

## **View from Norway: Inside and Out**

3/20/08

What do Americans know about Norway, other than it might just be colder than Alfred? Alfred University's Global Awareness Roundtable, scheduled for 7 p.m. Monday in the Knight Club, Powell Campus Center, will explore Norway home of Vikings and trolls; brown cheese that is sliced with a special cutter; and thousands of fjords, as well as the place where the paper clip was invented. At Monday's presentation, Teresa Longva will talk about growing up in rural Norway, and Dr. Nancy Evangelista, professor of school psychology, and Joe Dosch will share some of their stories about being American visitors in Norway.
