

Support specialist hired for Instructional Technology Services

10/20/08

Anton D. Flint of Hornell is new this fall in the Instructional Technologies Services Department at Alfred University where he serves as classroom technology support specialist. His duties include supporting classroom technology throughout the campus, videoconferencing, and instructional equipment lending. Flint has 10 years' experience in system engineering and administration with a concentration in database design, querying, and Web site interaction through server side scripting. Prior to coming to AU, he was a senior team leader/system administrator for Information Boulevard, Inc. in Hornell. Flint is also a private contractor writing Web applications, performing audio recording engineering, and for 20 years working in the musical entertainment field. He graduated from the Sylvan Learning Center with Cisco CCNA training in 2001 and completed the Alvarion/Breezecom Wireless Engineer Certification program in Charlotte, NC in 2003.
