian History...Leonard Pudelka, Hartwick College  
Topical Astronomy and Navigation...Roger Carr, Alfred University

March 3- March 28, 1975

Geology...Donald Gerace, Alfred University  
Environmental Chemistry...Anatol Eberhard, Ithaca College

March 10- April 18, 1975

Community Study on Cat Island...Carry Thomas, Ithaca College

May 2- May 20, 1975

Independent studies in Ecology...William Lindsay, Elmira College

May 5- June 21, 1975

Prehistoric Archaeology I and II (with various options)  
Marjorie Pratt, Ithaca College and Peter Pratt, SUNY Oswego

June 2- June 27, 1975

Drawing/Bahamas...Roberta Griffith, Hartwick College  
Subtropical Botany...Robert R. Smith, Hartwick College  
Art/science...Roberta Griffith & Robert Smith, Hartwick College  
Health & Health care Practices...Mary C. Sees, Hartwick College

Posters with detailed course information and with application forms can be found at various locations across campus. Applications for all 1975 projects must be completed by November 5, 1974. For further information, contact Dr. Frank Trice, Deputy Director of CCFL, 871-2254 or Jill Hirschfeld, student assistant at Alfred, 871-3423.

## U. F. O. Authority To Speak

An illustrated lecture with authentic photographs, eye witness accounts; fascinating commentary will be given by the noted UFO (unidentified flying object) researcher, Haydon Hewes. Director of the International UFO Bureau, Inc., Mr. Hewes is convinced, after 17 years of scientific investigation, that the Earth is being visited by alien beings.

Mr. Hewes is a weekly columnist for the **Mightnight** newspaper, midwest editor of **Beyond Reality** magazine and U. S. editor of **Canadian UFO Report** magazine. Active in the UFO field since 1957, Mr. Hewes was permitted by special authorization from the Pentagon to visit; question the Air Force UFO files. He was also one of six people from Oklahoma selected to work

with the University of Colorado's "Condon Committee," a \$513,000 18 month study of UFOs.

Mr. Hewes is a weekly columnist for the **Midnight** newspaper, midwest editor of **Beyond Reality** magazine and U.S. editor of **Canadian UFO Report** magazine. Active in the UFO field since 1957, Mr. Hewes was permitted by special authorization from the Pentagon to visit, question the Air Force UFO files. He was also one of six people from Oklahoma selected to work with the University of Colorado's "Condon Committee," a \$513,000 18 month study of UFO's.

**The Facts on the Flying Saucer Controversy** lecture will be held November 11th, at 8 p.m. in the Science Center Lecture Hall.

## New Plan To Attract Applicants

In response to a federal directive which prohibits holders of Federal contracts from discrimination in any form, and which calls for "affirmative action" to attract more women and minority applicants for employment consideration, Alfred University's Board of Trustees has approved an Affirmative Action plan. The plan sets the guidelines for a "vigorous campaign" to bring more women and minority groups to the institution.

An Affirmative Action committee has been established to operate in advising capacity to the Affirmative Action officer, Dr. J.D. Barton, Jr., Vice President for Academic Affairs. Barton will monitor faculty-administration recruitment and the way in which affirmative action plans are carried out.

The Affirmative Action committee consists of approximately nine members of the faculty and administration, two recently appointed students, with Martha A. Mueller assistant librarian in the College of Ceramics, as chairman.

Any matters relating to affirmative action policy or practices may be brought to Barton's attention. The committee meetings are held bi-monthly in Carnegie Hall and are open to anyone interested.

## Fiat Lux Bulletin Board

*The National Society of CWENS*, an honorary service group for sophomore women will be sponsoring a candy apple sale on Halloween. It will be held in the lobby of the Campus Center at 1:00 and will last as long as the apples hold out. Come and support us.

