

Founder's Day Speaker Dean of Maxwell School

James Harlan Cleveland, Dean of the Maxwell School of Citizenship and Public Affairs, will be guest speaker at the one hundred twenty-third annual Founder's Day assembly this Thursday at 11 a.m. in the Men's Gym.

Dean Cleveland will be presented with the honorary degree of Doctor of Humane Letters. Mr. Leston P. Faneuf, President of Bell Aircraft Corporation, will also receive an honorary degree, Doctor of Laws.

Founder's Day traditionally marks the first time in the academic year that seniors wear their caps and gowns. There will be an academic procession of the faculty and senior class at the beginning of the assembly.

Dean Cleveland is a graduate of Princeton and was a Rhodes Scholar at Oxford from 1938-9. In 1956 he received a Doctor of Laws degree from Rollins College.

He was executive director of the economic section, Allied Control Commission in Rome from 1944-45, and the following year was acting vice-president of the Commission. In 1948, Cleveland was director of the Economic Cooperation Administration's China program and was assistant director of the Mutual Security Administration from 1952-1953.

Dean Cleveland was a member

DMS Awarded At Mass Drill

The Cadet Corps of Alfred University held its first mass drill of the semester last Thursday at Terra Cotta Field.

The Distinguished Military Student Awards were given to fourteen Senior Cadet officers by President M. Ellis Drake. These cadets earned this award at summer camp which was held at Fort Bragg, N. C.

Cadet Second Lieutenant Alan Guernsey delivered a speech on the history of the Fiat Lux pins worn by all cadets.

President M. Ellis Drake also presented Fiat Lux pins to Cadet Norman Powell as a symbol of the presentation of Fiat Lux pins to the entire freshman class of cadets.

of the United States delegation to the UNRRA Council in London in 1945, and was director of the UNRRA China Office in Shanghai, 1947-8. From 1953-5, he was executive editor of The Reporter and the following year assumed his present position as dean of the Maxwell School.

In 1957, Dean Cleveland co-edited, "The Art of Overseamanship—Americans at Work Abroad." This volume contains eleven papers discussing what is doing what abroad, what seem to be elements for success, what problems are posed for American education by prospect of continuing waves of Americans of all sorts.

The book is the result of the Conference on Americans Abroad, which was held at Syracuse in the spring of 1957. At this conference, thirty-five experienced civilians spoke on how Americans can best be prepared for effective work overseas.

Bloodmobile Will Come Tomorrow

The Rochester Bloodmobile will be in Alfred at the Student Union from 9:30 a.m. to 4:30 p.m. tomorrow for its annual fall visit. Students who wish to donate blood will find time assignment blanks and waivers at all the houses and dormitories.

This year's quota is 125 pints. Last year with the same quota, we fell short of the goal by nine pints.

Students who wish to donate blood should remember that if they are under twenty-one, they must have a waiver signed by their parent or guardian. Those students who attended to this matter at registration time will be notified if they arrive by either Mrs. Wesley Parish or Dr. Clarence Klingensmith, the campus co-chairmen.

Civil Service

Any seniors interested in the Federal Civil Service Entrance Examination contact Dean Gertz in Greene Hall. Sixty career fields in the Civil Service are open to both men and women.

Westin Analyzes Basic Reasons for Current Attack on Supreme Court

The effect of recent developments in the Supreme Court upon Congressional and popular opinion was the major problem analyzed by Prof. Alan F. Westin, assistant professor of government at Cornell University, in his speech, "United State Supreme Court: Nine Men Under Attack." The speech, which took place last Thursday evening in Myers Hall, was sponsored by Pi Alpha Pi sorority.

Prof. Westin is a graduate of the Harvard Law School and a member of the District of Columbia Bar. He is the author of "The Anatomy of a Constitutional Law Case" and co-author of "Foundations of Freedom in the American Constitution."

