THE PRESIDENT'S ANNUAL REPORT

To the Trustees of Alfred University:

The President has the honor to submit his report for the year ending May, 1943, being his tenth annual summary, although his first included the months of the presidency of the late Dr. Paul E. Titsworth. The present report is for the one hundred and seventh year of the University and its eighty-sixth under the present charter.

Necrology and Health

Up to this time in the University year no deaths have occurred either among members of the Board of Trustees or the faculty and administrative officers. The following students or recent alumni have died in the service of their country: Lieut. John C. Eggleton, ex-'42, of Brooklyn; 2nd Lieut. Donald W. Hoefier, ex-'43, of Buffalo; Lieut, (j.g.) Dighton L. Polan, '39, of Brookfield; A/C Richard H. M. Shinebarger, ex-'43, of Erin; Seaman 1st Cla«s Robert H. Swick, ex-'43, of Niagara Palls; and 2nd Lieut. Carl J. Wdowka, ex-'41, Niagara Palls. The general health of the student body has been better than usual.

College of Libera! Arts

The year has been one of many ups and downs. The steady draining of men into the armed services has continued. Sixty-four men have left the College for the armed services or related purposes since September. The Dean's time has been spent to a considerable extent in dealing with questions of deferment for his students. The College has considerably modified its program in providing varied offerings as directly war-aimed as possible. Trustees have received leaflets showing these changes in detail. Such courses as navigation, meteorology, and radio illustrate the type in question.

There has been some development this year along the line of teacher education. A panel of experts respecting teacher training from a committee of the State Association of Colleges and Universities, spent some time on the campus evaluating our teacher training plans and making friendly suggestions for improvement. The panel seemed to be very well satisfied. We have had some interesting people on the campus both in the Assemblies and in the Forum. Just now Prince Hubertus zu Loewenstein is finishing a two-week stay with us under the auspices of the Carnegie Endowment for International Peace. He has made a great impression and has stimulated much thought.

The art courses which were introduced in this College last fall by way of experiment as electives have had some patronage during the year and have cost the University little.

PRESIDENT'S REPORT

Very important developments are taking place in the general field of liberal arts. A committee of the Association of American Colleges is making a study of objectives and course content in that field. It is desirable to do this for the purpose of reselling liberal arts to the public and for bringing it in line with present and future needs. The President believes that important changes can be made here and elsewhere and should be made in this direction without impairing the fundamental quality and purposes of the traditional liberal arts.

The basic phase of the Army Specialized Training Program, as well as the Naval college basic program, is made up exclusively of liberal aits courses. The College has been listed for inspection and possible contract to give the Army work.

School of Theology

The new Board of Managers of the School of Theology comes into active functioning for the first time this Commencement. The School has had a very successful year. The following individuals have contributed their services in various lines: Rev. S. S. Powell, Dr. George B. Shaw, Rev. Elmo F. Randolph, Rev. Everett T. Harris, and Dr. Ben R. Crandall. The survey of the work of the School made by the committee of the Commission of the Seventh Day Baptist General Conference last year resulted favorably and apparently allayed some of the criticisms that were arising. A full historical sketch of the School of Theology and its relation to the University was submitted to the survey committee by the Chairman of the Board of Managers and has been widely publicized in the denomination.

Apparently the School ran within its budget this year and that without any special solicitation by the Dean. Denominational support has been increased over the previous year. The Seventh Day Baptist Ministers' Conference held annually in recent years will be omitted this year on account of the war situation.

College of Ceramics

Like the College of Liberal Arts the College of Ceramics has had its ups and downs in morale and in its work. Students have been much perturbed through uncertainty.

The full and permanent accrediting of the College by the Engineers' Council for Professional Development has added to its prestige. A plan for an extensive building development after the war has been accepted by the Albany authorities. Ceramic industries are increasingly patronizing the school through the establishment of research fellowships. There are five now in operation, paying from \$300 to \$4,000 per year for such work. Indeed, the industries are supporting research at the College with funds now equal to those which the State

provides. The Experiment Station has seven part- or full-time employees. Industrial consulting work has also been increasing.

The summer semester of the College of Ceramics will begin on the 17th of May and will continue to the 31st of August. This will offer to qualified students half of the senior year's work, enabling some to graduate next December.

The College of Ceramics has been listed for inspection and possible contract for the Army Specialized Training Program.

AGRICULTURAL AND TECHNICAL INSTITUTE

This unit among our schools on the campus has had a very busy year, its thirty-fifth. It has gone on increasing its training of men and women for the industries, as well as for the armed forces. While suffering reduced enrollment of regular students, it has had very satisfactory enrollment in the special war work courses. The Naval Air Cadet training work has been moved from the campus to Dansville, New York. There the program is making use of the Physical Culture Hotel, which has been taken over wholly or in part, and the very fine airport in Dansville. Plans are now matured for training at least one hundred men at a time there, and sixty are already on the ground. The contract is still with Alfred University. We have loaned one or two College of Liberal Arts faculty men to help get certain phases of the program going and some of the regular instructors of that work in the Institute will permanently be in Dansville.

The Institute is going strongly now into the effort for increased food production. Many trustees, doubtless, have noted in the public press the interesting experiment undertaken by the Farm Security Administration and the United States Employment Service in bringing Kentucky farmers into New York State, as well as other states, of course, to relieve the farm labor shortage. A continuous stream of these men is being trained at the Technical Institute. They come for a week's work in operating milking machines, tractors, and other farm equipment, and then go under contract to farmers interested in obtaining their services. There are many more calls for them than can be filled.

A very extensive building program is already listed by the Albany authorities for the Technical Institute after the war.

SUMMER SCHOOL

The summer school of 1942, through elimination of certain small departments and a reduction in the members of the staff and in salaries, brought the school to a conclusion with a small surplus. The new Director, Dr. M. E. Drake, proved to be a wise choice. As in all cases of estimating the future, the problem of arranging for the

PRESIDENT'S REPORT

summer school of 1943 is a difficult one. It is planned to have a longer intersession of six weeks and the usual six-week session. The College of Ceramics, of course, as already indicated, is having the fifteen-week summer semester.

University Faculty Changes

1942-43

Liberal Arts

Mr. George H. Hobart was appointed Assistant Professor of Economics for the academic year as substitute for Dr. C. Edward Galbreath on leave of absence.

Mr. Clarence M. Mitchell was appointed Librarian of Alfred University January 1, 1943, to fill the vacancy caused by the resignation of Ruth Greene Brandstetter, September 1, 1942. Mrs. Hannah Shaw Burdick was appointed Acting Librarian during the interim.

Dr. Willis C. Russell, Assistant Professor of History and Political Science, was granted leave of absence, but due to the change in the draft law, was not called.

Mr. Alex J. Yunevich, Assistant Professor of Physical Education and Athletics and Head Coach of Football, was granted leave of absence for the year for service in the Navy.

Dr. Marjorie Hunsinger was promoted from an instructorship to the rank of Assistant Professor of Business and Secretarial Studies.

Miss Eva L. Ford, Professor of Romance Languages, absent on leave, 1941-42, returned to her position this year.

Mrs. Mildred M. Landis was appointed part-time Instructor in Art for the year.

Dr. Alfred T. Goble, Assistant Professor of Physics, was on leave of absence during the year teaching special war courses at Princeton University.

Miss Marion L. Fosdick was appointed part-time Instructor in Pottery for the year.

Miss Erma B. Hewitt was appointed part-time Instructor in Jewelry and Metal-working for the year.

Mr. A. Burdet Crofoot was asked to assist in the Department of Physics during the academic year in the absence on leave of Dr. A. T. Goble.

Mr. L. Eugene Reynolds served as part-time Instructor in Navigation during a part of the year.

Mr. Fred Kaplowitz was appointed Special Assistant in Music, part-time, for the academic year.

Ceramics

Mr. Walter A. Hedden has replaced Mr. Wayne E. Brownell as Instructor in Research in the Ceramic Experiment Station.

Mr. Milton A. Tuttle has been promoted from Research Ceramist to Instructor in Research in the Ceramic Experiment Station.

Mr. William B. Crandall has replaced Mr. Van Derek Frechette as Instructor in the Department of General Ceramic Engineering.

Mrs. Vivien P. Timiriasieff has replaced Mr. Thomas S. Haile as Instructor in the Department of Industrial Ceramic Design.

Mr. Archie Chisholm has replaced Mr. Edward W. Gehrke as an assistant in the Glass Technology Department.

PRESIDENT'S REPORT

Jamestown Extension

Mr. Albert J. Coe, who came to the Extension in the previous year as Assistant Professor of History and Political Science, was made Director to succeed Dr. Oran M. Knudsen, resigned.

Mrs. Dorothy C. Morse was appointed Assistant Professor in the Departments of Chemistry and Biology.

Technical Institute

Mr. Bror Anderson, Instructor in Floriculture, a reserve officer, was called for service in the Army. Mr. Aaron Small, who was employed as his substitute, was also called April 5.

Mr. Howard Merrill was appointed Instructor in Animal Husbandry as successor to Mr. Lloyd W. Robinson, resigned.

Mr. Harold Crowell was appointed Instructor in Farm Mechanics.

Mr. E. E. Foster received a permanent appointment as Instructor in Agronomy and has assumed complete charge of the farm.

Mr. George Gregory was appointed Instructor in Bacteriology.

Miss Phyllis Czajkowski has received a permanent appointment as Instructor in Mathematics and Drafting, a position vacated by Mr. Robert Brown, now in the service of the Navy. Miss Czajkowski is continuing with the instruction in shorthand and typewriting.

Mr. George Whitney was appointed Instructor in Electrical Theory to succeed Mr. William Jaeger.

Student Aid

Total \$30,655.99

During the year 55 students were employed under the NYA program and earned \$2,356.75. This includes the Extension School at Jamestown.

Acknowledgement of Gifts

Some 350 contributors have given the University approximately \$30,000 so far this fiscal year, with a vigorous campaign for further contributions by classes now under way, to end by the close of the year. The great bulk of these gifts was undesignated. An anonymous

contribution of \$1,200 for Greene Hall and one of \$1,000 for the carillon debt with nearly \$2,000 for scholarships and endowment cover most of the designated funds. Trustees contributed about \$17,000; faculty, staff, and business associates about \$2,500. Other alumni and friends furnished the remaining \$10,000 plus. There are still two months of the year to run.

These generous gifts, most of whicn are really sacrificial, have been exceedingly helpful and encouraging in these critical times, and our heartiest thanks go out to all the givers.

Appreciation also should be expressed to Mr. Harry Craig, County Superintendent of Highways for the great help he provided us last fall with men and machinery for clearing the flood-damaged Merrill Field, and in deepening and widening Kanakadea Creek.

CAMPUS LIFE

Disciplinary problems have been at a minimum. Morale has fluctuated. Social life has been curtailed. Much time of the Dean of Men as designated liaison officer with the armed services has been spent in counselling students with respect to the different reserve opportunities and keeping them informed on military developments affecting them. Nineteen men in Liberal Arts and 56 in Ceramics, a total of 75, were enlisted on the campus in the Army Enlisted Reserve Corps, the Army Air Corps Enlisted Reserve, the Navy V-l, V-5, V-7, the Marine Corps Reserve, or the Medical Administration Corps. A successful Campus Community Chest drive combining Red Cross, U. S.O. and other giving raised \$1,600. The weekly assembly programs, the Forum lectures and entertainments were of a high order. Α Faculty Variety Show or Revue was greatly enjoyed, rilling Alumni Hall to capacity and adding a nice sum 10 the War Scholarship Fund. A modified St. Pat's Festival was felt by most to be a success.