□□□□□

*All students contemplating a career in law, corrections, probation, law enforcement and other related fields should attend the meeting of the Criminal Justice Program on Tues., Oct. 22, at 3 P.M. in South Hall, room #7.*

□□□□□

*All art students and faculty members are invited to exhibit for show or sale their two-dimensional work at the Coachlight Steakhouse in Hornell. Call John Brady at 324-3500 for further information.*

□□□□□

*The Gay Liberation will be sponsoring the movie Boys in the Band in the Science Center at 7:30 P.M., Sun., Oct. 20. There will also be a lecture by Don Michaels and Laurel Hogkin of the Mattachine Society of Buffalo at Ade Hall Mon., Oct. 21 at 7:30 P.M. "Variations of Sexual Behavior" is a part of the Human Sexuality Series sponsored by the University. Regular meeting of the Gay Liberation are every Sunday at 7:30 P.M. in South Hall, Room #1. (Oct. 20th meeting cancelled because of the movie.)*

*Recycle your paper, glass and metal at the A.U. Ecology Group Recycling Center behind Flaherty (across from Alfred Sub Shop). Hours are from 10 to 1 on Saturdays and 4 to 5 on Wednesdays. Please remove aluminum rings from bottles, labels from cans, crush cans if possible, bundle all papers. Thank you.*

□□□□□

*There will be a meeting of Psi Chi, the National Honor Society in Psychology, on Oct. 21 at 7:30 in the Science Center, Room 424. the purpose of the meeting is to meet prospective members and to explain what Psi Chi is and how one goes about joining it. Basic requirements are the completion of 14 hours of psychology with a 3.5 index in the courses. A more complete outline of requirements may be found on page 46 of the 1974-75 Alfred University Student Handbook. All eligible interested students are urged to attend.*

□□□□□

*The Washington Post is hiring college juniors, seniors and graduate students interested in newspaper journalism careers. These are summer positions which will allow you to perform regular reporting assignments. Photographic and copy editing positions are also available. You should have an interest in journalism, writing ability, and typing skills. The deadline for applications is December 1, 1974. Send a post card or letter for an application to: Employee Relations Department, The Washington Post, 1150 15th Stree, N.W., Washington, D.C. 20071.*

□□□□□

*In cooperation with the Alumni Office, the Campus Center will have Room A open as a hospitality room for Alumni during Homecoming weekend. Featured in the room will be a photo display of various past events, people and buildings in Alfred University history. Coffee and doughnuts will be provided. This should be a good opportunity to meet, mingle with old friends and reflect on old times. The hours are Friday, Oct. 18, 5:30 to 8:00 and Saturday, Oct. 19, 9:30 to 10:30.*

## Unionization Bargained For

Dottie Gutenhauf and Bill Davis of the American Federation of Teachers visited Howell Hall on Thursday, October 10, to lecture on **Collective Bargaining for Faculty at Alfred University**. The lecture was an effort to convince the Alfred University faculty to unionize. Their main argument dwelled on the fact that in recent years, colleges have run like business organizations. If teachers are going to be treated as employees, they should receive employee be-

nefits. Ms. Gutenhauf and Mr. Davis contended. If the faculty of Alfred University decide to join the American Federation of Teachers, they would be insured of all the services and protection the Federation can offer. Lawyers, clauses, and the right to strike would be included in their contracts. On the other hand, if the faculty does become affiliated, they would lose the informality with the president of the University and would become more of an adversary, they concluded.

## Ceramics Project Sponsored

Zedmark, Inc., of Valencia, Pennsylvania, a manufacturer of industrial ceramic products, has awarded the New York State College of Ceramics at Alfred University a \$6,700 grant for the development of improved heat resistant materials called alumino-silicate refractories. The Zedmark grant will underwrite the one-year costs of research being carried out by John Gangeme of Corning, a candidate for the degree of master of science in ceramic

engineering at Alfred. Dr. Vernon L. Burdick, associate professor of ceramic engineering, is the research supervisor. The sponsor's interests in the project are represented by K. Robert Burger, president of Zedmark and an Alfred University trustee, and Dr. Don McTaggart, technical director of the company. Alumino-silicate refractories are commonly used as oven-liners in the glass industry.

## captain trivia

My apologies, Alfred, I really put my foot in it this time. As a rule, the trivia questions only have one answer. Last week, however, two of the five questions were kind of shaky. In any case, the judges' decision is forever. I'm just sorry that they had to be called into officiate.

