

Assembly to Stage 'Marriage Proposal'

Chekov's "The Marriage Proposal" will be presented by the Alfred University Footlight Club as its annual assembly production this Thursday.

Jules P. Leon, newly elected president of the Footlight Club, is directing the production. The role of Lomov, the suitor, will be played by Samuel Chororos. Joanne Wendover will appear in the role of the girl friend, Natalya. The part of the father, Chubukov, will be played by Michael Moses.

A pantomime added to the Russian comedy by Leon will be performed by Patricia Katz. The co-director of the play is Susan Schenker.

The comedy concerns itself with a young man who is just a bit too shy and nervous to propose marriage. When he finally does work

up his courage, unexpected complications, such as who owns the better hunting dog of the two families, interferes.

The poor young man almost has a heart attack, but the girl's father manages to calm him enough so he can become betrothed.

Tryouts for "Waltz of the Toreadors," the St. Pat's play, written by Jean Anouilh, were held on February 4, 5 and 6. The cast, technical crew and set designer for this production will be announced sometime this week.

This play, which is a bitter comedy about an aging general, who is somewhat of a rake, will be directed by Prof. C. D. Smith III. Technical director will be Prof. Ronald M. Brown.

Winter Carnival Festivities Include Snow Sculpture and Informal Dance

by Kathy O'Donnell

Four queen and king candidates were chosen last Thursday for the Snow Ball at judging which took place at Pi Nu Epsilon and Psi Delta, Omega. Those chosen as queen candidates were Gail Meyers and Jane Kelley of the Ag. Tech; Karol Edwards and Mary Cavanaugh of the University.

Those chosen for king candidates were Danny Moon and Dick Crombie from the Ag. Tech.; Jake Fredericks and Eric Kluwe from the University.

Each candidate was chosen from a group of nominees elected at each residence in the University and Ag. Tech. Judging was done by members from the faculties of both schools. Those participating

from the University were Dean Klitzke, Miss Tupper, Dean Gertz and Dr. Leach.

Final voting is to take place at the dance which is being held Friday night from 8:30 until 12:30. Ballots will be printed on the tickets, and you must be present to vote. Dancing again will be to the music of Art Dedrick. Those who attended the dance last year report the music of this ten piece band from the Olean area is, "well worth listening to." Tickets are now available from any Senate member.

The theme for this year's snow sculptures is, "Titles, themes, and characters from books." No sculpture is to exceed 35 feet in height, and no sculpture may contain color-

ing. All supports must be covered by snow, and all signs must be made of snow. No carving will be done before noon, Thursday and must be finished by 9:00 a.m. Saturday.

All entries must be sent by mail to Ken Warner, Box 807. No entries will be accepted unless they appear on the proper application form and are postmarked prior to noon, Tuesday.

Judging of the snow sculpture will take place on Saturday from nine to eleven in the morning and will be done by local high school teachers.

At eleven the human dog sled races will take place on the main street and will this year include both the women's and men's division. After dinner there will be skating competition on the ring behind the Ag. Tech Gym.

Overall judging this year will take place on a slightly different basis. There will be two trophies, the smaller of which is for the snow sculpture and the larger one for the over-all winner, who will be decided on a point basis. It has been pointed out that the winning snow sculpture competition does not necessarily qualify you for the large trophy. A residence may accumulate enough points in the other events to qualify. The trophies are now on display in the Ag. Tech Union Lounge and in the University Library.

It might be added—all this in event of snow!

Castle Sponsors Discussion Group

The Castle will sponsor discussion groups, composed of students and faculty to be held every Sunday afternoon at 2:30.

This marks the first time such groups have been formed under the auspices of a University dormitory.

Two or three professors will be asked, each week, to discuss a topic which, selected by the members of The Castle, is considered to be of general interest. Student participation in the discussions will be encouraged as the basic objective of these groups.

The first of the discussions, held at The Castle, will take place this coming Sunday afternoon. The first topic will deal with the Dead Sea Scrolls. Campus religious advisers have been invited to act as discussion leaders for this meeting.

All faculty members and students are cordially invited to attend.

Soprano Martha Flowers Performs For Third AU Forum Next Tuesday

by Emmalyn Heed

Martha Flowers, soprano acclaimed by critics here and abroad, will perform in Alumni Hall at 8:15 next Tuesday evening for the third Forum.