FINANCE

(See Minutes of the Trustees' Meeting, May 10, 1943)

VARIOUS ITEMS

Religious Activities. The campus religious activities have been usually successful except the daily Chapel. The small attendance this year poses the question: Is it advisable any longer to give ninety-five per cent of the campus a half-hour recess for coffee and coca cola while five per cent or less attend Chapel?

Athletics. Intercollegiate sports have been confined this year to cross country, basketball and track. The greatly intensified physical training work for men and women begun last year has been continued.

PRESIDENT'S REPORT

An extensive and varied intramural sports program has been conducted.

A. U. E. The Alfred University Extension in Jamestown, New York, has had a successful year though suffering reduced enrollment like most other schools. A financial drive in the city last spring produced sufficient cash and pledges to assure the School's stability for two or three years. Some additional courses in science have been made possible this year through cooperation with the municipal research laboratory and its very competent director.

Burdick Hall. This building, long used as a dormitory, is ninetyseven years old. For the last few years it has housed only a few students. This year it stands unused except for two offices of student publications. Should sentimental reasons dictate its rehabilitation? Whence the funds? Should it be demolished?

Japanese-Americans. Two American-born Japanese students, taken under FBI sanction from the Reallocation camps, have enjoyed our facilities this year. They have fitted in and been accepted without any stir or friction.

Army Specialized Training Program

When the first list of colleges and universities for the new Army-Navy College Program was selected in mid-winter by the Washington Committee on Selection, the College of Ceramics at Alfred University was on it. This naturally was very gratifying. However, as the proposed curricula were examined, it quenched enthusiasm somewhat to note that the College of Ceramics could give none of the engineering required by the Advanced phase—electrical, mechanical, or civil—ana that the Basic phase—physics, chemistry, mathematics, drafting, English, history and geography—had practically all been done for Ceramics by the College of Liberal Arts. Moreover, almost all the general facilities, libraries, laboratories, auditoriums, gymnasiums, dormitories, dining halls, etc., are owned by the University.

A later list included Alfred University for the Basic phase of the Army Specialized Training Program parallel with the State College. About March 10 came a call from the Second Service Command Headquarters asking if Alfred could take 400 men by April 5. A hurried explanation tried to make clear that Alfred could give only the Basic phase. This seemed satisfactory to Lieut. Col. J. B. Grier, the officer in charge.

Nothing more was heard for a week. Colonel Grier told the President not to come to New York, as the latter had suggested in the phone call. Not hearing as soon as Colonel Grier had promised, the President decided to go. A very fine conference was had with Colonel

Grier. The relation of the two colleges to each other and to the State was explained and the ownership of the general facilities pointed out under the Colonel's interested questioning. He showed his letter to Washington recommending Alfred for 250 men, but remarked that they would not be coming April 5. He had not notified Alfred of his recommendation! That particular allocation was evidently premature. Colonel Grier, however, had obtained a good mental picture of Alfred's facilities.

The President then went to Washington to participate in a meeting of college administrators involved in these plans. Much of an incidental nature was learned there. Perhaps the most significant item was that the selection of colleges had been made almost wholly on the basis of accrediting by the Engineers' Council for Professional Development (ECPD) for the College of Ceramics and by the Association of American Universities for the University (Liberal Arts).

Meantime, the Treasurer and the Manager of Dormitories and Dining Halls had visited other colleges to see what they were doing. The President's office had had detailed data about and diagrams of our dormitories carefully compiled and sent to the New York headquarters. Detailed plans also were made by the Dean and Registrar for allocating proper teaching personnel and classroom and laboratory space for instructing an army unit.

April 13 and 14 a lieutenant from headquarters (Medical Corps) was here to inspect our housing, dining and health facilities. He was a very congenial person, very different from inspectors some institutions endured. He carefully surveyed us, accused us of being too conservative in estimating the dormitory capacity, and in general expressed himself as well pleased with what he saw. He explained that he could make no commitments, also that the whole scheme was evolving more slowly than anticipated. It became clear that the inconvenience of having to empty the dormitories before Commencement would not occur.

April 23 Colonel Grier himself, with four engineers, came to Alfred. The engineers wished to make some preliminary measurements, but planned to come back for a more detailed check on fire protection, etc. The chief object of the visit appeared to be to convince us that we should plan on 400 men. Colonel Grier said that was considered the minimum efficient unit. If we took less we still might get a unit, but not so early. He said Alfred was on their preferred list. We can handle 400, using the facilities of both Colleges. Colonel Grier must know by May 1 that we agree to the 400 figure. Definite decision on using us would be made, he thought, about mid-May, and a contingent would come about mid-June. He left a work sheet for listing the figures they want on various costs, etc., and went over a

PRESIDENT'S REPORT

typical contract with us. They aim to be not generous, but fair and just with the colleges. Costs, except for instruction, are checked and revised each month. The government pays for minor alterations to enable us to serve it and will provide necessary double-deck cots, blankets, etc. Alfred apparently now is ninety-five per cent sure of a contract.

Conclusion

With deep appreciation again of the cordial cooperation of trustees, faculty members, office workers, students, alumni and friends, this report for Alfred's one hundred and seventh year as an educational institution and its eighty-sixth under the present charter is placed before you.

Alfred, New York May 10, 1943 President

J. NELSON NORWOOD,

REPORTS OF OTHER ADMINISTRATIVE OFFICERS OF THE UNIVERSITY

On Topics not Covered or Only Partially Covered in the President's Report

REPORT OF THE DEAN, COLLEGE OF LIBERAL ARTS

(Excerpts)

I have the honor of submitting my ninth annual report as Dean of the College of Liberal Arts for the year 1942-43. My time in administrative work as dean has been largely taken up by the usual routine duties—some of them seasonal—which have been described in detail in previous reports. In addition to the supervision of the counseling of freshmen and sophomores in both colleges, the preparation of copy for the new catalogue, the supervision of the choice of majors by juniors and seniors, considerable more time than usual has been given to correspondence, particularly in connection with the deferment of students from the draft and to problems concerning the Alfred University Extension in Jamestown.

The special responsibility which was placed upon me nearly two years ago to aid the students of the College in securing deferment of induction under the Selective Service System has involved increased activity in my office. Since the close of the college year on June 1, 1942, sixty-eight letters have been written to draft boards in behalf of forty-four students in the College. Of this latter number, twentyeight have received deferment or postponement of induction to continue their studies at least until the end of the current semester.

In the latter part of the first semester this year there was considerable unrest among the students because they felt that they should be doing something which would contribute more directly to the war effort. Some considered leaving college at the end of the first semester and either going into the service or preparing for defense jobs. In order to provide courses for them which would prepare them more directly for the war effort, and thus to keep such students in college, Mr. John Reed Spicer was appointed special assistant to the dean of the College of Liberal Arts for the purpose of studying how the College of Liberal Arts could adapt itself as much as possible to the war needs.. The War Adaptations Committee of eleven members, of which Mr. Spicer was chairman, was appointed to study the problem and to report to the faculty ways and means of meeting this situation. Numerous meetings of the committee were held during the months of November and December. Valuable information was gained from consultations with representative students. The result was the publication of a special bulletin on war courses which was distributed just before Christmas. This provided for a large number of war courses to be given in the second semester by the College of Liberal Arts and by the Agricultural and Technical Institute, for which full credit was to be allowed to the students of the College.. This program was favorably received by the students. A considerable number of them changed their registrations for the second semester in order to take some of these special courses. Of these courses, those which attracted the largest number of students were navigation, meteorology, spherical trigonometry, and radio. While not as many students availed themselves of these special courses as was expected, yet the effort was justified because it did help to quiet the unrest among the students and encouraged them to settle down and keep on with their college work until they were called into the service. Much credit should be given Mr. Spicer for his deep interest and intensive effort in organizing the War Adaptations Committee and in carrying through plans to meet a critical situation.

As an additional effort to aid our students in reference to the war, the Physics and Chemistry Departments repeated first semester courses in the second semester to enable pre-medical students to accelerate their programs and be ready for admission to medical colleges as early as possible. Plans have been completed to offer additional chemistry courses during a six-week intersession in May and June to further accelerate the programs of these pre-medical students.

Two students have already completed their courses and have entered a March class in medical college. They will receive their bachelor's degrees in May.

COLLEGE OF LIBERAL ARTS, DEAN'S REPORT

19

Everything possible is being done to arrange courses to be given during the coming summer so that students who are nearing graduation may complete their requirements for degrees in less than four years. However, the relatively small number applying for summer instruction makes it impossible to offer all the courses desired by individual students because the classes would be too small.

Forty-two members of the senior class expect to receive their degrees on May 10. These are completing majors in twelve different departments, as follows: Biology 8, Business and Secretarial Studies, 5; Economics, 5; English, 4; Chemistry, 4; Philosophy, Sociology and Psychology, 4; History and Political Science, 3; Mathematics, 2; Romance Languages, 2; Classical Languages, 2; German, 2; and Geography and Geology, 1.

It has been my privilege as Dean of the College of Liberal Arts to serve as chairman of the newly constituted Library Advisory Committee. This committee has had several meetings with the new Librarian of the University, Mr. Clarence M. Mitchell, and has been of definite help in bringing about a better understanding of the problems of the library, especially as they relate to the faculty and their use of the library.

The immediate need of education for special skills in carrying on the war has accentuated a trend in this country that regards education in the liberal arts and humanities as less important than special training for jobs and professions. Special education is quite necessary, but liberal education is vital to a democratic society. Men broadly educated are needed now to give proper perspective to the aims for which our country is fighting-freedom in our own country and elsewhere- but more important than that, a body of liberally trained graduates should be going out from the colleges from whom will come the leadership after the war in solving by democratic processes the problems of adjustment and permanent peace. The trend away from liberal education must be met; otherwise the continued existence of many institutions of learning is in great jeopardy. It is necessary, it seems to me, that Alfred should carefully re-evaluate its aims as an American college, revise its curricular offerings to carry out these aims, strive to show to its constituents the abiding value of its program in a free country, and thus do its part in maintaining the great American tradition in Christian education.

The situation in the Jamestown Extension is promising in the matter of finances, and the enrollment for the current year has been a cause for encouragement. The total enrollment, as compared with 94 of the previous year, for both semesters of this year, less duplicates, is 105 (93 in the first semester; 70 in the second semester). These are classified as follows: sophomores, 18; freshmen, 32; special or

part-time students, 55. Good work has been done in all the classes although some of the classes have been necessarily small.

A special arrangement was made with Dr. Frederick R. Weedon, head of the excellent Municipal Laboratory of Jamestown, to carry on the teaching of the advanced chemistry He has done this most successfully, giving the lectures at the high school building and having the laboratory work done in the well-equipped Municipal Laboratory. During this second semester he is also giving a course in bacteriology. Most of the students in his classes, however are special students, being persons who are employed in the Laboratory. Dr. Weedon is a scholar and a teacher of large experience and his instruction is of a high standard.