The speaker has also contributed to the various law and academic journals. He was called by the Senate Subcommittee on Constitutional Rights to give expert testimony on wire tapping in the United States and is author of a model wire tapping law which has been adopted by Maryland and Oregon. He is now completing a biography of the first Justice John Marshal Harlan, of the Supreme Court, from the Harlan papers given by the present Justice Harlan.

by FIAT LUX Staff Member

Prof. Westin first gave a background of Court decisions that have formed the basis of the current attack on that body. Upon looking back at Supreme Court cases throughout American history, it appears that there has been no Supreme Court decision affecting major situations that has been without criticism.

The conclusion reached by the

Hobart will be AU's Opponent At Annual Homecoming Game

The 1958 Homecoming celebration will start at 12 noon this Saturday, when Alfred's Cindermen will meet Colgate for a track meet on Terra Cotta Field.

The Annual Homecoming football game will take place at two in the afternoon at Merrill Field. Our opponent this year will be Hobart College of Geneva, N.Y. The Hobart game last year was cancelled because of the rampaging flu epidemic. Last year's Homecoming opponent, St. Lawrence University, lost the game by a score of 18-6.

The University Band will play for the second time at the game. Their theme will be "There's Music in the Air," with a treble clef formed by band members. Other formations to be presented will be a trumpet and a trombone. One of the tunes to carry out the theme will be "7 Trombones," from "The Music Man." The twirlers, with

majorette Betty Richards leading, will put on a specialty act.

The Alumni Association has planned a buffet supper to be held in the Men's Gym at five o'clock that evening. There will be an admission fee of one dollar for adults and fifty cent for children under twelve. After the buffet, Fred Palmer will be the caller for an evening of round and square dances.

Acting as hosts to the returning alumni at the buffet will be President and Mrs. M. Ellis Drake, Dr. and Mrs. Joseph Seidlin, Dean and Mrs. Fred H. Gertz, Dean and Mrs. John McMahon, Mr. and Mrs. Edward K. Lebohner, Mr. J. Milton Stull, Mr. and Mrs. William O'Connor, Dean and Mrs. Nelson Marshall and Dr. and Dean Klitzke.

The twenty-fifth annual meeting of the Ceramic Association of New York will be held on campus this Friday and Saturday.

The program for Friday will include addresses by Dr. L. Navis, President of the Ceramic Association of New York, Dr. Drake and Dr. S. R. Scholes Sr.

On Saturday, Dr. Willis G. Lawrence will speak on "Research at Alfred." The discussion theme for Saturday is "The International Geophysical Year Findings of Composition of Space." Kenneth E. Kissel will head the informal discussion involving such current items as the satellite program, Antarctic expedition, studies of the sun and space travel.

There will also be a program for the wives of the members of the Ceramic Association. Friday's program will include a lecture on "The Charm of Wood" by Kurt Ekdahl of the Ceramic College, and a bridge party to be held in Howell Hall. On Saturday, John Wood will speak on "Some Interesting Aspects of Photography."

Shape of Things to Come in Science Discussed at Myers Hall Dedication

by Kathy O'Donnell

Formal dedication of The Myers Hall of Science was held last Friday at 8:15 p.m.

The speaker of the evening, Dr. Clifford C. Furnas, Chancellor of the University of Buffalo, opened his address, "The Shape of Things to Come in Science," by asking his audience to decide by a show of hands how many of them would care to be the first man or woman to reach the moon, and how many wanted to live 200 years. He stated that while this may sound improbable now, in the light of the advances that research science has

made in the last few years, it is far from impossible.

To achieve a good life, Dr. Furnas believes . . . "the human race should be most interested in an adequate supply of: energy, mineral resources (including water), food and health."

Our population is increasing by the rate of 100,000 per day, and science must meet the needs of this population. Nuclear research is meeting the need in the field of energy. Our nuclear progress Dr. Furnas attributes to the military. He feels that is the stimulation of defense needs that has lead to the development of atomic radar, commercial planes, and other items that have become a part of our lives.