Last week's winner was Ken Kirchner, who narrowly beat five other people who had the right answers. Ken has a fantastic choice of prizes; movie tickets, concert tickets, magazines, text books, a night in Alumni Hall, ETC.

Turn your answers into the C.C. desk, c/o Fiat Lux.

Last week's answers:

1. 430 people on the starship Enterprise. (Judges' decision)
2. The Class of 1950 gave us the sidewalk by Carnegie Hall.
3. The Hindenburg crashed and burned in the air over Lakehurst, N.J.
4. To kill a werewolf, shoot it thru the heart with a silver bullet.
5. Seven stars in the Big Dipper. (Judges's decision)

Bonus answer: BMW made the engines for Fokker; hence BMW's logo is a stylized spinning propeller.

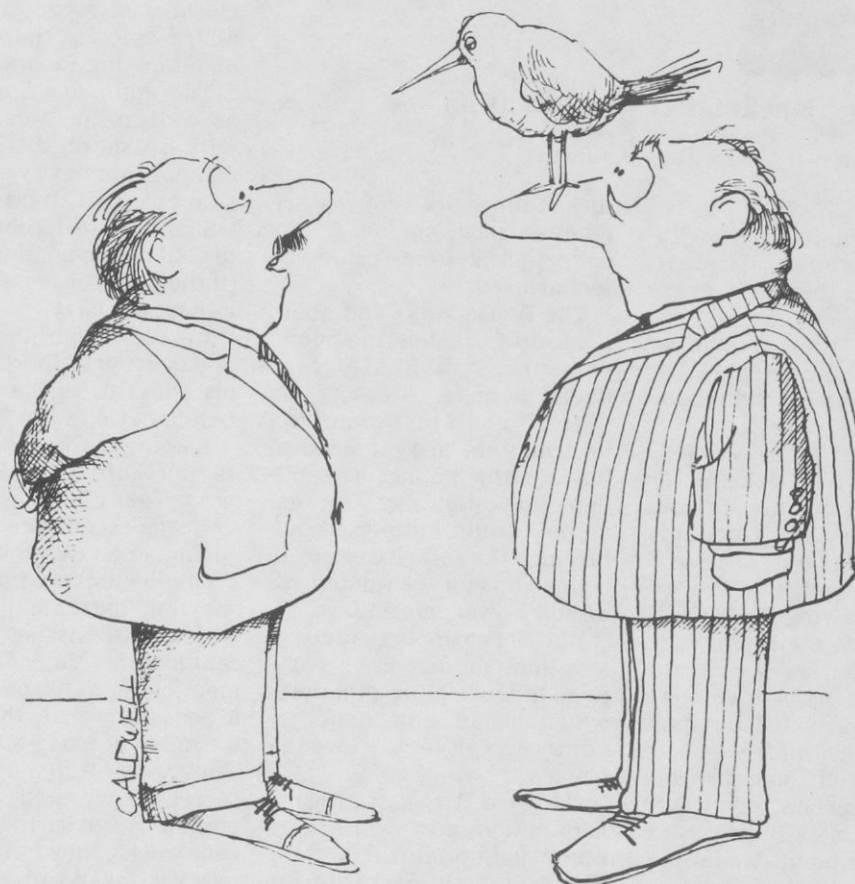

This weeks questins:

1. What used to be where Harder Hall is now?
2. What is the first line in Moby Dick?
3. From what poem are the following lines,  
It was the schooner Hesprus  
that sailed the wintry sea,  
and the skipper had taken his little daughter  
to bear him company...
4. Who played the Lone Ranger?
5. What major automobile manufacturer's logo was a Star of David?

Bonus questions: What was Green Lantern's pledge when he recharged his power ring?

## WEEKLY SPECIAL

### Rockefeller's Nomination

by Jack Anderson

WASHINGTON — Top tax experts, including former Internal Revenue officials, have told us they have grave questions about the enormous gifts that Vice President designate Nelson Rockefeller lavished upon his old associates.

One of the "gifts" was \$50,000, which Rockefeller passed on to his former foreign policy adviser, Henry Kissinger.