As leading soprano in Gershwin's "Porgy and Bess," sponsored by Everyman Opera, Inc., Miss Flowers sang in the opera houses of Paris, Berlin, Moscow, Rio de Janeiro, Milan and other major cities in South America, Africa, Eu-

rope and Asia. In 1958 she made a seventeen week tour of the United States as soloist in the same opera.

Miss Flowers made her debut at Town Hall in New York City December 6, 1954 when she received the Naumberg Foundation Award. She has also been the recipient of a number of other scholarships and awards, including the Marian Anderson first prize in 1950, a John Hay Whitney Fellowship in 1952 and a scholarship for study at Julliard School of Music from 1950 to 1954. Before entering Julliard she graduated from Fiat University.

Many colleges and universities have invited Miss Flowers to give recitals on campus. Her two most recent appearances have been at Vassar and Bennington Colleges. She has also been soloist on tour with the National Chorus of America.

During the first week in February 1959, Miss Flowers was guest artist with the Springfield Symphony Orchestra, Springfield, Ohio.

Press reviews of the N.Y. Times claimed that "Miss Flowers seems to sing as easily as most people speak . . . She has stage presence

and poise, as well as a clear, fresh voice that is just as velvety as it is agile."

The Herald Tribune wrote: "Once in a while one hears voice and artistry combined in perfect fusion; it is the art which conceals art, and when it happens one is spellbound, as in the presence of wonder of nature. Of this company is Martha Flowers . . ."

Belgium praised her "ravishing personality, remarkable voice." Germany acclaimed "The feline grace and highly educated singing of Bess by Martha Flowers . . ." as a "creation of instinctive sensitivity and tender humility." And from Leningrad, USSR comes this report: "The artist Martha Flowers showed, in the role of Bess, a real mastery of 'transfiguration.' With psychological truthfulness she depicted the different facets of the nature of her heroine."

Need Money?

If anyone has any books which he wishes to sell, he should bring them to the Book-easy in the Student Union on Thursday or Friday afternoon, February 12 and 13 between 2 and 4 p.m.

Burgeoning Beards Announce St. Pat's

by FIAT LUX Staff Member

Although St. Pat's is officially Friday and Saturday, the thirteenth and fourteenth of March, unofficially St. Pat's has been under way for several months.

Paul Holloway, publicity chair-

man of the St. Pat's Board, has announced that the St. Pat's queen candidates have been chosen.

Mary Cavanaugh, Lisa Finelli, Ann Gayle, Nancy Cashimere, and Barbara (Peewee) Cohnsen were elected as a result of a campus-wide balloting in which all senior girls participated.

The St. Pat's Board reports that rapid progress is being made on the ceramic favors, members of most of the sororities and fraternities have already started their traditional sessions with Kleenex and crepe paper, and as evidenced on many faces—beards are well under way.

The fruits of many efforts will be shown at the parade Friday afternoon whose theme this year is, "St. Pat Visits Disneyland." At this time too, the Queen and her court will be introduced.

The plans for Friday afternoon are not yet completed, but it is believed that, as in former years, a jazz session will be held in South Hall. Friday night open house will be held at the Ceramics building.

The dance Saturday night, along with the usual round of fraternity parties will culminate the week-end's activities. Negotiations for a band are still under way with the results of student voting in mind.

Convair Renews Grant

Convair of San Diego has renewed for another year, fellowships at A. U. for research seeking improved high temperature materials for satellites and missiles.

Dr. T. J. Gray, Director of the Graduate Program in Catalysis and professor of physical chemistry, is supervising the research project with the help of William B. Crandall, assistant professor of research.

The research is being done by Grant Lesoine and Sidney L. Smith, both graduate students living in Alfred, and Dae Hyun Chung, a senior in ceramic engineering from Seoul, Korea.

The Lonely Crowd . . .

Fifty-six students registered last Tuesday for the second semester at AU. Of this number only eight to ten are new. The others are returning after extended absences from the University.

AU now has a total enrollment of 1086 undergraduates and full time students.

Part time graduates registered yesterday.

Sigma Xi Speaker Will Discuss Mathematics Goes to Market

The Sigma Xi Club of Alfred and the department of mathematics is sponsoring a talk by Robert E. Gaskell, head of the Mathematical Research Laboratory of Boeing Aircraft Company, who will speak on "Mathematics Goes to Market" on February 18, at 8 p.m. in Myers Hall.