As many people are worried about our water supply, Dr. Furnas would relieve you by pointing out that water is one thing we have plenty of—oceans full. As soon as science learns to utilize this potential, we should have an adequate supply for

home and commercial use. He also returns to the sea for a source of food.

Concerning health Furnas predicts that, "The human race can look forward to not only longer life, but better health: provided individuals will take advantage of the scientific knowledge which will be acquired."

In closing, Dr. Furnas rested his case with educators who have not only the obligation but the opportunity to shape the future.

The program itself was brought to a close by the presentation of the Myers Hall keys to President Drake on behalf of the trustees, and the conferment of the honorary degree of Doctor of Laws, on Dr. Furnas.

Political Science Club Talks on Situations in Four Key States

The political situation in four key states was the topic of last week's Political Science Club meeting.

Progress and predictions in the election campaigns in the states of California, Connecticut, New York and Pennsylvania were discussed by four students of the history and political science department.

Art Klapper, in his summary of California politics, felt that the end result would be a Democratic sweep in that state. He said that it was mostly a matter of personalities at issue and that the Democratic candidate, Brown, would be victorious over Republican Knowland for the governorship.

The situation in Connecticut, as viewed by Dick Zodikoff, was seen to be leading the same direction as that in California, with a victory for Democratic incumbent, Ribicoff,

over his opponent, Zeller, for the gubernatorial seat.

The picture for New York was offered by Dick Altman, who predicted a Republican victory, with Rockefeller edging out incumbent Governor Harriman. Altman also predicted Republican victories all down the line in the coming election.

Dick McLane presented the situation in Pennsylvania, predicting that Democrat Lawrence would become governor over the Republican McGonigle. He also felt that the present governor, Leader, would win his bid for the Senate seat.

The next meeting of the Political Science Club will take place October 21 at 8:30 p.m., in Howell Hall. The agenda for that evening will be concerned with general political trends throughout the nation.

Karen Von Sauers, president of Pi Alpha Pi sorority, is shown here speaking to Prof. and Mrs. Alan F. Westin of Cornell University.

Spontaneity and Improvisation Mark Appeal of Jimmy Giuffre Jazz Trio

by Gail Chasin

Last Saturday night, the Jimmy Giuffre 3 gave a jazz concert in Alumni Hall as the first Forum of the season. Their style of music was different from any other usually heard.

During the intermission Giuffre was asked to explain his group's concept of music in simple, understandable language, as it was felt that the majority of students do not understand the technical language of jazz.

Giuffre said that all three men are "jazz musicians." They have played in the jazz world all their adult lives. All three have studied formal music and are writers in addition to being players.

The main difference in their group is that they have no rhythm

section. They have three instruments that just play melodies together as in chamber music. One of the main influences on Giuffre in this vein was Debussy's "Sonata for Flute, Harp, and Viola."

Some of their pieces are completely written—cut dried and finished. Others contain partial improvisation, with the trio digressing from the piece itself. The remaining pieces are completely improvised, with nothing formal in the minds of the players at the start.

Giuffre feels that his group's music seems to be a kind of parallel to folk music. He can't explain how this occurred, it just did.

The trio tries to make written music sound spontaneous and spontaneous music sound written. They combine the two approaches to music together.

All of their selections are mood pieces. The instruments play to-

gether, yet separately, each creating a separate mood that blend together harmoniously.

They usually played in hushed quiet tones, sometimes playing the same melody spaced apart, as if in round singing.

Much of the music sounded vaguely familiar, as though the listener had heard the melodies being played somewhere in the distant past.

A highlight of the evening was the newly premiered "Western Suite" in four movements: "Pony Express," "Apaches," "Saturday Night Dance" and "Big PowWow." The moods of the titles set the scene for the listener's impressions of the piece. In the second and third movements, the same melody prevailed, that of a chase. In the concluding movement the horns played the same melody simultaneously in order to emphasize its importance.

