

Marblehead, Sept 28

Dear Prof Binns-

It has been a long time since you had a report from me. I will write a full account of things very soon. Just now I want to ask one question. Which do you think will be the better way to place the ware in the new kiln - with saggars or with props and batts? If saggars when can I get them. I can get props and batts at the Beverly pottery, but don't know whether they will be as satisfactory as saggars. Please let me know what you think about it.

A. E. Baggs