The lecture will be on a non-technical level and Professor C. E. Rhodes, chairman of the department of mathematics, has said it will stress the expansion of mathematics beyond the narrow academic bounds to important uses in science, engineering, business, economics, and other areas of modern life.

Gaskell was a professor of mathematics at Iowa State College be-

fore joining the Mathematical Services Unit of Boeing in 1951. A native of Grelton, Ohio, he graduated with highest honors from Albion College, at Albion, Michigan in 1933 as a chemistry major. He later earned his Master's and Ph. D. degrees in mathematics at the University of Michigan and began his teaching career at Brooklyn, Michigan high school.

A member of a number of professional and honor societies, Gaskell has been a frequent contributor to professional publications. His papers have dealt with the relationship of mathematics to problems ranging from heat conduction on to the gravitational field.

The public is cordially invited to attend this lecture.

Sorority Rush Is in Progress

Today marks the second day of sorority rushing, which will continue until preferential Sunday, March 1.

The Intersorority Council has divided rushing into informal and formal rushing. The former consists of rushing by the sororities in the dorms on designated days. The latter refers to parties held at the sorority houses during the three-week period.

During the first week, parties will be formal and rushees are to wear anything from wool to cocktail dresses. The second and third weeks are informal and preferential Sunday is formal dress.

The I.S.C. stresses that rushees must go to every house for all parties the first week in order to be considered eligible to rush. The houses have been instructed to note those girls who don't attend their first week parties.

Rushees are also reminded that they are not to borrow anything from sorority girls and that they are to stay out of those rooms of sorority members living in the dorms. Freshmen in the Brick are not to go into Kruson during rushing. Sorority members in the dorms are also not to sit with rushees at meals.

Rushees are asked by the I.S.C. to be on time for parties and to wear their name-tags upon returning to sorority houses the second and third weeks.

International Club

The International Club will feature Dr. David James, research fellow at the Ceramic College, Sunday, February 22.

Dr. James will speak on his experiences as an Englishman in the United States.

All meetings are at 2:30 Sunday afternoons. Refreshments are served each week.

Student Outlook

by Howard Miller

MORE JOBS IN EUROPE

Want work this summer on a German farm in Bavaria, at a resort in Sweden, on the French seacoast, or construction in the Rhineland, or in the fishing industry in Norway?

This year, the program has been expanded to include more students and jobs. The purpose is to afford the student an opportunity to get into real living contact with the people and customs of Europe. In this way, a concrete effort can be made to learn something of the culture of Europe. In return for his work the student will receive his room and board, plus a wage. However students should keep in mind that they are working on the European economy and wages will be scaled accordingly.

For further information on the placement services and travel arrangements, write American-European Student Foundation, P.O. Box 34712, Vaduz, Liechtenstein, Switzerland.

DUPONT FELLOWSHIPS

Six graduate fellowships for future secondary school chemistry physics or mathematics teachers are available at Cornell University for the 1959-1960 academic year. Terms of the program include tuition, fees and \$1200 for living expenses.

Qualifications expected are graduation from a college or university; considerable high quality work in chemistry, physics and/or mathematics; a desire to complete the education requirements, and an intention to seek employment as a teacher in a secondary school.

The graduate students will observe and participate in teaching,

take academic courses, and consider teaching problems with 100 other students who are preparing for science or mathematics teaching.

Further information and application forms may be obtained from Professor Philip G. Johnson, 3 Stone Hall, Cornell University, Ithaca, N.Y.

ORIENT STUDY TOUR

A 44 day study tour of Japan, Formosa, Hong Kong, Macao and Manila has been announced for the summer of 1959 by the University of Hawaii. It is open to teachers, students and mature adults. Participants will depart the mainland June 9th aboard the SS President Cleveland for Honolulu. After visiting these five areas, the group will return to Honolulu to wind up the course by August 1st at the Manoa Campus of the University of Hawaii.

Complete information on the program and its special rate is available by writing to Orient Study Tour, 2275 Mission St., San Francisco 10, California.

SPRING CONFERENCE

The Twelfth Annual Conference on the Christian Ministry will be held on April 10-12 at the Colgate-Rochester Divinity School in Rochester.

This conference is for young men and women whose college training is not necessarily heading them toward a church related vocation. It will give them an opportunity to survey the opportunities which are available in the Christian ministry.

