February is Heart Health Month!

Did you know?

Heart disease accounts for 1 in 7 deaths in the U.S.

~One person in America dies from heart disease every 84 seconds.

~Heart disease is the #1 cause of death in the U.S., killing 370,000 Americans per year.

~Cardiovascular disease/stroke cost #316.6+ billion in health care costs and lost productivity.

Our hearts are more than the centers for LOVE! The heart is one of the most specialized organs we have. It is made of cardiac muscle, unlike any other muscle in the body. It has chambers, valves, arteries, even its own electrical system. The rest of the body depends on it being in good shape so we should take care of it the best we can!

This week in Alfred Today see tips for taking care of your heart so you can continue to use it for LOVIN'!