Those connected with the Jamestown project, both teachers and Citizens' Committee, are very much alive. Undoubtedly there is a growing interest on the part of the Jamestown people in the school. It is the definite hope of the Citizens' Committee that if the Extension can survive the loss of attendance which is inevitable during the coming year, the school will be in a position to benefit by the expected increase in attendance which should follow after the war in Europe has been won.

REPORT OF THE DEAN OF THE NEW YORK STATE COLLEGE OF CERAMICS

(Excerpts)

GOOD WILL AND COOPERATION

Nothing is more important than the cooperative relations with individuals and organizations that we have been able to develop and maintain. Certainly I should not do less than express appreciation of these cooperative relationships by a formal acknowledgment of them in this report. First of all I want to thank the Board of Managers for the fine backing and support that they have individually and collectively extended. Without that backing and support the work of the College would have deteriorated severely. It would be fortunate if the members of the Board had time to take an even more active part in the management of the College.

Most of the members of the college staff have loyally and industriously contributed to the attainment of the college objectives and some have contributed much more than could be reasonably expected of them.

Perhaps more important than the cooperation within the college organization is the cooperation that we have enjoyed from individuals and organizations outside of the College itself. Our relations with

STATE COLLEGE OF CERAMICS, DEAN'S REPORT 21

all of the other ceramic schools have been most friendly and cooperative. This is especially noteworthy from the fact that the Ceramie College has risen from a relatively inferior relationship to them to a relatively superior relationship to all of them in most respects. Jealousy and obstruction have been notably absent which testifies to the high caliber of men in these other institutions. Likewise our relations with the American Ceramic Society have been most friendly and cooperative.

Perhaps more important than all of the cooperation already mentioned is the cooperation with the ceramic industries and individuals in the industry. The most important consideration in this connection is the support that has been extended by the Ceramic Association of New York as will be apparent from the following paragraphs of this report. However, support by the ceramic industry in general has been most generous.

Student Enrollment and Deferment

In dealing with the problem of the loss of students for military service we have taken the point of view that it is in the interest of national defence to keep good engineering students in college in order that the military forces and civilian war industries' may be supplied with essential engineering service. If all engineers were drafted our defence effort would collapse. Pursuant to this policy we have written numerous letters for all the good students to their draft boards and have received splendid cooperation from them. This cooperation more than anything else accounts for keeping as many students in college as have been kept here. At the time of writing this report I am actively engaged in the work of an American Ceramic Society committee on this problem. I had the privilege of drawing up a set of resolutions that was approved by the committee and is now in the hands of the Board of Trustees with the recommendation that the officers of the Society and the officers of the Institute of Ceramic Engineers take these resolutions personally to Washington and present them to the War Man Power Commission. The men concerned have agreed to do so. It is hoped that this action will result in ceramic engineering being listed along with mining and metallurgical engineering in occupational bulletins 10 and 11 of the Selective Service.

Accelerated Program

The most important thing being done to counteract the reduction in enrollment is the accelerating of the college program. It is also a contribution to the war effort because it provides for an earlier graduation of students.. Students entering this fall can graduate in three years instead of four. This is made possible by continuing the

college work right through the year with no summer vacation. The choice of the three-year or four-year course, however, is optional with the students.

A questionnaire sent to the students March first resulted in 40 general ceramic engineers, 12 industrial ceramic designers and 11 glass technologists indicating their intention of attending the summer session.

Entrance and Scholastic Standards

Another measure we are taking to counteract the reduction in enrollment is to relax our entrance and scholastic requirements. We are now taking action on all applications as they are received instead of waiting until July 1, and we are admitting applicants who intend to remain in college only one or two years. They will be trained as laboratory technicians or for some other work of sub-college caliber. We shall also be somewhat more lenient toward students who have difficulty meeting the established standards for graduation. However, we shall not let the standards fall below that required by the ECPD for accrediting.

Selection of the Ceramic College as a Training Center for Service Men

Upon the advice of a committee of distinguished educators the Ceramic College was included in the original list of 281 American colleges selected by the Federal Government for the training of service men. Undoubtedly the selection was due primarily to the Ceramic College being accredited by the ECPD for the training of professional engineers. This adds in a very important way to the prestige of the college and it. will be most timely due to the threatened large decreases in enrollment of regular students.

New Ceramic College Building

Our five-year campaign for a new Ceramic Building has come to a successful conclusion. It is now approved and authorized for construction immediately after the war. We ha^{**}e spent a great deal of time developing preliminary plans not only to provide for present needs but also for future needs and to provide for what we think will be the most efficient operation of all units of the College. The plans we have developed provide for a quadrangular building with the present new ceramic building constituting the north section of it. Corresponding with this section will be a south section identical in size and shape. These two sections will be joined by an east and west section thereby constituting a quadrangle. The plans have specified the divisions of the space on all four floors and the uses to which each division will

STATE COLLEGE OF CERAMICS, DEAN'S REPORT 23

be put. The project is now in the hands of the state architect for developing final plans and we are informed he is to begin at once.

The Ceramic Experiment Station

The Ceramic Experiment Station continues to be the most industrious and successful unit of the College. The number of research papers that have been and will be presented during the year at meetings of the American Ceramic Society is 19. Five papers have been published. In addition, progress reports are prepared every month and special reports submitted to the sponsors of the various fellowships. All of this is supplemented by special brief reports to individual companies. The work has covered the testing of New York deposits of raw materials, improvement in the quality and manufacturing methods of Hudson River brick, improvement in glazed ware such as glazed brick, tile and terra cotta, developments to counteract crazing and shivering in glazes, the improvement in refractory insulating brick by coating with aluminum, studies of glaze penetration into whiteware bodies, development of disinfecting cement, production of bloated clay for use as light weight aggregate, controlling the coefficient of expansion of glazes by their composition, production of sponge iron from New York magnetite, developments in the preparation of grog for refractories, purification of New York talc, development of ceramic oven ware, substitution of zirconia for tin oxide as an opacifier, improvement in plaster molds for whiteware casting, the adaptation of the plastograph as an instrument for measuring plasticity and a number of other projects of which Ihe foregoing are typical. In addition, the staff has supervised much of the senior student research work.

Much of this work has an indirect bearing on the nation's defense program.

Consulting Work

Closely allied with the research work of the Ceramic Experiment Station is the consulting work that is being done by certain members of the teaching staff.

Miscellaneous College Activities

The numerous miscellaneous college activities which I initiated a number of years ago to lift the work of the College above the level of mediocrity have gone forward during the year for the most part with reasonable effectiveness.

The student publication known as the *Alfred Engineer* has won praise from both the alumni and the ceramic industries and has been effective in building up good will for the College. It is financed al-

most completely by advertising. It has a circulation of 1,000 to 1,500. The Alfred Student Branch of the American Ceramic Society has had another very successful year.

The practice of holding monthly meetings of the College Faculty to discuss ways and means of improving the work of the College was continued with excellent results. Morale was also nourished by monthly dinners for the faculty and officers of the Student Branch which were held in connection with the programs of the Student Branch.

The summer plant inspection trip has proved to be one of the most popular and effective of all our innovations.

Active participation in the work of the American Ceramic Society has continued. More than twenty papers will be presented at the annual meeting this year. Members of the staff fill the following positions in the Society this year: Vice President, Secretary of the Glass Division, Secretary of the Institute of Ceramic Engineers, Chairman of the Materials and Equipment Division and membership on various committees including the very important one on the deferment of Ceramic students. Most of the faculty will be in attendance at the Convention and some will have charge of certain services at it.

Cooperation with the R. H. Macy Company and the Southern Potteries in the production of ware according to designs developed by the students has continued effectively.

The Future

Along with most other colleges in the country the Ceramic College faces an immediate future that is gloomy. Our immediate job is to hold the decrease in enrollment and general deterioration of the College to a minimum. Flexibility should characterize our policies, our objectives and all of our activities whereby we may make the best of the situation imposed upon us by the war. We should keep our organization intact and our faith in the future of the College unimpaired. We should, in the meantime, make preparations to meet the situation that will develop with the termination of the war. Then we will again be sv/amped with students. In addition to the normal influx of regular students there will be large numbers returning from the services anxious to pick up their work where they left it when they were inducted. Included in the applications will be more girls than formerly as the war has shown that girls are useful in engineering work.

General Remarks

It is, of course, a disappointment that due to conditions beyond our control, we have not been able to lift the work of the Ceramic

STATE COLLEGE OP CERAMICS, DEAN'S REPORT 25

College so definitely above the status of other ceramic schools that other ceramic schools admit its superiority.

We recommend that the Board of Managers give detailed consideration to the college objectives, policies, and activities, making such changes as may be necessary for the achievement of that goal.

REPORT OF THE DEAN OF MEN

(Excerpts)

The year has been one of challenge and of opportunity. It has brought to most college men the necessity of early military service and a disruption of college work and life plans. I believe that the majority of Alfred men regard the period of military service as simply a necessary interlude and look forward *io* the close of the war when it may be possible for them to return and complete their preparation for chosen professions. The imminence of call to military service and the whole impact of the war effort has had its inevitable effects upon student morale. Some students have assumed a very indifferent attitude toward their work and have been marking time with their studies until calls to active duty have been received. Other students realizing the great importance of their college work in the war effort and their own professional careers after the war, have been diligent and have made the best possible use of their opportunities.

The major portion of my effort during the past college year has been spent in counseling. A large number of men have sought advice on military and numerous other problems. These men have come not once but many times. Each man has had to a considerable degree individual problems and an effort has been made to help in working out satisfactory solutions.. As the Alfred Armed Services Representative, I have served as the liaison officer between the University and the various branches of the armed services on service problems. This has involved the dispensing of information to students, a rather heavy correspondence with military offices, arranging for the reception and program of officers who have visited the campus and the supervision of such screening tests as have been given.

No serious disciplinary problems have developed during the year although it is my opinion that the moral tone of our student body is not quite as higlj as in normal and peace times. War always brings with it new attitudes toward the conventions and in my opinion these changes are inevitably and quickly reflected in student life.

There are many recommendations that I would like to make in my report this year but I am restrained at this time because they all involve the expenditure of funds which I realize are not now available.

REPORT OF THE DEAN OF WOMEN

(Excerpts)

Because of the natural anxiety about attendance at college this past year it is worth noting that the number of women at the beginning of the college year was 189, and that it is fewer by fifteen only than the number of women attending in the peak year of 1941-42 when the registration was 204. Twenty years ago the number of women was 157 and the number has increased until in 1936-37, there were 202; the following year, 1937-38, the number was the same as this year. On April 1 of this year the number of women was 172, showing a loss of 17 during the year. An analysis of this loss shows that two women completed their work for a degree in December, four left to be married, one for cadette training with Curtiss-Wright, two because of low scholarship, four for financial reasons, and three for other family reasons.

Fifty women have had scholarship help. Twelve of these have held honor scholarships and only one of them, a freshman, has failed to attain the index required for its continuance. Seventeen women have received aid through room grants. Three of these grants were given in return for filling the position of counselor. The plan of a counselor for each floor in The Brick, followed for the first time this year, has resulted in better observance of quiet hours.