If you are interested in attending, contact Chaplain Bredenberg immediately.

Roman Catholic Chapel Will Be Constructed Here This Spring

A new Roman Catholic chapel will be built in Alfred, according to an announcement by the Most Rev. Joseph A. Burke, Bishop of Buffalo.

The new religious center will serve nearly 600 Catholic students attending the State University Agricultural and Technical Institute and Alfred University.

A donation covering the major cost of the combination chapel, rectory and student center has been made by Fred W. Forness, an Olean, New York automobile dealer and his two sons.

The church, which will be called St. Jude's Chapel, will be built on Elm Street in Alfred, near the new campus site of the Agricultural and Technical Institute.

The major portion of the site was

given to the Buffalo diocese by the Agricultural and Technical Institute Student Association, a student-faculty benevolent corporation.

The exact cost of the religious center was not revealed. The chapel section will have a seating capacity for 420 persons. The center will be of brick construction with stained glass windows. A choir loft at the rear of the church, a main altar, two side altars, a confessional, and a sacristy are planned for the chapel.

The basement of the church is designed for use as a student cultural and social center. Living quarters will be provided for the resident chaplain, who is now the Rev. Donald Beechler.

Work on the chapel is expected to begin in the spring.

Letter to the Editor

Dear Editor:

Well, now I have seen everything! Why is the library to be kept open during meals? I certainly think it would be a little more rational to keep it open during the week-ends.

Our library is now open for three (3) hours on Saturday. In other words, the school seems to think that there should not be studying on that day. They open the library at three p.m. on Sunday indicating their belief that students should cram all their homework on Sunday night.

And now they tell us that if we want to study, which they would consider unlikely, we should give up eating.

A library is the heart of any university. To gain an education, it is necessary—not just helpful—to read. Alfred University claims to be an institution of higher learning. When it FORBIDS students to enter the library on week-ends, is it not failing? Is it not defeating its own purpose? No one forced us to come to college; we came because we wanted to learn. Alfred open your library.

Yours truly,
Norman Simms

Hillel Group

The next Hillel meeting will be held this Saturday at 2:00 p.m. in Room 2, Alumni Hall.

There will be a discussion of Jewish folk music during which records will be played to illustrate the various types of this particular music.

News Pictures of Year Are Displays in Library

A display of the 1958 "News Pictures of the Year" is currently being shown in the Herrick Library. The display is on loan from the Encyclopedia Britannica Company and is being shown in the main lobby of the library and in the display cases in the front entrance way.

The collection of photographs, consisting of about sixty prints, includes some in the categories of general news, sports, personalities, scenes, and accidents.

The Encyclopedia Britannica originally launched the "News Picture of the Year" competition in order to assure that its editors would see all the best press photo-

graphs annually for possible use as illustrations in the Britannica Book of the Year—the annual volume which keeps owners of the Britannica up-to-date.

Later competition was merged with the educational program of the National Press Photographers Association, the professional body of newspaper, magazine and news-reel photographers and cameramen of the United States.

Because of the interest of the NPPA's own members, the competition has become the largest of its kind in the world—and the one most representative of the skillful imaginative and dedicated work of the men and women whose pictures bring the public the news.

Balloting Underway to Select The Horatio Algers in America

Over 2,000 campus leaders on 400 campuses throughout the country will check off their selection of today's Horatio Algers on the American scene.

Ballots for the 11th Annual Horatio Alger Awards conducted by the American Schools and Colleges Association, 30 Rockefeller Plaza, New York City, have been distributed. Business leaders throughout the nation are waiting for this distinctive honor. The Committee has

as its Chairman, Dr. Norman Vincent Peale.

The Horatio Alger Awards Committee of the American Schools and Colleges Association is a non-profit corporation dedicated to the fostering and enhancement of the American tradition of opportunities and rewards for ability and hard work.

Ceramics College Obtains New Kiln

The Ceramic College has received a grant-in-aid of \$1,500 toward the purchase of a new rotary kiln.

The kiln, a gift of the Orton Research Foundation, of Columbus, Ohio, will be used in experimental work by the ceramic engineering students.

Dean McMahon has announced its particular value for the study of the expanding characteristics of New York State clays and shales, the program to be carried on in cooperation with the State Science Service.

Education means developing the mind, not stuffing the memory.

