

Labie '65 named president, CEO of

2/01/06

CXO Systems, a leader in real-time risk and operational intelligence software, has named software industry veteran Gerald Labie '65 company president and chief executive officer. The addition of Labie solidifies CXO Systems' strong executive team and positions the company to capitalize on the rapidly growing risk and operational intelligence markets. Labie has more than 20 years of management experience in the information technology (IT) industry. Most recently, he served on the board of directors and held the titles of president and COO at Novadigm, a publicly traded systems management software company acquired by Hewlett Packard in 2004. There, he initiated several changes that resulted in better execution, greater market penetration and record revenues. Previously, Labie was a senior vice president at Tech Data Corp. where he served first as president of European operations, overseeing the company's \$1.7 billion European business, and then as senior vice president of marketing. CXO Systems is the leading provider of risk and operational intelligence software for senior managers. CXO Systems addresses the needs of the Chief Risk Officer (CRO), Chief Information Officer (CIO), Chief Operating Officer (COO) and Chief Security Officer (CSO), by streamlining and integrating Key Risk and Performance Indicators to mitigate risk and accelerate performance.