The distribution of women in residences has been as follows: 103 in The Brick, 59 in the three sororities, 10 at Greene Gables, and 17 outside. Of those outside, 9 live in their own homes, 3 work for their room and board, 2 live with relatives, and the other 3, two of whom are graduate students, have special arrangements in town.

During the year there was considerable agitation in regard to the smoking rule, with the result that the matter was presented to the trustees for reconsideration of the present rule. As far as I can see, the Women's Student Government, to whom the matter was left, has done a good piece of work and, in my opinion, might well continue as long as it is satisfactory to the Administration.

One of the most immediate problems which presents itself is the matter of housing the women on campus should it be necessary to give the dormitories to the Army groups. With this in mind, the Dean of Men and Dean of Women made a canvass of the fraternity houses. Their feeling is that much would have to be done to make these houses suitable or comfortable for women. It would be desirable, it seems to me, to have such houses located in the same general neighborhood. It might be possible to remodel two or three of the fraternity houses, to use one of the University owned residence houses on the same street, and, together with the sorority houses, take care

REPORT OF THE DEAN OF WOMEN

of the usual number of college women. Separate houses would mean the employment of more heads of houses and of women for cooking and maid service. This would mean considerable added expense.

Since The Brick probably can not be used during summer school, arrangements are now being made to take care in sorority houses and Greene Gables of women attending the Ceramic summer session, taking courses in the inter-session, or attending the regular summer school. This involves, of course, the retaining of heads of houses and special supervision.

It is hoped that it will be possible to make such adjustments for the coming year that the standards of living now so satisfactory to parents and students may be maintained.

REPORT OF THE DIRECTOR OF THE GRADUATE DIVISION									

COLLEGE OF LIBERAL ARTS

(Excerpts)

The rather obvious causes responsible for reducing our enrollment in the Graduate Division and in Extension to a record minimum are, in part, the armed forces, in part, the financial and patriotic lure of the industries, but, mainly, the variety of restrictions on the use of the automobile.

t Mosty Army Air Cops

GRADUATE DIVISION, DIRECTOR'S REPORT

Gourdes Offered First Semester: Education 161 (4 students), Joseph Seidlin; English 21 (1 student), Lelia E. Tupper; Beginning Spanish (Extension, 11 students), Intermediate Spanish (Extension, 9 students), Elbert W. Ringo.

Courses Offered Second Semester: Education 151 (3 students), Joseph Seidlin; Education 201 (2 students), Education 117 (1 student), Harold O. Boraas; English 22 (1 student), Lelia E. Tupper; Beginning Spanish (Extension, 7 students), Intermediate Spanish (Extension, 6 students), Elbert W. Ringo.

Degrees Conferred June. 1942: Master of Education, 4; Master of Arts, 2. Candidates for Degrees, May, 1943: Master of Education, 2; Master of Arts, 1 (probable).

Activities

The activities of the library since we assumed responsibility on January 1 have been largely concerned with the study of library problems and the making of changes which, we hope, will increase the efficiency of the service we attempt to render the University and the community. Among these changes are the following:

ED YEAR BOCK, 1042-43

A. Charging system

The system of charging out books has been changed from the single to the double charge, enabling us quickly to locate a book that is out.

B. Reserved Books

Reserved books have been labeled to distinguish them as reserved books, and a charging system different from the home withdrawal system was instituted so there is no confusion between reserved book charges and regular charges.

C. Cataloging procedures

We have formulated a standard form by which all new books are now being catalogued, and as time permits we shall attempt to make all the cards conform.

The book numbers in use are inadequate for a collection the size of ours, and do not enable us to have a different call number for each individual book, so we are cataloging all new books by the Cutter 3figure system, which means that each book will have a distinguished number. This we shall extend to all the old books as rapidly as time permits.

D. Shelving

How books are shelved means much in the efficiency of our service, as well as in the convenience of patrons. To improve both of these we have begun a reshelving program which is designed to bring together in one place all books of like nature. We have therefore emptied the attic shelves of books and are using them exclusively for bound periodicals. All books will be shelved on the main floor and in the stack room, except history books, all of which will be shelved in the history seminar room. We are now in the midst of this program, which we hope to complete by early summer.

The congested condition of the library was somewhat relieved during the past year by the removal of several hundred rarely used volumes to a "library annex" room in South Hall. Some shelving has recently been provided for this room, and it is hoped that more may be built soon to care for additional volumes which should be removed from the central library.

E. New records

New records that have been instituted include the following:

1. A card file of books on order and received, giving complete bibliographic, ordering, and cost information for each book.

2. An authority file, establishing an accepted and authoritative form for each author's name and dates to be used on all shelf list and catalog cards, and indicating the authority used.

REPORT OF THE LIBRARIAN

3. A card file of unpaid overdue charges, keeping each patron's total indebtedness constantly in one place. These cards give complete history of each case: the book, the date due, the date returned, and the amount due, thus enabling us to give an intelligent answer when the patron asks, "What's the fine for?"

4. A record is also now being kept of all monies received on overdue charges and all disbursements from this fund.

The Library Committee

In January the President appointed a committee from the faculty to act with the librarian in an advisory capacity and as a sort of "go-between" between the library and the faculty. An organization meeting was held on February 1, since which time several meetings have been held under the direction of Dean Whitford, the chairman, and a number of helpful suggestions have resulted from the open discussions.

Faculty Cooperation

The librarian feels himself greatly indebted to both the administrative and teaching staffs for the assistance they have rendered him in getting established at Alfred, and for the gratifying cooperation they have given him in carrying out his plans for bettering the library service. And too, he feels especially indebted to the Acting Librarian, Mrs. H. O. Burdick, and the Assistant Librarian, Miss Anna May Ryno, for the invaluable assistance they have given.

REPORT OF THE DIRECTOR OF RELIGIOUS ACTIVITIES

(Excerpts)

The University Chapel

The Chapel congregations this year have reflected the general situation in size and mood. Attendance has fluctuated widely, with a range from 15 to 150. The average congregation first term was 60, while that for the second term, reflecting the reduced enrollment, was just about 30.

The Chapel services in spirit and content were quite helpful.

During the second term each Tuesday's service was devoted to the theme, "How We Got Our Denominations". The growth of the church up to the time of the Reformation was presented in four services. Following this, the origins and contributions of some of the larger denominations were discussed: Episcopal, Rev. G. R. Morrell, Hornell; Baptist, Rev. E. T. Harris, Alfred; Presbyterian, Rev. W. W.

McCall, Hornell; Methodist, Rev. Guy Ovenshire, Wellsville; Denominational Cooperation, Dean A. J. C» Bond, Alfred.

The University Church

The University Church celebrated its twentieth anniversary as an organized congregation on September 24, 1942. The occasion was marked by a supper with over 125 in attendance. The growth of the church and its various departments were reviewed in a series of brief speeches. The address of the evening was brought by Dr. A. J. Elliott of Chicago.

The Church has continued the support of our war refugee, John Clewley, in England, through the Foster Parents' Plan for War Children. The children of our Church School and the members of our Womens' Guild have united with the Church in the generous support of this project.

The Church School, under the direction of Mrs. Nease, has had a successful year. Eight of our University students have carried regular assignments of teaching or other leadership in the school throughout the year.

The Women's Guild, under the presidency of Mrs. Mord Corsaw, has developed a number of working committees and carried through an excellent program at each of their monthly meetings. The theme was "Our Christian Heritage" and there were discussions of art, music, worship and the other elements of our heritage.

The Choir, under the direction of Mrs. Scholes, with Mrs. Ada Becker Seidlin as Organist, has continued its fine work despite the pressure of our accelerated program. The Candlelight Carol Service seemed more beautiful than ever in these times of war.

The Executive Committee, with Dr. S. R. Scholes as Chairman, performed its duties faithfully.

The Alfred Christian Fellowship

The Alfred Christian Fellowship, continuing the merger of the Y. W.C.A. and the A.U.C.A., developed its program and organization, along the lines described in detail in my last report. Despite a fluctuating membership, we can count sixty students who committed themselves to the purpose of the organization, and made a contribution to the budget. A far larger number participated in the program of organization. In fact, it may fairly be said that practically every student on the campus has been touched at sometime during the year by the program of the Fellowship.

Special Assignments

During the year certain special assignments were made to the Chaplain which included: Relocation of Japanese-American Students:

DIRECTOR OF RELIGIOUS ACTIVITIES REPORT

The Chaplain was designated as liaison person to the National Japanese American Student Relocation Council. With the complete cooperation of the University Administration, the Board of National Missions of the Presbyterian Church, the Macedon Center Methodist Church, and of Mr. Norman Whitney, an Alfred Alumnus, we have been successful in relocating two students, Mr. Henry Nakamura of Seattle, Washington, and Mr. Yutaka Kobayashi of San Francisco, California. These men have been cordially received on the campus, and are proving themselves good students, and fine representatives of the great group of American-born citizens who have been dislocated by the war.

The Campus Community Chest: In January, at the request of the Student Senate, the Chaplain became the Chairman of the Executive Committee of the Campus Community Chest. The task laid upon this Committee was to hold one drive for the various relief funds which have heretofore solicited the students and faculty. With the excellent cooperation of many individuals and campus groups, the Chest exceeded its \$1500 goal. The following disbursements have already been made: The American Red Cross, \$900; The United Service Organizations, \$100; and the World Student Service Fund, \$300. The balance of the fund has not yet been disbursed by the committee.

Publicity: During the year the Chaplain has been asked to become Assistant in the Publicity Department, with special responsibility for issuing the personal items about our students to the press.

Sociology: At intervals throughout the year the Chaplain has assisted in the Department of Sociology, and has been standing by to substitute in that department if and when Dr. Warren is called to the service.

GENERAL

During the year the Chaplain has been invited to assist in the leadership of religious conferences on the following campuses: Colgate, Cornell, Rochester, and St. Lawrence. He was able to participate in all except the last, which occurred during Holy Week. Other speaking engagements have taken him to Hornell, Wellsville, Westfield, and other nearby towns. During the year he has endeavored to serve the community as Scoutmaster, which responsibility has now been relinquished to one of the high-school faculty because of the special assignments mentioned above.

Mrs. Genne and I are glad that we are able to use our home as an integral part of our work with the students. During the year we served approximately 266 meals at our table, and entertained over 150 other callers.. In connection with our program we entertained overnight guests on 26 nights.

Review and Preview

An examination of the total program administered through this office, we believe, will reveal an attempt to face squarely the religious and moral nature of the many problems facing our day, and to bring to the solution of those problems the best insights and resources of our Christian faith. We have also endeavored to provide practical projects through which to express this Faith. As we face the future, we stand firm in the belief that the Christian college is one of the bulwarks of our culture. Whatever adaptations we make should be in accord with this conviction.

This office, and also the Executive Committee of the University Church, is already planning to continue to function throughout the summer. As soon as the situation on the campus becomes clarified, we shall be eager to develop the specifics of a program which will make available to all students on the campus the fellowship, help, and inspiration of our various religious organizations.

REPORT OF THE DEAN, SCHOOL OF THEOLOGY

(Excerpts)

In presenting to you, and to the Board of Managers, my eighth annual report of the School of Theology of Alfred University, I desire first of all to express to you Mr. President, my appreciation for your sympathetic and understanding support throughout the eight years of my connection with the School. I wish further to record here my gratitude to you for your special service to the School this year in interpreting to those concerned its spirit and aims, and its organizational setup, both with reference to Alfred University and to the Seventh Day Baptist Denomination. I am sure your brief account of the history of the School of Theology, prepared for the Commission of the Seventh Day Baptist General Conference, rendered a real service in clearing up misunderstandings, and has resulted in bringing about a greater unity among our people in their thought concerning the School and in their support.

