

## **AU professor sat on panel that awarded x-ray diffraction scholarships**

12/06/06

Alfred University Associate Professor of Materials Science and Engineering Scott Misture sat on a panel that awarded scholarships at the 2006 Materials Research Society. Misture, who received his bachelor's degree and Ph.D. from Alfred University, has been awarded many honors including the Presidential Early Career Development Grant for \$310,155. His main research interests include development of x-ray, neutron, and electron scattering methods and solid-state reaction mechanisms and kinetics. Misture has over 25 publications and has made some 30 presentations in his field. The scholarships, sponsored by Bruker AXS, manufacturer of x-ray systems for elemental analysis, materials research and structural investigations, were awarded to two deserving graduate students.
