|---------------|-----------|
| 1. Rhetoric, | Day. |
| 2. Elocution, | Caldwell. |

II. DEPARTMENT OF PURE MATHEMATICS.

First Year.

- | | |
|------------------------|-----------|
| 1. Mental Arithmetic, | Stoddard. |
| 2. Written Arithmetic, | Perkins. |
| 3. Algebra, | Robinson. |

Second Year.

- | | |
|------------------------|--------------------------|
| 1. Algebra, | Robinson, University ed. |
| 2. Algebra, continued, | " " |
| 3. Geometry, | Davies' Legendre. |

Third Year.

- | | |
|--|-------------------|
| 1. Geometry, completed, | Davies' Legendre. |
| 2. Trigonometry, | " " |
| 3. Mensuration of Surfaces and Solids, | " " |
| 4. Conic Sections, | Jackson. |

Fourth Year.

- | | |
|--|---------|
| 1. Analytical Geometry, | Davies. |
| 2. Differential and Integral Calculus, | " |

III. DEPARTMENT OF MODERN LANGUAGES.

French.

- First Term—Pinney's First Book in French.
 Second Term—Pinney's Reader and Grammar.
 Third Term—Pinney's Second Book, Mezzofanti System.

To the above courses in Ancient Languages, is added a course in Hebrew, Hebrew Grammar & Chrestomathy, Rodiger's Gesenius, by Conant, Hebrew Bible.

V. DEPARTMENT OF GENERAL AND AGRICULTURAL CHEMISTRY.

It is the design to impart, in this Department, a practical knowledge of the Science of Chemistry, together with its application to Agriculture and the arts.

I. ELEMENTARY CHEMISTRY.

This course is open during the full term of each year, and embraces instruction in the principles and phenomena of Heat, Electricity, Galvanism, Magnetism, and Chemistry proper.

Text Books.

Elementary Chemistry,	Draper.
Kane's Chemistry,	"

II. CHEMISTRY APPLIED TO AGRICULTURE.

With a new Analytical Laboratory just established, it is the design in this course to give Scientific Farming the prominence which its nature seems to demand. No pains will be spared in showing the intimate relation between Science and Productive Labor. For this purpose, instruction will be given in the analysis of soils, the nature and adaptation of crops, the application of manures, and the relation of climate, weather, &c., to vegetation. Due attention will also be given to Chemistry in its application to Medicine and the Arts.

The Analytical Laboratory will be open for study and experiment, five days a week during the spring and fall terms of each year.

Text Books.

Outlines of Analysis,	Will.
Chemical Analysis,	Fresenius.
Analytical Chemistry, Qualitative and Quantitative,	Noad,
Scientific Agriculture,	Rodgers.

Expenses.

Charges for tuition, use of Apparatus, Chemicals employed by the pupil in experiments, (alcohol for lamps excepted,) and extra fuel, per term, \$10.00.

The apparatus necessary for the pursuit of this study will be furnished the student, and charged to his account, but the charge will be canceled for all that is returned in good condition at the close of the term. The above charges for Materials, Chemicals, &c., are intended to cover simply the actual cost.

VI. DEPARTMENT OF NATURAL PHILOSOPHY AND ASTRONOMY.

This course occupies one year, and comprises Mechanics, Hydrostatics, Pneumatics, Acoustics, Optics and Astronomy, both Descriptive and Mathematical. In addition to the daily recitations, the student is directed by lectures, illustrations, and experiments, in reducing *principles to practice*, in their application to the useful arts.

Text Books.

Natural Philosophy,	Olmsted.
Optics,	Brewster.
Descriptive Astronomy,	Mitchell's Burrill's Astronomy.
Mathematical Astronomy,	Olmsted.

VII. DEPARTMENT OF NATURAL HISTORY.

First Year.

1. Descriptive Geography.	Mitchell.
2. Anatomy and Physiology,	Lambert.
3. Zoology,	Lectures.

Second Year.