The problem, say the experts, is drawing the distinction between a gift and compensation for services. If the Rockefeller associates were being compensated for their services, the money should be considered "bonuses" and not gifts. As such, they would be taxable at a higher rate, and the recipients would pay the tax, not Rockefeller.

Thus, it is possible that Secretary of State Kissinger, among others, technically owes the federal government back taxes.

Nelson Rockefeller's personal fortune is valued at more than \$62.5 million. Yet in 1970, he didn't pay a penny in federal income tax. Since most Americans paid federal income taxes in 1970, that meant that the average citizen was paying Rockefeller's taxes.

All too many millionaires, particularly the oil tycoons, have not been paying their fair share of the taxes. Every dollar they escape paying must be made up by the rest of us taxpayers.

The public is losing patience with the discrimination in the nation's tax struc-

ture. Unless tax reforms are adopted soon, our whole tax collection system could be jeopardized.

The House Ways and Means Committee, feeling the public pressure, has finally produced a huge, 700-page tax bill. It contains some tax reforms that are intended to placate the public. The oil-depletion allowance, for example, would be phased out, forcing the oil industry to cough up an estimated \$3 billion a year more taxes.

But our own tax advisers say that, hidden in the 700-page bill, are other gimmicks which would give upper-income taxpayers new tax breaks.

Nelson Rockefeller's nomination, meanwhile, is in limbo on Capitol Hill, and the confirmation of the Vice President designate may even be held up until next year.

The Senate Rules Committee has finished its hearings. But the House Judiciary Committee is in no hurry to act on the nomination.

So far, its 38 members haven't even received briefing papers on the investigation of the nominee's finances.

The Joint Internal Revenue Committee, which audited the Ford and Nixon tax returns, is hard at work on the Rockefeller probe. They are expected to complete it by October 18th.

Congress will be in recess then, and it is doubtful that the Judiciary Committee will act before the election. Indeed, there is a strong

possibility the nomination will not be voted on until next year.

Despite his impressive credentials, Rockefeller remains a controversial nominee. The recent disclosures of large gifts have added spice to the old tales about buying favors.

The Judiciary Committee, as well as the House itself, will be quite different in composition next year. Some sources tell us that the leadership will soon decide to hold up the nomination until the new Congress is sworn in next January.

In the meantime, House Speaker Carl Albert, much to his chagrin, will continue to be the nation's No. 2 leader.

**Kissinger Charade:** Secretary of State Henry Kissinger was forced to enact a charade recently to preserve his image on Capitol Hill.

The lawmakers have been growing increasingly frustrated with Kissinger in recent months. Many Congressmen feel he regards them as a necessary evil, that he is too much of a one-man show. They resent his obsessive secrecy. Now their anger is boiling to the surface. In recent weeks, they have lashed into Kissinger with abandon.

Several senators, for example, loudly erupted when they learned Kissinger had been involved in the political sabotage of the late Chilean President, Salvador Allende.

The greatest blow to Kissinger's ego, however, came when both the House and Senate voted to embargo economic and military aid to Turkey. Kissinger had defied the law, the legislators felt, when he continued to ship arms to Turkey after that country had illegally used American weapons to invade Cyprus.

To save face, Kissinger flew to New York for secret talks with the foreign ministers of Turkey and Greece, who were in town for the latest U.N. session. In Washington, meanwhile, President

Ford publicly pleaded with Congress not to slash aid to Turkey as it would "undermine" Kissinger's "negotiations."

The truth is, according to our sources, there were NO "negotiations." It was all a charade designed to convince a balky Congress that delicate talks were in progress.

Kissinger's meetings with Greek Foreign Minister George Mavros, for example, were described to us as "cold, very cold." At one point, the two leaders posed for pictures and Mavros did a marvelous imitation of a block of granite.

Finally, Kissinger turned to the Greek leader. "Come on, smile," he implored.

**Oil Talks:** The foreign ministers of the world's oil-consuming nations recently sat down with Secretary of State Henry Kissinger to discuss the oil crisis. Despite extreme secrecy, we can report what happened during the private discussions.

Kissinger warned his fellow ministers that today's staggering oil prices are a threat to world order. The West, he declared, is being pushed to the brink.