The New Board of Managers

I appreciate the fact that the Board of Managers has been enlarged, thus making possible a wider representation of both University and denominational interests. The Board as now constituted consists of the following persons: J. Nelson Norwood, Burton B. Crandall, Orra S. Rogers, Howard M. Barber and Samuel Crandall, trustees of Alfred University and Rev. Jay W. Crofoot, J. Fred Whitford, Rev. Everett T. Harris and Rev. Elmo F. Randolph, directly representing

SCHOOL OF THEOLOGY, DEAN'S REPORT

the denomination. We welcome the new members to the Board and we seek, and will always welcome, their counsel and advice.

Faculty

The faculty remains the same as last year, with the exception that we have this year accepted the offer of Rev. Sylvester S. Powell, A.M., B.D., to give instruction in Old Testament Hebrew. Two students have taken work with him. Three students have taken New Testament Greek with the Professor of Greek in the College of Liberal Arts. The other teachers, besides the Dean who carries a full teaching load, are Dr. Edgar D. Van Horn, and Dr. Walter L. Greene, both on part time, and Dr. George B. Shaw, Dr. Ben R. Crandall and Rev. Elmo F. Randolph, B.D., each of whom gives one course on a voluntary basis. Altogether this gives our students who take the Biblical languages contacts with eight different professors. In addition to these men, the Assistant Professor of Speech and Dramatic Production of the College of Liberal Arts has met with the class in homiletics, giving valuable criticism to the students in sermon delivery, and Rev. Everett T. Harris, B.D., has met with the class in Pastoral Theology.

Students

Eight students have been enrolled during the year. Six of these are college graduates. Two of these will be graduated with the B.D. degree this spring. Two are completing the second year, and two the first year of the course. The other two students have completed three years of their college work and are planning to finish both college and seminary courses.

The students belong to the Atlantic Area of the Conference of Theological Students. Two students attended the annual meeting of the Conference in Lancaster, Pa., last fall, and one was made a member of the executive committee.

Finances

It will be remembered that the askings of the School of Theology from the denominational budget were reduced by vote of Conference at Denver in 1941. We are happy to report that the full amount asked for was restored to the budget in 1942, thus relieving us of considerable distress.

I would recommend that the Board of Managers ask the Seventh Day Baptist Board of Christian Education to include in its askings again this year the usual amount, \$2000, for the School of Theology.

An Appraisal

The last item of my report last year was headed "Pending Appraisal". An appraisal of the School of Theology was made by the

Commission of the Seventh Day Baptist General Conference, and its findings were presented to the Conference last August and adopted by that body. The *Sabbath Recorder* of January 11, 1943, carried a supplement which included this report of the Commission. This supplement embraced pictures of the Gothic, of the faculty members, and of the students of the School, also excerpts from my report to you of last year, the account of the history of the School of Theology by President Norwood, referred to earlier in this report, and a brief article titled "Our Seminary", by the editor of the *Sabbath Recorder*.

It seems appropriate to close this report with paragraphs from the findings of the Commission, which were given the sanction of the Conference last year at Salem.

"That our School of Theology is effectively and efficiently fulfi ling its mission is evidenced by the successful work being carried on by the young men who have been trained in that school. In view of this evidence the teaching force is satisfactorily carrying the task which is theirs.

"Certain scholastic standards must be maintained and certain financial requirements must be met in order for our School of Theology to be recognized as a standard school. The present salaries paid are practically minimum, the salary of the dean being not above salaries of our better paid pastors when house rent has been deducted.

"A school of our own for training our young men for ministry in our churches and missions is a necessity. Rev. T. R. Williams, in the *Jubilee Papers*, published fifty years ago said, 'There is a natural motherhood about a denominational college or theological school for which it is impossible to find a natural substitute.' The wholesome, cordial, fraternal, relationships existing among men who have had the opportunity of the three years together in our seminary is a binding force of inestimable value to the Seventh Day Baptist denomination.

"Therefore this committee is in agreement that the School of Theology is a department of Alfred University and enjoys all the advantages of the university. It is housed in a building provided and heated by the university. At present about two thirds of the expense of maintenance is cared for by the university and income from endowments specially designated for its purpose. The school is de°erv:ng of our moral support, and the denomination should increase its financial support of our school."

REPORT OF THE DIRECTOR OF THE BUREAU OF APPOINTMENTS, COLLEGE OF LIBERAL ARTS

(In full)

To the President of Alfred University:

I hereby submit my annual report as Director of the Bureau of Appointments for the year 1942-1943.

In the Class of 1943, there are thirteen seniors preparing for teach-

BUREAU OP APPOINTMENTS, DIRECTOR'S REPORT 39

ing. The disposition of the class, as of April 15, is as follows: 7 have signed contracts, 1 has entered medical school, 1 has been inducted into the Army, 1 is entering graduate school, 1 is about to enter one of the non-combatant branches of the services, 1 contract is pending, 1 is about to be inducted into the Army.

As usual, we do not have complete information with reference to the promotions and advancements of our alumni. So far as we know, all those who had not been employed have contracts for next year, and all but two or three of those who signified their intention of leaving their present jobs, have been placed in "better" jobs. There is a shortage of teachers, so that for four out of every five requests, we have no candidates to recommend, and the best we can do is to write pleasant letters of condolence.

Much of our business this year has been transacted through longdistance telephone calls, most of them, naturally, coming to us. Probably for the first time in the history of the Bureau of Appointments at Alfred, it has been literally deluged by requests for teachers, from every county in the State. It would be rather difficult to estimate the general rise in teachers' salaries. For the beginning teachers we have placed, the salary range is \$1300 to \$1600. For experienced teachers many schools have raised their salary scales and maximum anywhere from \$200 to \$1000.

> Respectfully submitted, JOSEPH SEIDLIN

REPORT OF COUNSELOR TO PROSPECTIVE STUDENTS

(Excerpts)

1. After a year including such innovations as extensive high-school visiting and on-campus programs for visiting students, this season's work is decidedly unspectacular.

2. Working officially in another capacity, the Counselor has undertaken several projects of potential bearing upon enrollment, but to date these have been largely abortive except as they may have tended to keep in college students already matriculated.

3. Figures on applications to date are substantially equivalent to those of last year at this time.

4. If the University is not to rely upon the Army for its principal subsistence, strenuous efforts both internally and externally seem to be imperative.

The program of guest-days and similar events that was developing in recent years has been suspended for 1943. It should, however, be revived and expanded at the earliest possible moment.

In this general connection, the Counselor feels that he cannot urge too strongly the provision of really acceptable lodging and dining facilities for visitors, for he is convinced that such accommodations, even if operated at a loss, would pay important dividends in terms of general good-will, financial contributions, and enrollments.

The office has continued affiliation with two agencies, The School and College Advisory Center and The American Schools and Colleges Association, though because of various dissatisfactions, arrangements with the former have been altered. As formerly, the A.S.C.A. works on a flat fee without guarantee of enrollment. But, whereas the S.C. A.C. formerly worked on a flat fee guaranteeing five enrollments, it is now on an individual fee basis, payable partly after original registration and partly after registration in the two succeeding semesters. Certain advantages appear in this plan, though whether it will finally prove satisfactory still remains to be seen.

While neither in inception nor program was the War Adaptations Committee officially related to the Prospective Student office, there has been so much connection between the two that certain phases of the Committee's work seem to require mention here.

The time and effort that the W.A.C. Chairman has devoted to the Committee has been to some extent stolen from his Prospective Student work, and the office staff has frequently devoted considerable time to Committee studies and correspondence. Likewise, since there was no budget for the Committee, its expenses have been largely absorbed in the Prospective Student account, which thus shows larger expenditures than would otherwise be the case.

While the Committee has avowed broader purposes, most of its efforts have related to enrollment. In this connection they have been of two sorts: conservation of present enrollment and encouragement of new. The former were, according to the Registrar, who was not a member of the Committee, successful to the extent of perhaps 20 enrollments for the second semester 1942-43.

Such other morale value as the Committee's efforts may have had is not a subject for this report, but, so far as new enrollments are concerned, results to date are not very impressive. The Chairman believes that the bulk of the Committee has substantially agreed with him in his various efforts, but, since there was divergence of opinion, what follows is offered only as from the Chairman-Counselor rather than from the Committee.

The principal efforts related to new enrollment, together with observations upon the present degree of their accomplishments, are:

1. Liberalization of entrance and curricular requirements of the College of Ceramics. This was officially accomplished and was

REPORT OF THE COUNSELOR TO PROSPECTIVE STUDENTS 41

publicized in a folder written by the Chairman and approved by all appropriate officers. Some indication of its success is the fact that, whereas girls in ceramic engineering have been exceedingly rare in the past, they constitute 3 of the 7 persons thus far accepted finally or pending graduation.

2. Revision of the calendar and of course offerings to facilitate the entrance of new students at times other than September. The first suggestion of success was the abortive March 1 sequence, which was finally sanctioned and publicized so late as to give it only the slimmest prospect of success. At the moment a new enterprise of this sort is in the making: the admission of new students on July 5.

3. Revision of schedule to foster acceleration and to encourage the matriculation or continued enrollment of boys who have little time for college study before induction.

The plan has its obvious problems, but the Chairman-Counselor still regards it as very much worthwhile, as essential to the execution of short-term concentrations for war-time purposes, and as the likeliest inducement that can be offered to boys graduating from high school to get in some college work, even if for only a year or part of a year. It is urged that hospitably serious consideration be given to this proposal.

4. Expansion of curricular offerings in the direction of specific preparation in war-needed fields. Aside from miscellaneous "war courses", outstanding possibilities in this field are nursing, occupational therapy, laboratory technology, secretarial work and summer refresher work for teachers. All such projects are, of course, hampered by uncertainty, especially as to the Army's prospective use of the University, and some involve problems of added cost.

As to enrollment of regular students for the duration, there is no need to enumerate here the reasons for the pessimism that is evident in earlier sections of this report. It may, however, be appropriate to offer some observations on future action, not only from the Counselor, as such, but from him as chairman of the War Adaptations Committee.

The fundamental question is one of general University policy, the determination of which is, of course, seriously handicapped by uncertainty as to Army plans: For its healthy operation if not its mere survival, will the University rely primarily upon Army cadets or upon regular students?

If as few as 150 cadets were involved, it would seem possible to maintain a fairly even balance. But if, as seems likely, any contingent will number 250 or more, housing facilities and the resources of certain key departments will be so largely devoted to this purpose that the program for regular students must become definitely secondary, and perhaps fragmentary.

In this event it would seem appropriate for the Prospective Student office to discard any special efforts and to confirm its work to the routine of handling such diminished inquiries as come to it.

On the other hand, if the University is to depend primarily upon regular students, or even if it is to maintain a fair balance between these and cadets, energetic efforts in considerable variety seem to be imperative.