American Artist Includes Cushing

Val M. Cushing, instructor of design in the Ceramics College, will be among the thirty-five artists selected to appear in the February issue of American Artist.

The issue, "New Talent USA," will contain a brief biography and pictures of Cushing's work. It will be the first issue of American Artist to include pottery as one of its feature art forms. The black and white photographs and color slides submitted by Cushing are of sculptured pottery forms which convey the impression of growing plants.

"I don't mind your running out of gas—but Camels!"

Many a girl would rather walk home than do without Camels. For the 10th straight year, this cigarette outsells every other—every filter, every king-size, every regular. The Camel blend of costly tobaccos has never been equalled for rich flavor and easygoing mildness. The best tobacco makes the best smoke.

Don't give in to fads and fancy stuff...

Have a real cigarette—have a CAMEL

A New Graduate Course In Sociology Now Given

A new graduate course in sociology, focused on the professions, is now being offered at AU.

Dr. Luke M. Smith, chairman of the department of sociology, will teach the course on "The Professions and the Social Structure." Classes are scheduled at 7:30 p.m. on Tuesday and will begin tonight in South Hall.

"A great deal of work has been done in the sociology of industry but very little in the sociology of the professions although it is apparent that the professions are of increasing importance in modern life," Smith said in explaining the need for such courses.

A comparative analysis will be made of the social roles played by the doctor, lawyer, clergyman, teacher, social worker, nurse, and engineer. Their roles will be compared with respect to: problems of recruitment; their views of themselves as professional people;

their relationships with clients, other professionals, and the public, and their participation in the family and community.

To help with the analysis, a panel of representative members of the professions will be invited to discuss these phases of professional life with the class, Smith said.

Service to Marks Beginning of Lent

Ash Wednesday, the first day of Lent, will be celebrated by Christ Chapel in the Gothic with two services: 7 a.m.—Holy Communion and Penitential Office; 12 noon—Holy Communion and Penitential Office.

The ancient rite of the administration of ashes will be administered to those who desire to participate in this service.

Service of the Holy Communion will be celebrated every Wednesday afternoon at 5 p.m.

Wiswell Exhibits Skills at Checkers

Tom Wiswell, the Free Style World Checker Champion, conducted a demonstration and tournament Friday night in the Union.

An exhibition star and match player, Wiswell played several simultaneous games with students. His visit on campus was sponsored by the Union Board.

Wiswell is also a noted author on checkers. Among his books are: "Learn Checkers Fast," "Let's Play Checkers," and "Checker Kings in Action"—the story of men on the move.

Former Teacher Is Housemother at Pi

Now in her third year as housemother of Pi Alpha Pi sorority is Mrs. Helena Kage.

Mrs. Kage, a former home economics teacher, has had long experience in working with young women. She was previously a housemother at Rochester Business Institute.

A member of the League of Women Voters, Mrs. Kage attended meetings as a representative of the

Elizabeth Church Circle, of the University Church. She was chairman of the Circle last year as well.

Mrs. Kage is also active in the Amandine Club, a village combined civic and literary organization.

Hobbies enjoyed by Mrs. Kage include bridge, reading and sewing. She is also one of the group of nine women who meet each Wednesday afternoon to practice playing hand bells. Under the direction of Mrs. Sam Scholes Sr., the group plans to perfect their playing to be able to give a public performance in the near future.

Mrs. Kage is proud of the fact that her daughter, Kage Booten, is a successful writer whose first published book, "The Troubled House," is presently in the AU Library. She has just published her second book, "Place of Shadows."

Mrs. Kage firmly believes that it is an important part of education for young women to be on their own and that the Alfred system of women's government fosters this idea as well as good relations between housemothers and the girls. This belief arises from her past and present experiences as a housemother.

Dr. William Anderson, Dr. Joseph Norton and Dr. William Pulos, all members of the AU psychology department, have been certified by the state as professional psychologists who may serve the public.

AU to Share Funds For Defense Loans

Alfred University is one of 1,227 colleges and universities in the nation to share \$6,000,000 allocated last week by the U.S. Office of Education for the establishment of the National Defense Student Loan Program.

A.U. is one of the 92 institutions to share \$600,000 of the federal funds allocated to New York State.

Several applications for the student loans already are being considered by the administration. Preference will be given to students who plan to teach in elementary or secondary schools.