Britain's Foreign Secretary James Callaghan took a less catastrophic view of the Arab oil squeeze. He suggested that the Arab oil billions might be recycled through a loan fund into the countries in desperate trouble.

Like Callaghan, the other foreign ministers were also uneasy about a confrontation with the oil-producing countries. This wasn't the best way, they argued, to get the Arabs to reduce oil prices.

France's Foreign Minister Jean Sauvagnargues suggested bluntly that the United States bring pressure on Israel to come to terms with the Arabs. A Middle East settlement, he argued, would gain Arab cooperation and solve the oil crisis.

The foreign ministers agreed, however, that the oil-consuming nations must work together to relieve the oil crunch.

## The Alfred Green

### Wandering Jew

There are two trailing vines that are commonly known as Wandering Jew; to be technical, Tradescantia and its relative Zebrina Pendula. Tradescantia was named after an English plant hunter, John Treadescant, who searched the Americas for unusual plants in the 1630's.

Tradescantias range in color and size from a tiny green leaved variety to other with stripes of silver, purple, white, pink or yellow. There is also a pure yellow variety called Gold Leaf. Zebrina Pendula has oval leaves ranging from purple with silver stripes to pink, red and white stripes.

The Wandering Jew are very easy to grow, just break off a piece at a joint and plant it. They will grow in water, soil or on moist pebbles. Both plants need strong light to bring out their coloring, but direct sun will fade them. If they are planted in soil they should be kept moist at all times. In the winter they should not be hung in a window as the cold draught will harm them. You should wash the leaves occasionally with a damp cloth to remove the dust and grime that accumulates on them.

The soil mix should be equal parts soil, peat moss, and sand. Feed it monthly from March to October, in other months feed every other month.

To keep the plant full and bushy, one should break off the ends of the long runners to promote the growth of side shoots.

## Letters: Dorm Resident Sounds Off On Rip-Offs

### Dear Editor:

It has been several weeks since school has started, and already some people have resorted back to their destructive impulses. Without fail, there have been many things stolen from the University and from the students.

I am writing this letter in regard to the vandalism and theft which has occurred in Bartlett Hall. Bartlett has reported more incidents of vandalism and theft than any other dorm on campus. So far, the list includes such things as the glass on the candy machine has been smashed in, the lint screen on one of the dryers has been broken in half, the bulletin board from the fourth floor was torn down and thrown out the fourth floor window, the bottom vent was kicked out of the Maid's room door, the patch panel for phone circuits was ripped off the wall and the wire for the Maid's phone torn loose, two linen lockers were broken into and the linen stolen from them, the full length mirror was stolen from the second floor, a bulletin board from the first floor was stolen, a fire extinguisher was stolen from the first floor; discharged and

found in Cannon, and a lamp has been stolen from the lounge.

This appears to be a very impressive list and I'm sure some people are very proud of their actions. However, the Student Affairs Office, the Resident Hall Staff, and the residents of Bartlett Hall are

OUR FULL LENGTH  
MIRROR  
USED TO HANG  
IN THIS PLACE  
UNTIL SOME  
(EXPLETIVE DELETED)  
STOLE IT.  
SO...  
SPREAD THE  
WORD -  
WE'D LIKE  
IT BACK!!!

thoroughly disappointed and disgusted with these recurring incidents. Every weekend, a minor incident happened until it accumulated and

Bartlett Hall was considered a problem. The attached Memorandum was distributed to the resident of Bartlett and since then there have been several dorm meetings on what we could do to alleviate the situation. These meetings have produced virtually nothing. Several suggestions were made, one being that locks be installed on the outer doors and only the residents could open the door with their room keys after a certain hour at night. The alternatives to this are to remove the furniture and/or close down the dorm. None of the residents in Bartlett favor the furniture being removed or the dorm being closed down. Also, none of the residents feel that they should be charged for the damage incurred by others.

Unfortunately, nothing has been done to solve any of the problems. The dorm meetings have produced nothing but apathy among most of the residents; questions, and NO results. If an agreement cannot be reached between the residents of Bartlett and the Resident Hall Staff, I feel that the Student Affairs Office and the Resident Hall Staff should take action on their own and do whatever

has to be done, whether it be locking the doors or whatever.