Without criticism, it may be fairly observed that Alfred is traditionally very modest, and that, while recent years have seen considerable intensification of its public relations efforts, they are still of a relatively casual character. Faced with a need for replacing at least half its normal clientele (two-thirds of its students are normally men) in the midst of terrific competition not only from other colleges but from industrial, military, governmental, and social agencies, Alfred would have to initiate what would be, for it, a revolutionary program of public relations. This would seem to include at least:

1. A full-time field representative to visit high schools and interview prospective students.

2. A greatly intensified advertising program involving several new publications and added office staff to keep a fairly steady stream of brochures, letters, posters, and folders going to high schools and individual candidates.

3. A full-time publicity man to create these new publications, supervise their distribution, and get news articles into papers.

Again without criticism it may be observed that Alfred, like most socially established institutions, is not typically revolutionary. While this characteristic is common and usually desirable, it may not provide the promptness of adaptation required in emergencies.

REPORT OF THE DIRECTOR OF THE SUMMER SCHOOL

(Excerpts)

The 1942 Sessions were the first for which I had full responsibility following my appointment to the Directorship in September, 1941. The wise administration of Dr. Waldo A. Titsworth, who served as Director over a period of many years, resulted in the laying of firm foundations and made the change in administration a comparatively simple one. I am extremely grateful to Doctor Titsworth for his counsel and advice on Summer School problems which have helped me to avoid many pitfalls.

I believe it may be said that the 1942 Sessions were very successful. The demands and opportunities of the war effort resulted in a somewhat reduced enrollment but this was anticipated. In spite of

REPORT OF THE DIRECTOR OF THE SUMMER SCHOOL 43

the reduction in enrollment careful planning made it possible for us to realize a substantial profit. The first task which I undertook upon assuming office was to study course offerings for the immediately preceding ten-year period in the light of enrollment and income. This study clearly indicated the necessity of eliminating, completely, summer work in some departments and reducing offerings in others. A reorganization of the Summer School curriculum was, therefore, undertaken. Not only did this reorganization involve actual course offerings but it made necessary to some extent changes in faculty personnel. A further step was taken in reorganizing the faculty salary scale thus eliminating problems at this point.

The work of the Summer School was as usual divided between the Intersession of three weeks and the Regular Session of six weeks. A wide variety of courses provided opportunities .for undergraduates, graduates and artists. Several regular session students returned for summer work in order to accelerate their program. The work in pottery, sculpture and drawing attracted a considerable number of artists and teachers of art. Finally the graduate program in education brought a group of teachers seeking the master's degree as a means of professional advancement. In 1942 as in previous years, graduate courses in public school administration, public school finance and mental hygiene were offered by visiting instructors.

REPORT OF THE DIRECTOR OF PHYSICAL EDUCATION AND ATHLETICS FOR MEN

(Excerpts)

A continuation of the new program in Physical Education was carried on. All men students were required to take three hours per week.

First Semester: Students in classes, 294. Activities—Cross country, touch football, soccer, softball, tennis, calisthenics, running, apparatus, wrestling, boxing, volley ball, basketball, tumbling.

Second Semester: Students in classes, 242. Activities—Calisthenics, distance running, sprinting, apparatus, wrestling, boxing, judo, volley ball, basketball, games, contests, and relays, track, tennis softball, fencing, military track.

Intramural and Interclass Athletics

Activities. Touch football, basketball, fencing, softball, tennis, track, badminton, archery, and volley ball. Approximate number of different individuals competing, 400 (this includes the Agricultural and Technical Institute students).

Summary of Intercollegiate Athletics

The varsity and freshman intercollegiate program was greatly reduced during the 1942-43 season. Cross country, basketball, and track were the only sports placed on a competitive basis. The one-year freshman rule was discontinued for the duration of the war. Freshmen, therefore, competed on the varsity teams. Total participants in intercollegiate sports, 81; approximate number without duplication, 75; total number of dual contests, 20; won, 4; lost, 16; percentage, .200; total number of championship contests, 6.

Championship Contests: I.C.4-A. Cross Country Championships, New York City: two men competed, one man in the varsity and one man in the freshman contest. M.A.S.C.A.A. Cross Country Championships: Alfred placed fifth, nine schools competed. I.C.4-A. Indoor Track Championships at New York City: three men competed. One man tied third in pole vault, one man qualified for the semi-final heat in the dashes. Penn Relay Carnival, Philadelphia; one man participated. M.A.S.C.A.A. Track Championships at Lehigh University: two men competed. I.C.4-A. Outdoor Track Championships at New York City: one man competed.

Conferences: Alfred University was represented at the following conferences: I.C.4-A Fall Meeting, New York City, Hotel Biltmore; I. C.4-A Mid-winter Conference, New York City; Executive Committee Meeting and Annual Meeting of M.A.S.C.A.A., Philadelphia, Pa.; I.C. 4-A Annual Spring Meeting, New York City.

Conclusion

The emphasis this past year definitely has been placed on the Physical Education Program. All of the men students have been required to take at least three hours per week of regular class work. The students have entered into the spirit of the program with seriousness that has not been observed any previous year. The physical condition of the average student has been greatly improved, and their skills have been developed to the extent that they are well prepared to enter the armed services. The program as presented in this report will undoubtedly be followed next year. It is very doubtful, however, that it will be possible to conduct any kind of an intercollegiate program.

The activities of the two men in the Department have been centered around the class program. This has been due to the fact that the intercollegiate schedule was greatly reduced.

DIRECTOR OF PHYSICAL EDUCATION REPORT

REPORT OF THE DIRECTOR OF PHYSICAL EDUCATION FOR WOMEN

(Excerpts)

Physical Education Class Work: All girls enrolled in classes three times a week. 180, first semester; 165, second semester.

Women's Athletic Association Activities: (sponsored by the twelve governing board members): Archery, 5 tournaments; badminton, 5 tournaments; basketball, interclass tournament, intramural tournament; fencing, 2 tournaments; field hockey, interclass tournament; skiing, 9 girls requested W.A.A. credit for from 3-14 hours each; softball, interclass games; table tennis, series of monthly tournaments; tennis, fall and spring tournament; volley ball, interclass tournament.

A very interesting Wednesday night folk dance session was held during a part of March and April.

REPORT OF THE UNIVERSITY PHYSICIAN

(In full)

To the President of Alfred University:

The medical services rendered by the University Physician for the college year 1942-1943 (May 15, 1942-April 14, 1943 inclusive) have been as follows, with fees attached:

Examination of new students and athletes (omitted as was	emer-			
gency measure)				
Office visits at \$1.00, 335 \$	335.00			
Infirmary visits at \$1.00, 361	361.00			
House and Infirmary visits at \$2.00, 58	116.00			
Night calls at \$3.00, 5	15.00			
Minor Surgery and Casts	48.00			
Student X-rays, as per attached list	193.75			
¢	1.068.75			
	1,068.75			
Total guarantee for medical service \$	1,000.00			
Excess cost for the year above guarantee \$	68.75			
Respectfully submitted,

REPORT OF THE SUPERINTENDENT OF THE CLAWSON INFIRMARY

(In full)

To the President of Alfred University:

The sixteenth annual report of the Ciawson Infirmary is presented as follows:

Summary

526 Students called at Infirmary

- 6,313 Student office calls
- 158 Student bed patients
- 567 Days beds occupied by students
- 33 Students transferred to hospital or home
- 124 Student X-rays
- 3 Contagious diseases
- 45 Heart and lung examinations

Students of the Colleges and School of Theology

- 447 Students called at Infirmary
- 5,455 Student office calls
- 142 Student bed patients
- 520 Days beds occupied by students
- 29 Students transferred to hospital or home for treatment or operative care
- 122 Student X-rays
- 2 Contagious diseases
- 45 Heart and lung examinations for physical education
- There were no physical examinations given on entrance due to war conditions.

Students of the Agricultural and Technical Institute

- 79 Students called at Infirmary
- 858 Student office calls
- 16 Student bed patients
- 47 Days beds occupied by students
- 4 Students transferred to hospital or home
- 2 Student X-rays
- 1 Contagious disease
 - Naval Aviation Cadets
- 12 Cadets called at Infirmary
- 21 Days beds occupied by Cadets
 - Faculty and Townspeople
- 30 Office calls
- 6 Bed patients
- 30 Days beds occupied
- 18 X-rays
- Respectfully submitted,

(Mrs.) ALICE C. McDERMOTT, R.N.

Superintendent

ALFRED COOPERATIVE PICTURES REPORT

REPORT OF THE MANAGER AND TREASURER OF THE COOPERATIVE PICTURES

(Excerpts)

No new equipment has been added and only very minor repairs have been undertaken this year. Admission price has remained at twenty-five cents. In spite of fewer students, gasoline rationing, and rising taxes, the enterprise has actually done a little better this college year and has been able to pay off some of its debts. Transportation difficulties are causing some worries in film arrivals. In close cooperation with the Government we have been running all Federal short subjects and helping in all drives sponsored by it. The Cooperative Pictures accomplished their purpose in providing desirable entertainment as well as other services to the students, thereby making it unnecessary for them to seek entertainment in less desirable surroundings.

REPORT OF THE NEW YORK STATE AGRICULTURAL AND TECHNICAL INSTITUTE

(Excerpts)

As in all other institutions, the war is creating a considerable problem of training, necessitating a change from regular to emergency programs which will aid in the war effort. The programs in operation in the school during the 1943-1944 period will very little resemble the programs of the 1941-1942 period.

Enrollment

It is anticipated during the coming year that this will drop to 150 or even less. However, to offset this, a considerable number of emergency training programs are being carried on. These include work in radio, machine shop, electricity, welding, etc. In addition, special training programs for girls in certain specialized fields are being offered which should keep some departments in full operation. These are briefly as follows: *Floriculture:* The training of girls to relieve men in the production, distribution and sale of florists' products. *Electricity:* The training of girls particularly for the Rome Air Depot in the electrical field. These girls are placed on Civil Service at the

AGRICULTURAL AND TECHNICAL INSTITUTE REPORT 49

beginning of their training and are paid at the rate of sixty cents per hour while in training. Following this, they go to the Rome Air Depot as electrical technicians. *Laboratory workers:* A training program has been worked out with the Strong Memorial Hospital, in which the girls spend twelve months in preparation as laboratory workers. Of this time, six months are to be spent at Alfred in bacteriology and laboratory study. The remaining six months are spent at the Strong Memorial Hospital where the trainee will be rotated through a minimum of three laboratories. This gives them both theoretical and practical experience in laboratory work. At the conclusion of their training there, they will be sent either to county health laboratories or serve as medical technicians in doctors' offices.

Other emerengency courses: The regular war training courses that have been conducted for the last three years are continuing in operation with reasonably full enrollment. These include the training of radio technicians in nine centers ouside of Alfred: Jamestown, Salamanca, Olean, Wellsville, Hornell, Bath, Corning, Dansville, and Penn Yan. Enrolled in these groups are some two hundred Signal Corps Reservists who upon completion of their training will go directly to Fort Monmouth for special advanced training. A total of 427 trainees is enrolled in this program. Four courses for college women are being carried on in the fields of drafting and electricity. These are being conducted at Keuka, Elmira, Houghton, and Alfred, for college juniors and seniors who wish training in this field. A total of 114 women is enrolled in this program. The total enrollment for the year, July 1, 1942, to April 8, 1943, in all programs was 1309. This was for training in courses varying in length from three months to a year. In addition, many one-and two-week courses fur special groups were offered but are not included in this total.