1. Botany,	Wood.
2. Physical Geography,	Guyot.
3. Geology,	Hitchcock.
4. Mineralogy,	Lectures.

The above course is designed to develop the laws which pervade and govern the three great kingdoms of nature. Especial attention will be given to the laws of hygiene, as applied to the human constitution, as well as to its relations and analogies to the lower orders of animals, and to vegetables.

Apparatus.

The apparatus for the demonstration and illustration of the sciences is very ample, and will be found quite sufficient for a thorough course of illustrative experiments in Anatomy, Physiology, Mechanics, Hydrostatics, Pneumatics, Electricity, Magnetism, Electro-Magnetism, Optics, Astronomy, and Chemistry.

MUSIC, PAINTING, &c.

Vocal Music is pursued as a regular study, the same as any other branch of education. Those desiring to take Instrumental Music, Drawing, Embroidery, or Painting in its various forms, will find at this Institution ample facilities and competent instructors.

TEACHERS' DEPARTMENT.

It is one of the prime objects of this Institution to fit young Ladies and Gentlemen for the profession of teaching. In carrying out this object, a course of study has been adopted with especial reference to the wants of teachers. The Regents of the University have, also, selected this institution for the purpose of giving instruction in the science of common school teaching.

In order for a teacher to enjoy the benefits of the State provisions, or to be recommended by the authorities of the institution, he must attend one full course of lectures upon the subject of teaching, and manifest the qualifications requisite for a successful teacher. No individual will receive a recommendation from the authorities of this institution, who is not deemed competent to fulfill all of the specifications of his recommendation.

Those completing the following course, satisfactorily to the Board of Examiners, and possessing good moral characters, will receive a Diploma, signed by the Faculty and President of the Board of Trustees, under the corporate seal of the Academy.

Those wishing the Diploma of the Institution, and not desiring to teach, will be at liberty to deviate from the regular course, provided always, that they take studies that shall be deemed fully equivalent to those omitted from the regular course.

Regulations and Government.

Candidates for admission as students must present testimonials of good moral character, or be known to possess such a character, and must be willing to comply, unreservedly, with the following regulations; and no one will be permitted to receive instruction in any class, until all academic bills for the term in prospect be paid or satisfactorily arranged.

REGULATIONS.

1. No student will be excused to leave town, except to visit home, unless by the express wish of such student's parent or guardian.
2. Punctuality in attending all regular academic exercises is required.
3. The use of any kind of intoxicating drinks cannot be allowed, unless prescribed, in cases of sickness, by a regular physician.
4. Playing at games of chance, using profane language, or the use of tobacco for chewing or smoking, either in or about the academic buildings, cannot be allowed.
5. Students are not allowed to keep or use fire-arms in or about the Institution.
6. No student is allowed to visit taverns or places of public resort, without permission, or to visit stores except at such times as shall be designated for that purpose by the Faculty at the commencement of each term.
7. Good order must be maintained at all times, and in all the rooms and halls of the Institution, and in all the intercourse of students with each other.
8. Students will be required to keep their own rooms in good order, and to pay all unnecessary damages, either of rooms or of furniture furnished with the rooms.
9. No nails, screws, or tacks, may be driven in the walls or ceilings, nor any alterations made in the windows, doors, or any part or appendage of the rooms, without permission of the Steward.
10. Students are not allowed, without permission, to visit each other's rooms during the regular hours of study, nor after the ringing of the last bell each evening, nor at any other recesses than such as shall be designated by the Faculty for that purpose.
11. Gentlemen and ladies, attending this Institution as students, are not allowed to walk with the opposite sex, nor visit their rooms, except in cases of imperious necessity, and then it must not be done without permission previously obtained from one of the Faculty. If a brother wishes to visit with a sister, or a sister with a brother, it may be done, at proper times, in the Reception Room of the Institution. The Faculty will grant permission to do so at their discretion.
12. All students are required to retire regularly at the ringing of the bell designated for that purpose, as occasion may require; and to rise at the ringing of the morning bell, also designated.