Under the federal program, 50 percent of the loan will be cancelled for graduates who teach full-

time for five years in a public elementary or secondary school. The reduction will be at the rate of 10 percent for each year of such service.

Each of the 49 states, the District of Columbia, Hawaii and Puerto Rico received a share of the \$6,000,000 determined by its proportion of the national full-time college enrollment.

Each institution received a share of the state allocation based on the proportion which its requests represented to the total amount asked by all schools in the state.

by Gail Kopper

With a new semester just getting started, social activity at AU is not exactly booming—to say the least! However, there are some visual signs that life still exists.

One indication that the social animal hasn't forsaken us was the informal party at Lambda Chi Saturday night. A good time was spent by those attending.

Sunday, Gail Green, '60, and Sue Christopher, '60, were initiated into Sigma Chi. Following the initiation ceremony, a tea was given for prospective honoraries.

Jan Neilson, '60, Joyce Harrington, '60, and Norma Eato, '60, descended on Pi Alpha for the weekend. Shirley Erickson is engaged to Dick Engle of Kappa Psi. Irene Tobey, '60, became a pledge of Pi.

Kappa Nu had two pinnings. Lennie Simon, '59, pinned Janie

Mandel of Adelphi. Ben Schneider, '60, pinned Brenda Jacobson, '60.

Although social events are rather limited at the moment, sorority rushing will soon envelop many of the girls on campus.

Engelmann to Go To C.C.H. Confab

Dr. Frederick Engelmann, associate professor of political science and a member of the Upstate New York Affiliate of the Citizenship Clearing House, will attend an executive committee meeting of the organization in Syracuse Friday through Sunday.

The meeting is to be held in conjunction with the drawing up of a masterplan for the 1960 campaign activities of New York state.

Government Seeks Graduates For Scientific Research Work

Civil Service Commission reports a new examination aimed at recruiting and identifying young engineers and physical scientists with outstanding ability for research work.

Unusual features of this new examination include use of a test which has been developed as a means of identifying candidates with imagination and potential for important research work, and provisions for higher-than-usual starting pay and promising assignments. Those appointed will work in top laboratories in the Washington

area with some of the nation's foremost scientists.

Engineering and physical science seniors and graduates who wish early consideration for employment must apply no later than March 3, 1959.

Further details are given in Civil Service Announcement No. 175, which may be obtained from the college placement office.

Jalbert Replaces Departed Terris

Major Donald J. Jalbert, the new military science professor, has taken the place of Major Alexander Terris, who was transferred to Fort Sill, Oklahoma. There Major Terris will attend the artillery school and then report to Saigon, Vietnam, in July.

Major Jalbert was previously in Germany serving with the United States Army before he came to Alfred. He also served in Europe during World War II and in Korea. He is a graduate of the Command and General Staff College and in 1943 he graduated from West Point.

Among Major Jalbert's many medals are the Bronze Star Medal with an Oak Leaf Cluster, the Purple Heart, and the Silver Star.

RCA, has the right engineering career for BS, MS and PhD candidates

Are you sure you know exactly what engineering field you prefer? What specific field you're best fitted for? RCA gives you the right answers to these pressing questions through . . . Design and Development Specialized Training.

You earn a full engineering salary as you progress through engineering assignments which give you the big picture. Regular advancement plans are applied to your progress by interested management and experienced engineers. Training completed, you have every chance to begin growing in your particular field of electronics. Development and design in radar, airborne electronics, computers, missile electronics, television, radio and other equipment fields offer opportunity, as well as electron tubes, semiconductors, components.

Your experience or advanced education may point your way to direct assignment. Dozens of RCA engineering fields lie open

to the man who's thoroughly acquainted with the direction he wants to take and whose qualifications open this path to him.

Either way, there's much to offer you . . . Such as a small-group engineering organization, recognition of accomplishment leading to advancement, liberal benefits, tuition refunds. Get the facts in person very soon when an RCA engineering management representative arrives on campus Feb. 12

Right now, though, see your placement officer. Get squared away on a specific time for your interview. And get your copies of the brochures that also help to fill you in on the RCA picture. If you're tied up send a resume to:

Grapplers Down Allegany, 18-16 On Lederberg Pin in Final Match

The Saxon Grapplers evened their record last Saturday at Allegany by winning a close match from the Gators 18-16. The outcome of the match was decided by the result of the final event of the day, in which Alfred's Herman Lederberg pinned his opponent in the second period.