Enrollment Peak Hit by University

A total of 1,376 students have enrolled in Alfred University for the fall semester, the Registrar's office has announced. This number is approximately 100 more than were registered last year and is the highest in the university's history.

Broken down into classes, the figures show 383 freshmen, 290 sophomores, 216 juniors, and 222 seniors. There are also 32 special students, 55 full-time graduate students, 150 part-time graduate students, and 28 students in the School of Theology.

The division of students in the separate schools show 680 in the College of Liberal Arts, 446 in the College of Ceramics, including 324 ceramic engineers, 37 in glass technology, and 85 in ceramic design. In the School of Nursing, 100 girls are registered.

Houses Note Crowded Parties As Fraternity Rushing Starts

by Steve Chaleff
Publicity Director

On Saturday, October 4, the first hour-long rush parties of the informal part of the Interfraternity Rushing Season were held.

These relatively short rush parties, part of the new rushing system now in effect for the first time, were designed to give Fraternity men and the men of the freshmen class, the largest in Alfred University's history, a chance to know each other as well as is practical and possible by Preferential Day.

Most of the University's frater-

nities reported that the rush parties were more crowded than any they could remember. This once again emphasizes the fact that there will be extreme competition for the privilege of pledging a fraternity.

There are approximately 250 men in the present freshman class. Each of the six fraternities can pledge a maximum of 25 men, making a total maximum of 150. But never before have all the fraternities pledged the maximum number. Thus, only about half of the 250 freshmen will be able to pledge a fraternity.

Because of this, the freshmen are strongly urged by the IFC and its member fraternities to visit every house at the prescribed time. Do not make a choice until you have a good basis for making your choice the right one, and for this you must be acquainted with every fraternity.

Senate Voice

by Al Tuckman
Publicity Director

The Senate Constitution was the opening note of last Tuesday's meeting. The issue of house representation was brought up and according to the new revision of the student representation clause of the Constitution a residence with less than thirty-five members will be entitled to one representative; thirty-five to seventy members, two representatives; and over seventy, three representatives.

On the issue of the Senate Treasurer's Committee, which was formerly composed of one representative from each class, a motion was made and approved to have the class treasurers act as the members of this committee. In this way, treasurers will learn more about their positions and be able to have a voice in student body financial affairs.

We are all aware of the decline in spirit and participation at University athletic functions. In order

to revive this spirit the Senate will henceforth work in conjunction with the cheerleaders. By working together, many new ideas can be put into operation and thus add a little more to the enjoyment of athletic events. To go along with this idea, beginning with the Homecoming football game, A.U. will also have a school mascot on the form of our Saxon Knight, "Li'l Alf."

As an added project this semester, the Senate has begun work on a pocket size student directory of all University students' campus and home addresses. This will be ready soon and will be sold on a subscription basis.

The Campus Barrel drive is now under way with the Ugly Men nominated and waiting for you to cast a vote for them. Whenever you see our symbol, the BARREL, let it be a reminder for you to give as much as possible this year.

Former Friendship Resident Is Now Housemother at Tau Delt

by FIAT LUX Staff Member

(This is the second of a series of articles designed to acquaint the students with the housemothers on campus.—Ed.)

A week ago Sunday, Tau Delta Phi welcomed its new housemother,

Mrs. Betty Mapes

Mrs. Betty Martin Mapes of Friendship, New York.

Mrs. Mapes lived in Wellsville for the years since her marriage to the late Mr. E. Allen Mapes, who was District Attorney of Allegany County for eighteen years.

Mrs. Mapes is a member of the Traveler's Club of Friendship. She belongs to the Saint Andrews Guild of the Episcopal Church and is on the Book Committee of the Friendship Free Library.

For many years, Mrs. Mapes worked in the Girl Scout movement as a troop leader.

In preparation for her arrival on campus, the boys of Tau Delt

redecorated a downstairs bedroom and made it into a sitting room.

