

Next Environmental Speakers Series guest/alumna to focus on 'Remediation of Chlorinated, Volatile Organic Compounds'

11/04/14

Ms. Seth Kellogg, geologist and senior project manager at CDM Smith, Cambridge, MA, will present “Remediation of Chlorinated Volatile Organic Compounds - The Evolving State of the Practice,” as the next lecturer in Alfred University’s (AU) fall semester Environmental Studies Speakers Series.

Her talk will take place Friday, Nov. 14 at 12:20 p.m. in Roon Lecture Hall (Room 247) of the AU Science Center. Everyone is welcome to attend, admission is free, and refreshments will be served.

CDM Smith is a consulting, engineering, construction, and operations firm that provides lasting and integrated solutions in water, environment, transportation, energy, and facilities.

An employee for 13 years, Kellogg’s clients are in federal and state government and private industry.

Kellogg earned a bachelor of arts degree in geology from AU and a master of science degree in geology from Indiana University. She has 18 years of experience in environmental characterization and remediation, primarily in the areas of groundwater remediation and sediment characterization.

The Environmental Studies Seminar Series at Alfred University is held every Friday during the fall semester when the University is in session. Sponsored by the Division of Environmental Studies within Alfred University’s School of Liberal Arts and Sciences, the series brings a range of speakers to the campus, including scientists, activists, and policy-makers, with the mission to better understand our environment and what we can do better to sustain our world.
