### **Faculty/Staff Invited to Join Choruses at AU**

This semester will bring a special opportunity for singers. The usual format for choruses at AU is being changed just for this fall semester. Director Luanne Clarke will be having two choruses: a women's chorus and a men's chorus.

The Women's Chorus will focus on works composed by women for women's voices. Faculty and staff are invited to attend rehearsal on Thursday from 7:00-8:30 pm, starting on September 4. The concert for the women's group will be on November 22.

The Men's Chorus, or Saxon Singers, will perform along with two invited male choirs. Former AU Gospel Choir Leader, football player, actor and comic Chaz Bruce, currently teaching at the University Prep Charter School for Young Men in Rochester, NY, and Kent Knappenberger, first recipient of a Grammy for Music Educator and vocal director in Westfield, NY, will bring their male voices to join together for a spectacular Festival of Men's Voice on November 1. The combining of all those voices

will be an experience not to be missed. Faculty/staff members of the Saxon Singers are invited to come on Monday 7:00-8:30 pm, starting on September 1 or 8.

Both choirs will rehearse in the choral room in the new section of the Miller Performing Arts Center. For more information contact Luanne Crosby at [fclarke@alfred.edu](mailto:fclarke@alfred.edu)

### 'Elemental,' An Exhibition by Damien Gilley

"Elemental," An Exhibition by Damien Gilley

Location: The Belfry, 406 Canisteo St.

Date: Friday, Sept. 5

Time: 7-10 P.M.

Cost to Attend: Free/Open to the Public

Damien Gilley will be presenting an immersive installation using sculpture and drawing that reacts to the site as both a church and a home. Using common building materials, the work creates an expansive framework that references the dualistic identity of the building.

The exhibition takes influence from Euclid's seminal printed work which outlines foundational geometric postulates and propositions as essential truths. The work is an homage to Euclid's "constructions," looking not to reproduce his studies but explore geometry past physical limits.

Illusionistic flat drawings, transparent walls, floating frameworks and chance sight lines elevate the process of building and making into a phenomena of perception.

Damien Gilley is an artist from Portland, OR whose work exposes hidden architectures through site-specific perceptual installations that combine drawing and sculptural approaches. Influenced by vintage computer graphics, techno-structures, and science fiction the work integrates digital languages with the physical world to question historical, current, and potential environments.