Mrs. Mapes thinks the members of Tau Delt study hard and is proud of the scholarship trophies which occupy a prominent place in her sitting room.

Mrs. Mapes enjoys living in the house and in Alfred which she finds a congenial town and close to her home.

Problems Probed At Business Club

Mr. M. Kenney, plant superintendent of the Foster-Wheeler Corporation of Dansville, spoke on "The Problems of Management in a Big Business" at the meeting of the Business Club Thursday night.

In his talk, Kenney gave a short history of the company, its management, and phases of industrial engineering. He stated that the company is the third largest company in the United States of its kind, and is international in scope.

The A.U. Business Club holds monthly meetings at Howell Hall. Guest speakers will be announced in advance.

Chaplain Seeks Answer to Problems Fundamental to Christianity and Life

by The Rev. Robert H. Bone
Episcopal Chaplain

(This is the second of a series of articles to be written by the campus chaplains.—Ed.)

The primary function of a college chaplain is to seek to deal with these questions: What is Christianity? Is it credible? Is it meaningful for my life?

What is Christianity? He must seek in all his activities (preaching, teaching, and counseling) to state with objectivity the classical truths of Christianity. Many college students after the first lecture in science announce that they have lost their religion which is really a good thing because it probably wasn't worth keeping. What they give up is a distortion of the faith.

They may give up the religion of their mothers, ministers, or Sunday School teachers but should not reject classical Christianity until they at least know what they are giving up. The chaplain is simply saying: "to be an educated person you must have a knowledge of Christianity before you can make a decision for or against." He stands ready to state that faith in its historical setting and to separate the classical truths from the present day opprobrious connotations.

Is it credible? Christianity does not require a student to surrender

his intellect or to refrain from the use of critical, scientific and objective methods of knowledge. A good motto is, "seek the truth, come whence it may, cost what it will." Christianity is also intellectually respectable. Walter Lowery has said that if theology is no longer the "Queen of the Sciences" then maybe she can be the "First Lady in Waiting."

Is it meaningful for my life? The church is a place for "pious platitudes and stained glass attitudes" (Gilbert and Sullivan) many would say. Classical Christianity,

however, can explain and deal with the forces of pride, self-love, loneliness and separation. In short the human predicaments. The Christian faith encounters and listens to human needs; it does not beat people over the head with moralistic codes and preachments of puritanical censures; it offers a newness of life.

The chaplain seeks to deal with these three categories. Finally, it must be said the chaplain is just a man. He is driven and possessed by the same fears and insecurities that plague all mankind.

Informal Dance Is Planned by the ISC

Plans for the Intersorority Dance have been announced by Anne Gayle, president of the Intersorority Council.

In the past, Intersorority dances were held with the Intersorority Council of the Ag-Tech. This year the University will sponsor the dance alone.

Polly Viner is chairman of the dance which will be held on Friday, December 12, from 9 p.m. to 12 midnight in Howell Hall.

The dance will be informal with music supplied by the Jim Ellis Combo.

After the dance, the four sororities will hold open houses until two o'clock. Since this is one of the six "big" dances listed in the WSG handbook, all women will be given two o'clock permissions that evening.

Tonight at 10 p.m., the members

of the Intersorority Council will hold a meeting in Kruson Lounge for all freshman women and transfers who will be rushing the second semester. The purpose of this meeting will be to explain the rushing system used on the campus.

The Intersorority Open House will be held on Sunday, November 23, from 2 p.m. to 5 p.m.

Hello Spirit New Practice for Alfred's Student from Iceland

by Anne Francese

This year Alfred welcomed to its campus many students from other countries. Among them is Olakur Hosuldsson, a personable and handsome young man, who came to us from Iceland.

For Olakur, his arrival at Alfred in September marked his first visit to the United States. In fact,

it was his first visit to a country other than his own.