Buildings and Grounds

No new construction was started during the year or is it planned to start any during the coming year. Plans are being drawn, however, for a post-war building which will include several additional buildings for the Institute. These include a new laboratory building for which funds have been set aside to the amount of \$315,000. Also planned is a combination auditorium - gymnasium and a new home economics unit to care for approximately 150 girls. This will include a main home economics building which will include a cafeteria and student commons, and a home economics practice house which will be located off the campus where girls live for short periods of time for home management practice. There will also be a farm shop located at the farm where all of the farm machinery program will be carried on. This program, if completed, should provide a satisfactory

unit for the Institute and to provide facilities for approximately 650 students. Tied in with this is a proposed dormitory system. Whether or not this would be available at the same time, will depend upon the amount of public building that will be necessary after the war to maintain full employment.

Emergency War Programs

Food Production. The Institute is devoting much of its resources to the production of food in aiding the war effort. This effort is pointed in two directions. First, the utilization of the staff in the various programs throughout the western New York area in the training of city youth for farm work, the supervision of the high school farm cadet program, the operation of the Victory garden program under the State Defense Council and extension activities in 16 western New York counties. This is utilizing the efforts of roughly threefourths of the agriculture faculty. In addition, every effort is being made to expand the production of the farm to its fullest capacity. This includes an increase in the livestock, the production of between 150 to 200 pigs and hogs, a very great expansion of the vegetable gardening activities and the anticipated fattening of a considerable herd of beef cattle during the coming winter months.

Second, farm labor. A rather interesting program has been worked out with the United States Employment Service and the Farm Security Administration in the training and placement of out-of-state farm workers, mainly from the State of Kentucky. The Farm Security Administration has recruited the workers and provided transportation and maintenance while at Alfred. The school has provided the instruction and the United States Employment Service has been responsible for their placement. To date, roughly 150 have been transported, trained and placed and the bulk of their families brought to the state. It is anticipated that this will continue throughout the year or as long as the supply of workers is available from the surplus area. In general, the program has proved very satisfactory. The men are working out very well on the farms and it has been a distinct rehabilitation service for the under-privileged group who come from the Kentucky hills.

Naval Air Cadets: During the past three years, in cooperation with the Civil Aeronautics Administration, a pilot training program has been maintained on the campus, with the flight training being carried out at the Hornell Municipal Airport. Starting in August 1942, this program was changed to the training of enlisted Naval pilots who were sent to us by the Navy. This program has now been expanded and moved to Dansville where increased housing and airport facilities are available. Also, the program has been changed to an advanced

AGRICULTURAL AND TECHNICAL INSTITUTE REPORT 51

flying stage; and the pilots who will be future officers, instead of coming directly to the school from their homes will come from flight preparatory schools, for the most part from Colgate and R.P.L Advanced training in both flight and the ground school work including Navigation, Aereology, physical training and similar subjects, all will be given at Dansville. A permanent staff will be located there and will be operated under the supervision of Naval officers. A quota of 150 fliers per session or approximately 1,000 per year has been allocated to us for training.

What the coming year will bring is difficult to anticipate, but it is expected that a continued expansion of all programs contributing to the war effort will be made. While the number of regular students will be reduced, this should be more than made up by the development and expansion of other activities. For example, we have been recently approached by the Signal Corps with reference to special training for groups of from 100 to 200 for that branch of the service. This, with other programs, will operate the Institute at greater capacity than ever before.

DEGREES CONFERRED IN COURSE

HONORARY DEGREES

Doctor of Science Willis Haviland Carrier* Allen Percival Green Daniel Everett Willard

Doctor of Laws Charles Potter Rogers

Doctor of Humane Letters George Dinsmore Stoddard

WILLIS HAVILAND CARRIER presented by Professor Charles R. Amberg.

It gives me the greatest of pleasure to have the privilege of recommending one, who in following his chosen profession of mechanical engineering, has contributed so much to the basic sciences on which all engineering, including my own field, depends.

Born in Angola, N. Y., on November 26, 1876, of parents descended from English and French families, his primary and secondary education was secured in the schools of Erie County, N. Y. Upon graduation from Buffalo Central High School, he entered Cornell University, from which he was graduated in 1901. He was employed as a Research Engineer by the Buffalo Forge Co. of Buffalo, N. Y., where he made himself so useful as to become Chief Engineer by 1906. In 1915, with a group of others, he founded the Carrier Engineering Corporation of which he was given the presidency.

His researches on the control of the temperature, humidity and movement of air, have become the standard formulae and tables of the present-day engineer. His mechanical inventions in this field have laid the foundation of the present science of air conditioning. Through his developments in this science hundreds of industries have been benefited and the economic location of manufacturing plants has been made possible without regard to climate, for he has made climate controllable within the plant. He has even brought the advantages and comforts of a controlled climate within the reach of the average household. His services to humanity through technological developments are manifold.

He has served on important committees for engineering societies, acted as President of the American Society of Heating and Ventilating Engineers, contributed extensively to engineering literature and, as a

* Conferred Founders' Day. Nov. 5, 1942.

HONORARY DEGREES

result, been honored by numerous learned societies, universities and public institutions. In 1941 he was appointed by the Secretary of War to the National Technological Civil Protection Committee.

In honoring him Alfred acquires a distinguished son of international repute.

Mr. President, I present to you as a candidate for the honorary degree of Doctor of Science, Willis Haviland Carrier.

President Norwood said:

Son of Cornell University, scientist, engineer, inventor, celebrated contributor to man's comfort and efficiency through the control of temperature and humidity in his habitations and places of work, thoughtful, constructive critic of educational procedures in the field of your own internationally recognized competence, Alfred University gladly inscribes your name on the select roll of her adopted sons.

Therefore by authority of the Trustees of Alfred University, I admit you, Willis Haviland Carrier to the degree of Doctor of Science, *honoris causa*, in this University, with all the rights, **Divieges** and obligations belonging thereto and in evidence thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

ALLEN PERCIVAL GREEN presented by Dean Major E. Holmes.

Mr. President:

Alfred University, engaged as it is in Ceramic Education through the medium of its Ceramic College, highly prizes its privilege of conferring the honorary degree of Doctor of Science upon individuals who, through the medium of Ceramic Engineering, attain a position of outstanding national distinction. We have as our guest today the twelfth person in the 104 years of Alfred University's existence to win this specific high honor. In accordance with established practice I shall present a record of his career.

He was born at Jefferson City, Missouri, and has spent most of his life in that state. He was educated in the Sedalia, Missouri, High School, Private Tutorial Schools and the University of Missouri School of Mines. After spending several years in General Engineering work in the mid-west, he became a Director and General Sales Manager of the Harbison-Walker Refractories Company of Pittsburgh, Pa. After a term as Vice-President and General Manager of the Evans & Howard Fire Brick Company of St. Louis, Mo., he founded his own company, The A. P. Green Fire Brick Company of Mexico, Mo. He has developed this company into one of the largest and most up-to-date ceramic organizations in the world, at the same time being directly

or indirectly responsible for many of the most important developments in ceramic refractories during the last thirty years. This company has always been his chief interest and it constitutes the foundation or bulwark from which all his other numerous responsibilities have sprung. Some of the highly responsible positions for which he has been drafted are the following:

President, Risher Fire Brick Co., Chicago, 111; President, Metropolitan Fire Brick Co., Brooklyn, N. Y.; President, Bigelow-Liptak Corporation, Detroit, Mich.; Partner, E. J. Bartells Company, Seattle, Wash.; Partner, Economy Arch Company, St. Louis, Mo.; Chairman, Liptak Furnace Arches, Ltd., London, England; President, S. A. Materials Refractories, A. P. Green, Buenos Aires, Argentina; President, A. P. Green Chilena Lt. da Santiago, Chili; President, A. P. Green Fire Brick Co., Toronto, Ont.; Director and member of the Executive Committee, Wabash Railroad; Director and member of the Executive Committee, Ann Arbor Railroad; Director and member of the Executive Committee New Jersey, Illinois and Indiana Railroad; Director and member of the Committee of Railroad Directors Agreement for Commissioner Plan for Railroads west of the Mississippi River: Director of the Mercantile Bank & Trust Co., St. Louis, Mo.; Director of Region 8 Boy Scouts of America, and a Director of the Missouri Y. M. C. A.

He is an elder of the First Presbyterian Church of Mexico, Mo., a Thirty-second degree Mason, and a trustee of the Masonic Association of Missouri.

He is a member of the St. Louis City Club, Noonday Club, and Racquet Club; of the Missouri Athletic Assn., Country Club of Mexico, Mo.; and of the following clubs of Miami Beach, Fla.: Bath Club, Surf Club, Indian Creek Golf Club, Biscayne Bay Yacht Club, Caribbean Club, Miami, Fla., and the Bankers Club of America, New York City.

He is a trustee and Chairman of the Executive Committee of Westminster College, Fulton, Missouri, and is now Chairman of the Board of Visitors of the University of Missouri.

His life is a demonstration of American democracy at work with all of its opportunities and accompanying responsibilities, a democracy that is worth fighting for. His career shows that it is still possible in this democracy of ours for one to start at the bottom and rise to the highest positions in technology and engineering, manufacturing, finance, banking, railroading, education, and that kind of good citizenship that is evidenced by his interest in religious, social, fraternal and philanthropic organizations. Sheer ability alone would not suffice for achievements of such magnitude. Character of highest type is implied.

HONORARY DEGREES

In 1935 his home town folks of Mexico, Mo., devoted a day to celebrating the 25th anniversary of his coming to Mexico and starting his company. That shows what the people who know him best think of him as a man and a citizen. Recently his company was awarded the coveted Maritime "M" for distinguished service to the nation in its war effort. His is the first and only company of its kind to win this honor. That shows what the United States Government thinks of his patriotic services. Westminster College of Fulton, Mo., has conferred upon him the degree of Doctor of Laws, and the University of Missouri School of Mines and Metallurgy has conferred upon him the degree of Doctor of Engineering. That shows what higher education in the State of Missouri thinks of him. It remains for him to be honored in ceramic circles. The entire superstructure of his achievements and services is built upon the solid rock of ceramics. Success in the ceramic profession made all the other successes possible. As such, he and his career will stand as an everlasting inspiration to young ceramic graduates starting their life work in the ceramic profession. It is fitting, therefore, that there should be added to his other honors one that comes to him through the medium of a ceramic institution.

Mr. President, on behalf of the New York State College of Ceramics, I have the high honor and very special personal pleasure of presenting for the honorary degree of Doctor of Science, our distinguished guest, and my esteemed friend, Allen Percival Green.

President Norwood said:

Giaduate of the University of Missouri School of Mines, engineer, railroad executive, ceramist with large business and technical interests in this country and abroad, president of the A. P. Green Fire Brick Company, community-minded citizen devoting time and talent to your church, to the Boy Scouts and the Young Men's Christian Association of your own state, Alfred University is glad to list you among her adopted sons.

