My dear Professor Binns:

Thank you for your letter of May 16th with the good news that I am enrolled as a student for the summer course in ceramics. I am looking forward to it with much anticipation.

You suggested that I might bring a few modeling tools with me if I had them. I have none at present but should be glad to buy them here in New York if you would advise me as to the kind I ought to have.

Very truly yours,

C. Louise Avery