Olakur, who studied English in his school in Iceland, was given the opportunity to further his studies in the United States when he was granted a Rotary Scholarship for one year of study here.

At the end of this year, he would like to go to England in order to further his education in the field of English.

Aside from this interest in studies, Olakur is also very sports-minded. While he was at home, his activities included volleyball, badminton, skiing and swimming. However, he feels that this year his studying will claim too much of his time to allow him to participate in sports to the extent that he would like.

When asked for his opinions of Alfred, he replied that he liked it very much here. He finds the landscape very beautiful, particularly our trees. He admitted that at first our custom of saying hella to one another confused him as it was not customary to do so at his school in Iceland. It is a habit which he seems to be developing rapidly.

New Additions to Ceramics School

A new Ceramic College laboratory is being set up in Allen Lab for a freshman ceramics survey course. The new course, commencing next semester, will be a cooperative program in which all ceramic engineering and technology students participate.

The College has been granted the loan of a new high temperature microscope from the American Optical Company. This loan to the Research Institute is for the purpose of studying glazes and glasses formations under high temperatures.

The College has also received two machines from Onondaga Pottery. They are a "batter," which is used in making clay blanks for throwing, and a "jigger" for making plates, bowls, and other circular objects.

Glidden Shows Burg Paintings

An exhibition of paintings and drawings by Prudence Burg opened Sunday at Glidden Galleries and will be on view through the month.

The show consists of eleven paintings in oil and two crayon drawings. A majority of the paintings are on Mexican subjects, the result of a summer spent in Mexico where Miss Burg taught painting at the Mexican Art Workshop in Taxco. Other paintings were made while she was in Italy and Turkey.

Paintings by Prudence Burg have been exhibited in group shows at the Argent Gallery, 1945-6; in Utica, 1948; in a duet show with her twin sister, Priscilla, at Syracuse, 1948; and in solo exhibitions at the Rochester Memorial Art Gallery, 1943-4; and the Syracuse Museum of Fine Arts, 1953-5.

First Victory for Gridders, 8-0; Harriers Win at Buffalo; Finnerty Sets Record

by Al Siegel
Special to the Fiat Lux

CANTON (October 11) — Homecoming and Hobart are next in line for the resurging Warriors, now on the warpath.

Operation rebound for the Saxons is now underway, the five game losing streak having come to an end.

Playing against a St. Lawrence squad, up for their Homecoming clash, and out for their first win in twenty, the young Saxon club showed their best offense to date and played a good defensive game, topping St. Lawrence, 8-0.

Victory came in the second quarter as Steve Crossman took a pitch-out on the 10, raced around left end, evaded the last defender on the 2, and tallied untouched. Adding insult to injury, he then raced around his right end for the PAT and the 8-0 margin.

Immediately after this TD the Scarlet Saints had their golden scoring opportunity, but the sturdy Saxon forward wall held up when the chips were down.

The kickoff following the TD was brought back to the Saxon 26, where Fred Cassin tossed a short pass to Don Chirlin, who in turn raced it to the Warrior 15, a TD being averted when John Pfeiffer knocked him out of bounds after a gain of 59 yards.

Three runs up the middle put the pigskin on the 10 and a fourth down roughing the passer penalty against the Saxons gave SLU a first down on the 1.

A 5 yard back in motion penalty vs. the Larries placed the ball back on the 6. Three plays saw an

incomplete pass and two losses for 18 yards. The half, and the threat ended as AU gained the spheroid on downs, on the 11.

The Saxon march started on their own 43 and saw a drive of 9 plays. After Jim Ryan and Crossman picked up 3, a pass from Mike Thrasher to Ryan netted 19 to the SLU 35. Runs of 6 and 7 yards by Crossman and Ryan then put the ball on the 22.

Dick DeMott hit for 3 and Ryan bulled his way to the 10. After being stopped cold on the 10, on his first attempt. Crossman then hit paydirt.