Speaking for myself and my own financial situation, I cannot afford to wait another week until the next dorm meeting to decide what we should do. I do not feel that we can afford to wait around to see if the damage will subside. Democracy is a fine tool when it comes to making decisions, but I for one, am not going to pay for the red tape.

**Records**

By Gary Weinstein

Jorma Kaukonen has come full circle. When he and Jack Casady appeared on stage in Davis gym last November, many in the audience were both confused and surprised. Their characteristic Airplane--Tuna locks had been cut to McLaughlin--Surrender length. There was no confusing the music, though, as we proceeded to enjoy three hours of electric virtuosity. Tuna's most recent album **The Phosphorescent Rat** contained most of the concert in 10 thundering and frolicking Jorma tunes. Again, all electric.

Now Jorma releases **Quah**, his first solo journey with musical changes that are most significant. A completely acoustic album, Jorma claims that it, "is reflective of my current musical state of mind."

It is certainly the most calm and perhaps the most romantic album he's ever been part of. A first look within the album cover shows Jorma smiling slightly, his short hair tousled as it may have looked years back during the Bay area coffeehouses. In fact, he worked with Tom Hobson back then and it's Tom who now appears in several spots on the album. Tom adds some acoustic work on "I'll let you know before I leave" and "Another Man Done Gone." Tom does vocals on "Blue Prelude" and "Sweet Hawaiian Sunshine."

Jorma has written only five of the eleven songs, however his presence of choice is felt throughout. There are tunes by Rev. Gary Dav in which, "I love to do." "Genesis" opens the album and at first I wondered if I had ever heard more beautiful lyrics. It's a song of love, "when breathin' felt like something new." There is an all acoustic number (I'll let you know...) which leaves zero doubt as to whose fingers are involved. "Song to the North Star" again displays J.'s distinguishing melodic style. Added orchestration and horns, are the final touch in several spots, bringing tears a step closer.

The album is produced that devil, of a man, Jack Casady. The cover is done by Margareta Tuna albums.

The music is Jorma's; by writ or by choice it is the essence of a much travelled and tempered Jorma. The music kicks and jumps and will mae you stop every thing and just listen. The rewards are there.

CHICK COREA

## A Return To Forever

By Scott Schlegel

In recent years, jazz has come from the bottom of record stacks and side-street, big-city night clubs to reach the soul of many Americans. It has progressed in many forms and **Chick Corea and Return to Forever** have obviously developed one of the most unique styles.

Last Friday night's concert in the Alfred Tech Gym was an exposé of their fast, exhilarating style. At several points during their three hour concert, the beat grew so intense and the lead so frantic that one could not help being possessed by such a precision performance. All songs were introduced as being from their most recent album, with the exception of one unre-recorded acoustic medley. The combination of acoustic instruments--piano, bass, guitar and drums--obviously pleased the audience, as did every set they played. They closed with a thirty-minute encore which was the peak of frenzy. The

audience was brought to their feet only to find the beat impossible to dance to.

Throughout the performance the musicians cued and glaced smilingly at each other obviously enjoying what they were creating. Bass player Stan Clarke seemed to be their guide to Forever by standing center stage, flinging bass notes at the audience. Chick Corea threw his fingers across various keyboard in response to the warp speed of the electric guitar and drums. Although the amatuerish light show gave no compliment to the performance, each musisian received the spotlight during his solo.

Whether one was familiar with the music of **Chick Corea and Return to Forever** or simply wanted to find out who or what they were, it was impossible to leave unastonished and unexposed to a semblence of jazz's finest performers.

## Films On Campus

**Little Ceasar** U.S.A. 1930  
Science Center  
Oct. 24 at 8:00 p.m.

This is an original Gangster Melodrama. The movie traces the rise and fall of East side Italian racketter Rico Bandello--played by Edward G. Robinson. This is one of the first Gangster movies to become a success. The movie was adapted from the novel written by W. R. Burnett. Included in the cast of characters is Douglas Fairbanks Jr. Directed by Mervyn Leroy. Warner Brothers.

