New Email Information Security Procedures Coming Soon!

In Spring semester 2019, ITS enrolled all students in email Multifactor Authentication (MFA)

During the week of November 11th through the 15th, ITS will be implementing email Multifactor Authentication (MFA) for all non-faculty employees. Multifactor Authentication (MFA) is a significant deterrent to unauthorized email access...even when the password has been compromised. MFA is often described as "Something you know, and something you own." The something you know is the password portion ...and in our particular case, something you own will be a mobile phone number.

Here is how Multifactor Authentication will work for Alfred University: During the week of November 11th, we will push 50-75 staff members each day through the enrollment process. During the

enrollment process, staff will be redirected to a Web page that will require them to register a mobile number where they can receive a call, text or notification to a phone based authenticator application (perhaps the easiest method of MFA). The enrollment process will take only a few minutes and will require that the employee have their mobile phones available on the day of enrollment. After they have registered that phone, they will be sent a call, text message or authenticator application notification whenever they login from off-campus. If an employee is on-campus, there will be no need for an additional authentication (other than the password).

The entire process is similar to the way banks secure login attempts to Online banking sites. If you would like to beat the week of November 11th rush, please feel free to pre-enroll at:

<https://my.alfred.edu/inf...>

If you have any questions, please feel free to contact the ITS Helpdesk at 871-2222 or helpdesk@alfred.edu.