Now operation rebound moves against Hobart in the first Saturday afternoon varsity football game in Alfred history. The two clubs haven't met since '55, AU getting a 6-0 win to cap an undefeated campaign and a national champion-

ship. The series started in 1899, the Statesmen holding a 21-7-2 edge. Game time is set for 2 p.m.

PRESS BOX NOTES — Saxons gained 140 on the ground to 47, 30 passing to 120, AU completing 3 of 6, while SLU was 5-16 . . . Punting of Tefft and DeMott hit for 36.1 average . . . Crossman had 60 yards rushing, Ryan 54.

Game Captain Bob Cranston has the game ball, played a good game as did entire Saxon line . . . Crossman still looks as top AU frosh find and best back . . . He, and other frosh getting better with each outing . . . Stook coming fast . . . Scouts in press box again included Spike Garish of Hobart . . . As usual for road trips, rain preceded game and ended in first quarter . . . Weather report—cold, windy . . . Motto on trip back to AU—"Next week we get Hobart"

Yunevich Appointed to Lambert Cup Committee

Alex Yunevich, football coach at AU, has been appointed to the selection committee for the Lambert Cup.

The Lambert Cup is emblematic of small college football supremacy in the East. Presented last year for the first time, the victor was Lehigh.

Yunevich now is one of ten on the selection group which will cast

its ballots each week until the season's close when it will cast the final ballot and select the winner.

The ten man group consists of coaches John McLaughry of Amherst, Roy Randall of Haverford and seven sportswriters and broadcasters.

The Lambert Trophy is annually presented to the team champion in the major school category. Navy was last year's winner.

The Alfred University Cross Country team chalked up its second victory in as many tries last Saturday by winning the Buffalo State and Western Ontario Invitational Meet at Delaware Park in Buffalo. The Saxons scored 34 points for first place honors. Finishing second, third and fourth respectively were Western Ontario with 48 points, Buffalo State with 52 points, and Canisius with 94 points.

Alfred's Frank Finnerty finished first, as he covered the 4.4 mile course in the record time of 23 minutes, 13.2 seconds. This is 2.8 seconds better than the old course record set by Joseph Bessel of Buffalo State in 1956. Finnerty led from the start and had things pretty much his own way as he finished unchallenged.

Following Finnerty for Alfred was Carl Blanchard, who came in

4th, 1 minute and 10 seconds behind the leader. The other scorers for the Saxons were Warren Sutton who finished 8th; Larry Eaton who finished 9th; and Sandy Smith who finished 12th. However close behind the scorers were Paul Lucas, Steve Kelly, and Joe Connor, who finished 12th, 15th, and 16th respectively.

This coming Saturday the harriers will meet Colgate here at Alfred. The competition should be much tougher and it should be a very close meet.

CROSS COUNTRY

Oct. 18	Colgate	Alfred
Oct. 25	Canisius Inv.	Buffalo
Nov. 1	Union	Schenectady

Basketball

All candidates for the varsity or freshman basketball teams, other than lettermen from last year's varsity, are invited to try out for this year's squads at 7:00 p.m. tomorrow in the Men's Gym.

Lettermen from the varsity of last year will report on Monday night at the gym. Candidates for the team are required to supply their own equipment during the tryout period.

All candidates should be on the gym floor, ready to play at 7 tomorrow.

THEY SAID IT COULDN'T BE DONE - BUT TODAY'S L&M GIVES YOU-

They said it couldn't be done...until the Wright Brothers flew this plane for 59 seconds in 1909. Today flying is so much a part of modern life that 40 American colleges offer regular flying courses, many of them for degree credit.

Less tars & More taste.

DON'T SETTLE FOR ONE WITHOUT THE OTHER!

Change to L&M and get 'em both. Such an improved filter and more taste! Better taste than in any other cigarette. Yes, today's L&M combines these two essentials of modern smoking enjoyment—less tars and more taste—in one great cigarette.

Light into that Live Modern flavor!
