Chemical Inventory / List of Chemicals

An annual chemical inventory is required of each Alfred University department which stores and uses chemicals and products which have an associated safety data sheet (SDS) - Ref: OSHA CFR 29 1910.1200(e)(1)(i); also Section 1.3.2.6.6 of the Alfred University Chemical Hygiene Plan. If you are unsure if a product qualifies for the chemical inventory, check with the manufacturer to determine if they produce an SDS for the product. If the manufacturer does produce an SDS, then the product must be included in your chemical inventory. The chemical inventory is due via a standardized Excel template (see attached) to Environmental Health and Safety no later than June 15th, 2017, email to: envhealthsafety@alfred.edu.

To simplify the chemical inventory process, EHS has produced a new streamlined Excel template. Only the attached template will be accepted by EHS. In this template, there are only two cases where we require that the quantity column be completed; if you store 100 pounds, or 55 gallons or more of any chemical, and if you have any P-Listed (Particularly/Acutely Hazardous) Substances in any quantity; otherwise you may leave the quantity column blank. There are also several drop-down lists to facilitate ease in completing the inventory. Thank you for your attention and support in implementing this new campus chemical inventory process. In addition, please note that each chemical inventory template includes a cover sheet. The cover sheet must be signed by the faculty/P.I. or supervisor in charge of that room or area. If there are multiple faculty/P.I.'s/supervisors in charge, then each person must sign the cover sheet certifying that the inventory is correct to the best of their knowledge. If you have any questions please contact Travis Reed (x2190) or Dean Perry (x2196).