13. Study hours and recesses will be arranged at the commencement of each term by the Faculty, and may be altered by them in special or individual cases, at their discretion.

14. Each student has his own studies assigned him when he enters school, according to his qualifications, always consulting his own wishes or those of his parent or guardian; and no student can change or drop a study thus assigned, without permission.

15. Students are permitted to study in their own rooms, during the regular hours of study, provided they will do so without any conversation with each other; otherwise they will be expected to study in the school rooms.

16. No student is allowed to give or receive instructions in any branch of education, except under the direction of the Board of Instruction.

17. Every student, by becoming a member of the Institution, must be pledged to comply with all its regulations till the close of the term for which he enters. If he leaves before the close of the term, without an honorable dismissal, his name will be marked in the next annual Catalogue as a delinquent.

18. Any room occupied by students will at all times be subject to the visitation of the teachers of the Institution, who are required to see that the regulations are complied with.

19. Students remaining at the Institution during vacations will be subject to the same regulations as during the terms.

REGULAR ACADEMIC EXERCISES.

The regular exercises, at which all the students will be required to attend, unless specially excused, are—Chapel exercises each morning during the term; Recitations, from two to four, five days each week, from Monday morning till Friday evening; Regular exercises in Compositions and Declamations; Literary, Scientific, and Moral Lectures, by the Faculty; and Public Worship each week, either on Saturday or Sunday, according as the students may be in the habit of keeping the Sabbath, either on the seventh or first day of the week.

GOVERNMENT.

The Government of the students will be in the hands of the Faculty, and will be strictly and steadily exercised, and, at the same time, strictly parental. The object of our academic government being to secure the greatest possible amount of physical, intellectual, and moral good to the students themselves, regularity and order of exercises, and good and wholesome citizens to society, no unwarrantable means will be made use of to enforce the observance of the above regulations; yet our constant endeavors will be to make the means resorted to as effective as human means may be.

Parents who place their children in this Institution, and all students who are sufficiently old to understand the necessity of order, cannot be too well assured, that the foregoing regulations form the most essential part of the contract between them and us; and that whatever student wantonly violates them, and shows himself incorrigibly determined on pursuing his waywardness, will be expelled from the privileges of the Institution, and will not be permitted to re-enter it again, without special proof of reformation. Nor will an expelled student have any deduction made from full term charges.

Miscellaneous Information.

LOCATION.

The Academy is located at Alfred Centre, Allegany Co., N. Y., two miles from the Alfred Depot, on the line of the New York and Erie Railroad. It is in the midst of a rich farming country, surrounded by romantic and delightful scenery. The location is retired and healthy. Few spots are so well adapted to the quiet and successful pursuit of science and literature as the village of Alfred Centre.

EDUCATIONAL FACILITIES.

The Course of Instruction in the Institution embraces every department of science and literature usually taught in the best Seminaries and Colleges of this country. A very large and *permanent* Board of Teachers enables each instructor to devote his whole attention to his particular department, and thereby give it an efficiency and thoroughness that no other arrangement can secure.

MORAL AND RELIGIOUS INFLUENCE.

The morals of the village and surrounding community are of the highest order. A people of high moral life, and of moral education and unobscured habits, cannot but furnish conditions not exposed here to *many* of the ordinary allurements of vice and dissipation. The members of the Board of Instruction belong to different religious denominations, and adopt an enlightened religious policy.

ROOMS AND BOARD.

The buildings for the accommodation of the school consist of a North Hall, occupied exclusively by gentlemen, under the supervision of one of the Professors; a South Hall, occupied exclusively by Ladies, under the supervision of one of the Teachers of the Female Department; and a Middle Hall, used for boarding, under the supervision of several of the Professors and their families. By this arrangement for boarding and rooming, students are placed under the immediate care of those who watch over their morals, their manners, and their health, with parental solicitude. Parents and guardians may be *assured* that good board will always be furnished, and that all reasonable attention will be given to the comfort and convenience of boarders.