Therefore by authority of the Trustees of Alfred University, acting under the Regents of the University of the State of New York, I admit you, Allen Percival Green, to the degree of Doctor of Science, *honoris causa*, in this University with all the rights, privileges, and obligations thereunto appertaining, and in token thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

DANIEL EVERETT WILLARD presented by Dr. Fred W. Ross. Mr. President:

The man of whom I am about to speak has had a life-long interest in science, especially in geology..

He was born at Nile, New York, and graduated from the Friendship Academy in 1883 without money, but with an inborn determination to go further, hardships notwithstanding.

Accordingly, he entered Alfred University, though he had to walk to Alfred. Modern hitch-hiking was as yet unknown. He was graduated in '88, his study having been interrupted to get funds.

Then, having in the meantime taught in the Albion Academy in Wisconsin, he entered the Graduate School of Geology of the Univerersity of Chicago, where he studied three years under the famous Professor Chamberlain, a privilege which few living geologists can claim.

For the next eight years he taught Natural Sciences in the State Teachers' College of Mayville, North Dakota. Then he was elected as the Professor of Geology in the State Agricultural College of Fargo, North Dakota, one of his duties being that of director of the State Agricultural and Geological Survey.

In all of his work there had been more or less difficulty in getting funds to carry on. But now a proposition was offered which would be free from financial restrictions, namely, that of Development Commissioner of the Northern Pacific Railroad. This position he accepted, though reluctantly, in 1910, and now the vast territory from Minnesota to the Pacific Ocean was at his disposal for geological and economic study. Thenceforth "Applied Geology as Fundamental to the Great Industry of Agriculture" was the theme of his labors with the Northern Pacific and the Great Northern Railroads until his retirement in 1935.

He is a Fellow of the American Association for the Advancement of Science, and a Fellow of the American Geographical Society. Among his writings are: United States Government Folios and State Papers, also several books including: *The Story of The Praries; The Story of The North Star State, Minnesota; Montana: The Geological Story;* and finally, *Adventures In Scenery,* in which the scenery and geology of California are beautifully and effectively set forth.

Mr. President: It gives me pleasure to present for the honorary degree of Doctor of Science, Daniel Everett Willard.

President Norwood said:

Son of Alfred, able scientific delver into the dark secrets of rocks and fossils, life-long participant in the development of the great resources of the Middle and Far Northwest, author through the years, of many scientific and popular works, friend of and collaborator with famous railroad builders of that area, your Alma Mater welcomes your return to these familiar halls and gladly clothes you with this symbol of her pride in your achievements.

Therefore by authority of the Trustees of Alfred University, acting under the Regents of the University of the State of New York, I

HONORARY DEGREES

admit you, Daniel Everett Willard, to the degree of Doctor of Science, *honoris causa*, in this University with all the rights, privileges, and obligations thereunto appertaining, and in token thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

CHARLES POTTER ROGERS presented by Dean Alfred E. Whitford.

Mr. President:

It is a pleasure and an honor to present for an honorary degree a worthy son of Alfred. Born in New Jersey, the son of a clergyman, he received his elementary and secondary school education in Wisconsin where his father served as pastor. He entered Alfred University in 1884, earned the degree of Bachelor of Arts in 1888, and six years later received from his Alma Mater the degree of Master of Arts. For three years after his graduation he was employed in the offices of the Charles Potter and Company printing press works of Plainfield, New Jersey. Then he took up the study of law in the New York Law School of New York City and two years later was graduated with the degree of Bachelor of Laws and was admitted to the bar and licensed to practice in all the courts of the State of New York. He will celebrate the fiftieth anniversary of his admission to the bar on June 30, next.

During this most significant half-century with its rapid changes and developments in social and industrial organizations in which legal advice has been most important, this man has been an active, keenminded, wise, and eminently successful lawyer in New York City. He has carried on a general practice but has specialized in corporation law, reorganizations, litigation, and estate law. He has represented many clients, including several large banks and trust companies. Among other clients were the estate of James A. Bailey of the firm of Barnum and Bailey, and numerous corporations of more than Statewide importance. In his earlier practice he was counsel for Bernarr A. MacFadden, incorporated, his Physical Culture Publishing Company and various other physical culture companies, and made a trip to London, England, in Mr. MacFadden's interests.

In carrying on such extensive practice it was necessary for him to represent his clients in many different courts. In addition to the New York State courts, he has been admitted to no less than five different United States district or circuit courts, and very recently in the United States Supreme Court at Washington, D. C. He has had large experience in preparation of briefs and arguments of appeals in New York and United States appellate courts and has had signal success in

securing favorable decisions. At the present time he has been retained to argue before the United States Supreme Court an appeal of a case involving the city of Newark. Ke believes, however, that the most important duty of a lawyer lies in giving sound advice to clients in operation of their business, in preparation of opinions, contracts, and documents, and in keeping clients out of litigation whenever possible.

His connection with Alfred University is more than that of an honored alumnus. He is the son of a man who for ten years from 1888 to 1898 was Professor of History and Political Science on this campus. Ten years ago he was elected to the Board of Trustees of Alfred University, and has served effectively as chairman of the Investment Committee and as a member of the Financial Committee. He has taken a deep interest in the financial affairs of the University and by reason of his large experience in such matters has rendered very valuable service to Alfred. One year ago he was chosen Chairman of the Board of Trustees and is now serving his Alma Mater in this most important office.

Mr. President, who could be more deserving of this honor which the University proposes to bestow on him! Because he is a thorough student of the law both in its practice and in its^underlying philosophy, because he has had a distinguished and most honorable record for a half century in the practice of law in the financial center of United States, and because he is the leader in managing the affairs of Alfred University, I deem it most appropriate to nominate Charles Potter Rogers for the honorary degree of Doctor of Laws.

President Norwood said:

Son and grandson of Alfred, holder of a law degree from the University of the State of New York, whose present president is our speaker today, long-time leader of your prominent New York law firm, recent recipient of the honor of admission to practice before the bar of the Supreme Court of the United States, devoted and effective worker in the interests of the University, now especially as Chairman of the Board of Trustees, friend and wise counselor to the present speaker in these difficult days, your Alma Mater honors herself in honoring you in this way.

Therefore by authority of the Trustees of Alfred University, acting under the Regents of the University of the State of New York, I admit you, Charles Potter Rogers, to the degree of Doctor of Laws, *honoris causa*, in this University with all the rights, privileges, and obligations thereunto appertaining, and in token thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

HONORARY DEGREES

GEORGE DINSMORE STODDARD presented by Dr. Joseph Seidlin.

Mr. President:

The presentation of the next candidate could be very simple and very brief. I might have chosen and merely mentioned one of his outstanding achievements, which in and by itself contains sufficient degree-earning power. Or, the presentation could be very involved and very, very long, since I might have attempted to describe all of his known major achievements and to mention several hundred minor ones. Actually, the presentation is a compromise, describing or listing a few of his accomplishments and omitting so many, that, if transfer of achievements were possible, and he were willing to distribute them, a great many as yet inconspicuous people would become bona fide candidates for honorary degrees.

George D. Stoddard was born in Carbondale, Pennsylvania, in 1897. I mention the year of his birth because I feel that many of the honors he has received and is about to receive are as much an expression of complete confidence in what he is destined to accomplish as they are a token of recognition of his already enviable record as scholar and administrator.

In 1921 he received the degree of Bachelor of Arts from Pennsylvania State College. In 1923 he received the diploma of the University of Paris and, in 1925, the degree of Doctor of Philosophy from the University of Iowa.

He is a psychologist. His work in the field of child development is universally acclaimed and respected even by those who disagree with him. As director of the Iowa Child Welfare Research Station he was the guiding spirit of many and varied research projects, of which perhaps the most revolutionary is referred to very simply as "The Iowa Studies." He and his co-workers practically destroyed the myth of the divine right of the IQ.

He is the author and co-author of many textbooks and treatises. He has contributed hundreds of articles in the fields of child psychology and child development, education at all levels, including adult education, and tests and measurements.

His latest work, a five-hundred-page volume on *The Meaning of Intelligence*, is barely off the press. It is a scientific, comprehensive, meaningful, and courageous dissertation on human intelligence and a cluster of problems "thereunto pertaining."

He is a member of practically every scientific and professional society that has even a remote bearing on his work. He is co-editor of several journals and magazines in the fields of psychology and education.

In 1925 he joined the faculty of the University of Iowa as Associ-

ate in Psychology; in 1936 he became Dean of the Graduate College. He was director of the Iowa Child Welfare Research Station from 1928 to 1942. In some of his spare time between 1918 and 1923, he was a commissioned officer in the Field Artillery Reserve Corps.

In 1942 the Board of Regents of the State of New York, either through a set of exceptionally fortunate circumstances (nurture), or a stroke of genius, (nature), elected Dean Stoddard to the presidency of the University of the State of New York, thus appointing him State Commissioner of Education.

Mr. President, I have the genuine honor, indeed, to present to you for the conferring of the honorary degree of Doctor of Humane Letters, the Commissioner of Education of the State of New York, Doctor George Dinsmore Stoddard.

President Norwood said:

Graduate of Pennsylvania State College, the University of Paris, and the University of Iowa, through research, leading authority on child psychology and child development, successful teacher, author, editor, lecturer, and college administrator, now promoted to the highest educational office within the gift of the State, as Commissioner of Education and President of the University of the State of New York, Alfred University welcomes you to her halls today and gladly enrolls you in the select company of her adopted sons.

Therefore by authority of the Trustees of Alfred University, acting under the Regents of the University of the State of New York, I admit you, George Dinsmore Stoddard, to the degree of Doctor of Humane Letters, *honoris causa*, in this University with all the rights, privileges, and obligations thereunto appertaining, and in token thereof, I cause you to be invested with the hood of this degree and present you with this diploma.

TREASURERS REPORT

AUDIT CERTIFICATION

NARAMORE, NILES & CO. certified public accountants

Lincoln-Alliance Bank Building

Rochester, N. Y.

OSCAR L. NILES, CP.A. ROBERT T. MORROW, C.P.A. FREDERICK \V. RAPPj C.P.A.

We have examined the accounts of the Treasurer of Alfred University for the fiscal year ended June 30, 1943. Cash receipts and disbursements, as shown by the records, have been properly accounted for and changes in invested funds have been verified. Investment securities held by the Chemical Bank and Trust Co. as collateral to a time loan dated November 20, 1942, and due November 22, 1943, for \$75,000.00 were certified to us by the depositary. The balance of the securities have been verified by inspection.

Bonds and stocks shown in Exhibit A under "Cash and Investments held by Alfred University", and in Schedule A-2 "Endowment Fund Assets held by Alfred University", are carried either at cost or, in the case of gifts, at the market value at the time of donation.

This examination did not include the accounts of the New York State Schools of Ceramic or Agriculture, as shown in the Report of the Treasurer of Alfred University. Neither did we verify funds held for the benefit of Alfred University by the Seventh Day Baptist Education Society and the Seventh Day Baptist Memorial Fund, all of which are summarized in Schedule A-2 of the Report of the Treasurer.

Subject to the foregoing and the comments in our report, we certify that the Report of the Treasurer of Alfred University for the fiscal year ended June 30, 1943. as reflected in Exhibit A, Schedules A-1 to A-6 inclusive. Exhibit B, Exhibit C. and Schedules C-1 to C-3 inclusive, properly set forth the true financial position of the University as at June 30, 1943, and the results of its operations for the year then ended.
