

Boston, Mass.
Apr. 8, 1908.

My dear Professor:

The 6th inst. I received a letter from Mr. Pond of the Mechanics Institute of Rochester, giving the needs and conditions of the pottery and modeling departments and stating that there was an opening for an instructor.

I immediately answered his letter as the conditions set forth seem to indicate just the position for which I have been looking and one which I should enjoy. In fact I know I should enjoy it much better than a factory one, even at a smaller salary.

There hasn't been much change here since my last letter. Mr. Lagunbeck comes Monday to begin his task.

Members of the firm admit that I haven't been given a fair chance to show what I

could have done for them, in correcting
their difficulties. But Mr. Gruby would
not allow it, and what he says goes
here, and it is rather hard work
to accomplish anything under such
circumstances.

Thanking you for referring Mr.
Pond to me and for any further
assistance you may give me in secur-
ing the place at Rochester,

I remain most truly yours.

F. E. Walrath.