**Sullivans Travels** U.S.A. 1942  
Science Center  
Oct. 24 at 8:00 p.m.

According to many this is the best comedy from Preston Struges. Joel McCrea appears as a top comedy film director who wants to make a realistic masterpriece called **Brother Where Art Thou?** and goes out on the road dressed as a tramp in order to find real life material for his work. The movie is very witty with good entertainment containing some sharp satire on the morals of Hollywood and American Society. Veronica Lake is featured as McCras'a wisecracking traveling companion. Director Preston Struges.

**Badlands** U.S.A.  
McClane Center  
Oct. 20th at 7:30 & 9:30

This movie is based upon the notarious killing spree of Charles Starkweather. It concerns he and his 14 year old girdlfriend Holly and their flight across the plan states in 1959 in an effort to escape their hollow and empty lives in a small South Dakota town. The movie is a smart and original theme of the wanderings of a disassociated couple who came from the dark side of American Society to wreak irrational violence and leave a trail of bodies them. Starkweather is played by Kit Carruthers. One of Director Terrence Malick's best.

## Craftsmen Exhibit Ware

The Fourth Annual Invitational Exhibition of the **Craftsmen of the West Hudson Highlands** (Rockland, Orange, and Ulster counties), will be held at the Bear Mountain Inn, Bear Mountain State Park, Bear Mountain, N.Y., from October 25 thru November 3, 1974.

This sales Exhibition will show the work of approximately 66 craftsmen living in the area. It is divided into two parts: The Artisans' Fair--composed of booths in which 38 craftsmen will personally sell their own work; and the Craft as Art Gallery in which special one-of-a-kind works will be exhibited and sold on the "red dot" system.

The Exhibition is sponsored by the Palisades Interstate Park Commission, which operates state parks in the three counties in which the exhibiting craftsmen live and work.

## Seminar at Corning Glass

The Annual Seminar on Glass will be presented by the Corning Museum of Glass with a revised and abbreviated format and a new title--**Collector's Weekend**. Programs on glass history, production techniques and other information of interest to collectors as well as artists will be shown October 17-19 in the Glass Center Lecture Hall.

Featured will be museum staff members as well as visiting lecturers. Registration for the entire seminar or individual lecturers may be purchased at the museum.

## Cornell Pianist

### Featured Soloist

The first in a series of chamber music recitals featuring young musicians attending schools in Western New York will be presented at 3:00 p.m., October 20, in Howell Hall at Alfred University.

The featured soloist will be Martin Goldray, a senior at Cornell University and student of Malcolm Bilson. Goldray has one several awards for composition and piano, and is said to be deeply committed to the performance of contemporary music. Goldray's program will include works by Schoenberg and Schumann, Beethoven's Sonata in E. Major and J.S.Bach's Prelude and Fugue in E Major.

The series is open to the public without charge.

## Ragtime Ensemble to Perform at A.U.

The critically acclaimed New England Conservatory Ragtime Ensemble will appear in concert at 8:15 p.m., October 19, in McClane Center.

The group's appearance on the Alfred campus is part of the annual series of cultural programs sponsored jointly by the University and the State University Agricultural and Technical College at Alfred. The ensemble represents a different dimension in the current ragtime revival. The twelve-musician group is built around string and wind

quartets, and under the conduction of Gunther Schuller, plays orchestrations of rags, mostly by the late Scott Joplin.

The New York Times commented that the ensemble "brings out colors and shadings well beyond those found in traditional piano versions of ragtime...Schuller shows that orchestrated rag is not necessarily a quaint dead end,"but is also a "bridge into jazz."

Tickets for the concert will be available at the door

# COLLEGE BOOKSTORE

THE HONORARY CONSUL, AMERICAN MISCHIEF, PENTIMENTO, RENDEZVOUS WITH RAMA, HOW TO BE YOUR OWN BEST FRIEND,

SYBIL, SHELTER, and HANDMADE HOUSES are back in.

PORTAL PANORAMIC PRINTS are in again.

Also a full line of new posters and stationery.