In the first match of the afternoon, Saxon Jim Gutierrez, wrestling at 123 pounds was outpointed by Tamorree 13-6, in an action packed event. Following this, Alfred's Jim Tenzel evened the score by winning a close match from Coulter, 5-4.

In the 136 pound division, Alfred's Dave Frey lost 4-1 to McChesney of Allegany, but Larry Wander put Alfred into the lead by pinning Johnson in the third period of their 147 pound bout.

In the next match, at 157 pounds,

Lyle Weideman increased the Saxon lead by winning a close match from Gator Blair 5-3.

However, Dick Gross and Dennis Kohler both lost their matches, Gross on points, and Kohler on a pin in the second period, to leave on Saturday.

the decision squarely up to Lederberg and Sewhill in the Unlimited contest.

The matmen will continue to wrestle on the road, as they face Gross on points, and Kohler on a Rochester tomorrow, and Clarkson pin in the second period, to leave on Saturday.

Saxons 4th Straight Win; Down Allegheny, 68-64

by Jay Henis—Fiat Lux Sports Editor

The Saxon hoopsters made a grueling six hour bus trip to Meadville, Pennsylvania last Saturday where they faced the Gators of Allegheny College. Coach Pete Smith's Saxons won the game 68-64 and in doing so, extended their current winning streak to four games.

The game, however, was not nearly as close as the four point margin of victory would indicate. The Warriors led all the way, and

at the halftime intermission, they enjoyed a commanding 43-21 lead.

The second half, though, was another story. Alfred got careless with its big lead and the Gators began closing the gap. Deckert and Johnson, who scored 16 and 14 points respectively, led the way for the Pennsylvanians, hitting consistently over and through the sagging Saxon defense. The Warriors obliged the Gators by taking

The Sports Corner

Some strange things have happened to Coach Pete Smith's hoopsters this year. They started the season with the prospect of a fine year, and they won their first two games, giving the impression that they were a team that would be difficult to stop.

That illusion was quickly dispelled, however, when they proceeded to lose their next seven contest, four of them heart-breakers. Then they abruptly halted the downhill skid at Hamilton a month ago, and have since won their last four games, three of them by large margins, and have completely outclassed their opposition. What has happened to the Warriors this season? What has caused the sudden reversals of form?

At the season's start, Coach Smith had a balanced squad, a team of specialists to work with. Gary Girmindl, last year's top scorer was back, and again figured to be the Saxon's scoring ace. But Gary was strictly an outside shooter and so Coach Smith based one of the team's varied offenses on Girmindl's outside shooting talent. Girmindl, however, could be as hot as a kiln one night and cold as Alfred at 8 A.M. the next. When he was on, all went well, but when he was off, there was no one to replace him and so he played, and shot, and missed, and shot, and missed, etc.

To continue the analogy, Warren Sutton was the team's rebounder. He could be counted on to pull the ball off the boards,

Trackmen To Run at BST Invitational

Next Saturday Coach McLane's track team will kick off their 1959 season, as they participate in the Buffalo State relays at the Connecticut Street Armory in Buffalo. The cindermen, who were the New York State track and field champions last year, will send a squad of about 12 to compete in the pre-season meet.

A special collegiate mile event will be on the program and Alfred's top notch millers, Frank Finnerty and Larry Sweet will be among the entrants competing for first place honors. Finnerty, who ran the mile in 4:12 in a NCAA meet in California last summer, will no doubt be looking to better that time, and Sweet, who was runnerup in the mile to Finnerty in the New York State Meet last spring, and who has bettered 4:20 for the event on numerous occasions should be in contention all the way.

This year's meet will be run in two sections: afternoon and evening, with most of the girls' and high school heats being run off in the afternoon section, which will begin at 3 p.m. The evening section, beginning at 7 p.m., will include the remaining high school events and the collegiate competition.

but not to score. Joe McLarney was the field general. His job was to direct the offense, not to score or rebound himself. Art Bresnick was the team's give and go man. He moved well without the ball and had a fine middle distance jump shot, but couldn't be counted on for outside shooting or rebounding. And so it was, each player had his specialty, but when he was off, or injured, there was no one to replace him. The result was that everytime someone was unable to do his job, whatever the reason, that particular part of the team offense failed.