Each room for the accommodation of students is designed for two individuals, and is furnished with stove, bed and bedding, two chairs, table, and pail. Any additional furniture required, students provide for themselves.

There is also now completed a large and commodious building, used exclusively for Chapel, Recitation and Society Rooms.

LIBRARY.

The Institution Library consists of a choice selection of Histories, Biographies, Greek and Latin Classics, Mathematical and Scientific Works, and Standard English Literature. Additions are made to it every year.

SOCIETIES.

The Allegonian, the Orophilian Lyceum, and the Ladies' Literary Society, are the *permanently* organized Societies of the Institution. They are managed with ability, and are important aids to those who are desirous of becoming good writers and speakers.

SUGGESTIONS TO STUDENTS AND PATRONS.

I. It is very important, that students be present at the opening of the term, as on that day students are examined and classified. On the succeeding day classes are arranged for the term. Students can be admitted at a later period, if they are prepared to enter classes already in operation, in a manner not to interfere with the previously existing arrangements.

II. As the studies marked out for each class will require the entire term for their completion, it is important that students should continue through the term. Accordingly, (extraordinaries excepted,) no student will be admitted for a less time than a full term, unless belonging to the Teachers' Department. The exercises of this department will terminate about ten days before the close of the Fall Term, when teachers desiring to do so, will be excused to leave; but as much extra expense is incurred by the Institution in conducting this department, no deduction will be made from full term charges.

III. All of the educational facilities of this Institution prove nearly valueless to those students who are irregular in attendance. Frequent interruptions during the term are fatal to every thing like *real* progress and mental discipline. Students who lose one recitation each week, can seldom make commendable attainments. Even where a student goes home at the close of the week, and returns in season to be in his classes on Monday morning, he will almost inevitably have his habits of thought and interest in his studies so broken up as to destroy the value of half his week's labor.

IV. The progress of the age is constantly demanding a higher grade of scholarship. The full four years course marked out in this Institution is little time enough for securing the knowledge and intellectual discipline which ought to be obtained by those occupying the humblest spheres in life. A student can do but little more, in a single term, than to become fairly enlisted in his studies; it is far better, therefore, unless necessity forbid, that he should remain several terms in succession. Attendance at school one term each year for half a dozen years, is the worst economy that can be adopted in getting an education. The whole would not be worth one year's uninterrupted attendance. Thorough intellectual discipline cannot be secured without a long and uninterrupted course of training.

V. PARENTS and GUARDIANS are earnestly requested not to furnish their children, while attending this Institution, any more spending money than their necessities demand; nor should they permit their children to make debts at the stores, unless they have perfect confidence in the *good economy* and *prudent habits* of their children. Any member of the Board of Instruction will cheerfully act as fiscal guardian of such children as may be placed under his care. Nor can the Institution be responsible for the extravagancies of children not thus placed.

THE INSTITUTION AND THE PUBLIC.

The Trustees of the Institution, in presenting their fifteenth annual Catalogue to the public, would return their acknowledgments for the marked favor and liberal patronage received from its numerous friends and patrons. Their highest ambition and only object have been to found a Seminary of unsurpassed excellence—a Seminary that shall bless the Church and the world. They have appreciated the necessity of laying the foundation of intellectual and moral attainments

and discipline upon a broad and permanent basis; and they have provided in a liberal manner, the appliances and facilities for securing these objects. They labor to send forth young men and women, so educated as eminently to qualify them for the realities and responsibilities of active life.

With a Faculty that are zealously devoted to their work, the public may rest assured, that no pains will be spared to merit, in future, that confidence and patronage with which the Institution has been heretofore favored.

N. V. HILL,
President of the Board of Trustees.