### St. Lawrence Halos Saxons

What started out to be a very promising football season for Alfred has turned out to be one which the Saxons are going to have to fight to fain a winning record. St. Lawrence handed Alfred their third consecutive defeat when they shot out the Saxons 6-0 last Saturday in Canton. For the third time in four weeks the Saxons played in the rain.

The Larries scored in the second quarter when they recovered a Saxon fumble on the Alfred eight yard line. On fourth down Andy Reinhardt scored from one yard out and produced the winning score for St. Lawrence.

The Alfred offense was less than potent throughout the game. They did not penetrate inside the St. Lawrence thirty. Their offense totaled only 177 yards. All but twenty yards

attack. Three pass attempts were intercepted, and only a total of four were completed. Leading ground gainers for Alfred were Tim O'Neil with 75 yards and Frank Yorio with 42.

Alfred's defense however was close to perfect. They allowed only 68 yards net total offense for the entire game. In fact the Larries net rushing yardage totaled zero. In almost any other game this defense would have been the key to victory, however Alfred's offense was stifled.

This game marks the first time Alfred has been shutout in forty-five games, and the first time they have lost three successive games since 1968. Hopefully Alfred will make ammends for the past three weeks this Saturday when they face Hobart on Homecoming Weekend.

### Rifle Team Shoots For Top

Last Friday the Alfred Rifle Team met St. Bonaventure at home for their first rifle match of the season. The Alfred team won with 1327 points out of a possible 1500, while St. Bonaventure ended with 1279 points. Scoring is based on the sum of the scores of the top five shooters, each of whom are shooting at three 100-point targets—one prone, one kneeling and one standing. The Alfred team scored as follows:

	Pr. Kn. St. Tot.
Dave Hardey	99 94 92 285
Gary Caso	99 94 75 268
Sue Olyha	98 90 76 264
Ken Lozo	97 85 75 257

Don Schreeck 94 82 77 253  
The Rifle Team's next match is on Oct. 19th at home against Cornell.

In addition, this year the Alfred team has a very promising new shooter. Sue Olyha, a freshman from Hastings, N.Y., started shooting at the age of 12 when her father took her to a local range. For the last two years Sue has shot in the nationals at Camp Perry, Ohio. This year she won several matches with perfect scores of 400 points.

It is believed that this new talent will strengthen the already strong Rifle Team even more.

#### INTRAMURAL NEWS SHEET RIP FLAG STANDINGS

- Fraternity:**  
1) Klan Alpine 1-0  
2) Lambda Chi "A" 1-1

### DOUBLE CROSS-UP

By Lora W. Asdorian

Consider the clues from all angles; they may CROSS you UP! The clue may be a pun on the word wanted, or an anagram of the word itself. Usually, the clue contains a definition (synonym) as well as a cryptic representation of the word. Certain words may stand for letters in an anagram, e.g., NOTHING, TEA, SEE, WHY, YOU, and BE may represent O, T, C, Y, U, and B. The word could also be hidden in the letters of the clue, e.g., the phrase "human being rated as unthankful" contains the answer INGRATE. The word might be defined in two parts, e.g., a clue for FORESTER is "ranger in favor of organic compound" (FOR ESTER). Write the words over the numbered dashes and then transfer each letter to the correspondingly numbered square in the diagram. Black squares indicate word endings. The completed diagram will contain a quotation reading from left to right. The first letter of the answered words will give you the author's name and title of the work from which the quote comes.

## Learn to land a jet here and you can land one anywhere.

Bringing in a supersonic jet on a 10,000 ft. cement runway is tough enough. But landing one on a 500 ft. piece of a carrier deck, moving at 25 knots, is even tougher. Only a few men are good enough to do it. And they're all Navy trained. How can you become a member of the Naval Air team? One way is to join while you're still in college. One of the advantages of being part of the Aviation Reserve Officer Candidate (AVROC) Program is that it lets you continue working toward your degree.

Getting your Navy Wings isn't easy. The training is tough. The least that will be expected of you is the best that other pilots can do. Their limits are your starting blocks, their expertise your primer. But if you succeed, your future is assured whether you remain in the Navy or not.

For more information, talk to your local Navy Recruiter.

### Be Someone Special. Fly Navy.