However, as injuries incapacitated one Saxon after another something had to give, and something did. The team started losing because their bench was filled with specialists who could not easily do anyone else's job. But, during that skein of seven losses, one player did emerge as a jack of all trades. A player who could, and did, fill in where he was needed, doing not only renhis own pob, but everyone else's, too. His name, of course, is Warren Sutton.

Sutton has emerged as the team's leading scorer, play-maker, and defensive player, besides being the nation's leading small college rebounder. If there is need of outside shooting, he does that. If an inside shot is called for, he can do that. If a fast break is in order, he is inevitably there. And if someone misses a shot, his long fingers are usually a few inches higher than anyone else's to direct the tip or snare the rebound. He can shoot set shots, jump shots, hook shots, and some shots that as yet have no name. Indeed, he is not a jack of all trades, he is a master of them. It has been his emergence as a consistant scorer that has enabled the Saxons to get back on the winning track. Furthermore, since he is only a sophomore, we can conclude that he will continue to improve.

However, as much as Sutton has contributed towards the resurgence of the team in recent weeks, his has not been the only contribution. The development of freshman Steve Steinberg has given the Warriors a big lift. Steinberg can shoot from the outside and can drive well. When he improves his defensive play, he will be doubly valuable to Coach Smith.

As for the team, with Wagner and Girmindl gone it is now, without question, a one man club. If Sutton can be stopped, so can the Saxons. But, can Sutton be stopped?

Hoopsters Keep Rolling Along; Ithaca, St. Lawrence This Week

poor shots and making bad passes, but for all that, the situation was never reeally serious, and the outcome of the game was never in doubt. An interesting sidelight was that Allegheny matched Alfred from the floor, each team sinking 23 field goals. The Saxons won the game, hitting from the foul line, for 22 foul shots as against 18 for the Gators.

Paced by the successful shooting of Bresnick, Steinberk, and Sutton, the Saxons steamed to an early lead. With Sutton sweeping the backboards with his usual facility, (he picked off 28 during the evening) as well as scoring, and Steinberg driving hard and hitting on outside onehandlers, they had little difficulty with the Gators. Sutton wound up as the

game's high scorer with a total of 22 points. Steve Steinberg was second to "Suts" with 20 points.

The Frosh Cagers played the same evening at the Buffalo Memorial Auditorium against the Canisius Fledglings, in the preliminary contest to the Canisius-Notre Dame game. They played fine ball in losing to the young Griffins by an 83-70 score. Alfred's Bob McDonald was high scorer for both sides in the game with 22 points.

Tomorrow night the Smithmen will face Ithaca College at Ithaca before returning home Friday night to play St. Lawrence.

Do You Think for Yourself? (ANSWER THESE QUESTIONS) AND YOU'LL FIND OUT!*

1. If you get stuck on a crossword puzzle, do you (A) finally refer to a dictionary, or (B) leave the puzzle unfinished?

A ☐ B ☐

2. Would you rather be (A) the designer of the first successful space vehicle to the moon, or (B) the first man to ride in it?

A ☐ B ☐

3. If you were faced with two tasks, one pleasant and the other unpleasant, would you first do (A) the unpleasant task, or (B) the pleasant task?

A ☐ B ☐

4. If you find you aren't doing well in an activity, do you (A) concentrate on it to improve your performance, or (B) devote your attention to things in which you do excel?

A ☐ B ☐

5. Would you prefer to play tennis with an opponent you know to be (A) not quite so good as you, or (B) a slightly better player?

A ☐ B ☐

6. In deciding whether to see a movie, are you more influenced by (A) what a casual friend tells you about it, or (B) what you know of the cast and story?

A ☐ B ☐

7. If you were a multimillionaire, would you rather have (A) everyone know it, or (B) only a very few know it?

A ☐ B ☐

8. Do you take more notice of someone's (A) good looks, or (B) good manners?

A ☐ B ☐

9. When making your choice of a filter cigarette, do you (A) act on the basis of what someone tells you, or (B) think it through for yourself?

A ☐ B ☐

If you're the kind of person who *thinks for yourself* . . . you use judgment in your choice of cigarettes, as in everything else. Men and women who think for themselves usually smoke VICEROY. Their reason? Best in the world. They know that only VICEROY has a thinking man's filter and a smoking man's taste.

*If you checked (A) on three out of the first four questions, and (B) on four out of the last five . . . you really think for yourself!
